But there is little time for this country to luxuriate in its success even though the hard times on which the Communist regimes have fallen have diminished the expansionist threat that has for so long overshadowed international relations. That conclusion was confirmed by United States and allied officials in their discussions with a delegation I led to Europe in early January.

I rise on this occasion to call the attention of this body and the Nation as a whole to the sudden necessity for a rethinking of our national security strategy precipitated by the altered position of the Soviet Union and the liberating events in Eastern Europe. The international political landscape has changed but the dangers inherent in traversing that landscape have by no means disappeared.

STRATEGIC PROBLEMS

Let me hasten to add that the altered Eastern Bloc, although the proximate cause for rethinking our national strategy, by no means is the only reason for doing so. A new national security strategy must comprehend a number of developments that are changing the world in which this nation exists and pursues its interests. A review of some of the most significant of these developments in itself makes the case for the development of a new national security strategy.

A new strategy must cope with a Soviet Union that may remain a great power with great power interests or, on the other hand, could self-destruct. It must take into account a range of possibilities from replacement of President Gorbachev and reassertion of conservative Communist control to the other end of the spectrum, nationalist insurrections, civil war, and even the dissolution of the Soviet state. Considering the vast nuclear arsenal possessed by the Soviet Union, a civil war is almost as frightening to comptemplate as a return to totalitarian rule. I wholeheartedly agree with the recent warning sounded by Adm. William Crowe, former JCS Chairman, when he said that:

> Four times in the last century we have entered major wars unprepared because we failed to fund defense properly in peacetime.

The specter of instability also looms over Eastern Europe Yugoslavia and the former Soviet satellites are economically as well as politically bankrupt. Italian officials recently told the delegation I led to Europe that they fear a resurgence of old rivalries and regional conflicts engendered by the loosening of communism's grip.

The economic and political integration of Europe, and the concomitant arrangements for European security, must be factored into a new U.S. strategy. How will the United States respond to the rationalization of European economic arrangements set for 1992? What role should the United States play in the emerging pan-European political arrangements? Some would counsel that the United States should heed George Washington's advice and resist further foreign entanglements. Yet, the Italians told my delegation that European political integration is impossible without a continued U.S. presence in Europe, and strong U.S. leadership. And George Kennan, the chief architect of the now successful containment strategy, recently asserted that the United States "must be actually involved in designing a new European security framework." What, then, is the appropriate level of U.S. forces in Europe? A high ranking American Commander in Europe told my delegation that he believes United States forces can be reduced to 50 percent of their current levels if the ongoing Conventional Forces in Europe [CFE] negotiations are, in the end, successful. He warned against a piecemeal approach to such significant reductions and urged that a coherent strategy be developed and implemented.

The approach of the United States toward German reunification must be a part of a new U.S. strategy. West Germany, whether divided as at present or reunified in some fashion with East Germany, must remain democratic and aligned with the West at all costs. How can this be accomplished while assuaging historic concerns of the Soviet Union? Further, how will our policy affect the concerns our Western allies have toward a unified Germany? For many on the European continent, memories of 1914 and 1939 are still vivid and frightening.

A new strategy must deal with the Pacific as well as the Atlantic. In the economic sense, Japan is a superpower. Our strategic focus on the threat posed by the Soviet Union as it developed into a co-equal military superpower blinded us to the potential threat to our economic security posed first by the Japanese and increasingly by other Asia economic powers—and potentially by the European Economic Community. Containment of Soviet expansionism, with its strong military component, proved to be a successful strategy vis-a-vis a militarily aggressive superpower. We have developed no comparable strategy to compete with economically aggressive powers such as Japan and increasingly, Korea, Taiwan and Singapore. And we must.

A new strategy must anticipate the consequences of rapidly increasing military power in countries throughout the world. Nuclear and chemical proliferation, in conjunction with the spread of ballistic missile and other technologies, afford the potential for countries like Libya, Syria, Iraq, Iran, India, Brazil, and China, whose military power was formerly limited in global terms, to figure on the world scene.

At the other end of the spectrum, a new strategy must cope with the conditions that foster or facilitate the many forms of low intensity conflict, including terrorism. This Nation's concentration on large-scale wars has left it sadly deficient in capabilities to conduct special operations.

The United States must develop a strategy that recognizes the Nation's dependence on other parts of the world for vital resources. It has been obvious for many years that the time would come when the United States could no longer depend on domestic sources for the raw materials to serve its industrial capacity. The time has come and gone. We need a strategy that recognizes that access to oil and other resources is a vital interest of the United States.

If the challenges to the Nation's security are as much economic and technological as they are military, we need a strategy that equips the Nation with the capacities to meet the varied threats. That means devoting the necessary resources and attention to improving the educational system in our country. It means refurbishing the transportation and communication infrastructure so necessary for increased industrial productivity. It means nurturing and revitalizing a massive, aging, industrial base. Finally, it means cultivating new technologies that hold the key to future prosperity.

A new national security strategy must address threats to all mankind that transcend national borders. Narcotics trafficking and environmental damage, though very different menaces, threaten our security and that of all nations.

DEVELOPING A NEW NATIONAL SECURITY STRATEGY

The preceding list of factors that must be taken into account in developing a new national security strategy suggests the vast scope of the undertaking. What is called for is no less an effort than that expended in the fundamental reassessment of the Nation's direction that took place in the period between 1946 and 1949. In 1946 Winston Churchill sounded the challenge in his famous "Iron Curtain" speech at Fulton, MO. The challenge was met by the United States, under the leadership of President Truman, by the Truman doctrine, the Marshall plan and the NATO alliance.

Thus, we ask the questions: How much time do we have? Whose responsibility is it to develop the strategy? What role should the Congress play?

How much time do we have? In my view, we have between 12 and 24

months to develop a new national security strategy. That will afford time for recent developments in the Eastern bloc to play out, for us to ascertain for certain whether cold war battles have been won, or whether the war itself is over. As I indicated at the outset, I believe the cold war is over. But it could be replaced by an equally unstable, threatening situation in the Eastern bloc or elsewhere.

Developing a new strategy within the next 2 years will also allow time for the West to conclude a first conventional arms control agreement that will be in our favor, whatever our emergent strategy. General Galvin, the NATO allied commander in Europe, emphasized to our delegation earlier this month that the agreements coming to fruition in Vienna this year will require destruction of over 90,000 Eastern bloc weapons while Western countries will only be required to destroy approximately one-tenth that number. Ambassador Woolsey, the U.S. Representative to the Conventional Forces in Europe [CFE] negotiations, emphasized the importance of "locking in" an agreement so that: First, the military equipment to be taken out of service will be destroyed; and second, unprecedented verification protocols will be accepted by both sides, thus increasing the likelihood of compliance by all parties.

Both Galvin and Woolsey emphasized that the United States should not "get ahead" of the negotiations and announce unilateral reductions of United States forces in Europe. That could have a domino effect on other Western countries. Ambassador Woolsey suggested that with cooperation on all sides a first conventional arms reduction agreement could be reached by the end of the year. Consequently, the United States has at least that long to develop a new national military strategy.

But momentum is building toward a second conventional arms control agreement to follow quickly on the heels of the first. The second agreement could cut United States forces in Europe in half.

And yet a third, final, CFE negotiation with even deeper cuts is being discussed. Before the second and third agreements are negotiated, the United States should have decided upon the European component of its new strategy. Thus, in my view, we have no more than 24 months maximum to develop the new national security strategy.

In the meantime, this year, I believe we should heed the advice of Senator NUNN, Chairman of the Senate Armed Services Committee, that any cuts in the defense budget should be in rough proportion to the reduction in the threat against the United States and its NATO allies by the Warsaw Pact. However, we must remember that this is a stop-gap measure, not an acceptable permanent solution.

Whose responsibility is it to develop a new strategy? The Packard Commission in 1986 called for the development of an integrated national security strategy. The Commission's recommendations were endorsed by President Reagan who subsequently issued a National Security Memorandum directing that they be implemented.

The Goldwater-Nichols Department of Defense Reorganization Act of 1986—of which I was one of the principal framers—included a provision drafted by Senator WARNER and sponsored in this body by Representative MCEWEN that requires the President to develop and submit a national security strategy to the Congress. Following is the relevant excerpt from the Goldwater-Nichols Act:

Section 104. (a)(1) The President shall transmit to Congress each year a comprehensive report on the national security strategy of the United States (hereinafter in this section referred to as a "national security strategy report").

(2) The national security strategy report for any year shall be transmitted on the date on which the President submits to Congress the budget for the next fiscal year under section 1105 of title 31, United States Code.

(b) Each national security strategy report shall set forth the national security strategy of the United States and shall include a comprehensive description and discussion of the following:

(1) The worldwide interests, goals, and objectives of the United States that are vital to the national security of the United States.

(2) The foreign policy, worldwide commitments, and national defense capabilities of the United States necessary to deter aggression and to implement the national security strategy of the United States.

(3) The proposed short-term and long-term uses of the political, economic, military, and other elements of the national power of the United States to protect or promote the interests and achieve the goals and objectives referred to in paragraph (1).

(4) The adequacy of the capabilities of the United States to carry out the national security strategy of the United States, including an evaluation of the national power of the United States to support the implementation of the national security strategy.

(5) Such other information as may be necessary to help inform Congress on Matters relating to the national security strategy of the United States.

* * * * *

(e)(1) The Secretary shall include in his annual report to Congress under subsection (c)—

(A) a description of the major military missions and of the military force structure of the United States for the next fiscal year;

(B) an explanation of the relationship of those military missions to that force structure; and

(C) the justification for those military missions and that force structure.

(2) In preparing the matter referred to in paragraph (1), the Secretary shall take into consideration the content of the annual national security strategy report of the President under section 104 of the National Security Act of 1947 for the fiscal year concerned.

What role does Congress play? The Goldwater-Nichols Act merely codified what is implied in our form of government. The President is responsible in the first instance for proposing national security strategy. The Congress, however, shares the responsibility for ensuring that the Nation has a coherent national security blueprint. And the Congress must be a partner in the development of strategy; it must participate in the final formulation. Otherwise, the resources for implementing the strategy may not be made available by the legislative branch.

Consequently, my call today is for the President to set in motion the necessary mechanism in the executive branch to develop and propose a new national security strategy. I hope that my call will be echoed by the leadership of both houses of the Congress. Congress must insist that our Government recognize the dawn of a new era in world politics and the concomitant requirement for a new national security strategy. The Iron Curtain, of which Churchill spoke in 1946, is falling. It has turned into a shroud that cloaks the Communist system. But the sunrise of a new era may show a revival of ancient rivalries and unprecedented international turmoil. The new era may be as unpredictable as the patterns in a kaleidoscope. Uncertainties are the order of the day.

DEVELOPING THE MILITARY COMPONENT OF A NEW NATIONAL SECURITY STRATEGY

With respect to national military strategy, I believe that the Congress can and should do more than merely issue a call that the President may or may not heed. Fortunately, the Goldwater-Nichols Act established a new mechanism within the Department of Defense that Congress can insist be employed.

The Department of Defense has not developed a long-range plan that relates military strategy to the diminishing resources to be allocated to defense in the coming years. Instead of basing projected cuts on an integrated, coherent strategy that is based on the dollars that will likely be available for defense in the coming years, the Department, according to press reports, has apparently gone through a series of budget drills in which the DOD Comptroller asks the services what they could cut if their budgets were reduced 3 percent or 5 percent or X percent in each of a number of future years. The result, if this is the process being followed, will inevitably be four separate, independent, uncoordinated answers, based on very different service military strategies, designed to protect the weapons and missions of most interest to each service but not necessarily of greatest military value to the United States.

There has been a chorus of criticism of the DOD process. House Armed Services Committee Chairman LES ASPIN stated in a speech late last year that absence of a coherent strategic plan would make any DOD proposed budget very vulnerable on the Hill. Senator NUNN criticized the budget cut drills for not being based on an assessment of the threat that could serve as the starting point for revised defense plans.

I think both chairmen and the many other critics of a piecemeal approach are right on the mark. With all due respect, the Comptroller of the Office of the Secretary of Defense is commonly, and accurately, referred to as a "bean counter." He performs a necessary valuable function. But he is hardly the official to link force structure to strategic objectives and plans for their attainment.

The Goldwater-Nichols Act places responsibility on the JCS Chairman. Fortunately, the Goldwater-Nichols Act established a new mechanism for developing military strategy and relating that strategy to the resources to be allocated to defense. In that act Congress reshaped the position of the Chairman of the Joint Chiefs of Staff, making him the principal military advisor to the President and Secretary of Defense. The new law placed responsibility on the JCS Chairman to perform the long-range fiscally realistic planning that is apparently missing in DOD. The Chairman is made responsible in the act for the following strategy-related activities.

Preparing strategic plans in accordance with "resource levels projected by the Secretary of Defense to be available" during the period covered by the plan.

Advising the Secretary on the extent to which the program recommendations and budget proposals of the military departments, defense agencies, and other DOD organizations conform with the priorities in strategic plans and with the priorities the Chairman recommends for the requirements identified by the combatant commands.

Submitting to the Secretary of Defense alternative program recommendations and budget proposals that conform to the Secretary's fiscal guidance and with the priorities established by the Chairman; first, in strategic plans; and second, for the combatant command requirements.

Advising the Secretary on the extent to which the manpower programs and policies of the Armed Forces conform with the Chairman's strategic plans.

Assessing military requirements for defense acquisition programs.

Conducting net assessments to determine the capabilities of the Armed Forces of the United States and its allies as compared with those of their potential adversaries.

Overseeing the activities of the combatant commands.

Serving as the spokesperson for the commanders of the combatant commands.

Unfortunately, in my view, the JCS Chairman and his Joint Staff have not achieved what the framers of the Goldwater-Nichols Act intended. True, the Chairman has apparently become a close personal advisor of the Secretary of Defense. No doubt he has provided his views on the major issues in the defense budget. Reportedly, he has even submitted strategic concept papers developed in the joint arena. But this is far different from engaging the Chairman and Joint Staff as an institution in developing and recommending to civilian authorities a coherent, long-range strategic plan, or alternative plans, tied to resource levels established by the Secretary of Defense. The Goldwater-Nichols Act envisioned a massive, institutional, joint military undertaking. It would inevitably result in recommended tradeoffs among the services, a prospect that, however unpalatable to the military officers serving in joint positions, must be accomplished.

Let me make clear, however, that the failure to implement fully the Goldwater-Nichols strategic responsibilities of the Chairman is not entirely, or even preponderantly, the fault of the joint military institutions. As Representative ASPIN and others have pointed out, the Pentagon has so far failed to seek an integrated, coherent strategic blueprint for the reduction and realignment of U.S. military forces. Instead of attempting to develop such a plan, each service was asked what it would cut if the defense budget were reduced a certain percentage for the next 5 years. The fact is that civilian leaders in the Defense Department have overlooked the key strategic role assigned to the JCS Chairman.

That strategic role is closely linked in the Goldwater-Nichols Act to the acquisition of weapons. But the otherwise excellent defense management review, though it addresses acquisition reform at length, fails to recognize the responsibility of the Chairman to tie acquisition of military weapons and equipment to long-range strategic priorities. One of the most frequent criticisms of the weapons and equipment procured by the Department of Defense is that their military purpose, mission, or task is not clearly defined. The most recent example is the B-2 bomber, a program that I support wholeheartedly. The controversy over its mission, and how that mission fits into both U.S. nuclear and U.S. conventional strategy, has made the B-2's path through the congressional process unnecessarily difficult. Another example is the two aircraft carriers presently under construction. What will be their mission within the strategy dictated by a smaller U.S. force structure? The point is that the first "acquisition" question that must be asked is: What military task will the proposed weapon system or equipment perform in accordance with U.S. strategic plans? Thus, a strategic blueprint should be the starting point for decisions about affordable acquisitions.

We are all familiar with the Pentagon's Planning, Programming and Budgeting System, the PPBS. For years, close observers of the Pentagon have pointed out that the first "P"—Planning—is a silent "P". That is, the planning that should guide programming and budgeting is weak or nonexistent. The Goldwater-Nichols Act sought to strengthen the silent "P" by making the JCS Chairman responsible for linking strategic planning to programming and acquisition.

Needed legislation: I believe that Congress should call upon the JCS Chairman to employ the full potential of his legislative responsibilities to develop a coherent, realistic strategic plan, or set of alternative plans, for consideration by the Secretary of Defense and his principal officials, the President, and the Congress. To develop legislation requiring the Chairman to exercise his strategic responsibilities will be a complicated undertaking. I intend to consult with my colleagues on the Armed Services Committee in drafting and introducing the legislation. Following is an outline of what I have in mind:

The JCS Chairman would be given a planning top line and a set of planning assumptions. For example, the top line might be a defense budget of $275 billion in fiscal year 1996—in 89 dollars—and $250 billion in fiscal year 2000. The assumptions for this top line might include a greatly reduced Soviet threat as a result of stringent strategic and conventional arms control agreements and at least 6 months warning time of a Soviet buildup that might lead to hostilities.

The JCS Chairman might be asked to propose alternative strategic plans based on other top lines related to more pessimistic and more optimistic assumptions. The Packard Commission recommended that he be responsible for several alternative strategic plans each year based on a range of top lines.

Each of the plans would necessarily include the missions of each of the services, their manpower, force structure, and major acquisitions during the planning period.

To develop the strategic plans the JCS Chairman would obtain inputs from the unified and specified commanders—by law he is their spokesman and he oversees them—and from

the services. It is the service connection that may have dissuaded the JCS Chairman from exercising his planning responsibilities to the fullest in the past. Neither he nor the Joint Staff leaders welcome making tradeoffs among the services that might result in a recommendation to cut the Army, say, far more than the Navy or to reshape the Air Force close air support mission in favor of the Army.

The recommendations contained in the JCS Chairman's plan—or plans—should serve as the basis for deliberation by civilian administration officials and the Congress. As modified, they would become the basis for a fiscally realistic 5-year defense plan.

THE NEED FOR JOINT MILITARY STRATEGISTS

In concluding my remarks, I want to put into perspective my call for the joint military institutions—the JCS Chairman and his Joint Staff—to develop and propose to civilian authorities and the Congress the military component of the new national security strategy.

A little over 2 years ago I made a series of speeches in this body intended to call attention to the necessity for the Department of Defense to turn its attention to the development of military strategists. Those speeches were prompted by my belief that the Nation was no longer producing outstanding strategists of the caliber of George Marshall, Douglas MacArthur, Omar Bradley, Ernest King, Chester Nimitz, Hap Arnold, and Maxwell Taylor. Our military leadership, I insisted, must be capable of grasping the significance to our national security of the increasingly rapid succession of changes that characterize the national and international scene. Furthermore, in order to respond to a world in turmoil, military strategists must possess the experience, intellectual skills, and unique talents required to shape, and continually reshape, long-range military plans and the force structure required to implement those plans.

By placing the initial responsibility for developing and proposing military strategy where it belonged, squarely on the shoulders of the JCS Chairman supported by his Joint Staff, the Goldwater-Nichols Act made it imperative that any deficiencies in the number and qualifications of military strategists be corrected quickly. And the act contained provisions requiring revitalization of the professional military school system that, if implemented properly, should solve the problem. As chairman of the newly formed panel on military education, I undertook to ensure that those Goldwater-Nichols Act provisions were properly implemented. That task continues today.

Little did I realize 2 years ago that it would be necessary for the Department of Defense to initiate a fundamental reassessment of U.S. military strategy before the decade ended. There has been insufficient time for changes in the professional military education system to bear fruit in increasing the pool of highly qualified military strategists. I can only hope that military school officials and others who appeared before our panel were right when they asserted that many competent military strategists have been educated and are available to fill key positions. We shall see soon enough if the Joint Staff is capable of developing fiscally constrained long-range strategic plans that fashion the various services' missions and force structures in terms of overall national objectives rather than on the basis of allocating to each service its share of the defense pie.

In my view, the Nation not only desperately needs a new national military strategy, it desperately needs for the joint institutions to work in initiating that strategy. Former Secretary of Defense Laird recently joined the chorus of voices calling for a new military strategy. He went on to warn, however, that neither the military services nor the Congress are capable of developing such a strategy. He is right. The joint military institutions must propose a new military strategy, or alternative strategies, to civilian officials. And first the executive branch, and then the Congress must participate in finally shaping a new national military strategy.

I close with a description of the worst thing and the best thing that could happen in attempting to fulfill the Nation's need for a new military strategy.

The worst thing that could happen would be to follow the advice advanced by one Army general recently. Indicating that the Army is ready and willing to take its allocated cuts, the general asked only that the Army be left alone to implement the reductions as that service sees fit. If his advice were heeded—and that is the implication of the Department of Defense's individual budget drills with each service—the coming "build down" would yield four smaller versions of today's services, designed by their individual leaderships to maximize service interests rather than to work together in accomplishing national military missions.

The best thing that could happen, on the other hand, would be for a JCS Chairman to shoulder the mantle of George Marshall and lead in the development of an integrated national military strategy that serves as a blueprint for integrating the four services, in the words of the National Security Act of 1947, into "an efficient team of land, naval, and air forces."

Let us, as Members of Congress, urge the development of that integrated national military strategy. If it is forthcoming, let us determine to participate to the fullest to make it come to pass as a reality. When this is accomplished, we can say that we have served our Nation and world peace well in our time.

□ 1900

Mrs. BYRON. Mr. Speaker, will the gentleman yield?

Mr. SKELTON. Mr. Speaker, I yield to the gentlewoman from Maryland [Mrs. BYRON].

Mrs. BYRON. Mr. Speaker, let me say to the gentleman, many times when a special order is taken, there are very few people on the floor of the House, but many of the Members listen to their offices, as I have been doing, to your remarks, as I was signing mail.

I could not let the gentleman finish without joining the gentleman in his request for a policy. As Members know, we work very closely. I chair the Subcommittee on Military Personnel and Compensation. One of the things that we have before Members this year, as the gentleman well knows, are the decisions to be made on where those cuts are going to be. Without a policy, how can those decisions be made in a proper manner?

Therefore, I think that what all Members are trying to ask and request is that that policy be defined, so that when we make those decisions, this Member in his capacity, looking forward to the long-term training, and the schooling that our military personnel will get, and I in my responsibility with the personnel, where we are going and what is enough, what is too much. However, more important in the environment we are in, what is too little.

Therefore, let me join with the gentleman on his remarks in the thrust of his special order this evening, and the fact that we do need a policy before we make those decisions.

Mr. SKELTON. Mr. Speaker, I certainly thank the gentlewoman from Maryland for her remarks. I am fortunate enough to be a member of her Subcommittee on Military Personnel and Compensation. I know of the gentlewoman's deep concern for the men and women of our armed services, for the national security of our Nation. We need that blueprint.

As I see it right now today, we are about where we were in the last months of 1945, possibly the early months of 1946 when we brought the boys home from Europe. We had won the war. We had won the war in Japan as well. At that time, we reduced our troop strength to some 70,000 in Europe. It was at that time that the Yalta agreement accords between Stalin and Roosevelt and Churchill were breached by Stalin and in essence, Eastern Europe was grabbed by the Soviet Union. We sat there unable to do anything.

I think that we need a policy blueprint, coming from the Chairman of the Joint Chiefs, through his Secretary of Defense, through the President, to the Congress, so we can respond just as the U.S. Congress responded to Harry Truman and his Secretary of Defense in 1947 with the Truman doctrine, in 1947 again with the Marshall plan, and the following year, 1948 with the NATO Alliance. That was born as the result of a policy.

As the gentlewoman knows, it worked. It worked through those years. That is what we need, the restructuring. We need that blueprint, that guideline, and as of this moment I am fearful we do not have it.

Mrs. BYRON. Mr. Speaker, if the gentleman will yield. I want to join with the gentleman on this special order.

Mr. SKELTON. Mr. Speaker, I yield back the balance of my time.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mrs. BENTLEY) to revise and extend their remarks and include extraneous material:)

Mr. WOLF, for 60 minutes, on January 25.

Mr. BALLENGER, for 5 minutes, today.

Mrs. BENTLEY, for 60 minutes, each day on January 25, 30, 31, and February 6 and 7.

Mr. WALKER, for 5 minutes, today.

Mr. GINGRICH, for 60 minutes, each day on January 29, 30, 31, and February 1.

(The following Members (at the request of Mr. OWENS of New York) to revise and extend their remarks and include extraneous material:)

Mr. BUSTAMANTE, for 5 minutes, today.

Mr. KLECZKA, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. STARK, for 5 minutes, today.

Mr. FAUNTROY, for 60 minutes, on January 30.

Mr. OWENS of New York, for 60 minutes, each day on January 29 and 30.

(The following Members (at the request of Mr. BUSTAMANTE) to revise and extend his remarks and include extraneous material:)

Mr. DE LA GARZA, for 60 minutes, January 30, 1990.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mrs. BENTLEY) and to include extraneous matter:)

Mr. BROOMFIELD.

Mrs. MORELLA.

Mr. BILIRAKIS.

Mr. BALLENGER.

Mr. LEWIS of California in two instances.

Mr. EMERSON in two instances.

Mr. RHODES.

Mr. CONTE.

Mr. GREEN.

Ms. ROS-LEHTINEN.

Mr. GINGRICH in two instances.

Mr. GRADISON.

Mr. TAUKE.

Mr. GUNDERSON.

(The following Members (at the request of Mr. OWENS of New York) and to include extraneous matter:)

Mr. BONIOR in three instances.

Mr. SKELTON.

Mr. HAMILTON.

Mr. KANJORSKI in two instances.

Mrs. SCHROEDER.

Mr. MONTGOMERY.

Mr. STARK.

Mr. MAZZOLI.

Mr. WAXMAN.

Mr. MRAZEK.

Mr. NATCHER.

Mr. RICHARDSON.

Mr. TALLON.

Mr. KASTENMEIER.

Mr. BATES.

Mr. YATRON.

Mr. SMITH of Florida.

Ms. OAKAR in two instances.

Mr. UDALL.

Mr. CLAY.

Mr. FAZIO in two instances.

Mr. DYMALLY.

Mr. STUDDS.

Mr. LANTOS.

Mr. RAY.

Mr. FORD of Tennessee.

Mr. CONYERS.

SENATE BILLS REFERRED

[Inadvertently omitted from the Congressional Record of Tuesday, January 23, 1990]

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1949. An act to amend the Labor Management Relations Act of 1947 to permit parties engaged in collective bargaining to bargain over the establishment and administration of trust funds to provide financial assistance for employee housing; to the Committee on Education and Labor.

S. 1998. An act entitled the "Medicaid Long-Term Care Demonstration Project Waiver Act of 1989; to the Committee on Energy and Commerce.

S. 1999. An act to amend the Higher Education Act of 1965 to clarify the administrative procedures of the National Commission on Responsibilities for Financing Postsecondary Education; to the Committee on Education and Labor.

ADJOURNMENT

Mr. SKELTON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 10 minutes p.m.) the House adjourned until tomorrow, Thursday, January 25, 1990, at 11 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

[Submitted Jan. 23, 1990]

2316. A letter from the Director, the Office of Management and Budget, transmitting the revised final OMB sequester report to the President and Congress for fiscal year 1990, pursuant to 2 U.S.C. 901 (H. Doc. No. 101-128); to the Committee of the Whole House on the State of the Union and ordered to be printed.

[Submitted Jan. 24, 1990]

2317. A letter from the Comptroller, Department of Defense, transmitting a copy of the contract award report for the period January 1, 1990, to February 28, 1990, pursuant to U.S.C. 2431(b); to the Committee on Armed Services.

2318. A letter from the Director, Defense Security Assistance Agency, transmitting notification concerning the Department of the Navy's proposed letter(s) of offer and acceptance [LOA] to Egypt for defense articles estimated to cost $50 million or more (Transmittal No. 90-17), pursuant to 10 U.S.C. 118; to the Committee on Armed Services.

2319. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-137, "Protection of Children from Exposure to Drug-related Activity Amendment Act of 1989," and report, pursuant to D.C. Code Section 1-233(c)(1); to the Committee on the District of Columbia.

2320. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-114, "Public School of Law Amendment Act of 1989," and report, pursuant to D.C. Code Section 1-233(c)(1); to the Committee on the District of Columbia.

H.R. 56: Mr. BARTON of Texas, Mr. CARPER, Mr. DORGAN of North Dakota, Mr. LEWIS of Georgia, Mrs. LLOYD, and Mr. WISE.

H.R. 92: Mrs. UNSOELD, Mr. BONIOR, and Mrs. LOWEY of New York.

H.R. 93: Mr. GLICKMAN and Mr. LAGOMARSINO.

H.R. 101: Mr. SCHUMER, Mrs. SCHROEDER, Mr. SAWYER, and Mr. DURBIN.

H.R. 145: Mr. NOWAK and Mr. GRAY.

H.R. 158: Mr. OBEY.

H.R. 164: Mr. SOLOMON.

H.R. 173: Mr. MADIGAN.

H.R. 201: Mrs. UNSOELD.

H.R. 216: Mr. BORSKI.

H.R. 303: Mr. ENGEL, Ms. SCHNEIDER, and Mr. SISISKY.

H.R. 377: Mr. NEAL of North Carolina.

H.R. 393: Mr. JAMES.

H.R. 446: Mr. SUNDQUIST, Mr. TAUKE, Mr. INHOFE, and Mr. HAYES of Louisiana.

H.R. 467: Mr. FOGLIETTA.

H.R. 509: Mr. MILLER of Ohio and Mr. TORRICELLI.

H.R. 567: Mr. WISE and Mr. RINALDO.

H.R. 638: Mr. BATES.

H.R. 761: Mr. OWENS of Utah.

H.R. 855: Mr. FAUNTROY, Mr. DE LUGO, Mr. COSTELLO, Mr. FOGLIETTA, and Mr. RANGEL.

H.R. 933: Mr. PALLONE and Mr. ANNUNZIO.

H.R. 993: Mr. SABO.

H.R. 1008: Mr. ROE, Mr. BOUCHER, Mr. SCHEUER, Mr. MCNULTY, Mr. HARRIS, Mr. BENNETT, and Mrs. KENNELLY.

H.R. 1024: Mr. DREIER of California.

H.R. 1046: Mr. DORNAN of California.

H.R. 1068: Mr. CALLAHAN, Mr. BOEHLERT, Mr. MURTHA, Mr. BONIOR, and Mr. SHAYS.

H.R. 1074: Mr. FLAKE.

H.R. 1092: Mr. STUDDS.

H.R. 1095: Mr. AUCOIN and Mr. DONALD E. LUKENS.

H.R. 1109: Mr. MATSUI.

H.R. 1136: Mr. BURTON of Indiana, Mr. ROE, Mr. JAMES, and Mrs. BOXER.

H.R. 1150: Mr. NELSON of Florida.

H.R. 1317: Mr. MONTGOMERY and Mr. PALLONE.

H.R. 1360: Mr. ESPY, Mr. NIELSON of Utah, Mr. ROE, Mrs. COLLINS, Mr. PETRI, and Mr. LAGOMARSINO.

H.R. 1390: Mr. RHODES and Mr. ARMEY.

H.R. 1436: Mr. BILIRAKIS, Mr. BRUCE, Mr. FEIGHAN, and Mr. SMITH of New Jersey.

H.R. 1457: Mr. KOLTER, Mr. GUNDERSON, and Mr. HILER.

H.R. 1494: Mr. GLICKMAN.

H.R. 1565: Mr. SHUMWAY.

H.R. 1675: Mr. ROBERT F. SMITH, Mr. OWENS of Utah, and Mr. GALLEGLY.

H.R. 1691: Mr. TAUZIN, Mr. SCHNEIDER, Ms. ANDERSON, and Mr. KENNEDY.

H.R. 1693: Mr. MACHTLEY, Mr. JOHNSTON of Florida, and Mr. DWYER of New Jersey.

H.R. 2121: Mr. THOMAS A. LUKEN.

H.R. 2139: Mr. PERKINS, Mr. BLAZ, Mrs. PATTERSON, Mr. AUCOIN, Mr. WAXMAN, Mr. KANJORSKI, Mr. PEASE, and Mr. GEJDENSON.

H.R. 2192: Mr. TAUZIN and Mr. CRAIG.

H.R. 2222: Mr. GUNDERSON, Mr. MORRISON of Connecticut, and Ms. SNOWE.

H.R. 2269: Mr. WATKINS.

H.R. 2290: Mr. YOUNG of Florida, Mr. BRUCE, Mr. JOHNSTON of Florida, and Mr. SHAW.

H.R. 2335: Mr. FOGLIETTA.

H.R. 2336: Mr. KOSTMAYER.

H.R. 2460: Mr. MCCOLLUM, Mr. TOWNS, Mr. IRELAND, Mr. HUTTO, and Mr. CONDIT.

H.R. 2584: Mr. PARKER, Mr. MATSUI, Ms. SNOWE, Mr. KANJORSKI, Mr. SABO, Mr. BROWDER, Mr. VALENTINE, Mr. JONTZ, Mr. MURPHY, Mr. FROST, Mr. HEFNER, Mr. WYLIE, Mr. HUTTO, Mr. MCDERMOTT, Mrs. BENTLEY, Mr. ASPIN, and Mr. BENNETT.

H.R. 2585: Mr. BRYANT, Mr. KLECZKA, Mr. MORRISON of Connecticut, Mr. FAZIO, Mr. ROE, Mr. COURTER, Mr. BILBRAY, Mr. LANTOS, and Mr. OWENS of New York.

H.R. 2596: Mr. FEIGHAN and Mr. FAUNTROY.

H.R. 2608: Ms. SLAUGHTER of New York, Mr. SAWYER, Mr. GREEN, Mr. DERRICK, Mr. BROOMFIELD, Mr. HENRY, Mr. SCHUETTE, Mr. VANDER JAGT, and Ms. SNOWE.

H.R. 2648: Mr. LANTOS and Mr. ROSE.

H.R. 2700: Mr. SHAYS and Mr. ROTH.

H.R. 2754: Mr. BAKER, Mr. BLAZ, Mr. BOEHLERT, Mrs. BOXER, Mr. BROOMFIELD, Mr. CARPER, Mr. CLAY, Mr. COLEMAN of Texas, Mr. COSTELLO, Mr. DANNEMEYER, Mr. ERDREICH, Mr. ESPY, Mr. FALEOMAVAEGA, Mr. FAUNTROY, Mr. FLAKE, Mr. FLIPPO, Mr. GALLO, Mr. GEREN, Mr. GILLMOR, Mr. GRADISON, Mr. GRAY, Mr. HENRY, Mr. HERTEL, Mr. HOAGLAND, Mr. HOCHBRUECKNER, Mr. HOYER, Mr. HUCKABY, Mr. HYDE, Mr. IRELAND, Mr. JENKINS, Mrs. JOHNSON of Connecticut, Mr. KENNEDY, Mr. KLECZKA, Mr. KOLTER, Mr. KOSTMAYER, Mr. LEACH of Iowa, Mr. LEVIN of Michigan, Mr. LEWIS of California, Mr. LEWIS of Georgia, Ms. LONG, Mr. MCCANDLESS, Mr. MCCOLLUM, Mr. MCDERMOTT, Mr. MACHTLEY, Mr. MARKEY, Mr. MFUME, Mr. MILLER of Ohio, Mr. MINETA, Mr. MOAKLEY, Mr. MONTGOMERY, Mr. MOODY, Mr. MORRISON of Washington, Mr. MRAZEK, Mr. NEAL of Massachusetts, Mr. NEAL of North Carolina, Mr. NELSON of Florida, Ms. OAKAR, Mr. PARKER, Mr. PARRIS, Mrs. PATTERSON, Mr. PRICE, Mr. RAHALL, Mr. RHODES, Mr. RICHARDSON, Mr. RINALDO, Mr. ROBERTS, Mr. ROBINSON, Mr. ROSTENKOWSKI, Mr. ROTH, Mr. SAVAGE, Mr. SCHULZE, Ms. SLAUGHTER of New York, Mr. DENNY SMITH, Mr. TAYLOR, Mr. TOWNS, Mr. TRAFICANT, Mrs. UNSOELD, Mr. WALKER, Mr. WELDON, Mr. WHITTEN, Mr. WISE, and Mr. WILSON.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 2273: Mr. WATKINS.

H.R. 3456: Mr. SAXTON.

EXTENSIONS OF REMARKS

H.R. 3861—THE OUTER BANKS PROTECTION ACT

HON. WALTER B. JONES
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. JONES of North Carolina. Mr. Speaker, yesterday I introduced H.R. 3861, the "Outer Banks Protection Act." This bill will ensure that no oil and gas leasing, exploration, or development takes place offshore North Carolina until an adequate amount of physical oceanographic, ecological, and socioeconomic information is available to enable decisionmakers to adequately protect the coastal environment of North Carolina.

Under the bill, the Secretary of the Interior is required to undertake ecological and socioeconomic studies, additional physical oceanographic studies, including actual field work and the correlation of existing data, and other additional environmental studies, to obtain thorough, up-to-date information about all significant conditions and processes which influence oil and gas leasing, exploration, and development activities offshore North Carolina.

The bill also establishes a five-member Environmental Sciences Review Panel to consult with the Interior Secretary on the makeup of the environmental studies and to make findings and recommendations as to the adequacy of physical oceanographic, ecological, and socioeconomic information available to the Secretary. These findings must be considered by the Secretary prior to the conduct of any oil or gas activity offshore North Carolina.

Section 1 of the bill lists the "short title": The Outer Banks Protection Act. Section 2 outlines the key findings that form the basis for this legislation. Section 3 prohibits the Secretary of the Interior from: First, issuing any new leases; second, approving any plan of exploration; third, approving any permit to drill; or fourth, permitting any drilling for oil or gas on any lands described in the bill. The prohibition is effective until the later of October 1, 1991, or 45 days of continuous congressional session after the Secretary certifies, on the basis of the findings and recommendations of the Environmental Sciences Review Panel, that comprehensive and reliable information exists to support environmentally sensitive development decisions. The prohibited area includes any land of the Outer Continental Shelf [OCS] offshore North Carolina which lies between the boundaries established by the State of North Carolina and the States of Virginia and South Carolina.

Section 4 requires the Secretary of the Interior, in consultation with the environmental sciences review panel, to undertake ecological and socioeconomic studies and additional physical oceanographic studies, including actual field work and the correlation of existing data, and other additional environmental studies. The studies are intended to provide the Secretary with sufficient information about all significant conditions and processes which influence oil and gas leasing, exploration, and development activities offshore North Carolina to make appropriate determinations in authorizing such activities. This provision establishes a presumption that additional studies are necessary before development can be allowed to proceed offshore North Carolina.

Section 4 is intended to ensure that the Secretary of the Interior consults with the environmental sciences review panel before proceeding with the development of studies tailored to offshore North Carolina. Therefore, one of the first tasks for the review panel will be to examine existing environmental data to determine what is needed in the new studies.

Section 5 establishes an environmental sciences review panel consisting of: First, one marine scientist selected by the Secretary of the Interior; second, one marine scientist selected by the Governor of North Carolina; and third, one person each from the disciplines of physical oceanography, ecology, and sociology, to be selected jointly by the Secretary of the Interior and the Governor of North Carolina from a list of individuals nominated by the National Academy of Sciences.

The purpose of the environmental sciences review panel is to consult with the Interior Secretary on the establishment of additional environmental studies, and to prepare and submit to the Secretary, findings and recommendations as to the adequacy of physical oceanographic, ecological, and socioeconomic information available in enabling the Secretary to make appropriate determinations prior to authorizing activities prohibited under section 3.

In August 1988, the Minerals Management Service [MMS] notified the State of North Carolina that the Mobil Oil Co. would be submitting an exploration plan to drill up to 7 wells within a 21-block unit, with the first well located approximately 45 miles northeast of Cape Hatteras. Mobil is leading a consortium of 8 oil companies—Mobil, Amerada Hess, Chevron, Conoco, Marathon, Occidental, Shell, and Union—that owns the 21 blocks. Mobil later decided that it would submit a plan to MMS covering one wildcat well on Mobil's block 467 and, if a discovery is made, another exploration plan covering the remaining blocks and delineation wells, would be submitted.

A total of $296,294,000 was paid as bonuses to the Federal Government for the blocks in this unit which were purchased during lease sale No. 56 held in 1981 and lease sale No. 78 held in 1983. Block 467, the site of Mobil's proposed exploration wildcat well, attracted the most interest in lease sale No. 56. A partnership consisting of Mobil, Marathon, and Amerada Hess paid $103,775,000 for the lease. All of the leases in this unit have 10 year primary lease terms.

Mobil intends to drill its initial test well in 2,690 feet of water to a total depth of 14,000 feet into a structure that appears an excellent source rock for natural gas. The company estimates a 1 in 10 chance of finding natural gas and a 1 in 100 chance of finding oil in commerical quantities. If oil or gas are found, additional wells may be drilled to define the size and extent of the resource. The surface area of the target structure is approximately 50,000 acres and, according to Mobil geologists, could produce five trillion cubic feet of natural gas if filled to 50 percent of total capacity.

Although MMS approved two exploration plans in 1982 on Chevron and Arco lease blocks, no OCS exploration has ever been conducted off the State's coast. When Mobil made its initial announcement that it wanted to drill on blocks leased in 1981 and 1983, the Governor, Attorney General, coastal residents, and environmental groups voiced reservations. Because MMS's regulations under the Outer Continental Shelf Lands Act allow for only a 30-day environmental review of exploration plans by MMS and only a 20 day review for an affected state's Governor prior to approval of the plan [the plan is approved before a State's automatic 90-day Coastal Zone Management Act [CZMA] consistency review is completed], Republican Governor Jim Martin and Democratic Attorney General Lacy Thornburg began calling for a new Environmental Impact Statement [EIS] on the exploration plan.

North Carolina wanted a more up-to-date review of the potential environmental impacts, a review process that covered all 21 blocks in the unit and addressed development and production issues, guaranteed public involvement, and results of the environmental review process prior to significant actions being taken by MMS or the State. After exchanges of letters and several meetings between the State and MMS, and the State and Mobil, in which North Carolina threatened to sue if MMS approved the plan without preparing a new EIS, an impasse developed when neither MMS nor Mobil would agree to a voluntary EIS.

Due to several factors, among them a change in MMS leadership, the passage by the House of a bill (H.J. Res. 281) that contained an amendment that I offered requiring an EIS on Mobil's exploration plan, and the urging of a compromise by the State's U.S. Senate delegation, MMS offered a unique approach to resolve the impasse and stem further congressional action. MMS agreed to prepare an environmental report that mirrored the requirements of, but would not be called an EIS. MMS feared the legal precedent if an EIS were required for an exploration well. After several days of negotiating, MMS, the State, and Mobil signed a Memorandum of Understanding [MOU] on July 14, 1989. The Senate subsequently removed the Jones EIS amendment.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

The MOU increased the scope of environmental review through coverage of all 21 blocks rather than the one block that Mobil designated as a test well site, and coverage of issues associated with future development and production. The role of the public was heavily emphasized through scoping meetings, review of Mobil's draft exploration plan, and public hearings to review the draft environmental report.

On November 1, 1989, MMS issued the draft environmental report on proposed exploratory drilling offshore North Carolina. Shortly thereafter, the draft report was harshly criticized by environmental groups for failing to provide the quality of environmental review necessary for the State to make an informed decision about proceeding with the Mobil proposal.

On November 3, 1989, 2 days after the release of the draft environmental report, the National Research Council [NRC] issued a report to the President's OCS Task Force entitled "The Adequacy of Environmental Information for Outer Continental Shelf Oil and Gas Decisions: Florida and California." The NRC report found insufficient scientific information for making leasing and development decisions offshore Florida and California. Although the NRC report focused on the preleasing conditions off Florida and California, the analyses used and conclusions reached by the NRC should equally apply to North Carolina.

The NRC has been conducting the same analysis for all OCS areas—with final reports to be issued over the next 2 years—and generic information from the initial report is useful for comparison to the North Carolina situation. In fact, every one of the criticisms leveled against MMS by the NRC parallels concerns that the State has raised with MMS about its draft environmental report on the Mobil drilling proposal.

On December 4, 1989, the first of a series of public hearings on the draft environmental report was held in Manteo, NC. MMS used the occasion to announce plans to suspend indefinitely the time-line established by the MOU. MMS noted that the environmental report was the most comprehensive review ever undertaken for an offshore exploratory well. However, MMS agreed that the process would be better served by postponing the time-line to improve the content of the final environmental report.

The State of North Carolina submitted comments at the Manteo meeting that were highly critical of the draft environmental report. Specifically, the State found that the draft report substantially violates the requirements of both the MOU and the National Environmental Policy Act [NEPA] in scope and adequacy of its environmental analysis. Moreover, the State argues that MMS cannot conduct an adequate environmental analysis on Mobil's proposed exploration until: First, the oceanography panel created in the fiscal year 1990 Interior Appropriation Bill completes its analysis of the currents north of Cape Hatteras and additional field work is conducted to fill data gaps on the currents; second, either MMS or Mobil has completed at least one season's worth—for example, March through October—of biological field study on the fisheries resources and spawning conditions at the exploration unit; and third, complete data that would otherwise not be provided until the application for permit to drill [APD] stage, is made available for evaluation as part of the environmental report.

At this same forum, I announced my intention to introduce the Outer Banks Protection Act citing the need for additional environmental information. This belief is reinforced by the NRC report on oil and gas leasing offshore California and Florida and the inadequacies of the draft environmental report that were pointed out by the State.

I am confident that the measures required by this legislation will ensure that the people of North Carolina have sufficient information from which to determine whether natural gas can be extracted offshore North Carolina in a safe and environmentally sound manner.

A TRIBUTE TO SAN BERNARDINO COUNTY'S EXTRAORDINARY COMMITMENT TO HOUSING THE HOMELESS

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. LEWIS of California. Mr. Speaker, San Bernardino County is presently addressing a problem common to other counties across the United States; namely, the plight of the homeless. It is an issue that has garnered the attention and concern of the American people including some extraordinary and dedicated individuals in my district.

Responding to this enormous social challenge, the executive director of the San Bernardino County Community Services Department, Rodolfo Castro, spearheaded an effort to establish a county homeless task force to develop a comprehensive strategy for housing the homeless, particularly during the cold winter months. The task force membership consists of many caring and committed citizens. They include Sergeant. Boswell, Kent Paxton, Aurelio De La Torre, Roy Copple, Linda Foisel, Ann Ivey, Brian Turnbull, James Curtis, Alberta Graham, Michael Van Mouwerik, Patricia Nickols, Sandra Brown, and Sondra Alvarado. Necessary staff support for the task force was provided by Eric Grulke.

Mr. Speaker, this task force has been a tremendous success, providing nearly 16,000 shelter nights for the homeless throughout the county. Through joint funding contracts of San Bernardino County's Community Services Department and its Economic and Community Development Department, this plan was implemented by assisting private organizations that have the knowledge and structure needed for proper shelter management. These organizations also depend heavily upon our most important resource in our efforts to house the homeless—the use of private volunteers.

The private community based organizations aiding in this effort include the San Bernardino Salvation Army, Desert Manna of Barstow and St. Mark's Homeless Shelter of Upland. In addition, I would like to recognize the fine efforts of the shelter directors who provide emergency housing. They include Capt. Robert Anderson, Fred Broadhead, Irene Gernon, Capt. John Tolar, Capt. William Lum, Capt. Donald Takeuchi, and Rudy Craft.

I would also like to share with my colleagues an article by Eric Grulke that first appeared in the San Bernardino Sun on Dec. 20, 1989, discussing the constructive response by many extraordinary people working with the county of San Bernardino to address this most difficult challenge:

[From the Sun, Dec. 20, 1989]

COUNTYWIDE EFFORT TRIES TO AID HOMELESS

(By Eric Grulke)

"Why are people homeless?"

I stopped keeping count of how many times I am asked this question. The best answer I've heard was presented at a community meeting by a shelter director who was looking for funds to stay open through the winter. Her response was, "Because they can't pay the rent."

In six words, she summarized what educated scholars say in 300-page manuscripts. It also suggests that there are no quick-fix solutions to this complex social problem.

If you look deeply into her response, you can see quite clearly all of the related problems that accompany an inability to pay the rent. They can be problems of circumstance (family problems, people moving to California in search of a better life), problems of personality (alcohol abuse, drug abuse) or problems of severe mental illness.

Look even deeper into her answer and envision an individual who has been homeless for several weeks. Just imagine his physical appearance when the time comes for a job interview. It would seem that the problem of homelessness is one that compounds as long as it continues.

"What are you doing about it?"

This question always follows and gives me an opportunity to present a more concrete answer.

San Bernardino County has taken the lead in developing a comprehensive plan to serve the needs of the homeless this winter. Through an ad hoc committee of the San Bernardino County Homeless Task Force, we were able to identify more than $127,000 in funding to provide cost-effective direct sheltering and vouchers for shelter across the entire county.

We have funded three shelters throughout the county and provided them with the ability to house those in need during periods of cold weather. These are the San Bernardino Salvation Army, Desert Manna in Barstow and St. Mark's Homeless Shelter in Upland.

We knew in analyzing the problem of homelessness that there was no way to service a county the size of ours with existing shelters alone. Our plan depends on the use of motel vouchers to be distributed by Salvation Army officers in Ontario, Victorville, Redlands and San Bernardino, and at the service extension office in Fontana for all other areas.

The best part of our plan is that it assists the organizations in our community that already have a structure and a knowledge of running a shelter properly. With this funding, we help these shelters through the expensive winter so that they may be there to serve the needs of the homeless in the spring with their customary sources of support.

With the joint-funding contracts of both the county's community services department and its economic and community development department, this 1989 cold-weather homeless strategy was able to be implemented.

"What about after the winter?"

This answer is far from solid and much more complex than the others.

The San Bernardino County Homeless Task Force has branched out into another ad hoc committee to look for a long-term solution to the problem of homelessness throughout the year. With the early successes of the 1989 cold-weather homeless strategy, we all have high hopes for the work of this committee.

In addition, I am actively working with cities in our area that show an interest in dealing with the problem of homelessness in their communities. We must gain the support of the cities to deal effectively with this drastic social problem.

Yet, we all must keep in mind that there are no quick-fix solutions to the problem of homelessness in our community.

PATENT REMEDY CLARIFICATION ACT

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. KASTENMEIER. Mr. Speaker, today, together with my colleague, CARLOS MOORHEAD, the ranking minority member of my subcommittee—the Judiciary Committee Subcommittee on Courts, Intellectual Property, and the Administration of Justice—I am introducing the "Patent Remedy Clarification Act" to assure that patent owners can recover damages from States that infringe their patents, notwithstanding the provisions of the 11th amendment.

In the first session of this Congress, the House passed H.R. 3045, which I sponsored along with Mr. MOORHEAD and several of our colleagues on the subcommittee. That bill clarifies Congress' intent that States be subject to damage suits in Federal court for their violations of the Copyright Act. The bill that I am introducing today will assure that the same principle applies in patent law. Accordingly, it will be clear that Congress intends that State infringement of patent rights will make the State monetarily liable to the patentee.

Article 1, section 8, clause 8 of the U.S. Constitution grants Congress the explicit authority to promote the progress of science and the useful arts by granting inventors exclusive rights to their inventions. Pursuant to this authority, Congress enacted a patent statute in 1790, and has significantly revised that law three times—in 1793, 1836 and most recently in 1952. The Patent Act sets forth the requirements that must be met for the issuance of a patent, and the rights of the patent holder to protect against infringement, including the right to seek a remedy in Federal court.

In fact, the Federal courts have exclusive jurisdiction to decide patent infringement claims. However, in 1985 the Supreme Court held in Atascadero State Hospital versus Scanlon that absent a clear expression of congressional intent to the contrary, the 11th amendment prohibits individuals from recovering damages against States in Federal court.[1] While Atascadero was not a patent case, the U.S. Court of Appeals for the Federal Circuit recently ruled in Chew versus California [2] that the 11th amendment applies to cases brought by individuals against States for patent infringement, and it held that States are immune from damage suits in Federal court. Consequently, because a claim of patent infringement can only be brought in Federal court, the individual whose patent has been infringed by a State is deprived of the important remedy of damages.

The Supreme Court set forth a test to determine whether Congress intended in a particular statute to permit the recovery of damages against a State: "Congress may abrogate the State's constitutionally secured immunity from suit in Federal court only by making its intention unmistakably clear in the language of the statute." [3] Subsequent Supreme Court cases, decided this past term, expanded on the court's requirements for effective abrogation of the 11th amendment.

The legislative record does not reflect a congressional intent to exempt the States from damages for patent infringement. However, the Supreme Court rulings and the Court of Appeals for the Federal Circuit decision in Chew versus California, now require that we amend the patent laws to specifically declare that States are not immune from actions for damages under the 11th amendment. For this reason, the bill that Mr. MOORHEAD and I introduce today incorporates the Supreme Court's guidance. It makes it unmistakably clear that patentees can recover all available remedies against a State infringer and it specifically cites the monetary relief that Congress intended to make available against States.

My subcommittee will hold hearings to fully explore whether this proposed legislation will serve the public interest and what impact it will have on States, patent owners and the university community. The 11th amendment immunity is an important constitutional privilege afforded to the States, and Congress must not be indifferent about abrogating this right. Instead, we must examine the factual situation before us to determine whether there is a need to assure a remedy against States for patent infringement.

This bill has the strong support of the Patent and Trademark Office of the Department of Commerce, the American Bar Association, and the patent bar. It is part of an assemblage of important patent law revisions that my subcommittee is considering this Congress, including as well the patenting of transgenic animals and patents in space.

Congress should correct the current unintended immunity for States in the patent law just as it should in the Copyright Act. It is my understanding that Senator DECONCINI is planning to introduce a similar measure and we expect that the Senate will work with the House to assure that Congress' intent is adequately expressed in our patent and copyright laws.

I look forward to working with the members of my subcommittee and with other Members of this body on this proposed legislation.

[2] Civ. Act. No. 89-1390 (Fed. Cir. 1990).
[3] 473 U.S. at 242.

IN HONOR OF MAJ. GEN. JAMES C. WAHLEITHNER

HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. FAZIO. Mr. Speaker, I rise today to pay tribute to Maj. Gen. James C. Wahleithner, retiring commander of the Fourth Air Force Headquarters, McClellan Air Force Base, CA.

From May 14, 1985 through February 3, 1990, General Wahleithner played a central role in shaping the 26,000 Air Force Reservists of the Fourth Air Force into a combat-ready asset for the defense of our Nation.

The mission of the Fourth Air Force Headquarters is to provide the management necessary to assure the combat readiness of over 200 subordinate organizations across the United States. During the period of General Wahleithner's leadership, he successfully augmented the size of the command, increased the retention rate of personnel, converted virtually every subordinate unit to more modern aircraft, increased the diversity of missions, and shaped the Air Force Reserve into a model of readiness. Fourth Air Force flying units have had remarkable success in competitions with both the active duty Air Force and foreign air forces and have participated in approximately 105 military exercises worldwide. Recognizing these outstanding accomplishments, the Fourth Air Force was awarded the Air Force Outstanding Unit Award in 1988.

His devotion to the service of his country is evident in his 37 years of Air Force service and in his efforts to better the conditions of service for enlisted personnel and officers alike. He is a member of the Reserve Forces Policy Board, Reserve Officers' Association, Air Force Sergeants' Association, Department of Defense Reserve Forces Policy Board, Northern California Committee for Employer Support of the Guard and Reserve, and the Air Reserve Forces Policy Committee. He was awarded the prestigious Order of the Sword by the noncommissioned officers of the Air Force Reserve in recognition of his support for the enlisted force.

His civic affiliations include the Comstock Club, Order of Daedalians, American Legion, and the McClellan Air Force Base Air Museum Foundation.

He and his wife, Jacqueline, are the parents of 11 children, 3 of whom are currently serving their country in the Air Force Reserve.

Mr. Speaker, I join General Wahleithner's colleaques from the Air Force Reserve, his family and friends in commending the general for his many accomplishments and the tremendous contributions he has made to the service of his country.

TRIBUTE TO DEAN PETITPREN

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. BONIOR. Mr. Speaker, I rise today to pay tribute to an outstanding community leader, Mr. Dean Petitpren. Mr. Petitpren has been selected by the Macomb Arts Council as a Patron of the Arts for 1989.

Mr. Petitpren, who is president of Petitpren Inc., an Anheuser-Busch beer distributorship, has produced and sponsored the Bud Light riversite and sound concerts for the last 4 years in Mount Clemens, MI.

Through Mr. Petitpren's support and promotion the free concert series, produced throughout the summer, has given area citizens an opportunity to enjoy our most pervasive art form—music. The series has quickly found acceptance in the community. It has become a greatly anticipated event which makes the summer that much more festive.

I commend Mr. Petitpren on his commitment and dedication to the promotion of the arts in our community. He will long be remembered as a true friend of Macomb County.

TRIBUTE TO VERNAL RIFFE, SR.

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. FEIGHAN. Mr. Speaker, today, Ohio mourns the loss of one of its great community leaders. Vernal Riffe, Sr., passed away at the age of 89.

Mr. Riffe began his long and distinguished career in public service in 1929 as a patrolman in the Ohio town of New Boston. He moved on to serve as an enforcement agent for Ohio's Department of Liquor Control and for 8 years directed New Boston's safety and service department.

Twenty years later, Mr. Riffe was elected mayor of New Boston. As a testament to his leadership ability and popularity with the people of New Boston, he was elected to 11 consecutive terms as mayor, retiring in 1971.

Throughout his life, Mr. Riffe was a great influence on the careers of hundreds of public servants, most notably his son, Vernal Riffe, Jr., speaker of the Ohio House of Representatives. From Governor to precinct committeeman, Mr. Riffe provided guidance, political insight, and just plain common sense to those who have served the people of Ohio.

It's no coincidence that at the same time people in Ohio grew in their admiration for Mr. Riffe, people across the country grew in their admiration for Ohio. Mr. Riffe's character and integrity will never be forgotten. His determination to improve the quality of life for all Ohioans will also never be forgotten. Above all, his friendship will be missed.

THE INTRODUCTION OF LEGISLATION TO REQUIRE THE PAYMENT OF INTEREST ON EXCESS MEDICARE PREMIUMS COLLECTED AS A RESULT OF DELAYED IMPLEMENTATION OF THE MEDICARE CATASTROPHIC COVERAGE REPEAL ACT

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. CONTE. Mr. Speaker, I rise today to introduce legislation requiring the Secretary of Health and Human Services to pay interest on the excess part B premiums withheld from Medicare beneficiaries as a result of the repeal of the Catastrophic Program.

As we all know, the debate on whether to repeal the Catastrophic Program dragged on for months and wasn't finally resolved until November 22. By then it was too late to reprogram the computers at the Social Security Administration to drop the $5.30 a month that the Catastrophic Care Program had been expected to cost. So now, our elderly and disabled constituents must endure this reduction in their monthly Social Security checks until May at the earliest.

I opposed repeal of the Catastrophic Program but now that we've done it I believe we must make every effort to soften the hardships this action caused our constituents. I'm sure many of you have received letters from your constituents voicing their concerns over the loss of this income. Although $5.30 may not seem like very much here in Washington, it often can be the critical difference to our elderly and disabled constituents living on fixed incomes.

That's why I'm introducing this legislation. The intent is simple; it requires the Secretary of Health and Human Services when making payment of any excess part B premiums collected by the Social Security Administration to include interest with these payments. The rate of interest will be equal to the Secretary's estimate of the average rate of interest received on funds in the Federal supplementary medical insurance trust fund—about 8.5 percent. The interest will accrue from the day the excess premiums are withheld until the date of payment.

What could be more fair to our elderly constituents. If the Government is going to withhold portions of Social Security payments then they ought to be required to pay interest on this withholding. I hope I can count on the support of my colleagues to enact this legislation into law.

VOTE FOR DEMOCRACY, NOT INCUMBENCY

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. GINGRICH. Mr. Speaker, every Member should read Mr. Kidder's column and recognize we will either have campaign reform to help challengers or a limitation on terms.

[From the Christian Science Monitor, Nov. 27, 1989]

VOTE FOR DEMOCRACY, NOT INCUMBENCY

(By Rushworth M. Kidder)

When Congress voted itself a much-needed pay-raise-and-ethics package, it missed the point. The ethical question isn't simply how legislators earn their salaries. The real issue concerns a principle to democracy absolutely central to its proper functioning: rotation in office.

Diplomats and foreign correspondents know about that principle. They know that long experience in a post is valuable. But they're even more aware of the dangers of "going native"—defending the nation they're supposed to be reporting on. They solve it by judicious rotation in and out of assignments.

In Congress, particularly the House, there is effectively no rotation. Consider that:

Some 98 percent of House incumbents were returned to office in 1988.

There is more turnover in the Supreme Soviet than in the U.S. Congress.

The problem is worsening. In 1948, 68 incumbents were defeated. Losses in 1988: 6.

Rotation? Hardly. The electoral flywheel has rusted up so tight that you can't even crank it over by hand. Result: Congress is dangerously close to "going native," busily ensuring its own institutional perpetuation rather than seeing to the welfare of the nation.

Why are we in this fix? Part of the fabled "power of the incumbency" rests on such pillars as franking privileges that allow mass mailings to constituents and the limelight that attracts bushels of money and the resulting paid television spots. Changes in campaign finance laws, as proposed by President Bush, could make a dent.

But even that misses the point. What needs protecting is the principle of rotation. Here are a couple of reasons why:

First, there's the damaging effect of extended incumbency. Carried to its extreme, it breeds tyranny. And tyranny and democracy don't mix. That point is being made in spades these days among the East bloc nations, where democracy springs up only after decades-long tyrannies of the old guard have been unseated.

In principle, Americans have already addressed this issue. Franklin D. Roosevelt—who liked to point out that the first duty of a politician is to get re-elected—had such an extended tenure in office that, when it finally ended, a sobered citizenry ratified the 22nd Amendment to the Constitution, limiting the president to two terms in office.

Second, there's the benefit of change. At the heart of democracy lies the idea of a citizenry made up of voters equally entitled to be heard. Granted, not everyone exercises that entitlement. But the presence of startling levels of electoral apathy doesn't mean that nobody cares. It doesn't translate into a mandate to govern without the consent of the governed, or an assumption that only a ruling elite can know what's best for the citizenry. And it certainly doesn't mean that those currently in office are the only ones suited for it.

In fact, democracy is unlike other systems in the way it breeds leaders. It doesn't pass the mantle from the top down. It grows new leaders from the bottom up. That's what brings in freshness—not only to govern-

ment, but to any organization founded on democratic principles.

But that self-renewal can't happen without genuine electoral choice—in other words, rotation in office.

That, of course, is not a question members of Congress are keen to address. They would evidently rather risk public wrath over a pay raise than their safe seats. So here's a test question to use next election time. Ask the candidate, "Do you believe that the principal job of a politician is to get re-elected?" If the answer is yes, you're being asked to vote for something other than democracy.

AN EXCEPTION TO THE KIDDIE TAX

HON. BILL EMERSON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. EMERSON. Mr. Speaker, in years past, it was discovered that many well-to-do parents across the country were sheltering their assets from a significant amount of tax liability by nominally transferring these assets to their children. Congress quickly put a stop to this behavior by enacting the so-called kiddie tax.

As you know, under the "kiddie tax" rules, income from assets belonging to a child under 14 years of age is taxed at his/her parents' rate. This change in the law accomplished its stated goal, closing the loophole in the law and ensuring that parents could no longer evade tax liability through shifting assets to their kids.

So, we've put a stop to the attempts to deceive the Government. But what about the kids whose assets are legitimately their own? We all know of situations such as this. I know of a middle-class family in southeast Missouri in which the father died when the children were very small. Portions of his life insurance benefit established a trust for each of the children, and the funds were to be used for educational expenses. Yet when the mother remarried several years later, the children's trusts were suddenly forced into a higher tax bracket, and suddenly their college funds were significantly reduced.

This is not a case in which parents are trying to deceive the Government. This is not an instance in which children are nothing more than tax shelters for their parents. These are kids who, through the tragedy of losing their father, were given a small sum to help them with the rising costs of a college education. These kids should not be penalized because other parents once tried to evade their fair share of taxes.

I have introduced a bill which would allow a limited exemption from the "kiddie tax" for any child's income which is set aside as strictly for educational expenses. For this portion of income, the child would still pay taxes, but the child would be taxed at the child's tax rate. To ensure that this exemption is not abused, the bill exacts a 30-percent penalty on any sum which is given this treatment and not used for education.

This is a small but meaningful way in which we can encourage families to save for college, and at the same time, treat kids with a bit of equity. The kiddie tax was enacted to keep parents honest; let's make sure that it doesn't penalize the kids.

INTRODUCTION OF THE ROSE KUSHNER MAMMOGRAPHY ACT OF 1990

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Ms. OAKAR. Mr. Speaker, today I am introducing legislation which will, once and for all, provide low-cost, cost effective, life saving screening mammography to all American women covered under Medicare. When the Congress voted last November to repeal the 1988 Medicare Coverage Act, we also eliminated a major milestone in progressive, preventive health care coverage in the Medicare program—we eliminated biennial screening mammography.

One out of every nine American women will develop breast cancer. The American Cancer Society reports that 42,000 American women died from breast cancer in 1988. Studies have convincingly shown that regular mammogram screening can prevent one-third or 14,000 of these deaths. Approximately 4,000 of these women are Medicare beneficiaries. The average cost of a mammogram is $100 to $120, which most Medicare beneficiaires can scarcely afford.

Twenty-five States now mandate coverage of screening mammography by private health insurers. It is time for the Congress to take decisive action in support of cost-effective prevention in its public health policy. It is quite clear that the early treatment of the breast cancer victim costs about $10,000 to $15,000. The cost of cancer treatment in the second and third stages of development is approximately $65,000. Since I started fighting, over 6 years ago, for the inclusion of this benefit under Medicare, over 200,000 women have died from breast cancer. This is almost four times the number of American casualties in all 10 years of the Vietnam conflict. The National Cancer Institute, as well as the American Cancer Society recommend a baseline mammogram at age 35 and regular screening every 1 or 2 years beginning at age 40, and annual mammography screening for all women over age 50. A new formula, based on NCI's breast cancer detection demonstration project can calculate a woman's risk of developing breast cancer in the next 10 to 30 years based on her medical history. Accordingly, my legislation allows all women covered under Medicare a baseline screening at age 35, and up to one screening per year after age 40, based on the advice of their physician. In addition, this legislation includes a $60 cap on physician payment per mammogram. This strikes a reasonable, responsible balance between the need to contain rapidly escalating health care costs, and the need to increase economic incentives for physicians to recommend patients for mammographic screenings. This legislation has the support of the American Cancer Society.

Mr. Speaker, I have decided to name this legislation in honor of a very dear, personal friend, a champion for the rights and well-being of cancer patients whom we have recently lost to this horrible killer—Mrs. Rose Kushner. The name of Rose Kushner, who passed away here in Washington, DC on January 7, 1990, will be instantly recognized by all who have fought for the causes of cancer patients. Her perseverance and single-minded devotion to these issues will be profundly missed, especially at this time when we are so close to reaching many of her goals. Her generosity in helping others was unsurpassed. It is only fitting that this bill be named in honor of Rose Kushner. The legacy of Rose Jushner will be realized when we pass meaningful legislation which can bring hope, comfort, and perhaps a cure to the victims of cancer.

I urge all of my colleagues to cosponsor this legislation.

IMMIGRATION PROBLEM

HON. SOLOMON P. ORTIZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. ORTIZ. Mr. Speaker, I rise today to bring your attention to a situation in my congressional district that bears watching.

Just 1 year ago the Rio Grande Valley was flooded by a wave of immigrants from Central America seeking asylum. Due to policies in place with the Immigration and Naturalization Service at that time, those who were not granted asylum were released on their own recognizance to await further action on their cases. However, they were not granted work permits and were prevented from leaving a limited geographic area. At that time, the people of Cameron County, TX, were put in the position of paying for our national immigration policy. It was an intolerable situation that must never be repeated.

I had the opportunity of meeting yesterday with our new Commissioner of the Immigration and Naturalization Service. He has assured me that the INS is ready to meet any immigration challenges that may occur along the Texas border and is prepared to adjust enforcement as necessary. I am encouraged by his personal interest in this important matter. However, I can assure him that the people of south Texas and of this Nation will be keeping a careful eye to the situation along the border to ensure that there is no recurrence of last year's crisis situation.

A TRIBUTE TO CLAUDE T. (TOM) MANGRUM

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. LEWIS of California. Mr. Speaker, I would like to bring to your attention today a man who has served as a professional leader in community corrections with dedication and distinction for many years. On March 29, 1990, Mr. Mangrum will be retiring from his position as interim chief county probation offi-

cer of California's San Bernardino County. His record of service is inspiring and certainly worthy of recognition today by the House of Representatives.

Tom Mangrum began his career with the San Bernardino County Probation Department in January 1962. Over the years, he has served as probation officer, supervising probation officer, division director, and assistant chief county probation officer. He was appointed interim chief probation officer in February 1989.

Tom received his Th.B in theology from Malone College in 1952 before acquiring his B.A. in social science from Youngstown (Ohio) University in 1956. He pursued a masters degree in sociology at Kent State University in 1958 and later acquired his M.P.A. in public administration at the University of Southern California in 1972. A licensed marriage, family, and child counselor, he is also the author of a textbook for probation officers and more than 40 articles in a dozen journals on corrections and public administration. In addition, Tom has also taught at a number of colleges and universities including Kent State University, 1958–59; Chapman College, 1965–74; Pepperdine University, 1971–74; Riverside City College, 1975–81; and Loma Linda University, 1979–84.

Tom has long been active in the community through a number of professional and civic organizations. He is the past president of the San Bernardino County Peace Officers Association; past president, Exchange Club of Uptown San Bernardino; past president, Family Service Agency of San Bernardino; past president, California Probation, Parole, and Correctional Association; past secretary, American Probation and Parole Association; and president of the Arrowhead United Way.

Tom has also received numerous awards for his services to professional and charitable organizations. They include the Western Correctional Association's Pepperdine Award, the California Probation, Parole, and Correctional Association's Lester J. Haye Award; the American Probation and Parole Association's Walter J. Dunbar Award; and the Family Service Agency Award. He has also served as a delegate in the People-to-People Citizens' Ambassador Program's Juvenile Justice Tour in Europe and the U.S.S.R. In addition, Tom is listed in Who's Who in America; Who's Who in the West; and Who's Who in California.

Mr. Speaker and my fellow colleagues, I ask that you join me today in wishing Tom Mangrum a healthy and happy retirement.

MONROE, WISCONSIN EDUCATOR JERRY GUTH AND THE BICENTENNIAL PROGRAMS ON THE CONSTITUTION AND THE BILLS OF RIGHTS.

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. KASTENMEIER. Mr. Speaker, we have just witnessed the closing of a decade in which millions of people who had long suffered from repressive regimes have toppled those regimes in their quest for freedom and democracy. We, who have benefitted from the longest lasting constitutional democracy in history, should rejoice in the overthrow of those totalitarian governments and in the recognition by their citizens of the importance of the principles and values of free government we have cherished for so long. We also must wish the people of these nations well in the difficult tasks that lie ahead.

At the same time, we must not neglect to pass on to our own youth the understanding of the fundamental principles and values of our democratic institutions that leads to a reasoned commitment to their preservation and improvement. In this regard, I am most pleased to commend the efforts of a constituent, Jerry Guth, a social studies teacher at Monroe High School in Monroe, WI. Jerry Guth is Wisconsin's Second Congressional District coordinator of the "We the People . . . Bicentennial Programs on the Constitution and Bills of Rights." These programs include the National Bicentennial Competition, its noncompetitive companion program, Congress and the Constitution, and the National Historical Pictorial Map Contest.

Through the dedicated and voluntary efforts of Jerry Guth, thousands of upper elementary, middle, and high school students in my congressional district have studied the program's curriculum. This curriculum incorporated in the "We the People . . ." text, introduces students to the philosophical ideas of our Founding Fathers, the historical background of the Philadelphia Convention, and the issues and debates that shaped the writing of our Constitution. Students learn how our Government is organized and how it protects the rights and liberties of all citizens. Finally, and most important, students learn of the responsibilities which accompany the rights of citizenship in a democracy. I had the pleasure to personally present certificates to hundreds of Second District students who have completed this program, and one school in my district, the Winnequah Middle School in Monona Grove, placed first in Wisconsin in the National Historical Pictorial Map Contest.

Mr. Speaker, I want to express my admiration and appreciation to Jerry Guth for his impressive contributions in encouraging young people to understand the purpose and importance of our Constitution which, in turn, will stimulate the development of a competent and responsible citizenship.

IN HONOR OF THOMAS A. MCNUNN

HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. FAZIO. Mr. Speaker, I rise today to honor a longtime friend, adviser, and one of Solano County's most outstanding civic leaders, Thomas A. McNunn.

Born and raised in Nebraska, Tom moved to Solano County after serving with the U.S. Air Force in Korea. He started his postmilitary service career with the Vallejo Chamber of Commerce, and he remained there until he relocated to Vacaville in 1966.

As the chief executive officer of the Vacaville Chamber of Commerce from 1966 to 1989. Tom's progressive approach to economic development and community enrichment has greatly benefited Vacaville and Solano County.

With unending stamina, Tom has always worked extremely long hours and gone beyond the call of duty to provide service to his community. His former secretary of 10 years, Betty Ladd, said, "Tom's ability to dedicate endless hours to a good cause sets a very fast pace for the entire working staff."

Vacaville businessman Glen Miller also commended Tom for his "boundless energy, good attitude, and on-call devotion to community and civic endeavors." Mr. Miller praised Tom for applying these attributes to create "one of California's most outstanding chambers of commerce."

Tom has held many prominent community positions including: Chairman of the local United Way Telethon, general chairman of the Vacaville Fiesta Days Committee, chairman of the Vacaville Onion Festival, director of the Solano County Private Industry Council, and Vacaville chairman of the Vaca Valley Hospital Fund Drive. Tom has also served as director of the California Association of Chamber of Commerce Executives, vice president of the Vacaville Art League, president of the Vacaville Host Lions Club, and president of the 20–30 Club. As one of Solano County's most generous volunteers, Tom has set a standard for others to follow.

As Tom leaves the Vacaville Chamber of Commerce after 23 years of distinguished leadership, Solano County pauses to say, "thank you, Tom, for enriching our community and our lives; Solano County appreciates and respects your many contributions." Having worked with Tom for many years, I know firsthand the valuable and unselfish service he has given to Vacaville and the entire Solano County community.

TRIBUTE TO JEANNE BUSSE

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. BONIOR. Mr. Speaker, I rise today to pay tribute to a dynamic and altruistic individual, Mrs. Jeanne Busse. Mrs. Busse has been selected by the Macomb Arts Council as a "Patron of the Arts" for 1989.

Mrs. Busse has actively involved herself in the promotion of the arts for most of her adult life. She has remained dedicated to teaching the importance of arts in our society. She has served as chairperson of the Warren, MI Cultural Commission since 1982. Her long-time commitment to promoting arts in Warren schools and her cochairing of the Warren "Art in the Park" project since 1984 have earned her numerous accolades.

Hailed as a champion promoter of the arts in Warren schools, Mrs. Busse has garnered respect and support for the arts throughout Macomb County. The fruits of her labor have not gone unrecognized by her peers. She is being honored for her drive and dedication

which have enabled her to make a difference in the cultural climate of our community.

I commend Mrs. Busse on her commitment to promotion of the arts and her exceptional community involvement. She will long be remembered as a true friend of Macomb County.

COMMEMORATING THE RETIREMENT OF RICHARD J. DACEY

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. CONTE. Mr. Speaker, I rise today to honor Richard J. Dacey. Richard is retiring after 31 years as principal of Conway Grammar School. Richard's enjoyment of working with children, his ability to guide, and his fascination with history and the government lead him to his position as the principal of the grammar school that he had once attended as a child.

Richard graduated from St. Michaels College in Vermont, where he majored in education and minored in business. It was in January 1957, when Richard began his teaching career at North Brookfield Junior-Senior High School. In 1958, Richard relocated to the grammar school where he became a teaching principal. In the early 1960's, Richard's duties became entirely administrative.

His dedication and commitment to the field of education was apparent throughout his 33 years of service to Conway's school system and community. Richard is a true educator, one who has inspired children to be creative, to develop their minds and to seek the enjoyment of learning.

His family had always been involved with the Conway community. His father, Charles Dacey, was the Postmaster for 37 years, and with Richard's mother, Bertha, they owned a general insurance company.

Born and raised in Conway, Richard has become involved in his community above and beyond his duties as an educator. He served for 27 years on the Conway Cemetery Association, is a member of the Frontier Regional School Committee, and the Historical Society. He also has served on the Conway Festival of the Hills Committee and Bicentennial Committee, and is currently a Conway Library Trustee.

After 31 years of service, Richard is stepping down from his position as principal. He plans to assess his future and enjoy a deserved break. With his newly found spare time, Richard may do some fishing, go swimming, and keep abreast of current events.

Mr. Speaker, Richard J. Dacey is an inspiration to those who know him. His service to the Conway community should be commended, for it is his genuine concern for his town and its peoples that makes America the great Nation it is. I wish Richard the best of luck in his retirement and hope that he will continue to inspire the community of Conway.

FAIR WINDS AND FOLLOWING SEAS FOR CAPT. JOHN E. KANE, U.S. NAVY

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. GINGRICH. Mr. Speaker, it has come to my attention that Capt. John E. Kane will be retiring from the U.S. Navy after 21 years of honorable and distinguished service, and leaving his position as Director for Navy Liaison, U.S. House of Representatives effective February 1, 1990.

As the Navy's primary representative and spokesman on the House side of Capitol Hill, Captain Kane has performed in an extraordinary manner in support of the Navy and the Members of this body. His unique perspective and extensive grasp of all Navy programs and issues is well known and respected by me and so many of my colleagues. I believe that I share this view with the more than 150 Members that Captain Kane has personally escorted on official congressional travel worldwide as well as the many more he has interacted with on a daily basis.

Captain Kane's dedication and commitment of the Navy and the Congress will be truly missed. It gives me great pleasure today to join with his family and friends in extending my heartfelt congratulations to Capt. John Kane on the award of the Legion of Merit in recognition of his outstanding performance as Director for Navy Liaison in the House of Representatives from November 1987 to January 1990. On behalf of my colleagues I extend the traditional Navy salutation of "Fair winds and following seas" to Captain Kane and his family in their future endeavors.

OVERRIDE OF VETO OF EMERGENCY CHINESE IMMIGRATION RELIEF ACT

HON. BILL EMERSON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. EMERSON. Mr. Speaker, today I voted to override the President's veto of the Emergency Chinese Immigration Relief Act. While I have no doubt of the President's commitment to freedom, democracy, and to the Chinese students living in this Nation, I do not feel that administrative action is strong enough, and that the congressional action is legitimate at this point, at this time.

What happened in Beijing last year—when Chinese students were massacred at the hands of their own Government—was a shocking tragedy. It is vital that the United States makes every effort to show the Chinese—and the world—that we in no way condone their actions in Tiananmen Square. It is equally important that we evidence a strong commitment by offering protection to the Chinese students temporarily living in this country. I believe our action today conveys the message our people want delivered in support of the students.

Indeed, the Emergency Chinese Immigration Relief Act sends the message that the United States will stand firm in its unwavering support to the worldwide democratic movement.

The diplomatic and geopolitical role we occupy vis-a-vis China is complex and difficult. I think President Bush is the right person at the right time to be at the helm to manage and direct this relationship. As former Ambassador to China and the United Nations, as former CIA Chief, as Vice President and President he has background and expertise to guide us through these troubled waters as no one else quite has.

ST. IGNATIUS WINS OHIO FOOTBALL CHAMPIONSHIP ALONG WITH USA TODAY NO. 1 RANKING

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Ms. OAKAR. Mr. Speaker, all of Greater Cleveland is very proud of the achievements of St. Ignatius High School, located in the Ohio city area of Cleveland, OH. For the second year in a row, St. Ignatius went undefeated on its way to the division I, Ohio high school football championship. St. Ignatius, guided by Coach Chuck Kyle, rallied from a 21-to-14 halftime deficit to win 34 to 28 against an outstanding Cincinnati Moeller team in the 1989 State championship game. Some 30,000 spectators at Ohio Stadium buzzed with excitement as the two teams ran up 820 yards in total offense in just 48 minutes of football action. St. Ignatius went 13–0 in 1989 and now has a 29 game winning streak. In recognition of the team's outstanding achievement, USA Today named Cleveland St. Ignatius the top-ranked team in the Nation.

Any outstanding football team requires enormous dedication on the part of each and every player and great skill and leadership from the coaching staff. Coach Kyle brought the best out of his players and coordinated their efforts into a winning combination week after week. What most people do not see, however, is the intensity that the team carried into each practice session. One observer noted that, "Every day at practice they work like it's a championship game." The results, of course, speak for themselves.

Although it is often difficult to single out a single player in a team effort, I want to pay tribute to the St. Ignatius quarterback, Joe Pickens, who was honored in the December 31, 1989, Parade magazine as a high school all-American. Joe completed his magnificent career at St. Ignatius with an all-American performance in the State championship game. He threw three touchdown passes and gained 311 yards in the air. He just missed a fourth touchdown by a yard.

Although the entire community is proud of the St. Ignatius football team, I would also like to point out how proud I am of the school as an academic institution. For more than a century, St. Ignatius has been located in Cleveland's near west side, serving as an anchor to

the Ohio city neighborhood throughout the decades and providing generations of young men with the very best education. St. Ignatius graduates go on to colleges and universities throughout the United States. Many of the school's alumni now assume leadership positions in the business, cultural, political, and spiritual communities in Ohio and every State in the Union. It should be emphasized that there is no academic free ride for the members of the St. Ignatius football team. Each of the players carries a full academic load and is expected to meet the school's high standards of achievement. It is a tribute to the team, to the coaching staff, the faculty, and administration of the school that St. Ignatius excels as an academic institution at the same time that it fields the top football team in America.

Congratulations to everyone associated with St. Ignatius on a fine football season and for the consistent record of achievement the school has posted year after year for more than a century now.

WELCOMING THE PARLIAMENTARY DELEGATION FROM THE REPUBLIC OF CYPRUS

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. FEIGHAN. Mr. Speaker, it is my pleasure to join in welcoming the parliamentary delegation from the Republic of Cyprus on their visit to Washington. During the week, they will be visiting with our State Department and other administration officials and meeting with members of the Senate Foreign Relations Committee and with our own Committee on Foreign Affairs.

The United States and Cyprus have enjoyed close ties since the formation of the Republic in 1960. Those ties have weathered enormous difficulties, including the 1974 Turkish invasion and the continuing Turkish occupation of the northern third of the island. With the election of President George Vassiliou nearly 2 years ago, we have seen progress in getting the two communities to sit down together and work with the U.N. Secretary General to come up with a solution to the Cyprus problem.

Those efforts have the strong support of this Congress and that message was delivered to President Vassiliou and to Turkish-Cypriot leader Rauf Denktash during thier respective visits last October. In November, the House Subcommittee on Europe and the Middle East passed House Resolution 205 in support of the Secretary General's mission and calling for the resumption of talks between the two sides.

It is my understanding that the two leaders have been invited by the U.N. Secretary General for a meeting in New York in February. According to press reports, President Vassiliou has agreed to attend this meeting. However, Mr. Denktash has balked at the invitation and it is unclear whether or not he is ready to resume the dialog. I look forward to hearing about recent events on Cyprus as well as the delegation members' expectations about the upcoming meeting. I hope my colleagues will take advantage of this opportunity to hear about the situation in Cyprus from our Cypriot counterparts.

The delegation includes members from across the Cypriot political spectrum and is headed by the President of the Cypriot House of Representatives, Dr. Vassos Lyssarides. The delegation includes Mr. Dinos Constantinou, chairman of the house standing committee on financial and budgetary affairs, Mr. Alexis Galanos, chairman of the house standing committee on foreign affairs, Mr. Takis Hatdjidemetriou, chairman of the house standing committee on defense affairs, and Mr. Yiannakis Matsis, chairman of the house standing committee on development plans and public expenditure control. Let me take this opportunity to welcome each of you.

A GIANT PASSES

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. CLAY. Mr. Speaker, recently, the St. Louis community mourned the passing of one of our great leaders, Mr. Ernest Calloway. It was my privilege to spend many hours working with Mr. Calloway on some of the major political and civil rights issues confronting our society. Sometimes Ernest and I disagreed on the tactics and techniques we should employ, but we never disagreed on our goals. Ernest Calloway was deeply dedicated to helping ensure that all people share equally in the freedoms and equal rights envisioned by our forefathers, and to this end he dedicated his life.

I would like to take this opportunity to share with my colleagues the following article from the St. Louis American, January 18-24, 1990.

[From the St. Louis American, Jan. 18-24, 1990]

CALLOWAY DEDICATED HIS LIFE TO LABOR UNIONS, CIVIL RIGHTS

(By Farley Wilson)

It was an ideal, and proper site for the memorial service for life-time union advocate and civil rights activist Ernest Calloway to be held at the Teamsters Plaza, 300 South Grand Blvd., Saturday, January 6. If the records were checked, one would find that Mr. Calloway's contributions to the Teamsters Union played a major role in its success.

Mr. Calloway, who died on December 31, the day before his 81st birthday, had dedicated his life to labor unions, and civil rights causes, but in death, he wanted his body to be used in the study of medical science. The body was turned over to the St. Louis University medical school.

In his work as an organizer for Teamsters Local 688 and as a director of research for Teamsters Joint Council No. 13, Mr. Calloway helped that labor union to be one of the most respected and powerful in the nation. The union's facility moved from an inadequate building in the 1100 block of Olive Street to the former Magic Chef high-rise building on South Kingshighway. With memberships increasing, and plans for the expansion of medical services, and with proposals for housing for retired union members and others, the Teamsters built, from the ground up, the massive Teamsters Plaza on South Grand Blvd.

Mr. Calloway often warned blacks that they would never enjoy the prosperity of America and share economic parity unless they became involved in a labor union.

At the age of 25, Mr. Calloway learned that he had to personally get involved in movements that worked toward a solution to problems blacks were having as miners and other slave-labor type jobs. The blacks worked harder than whites but received far less compensation. He received a scholarship and attended Brookwood Labor College in Katonah, New York. The school was headed by a well-known pacifist, A.J. Muste. During the 20's and 30's, Brookwood served as a progressive focal point in training union organizers, administrators and workers' education specialists.

Calloway quickly made a name for himself as an advocate of organized labor. In 1935-36 he was very active in organizing the unemployed and the development of workers' education programs in Virginia on a volunteer basis. Saturday, January 6. If the records were checked, one would find that Mr. Calloway's contributions to the Teamsters Union played a major roll.

Calloway moved to Chicago and in 1937-38, was one of the founders and organizers of the United Transport Service Employees Union, which represented red caps and other railroad station employees.

Calloway became the first black person to refuse military service after passage of the first peace-time draft law in 1939 on the grounds of hard-core racial discriminatory practices in the Armed Forces.

During a CIO convention in Boston in 1942, Calloway co-authored the resolution that created the CIO Committee Against Discrimination with a full staff to police racial discriminatory practices in that union. He also served for several years on the CIO Convention's Education Committee.

In 1948, Calloway was granted a Transatlantic Foundation Scholarship to study at Ruskin College, Oxford, England. The scholarship was sponsored by British Trade Union Congress. While overseas, Calloway visited Paris, and learned about the French economy and the fragmented French trade union movement following World War II.

In late summer, 1949, Calloway returned to the United States. He received a position with the CIO in North Carolina. Prior to leaving England, Calloway had applied for a Fullbright scholarship. He was later informed by the U.S. State Department that the scholarship had been granted.

However, while packing for the overseas educational program, Calloway was asked by Harold J. Gibbons to come to St. Louis to help establish a research department for Teamsters Local 688. The rest is history. Calloway was delighted to have had that opportunity. He cancelled the Fullbright scholarship plans.

Calloway later said, "I was attracted to the groping effort of this unique St. Louis local union to view the union members within the frame of his total environment-economic, social, cultural and political. This was different from most U.S. unions who usually viewed the member in one-dimensional fragmented terms."

Calloway worked diligently as the Teamsters director of research, but because of his desire to fight for first class citizenship for blacks, he became an activist in civil rights organizations. It could be possible that his affiliation with early members of the Com-

mittee On Racial Equality (CORE) here in the 50's gave him the inspiration for leadership in labor and civil rights.

He and other officials of the Teamsters Union were among the first CORE members in St. Louis. Their first meetings were in a large rooming house at Garrison and Franklin Avenues. Union officials attending those meetings were: Calloway, Gibbons, Arthur Chapin, who later became a deputy director of the U.S. Department of Labor, Arthur Johnson, who later became director of the Hartford, Connecticut Human Rights Commission; Marvin Rich, now a New York Labor Leader, Charles Oldham, now an attorney for a local union; Joe Ames, Francis Hicks and Dick Kavner. Some of the other members of CORE in the early 50's were Marian Oldham, Vivian Moore, Rosalind Greenbaum, a Dr. Chambliss, Billy Ames and Wanda Penny.

The CORE group held sit-in demonstrations at department stores downtown where blacks could spend their money on clothes but could not eat at the lunch counters with whites. They also protested other discriminatory practices at business establishments here.

In 1955, Calloway was elected president of the local branch of the NAACP. Within a two-year period, the membership more than tripled. Through his leadership, blacks were hired as sales clerks in department stores. Prior to that time, blacks were only elevator operators. They also integrated the taxi-cab industry and were instrumental in getting the Coca-Cola Company to employ black driver-salesmen. Prior to that time, only one black, Walter Lay, worked in a high job bracket, and there were four other blacks who serviced machines in factories.

The NAACP also attacked the hiring practices of Southwestern Bell Telephone, which straightened up and has surpassed all other corporations in hiring and promoting blacks.

When Calloway was president of the NAACP, there was no such thing as a policeman arresting a hungry black woman on a Bi-State bus for eating four cashew nuts. Don't laugh. Such a disgrace did happen here several years ago.

In 1957, while Calloway was still president, the NAACP opposed a new city charter primarily because the framers of the proposed new city constitution refused to support civil rights measures, public accommodation provisions as well as some reform in civil service rules that denied equal opportunity in municipal employment. The NAACP was also opposed to the structure of the Board of Aldermen.

The black political leadership was strongly divided on the charter issue. The two blacks on the Board of Freeholders, Attorney David M. Grant and C.B. Broussard, joined Calloway in opposing the charter.

In his strategy to defeat the charter proposal, Calloway, through the NAACP, created NAACP Citizens Assemblies in each of the wards with substantial black population. Such assemblies were patterned after ward political organizations, with precinct captains.

The results—the charter lost with 107,000 votes against and 70,000 for it. The political experience of 1957 served as a great stimulus to the new political mood, and in several cases the Citizens Assemblies were held intact by the leaders involved in the charter fight.

The enthusiasm caused blacks to reject apathy, and go to the polls and vote. By 1958, there were four black alderman.

In 1959, Calloway served as campaign director for the election of the Rev. John J. Hicks to the Board of Education. Hicks won, becoming the first black elected to that board.

In 1960, Calloway was campaign director for Theodore D. McNeal who tossed his hat into the ring to unseat the veteran, white Missouri Senator Edward "Jelly Roll" Hogan. McNeal won overwhelmingly and became the first black Missouri senator.

In 1962, apparently through the political strength of Calloway, his wife, Deverne, became the first black female Missouri Legislator. Due to her dynamic performances, she was reelected over and over again.

ERNEST CALLOWAY'S PAST COMMUNITY INVOLVEMENT

President, Congress of Neighborhood Associations in North St. Louis

Co-moderator, Public Issues Forum

Commissioner, Community Development Commission: Chairman, Zoning Committee

Trustee, Mullanphy Travelers Aid Fund

Executive Board, Committee To Aid Victims of Crime

Executive Board, Richard Hudlin

HONORING DR. BENJAMIN HOOKS ON HIS 65TH BIRTHDAY

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. FORD of Tennessee. Mr. Speaker, I rise today to extend birthday greetings to one of my most distinguished constituents in the Ninth Congressional District of Tennessee, the executive director of the National Association for the Advancement of Colored People, Dr. Benjamin L. Hooks. Dr. Hooks is celebrating his 65th birthday today.

Dr. Hooks was unanimously elected executive director of the Nation's oldest civil rights organization in January 1977 and he succeeded Roy Wilkins in that leadership post in August of that same year. Perhaps best known for his effective and persuasive oratory, his highly successful and diverse career has embraced the fields of law, ministry, and public service.

An ordained minister, he is on leave as pastor of both the Middle Baptist Church in Memphis, TN, and the Greater New Mount Moriah Baptist Church in Detroit, MI.

A successful businessman, he was cofounder and vice president of Mutual Federal Savings and Loan Association of Memphis for 15 years.

A member of the Tennessee bar, he served as an Assistant Public Defender, and as a skilled and effective general counsel prior to being named the first black judge of the Shelby County, Tennessee Criminal Court, where he served with distinction. This appointment by Gov. Frank G. Clement made him the first black judge of a court of record in the South since the Reconstruction era.

In 1972, President Richard M. Nixon nominated Dr. Hooks to become the first black member of the Federal Communications Commission. Dr. Hooks served on the Commission until his resignation to assume his post with the NAACP.

Born in Memphis, TN, he attended LeMoyne College (now LeMoyne-Owen) in Memphis and Howard University in Washington, DC. He received his J.D. degree from DePaul University College of Law in Chicago, IL in 1948.

A veteran of World War II, Dr. Hooks served in the 92d Infantry Division and saw combat in Italy.

Dr. Hooks is a Golden Heritage Life Member of the NAACP and a former member of the board of directors of the Southern Christian Leadership Conference. He serves as the chairman of the Leadership Conference on Civil Rights, a coalition of more than 150 of the Nation's major organizations concerned with civil and human rights. Dr. Hooks has served on the board of a number of organizations, including the League of Women Voters, National Conference of Christians and Jews, Public Broadcasting Corporation, National Alliance of Business, Independent Sector, A. Philip Randolph Institute, International League from Human Rights, National Committee for Full Employment, Jobs for America's Graduates, Inc. and Council on Foreign Relations.

As a major figure in the civil rights movement, Dr. Hooks testified on many occasions before congressional committees. His was a leading voice in the successful effort to secure legislation to impose economic sanctions against the apartheid practices of the government of the Republic of South Africa. He was instrumental in securing passage of the voting rights extension, the Martin Luther King, Jr. Holiday bill, the defeat of the Bork nomination to the Supreme Court, and was the architect of the 1978 demonstration at the Davis Cup Match at Vanderbilt University in Nashville, TN, to protest the participation of players from the Republic of South Africa.

Among Dr. Hooks' major achievements as executive director of the NAACP was his leadership in the successful campaign to purchase and retire the debt for the association's permanent national headquarters in Baltimore, MD. For the first time in its history, the NAACP now owns its home.

Dr. Hooks has received more than 20 honorary degrees. In 1986, he became the 71st recipient of the NAACP's highest award, the Spingarn Medal.

I know my colleagues in the House join with me in extending the warmest birthday greetings to a great American, Dr. Benjamin Hooks.

THE JACKSON/VANIK AMENDMENT AND MFN FOR THE SOVIET UNION

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. HAMILTON. Mr. Speaker, I would like to draw the attention of my colleagues to a letter I recently received from Mr. Edgar M. Bronfman, president of the World Jewish Congress.

The letter outlines his views on the Jackson/Vanik amendment and most-favored-nation [MFN] status for the Soviet Union. Mr. Bronfman believes that the Jackson/Vanik amendment should be repealed, that the amendment has served its purpose and that "its continuation is not appropriate to the present political context."

The text of the letter follows:

WORLD JEWISH CONGRESS,
New York, NY, January 18, 1990.

DEAR MR. CHAIRMAN: I would like to expand on our discussion this week concerning the Jackson/Vanik Amendment to the Trade Act of 1974 and the President's decision to move toward a trade agreement with the Soviet Union. The President's decision is a significant political act that goes well beyond trade and economics. In announcing this decision, the President said that he also wants to see *perestroika* succeed and that he wants to do everything possible to help the Soviet Union in its efforts to join the world economy.

In light of these circumstances, I believe the Jackson/Vanik Amendment should be repealed. Its continuation is not appropriate to the present political context.

First, the conditions that led to the passage of Jackson/Vanik no longer exist. The Soviet Union does not now restrict the emigration of Soviet Jews. Furthermore, the other Communist countries at which the Jackson/Vanik provisions were aimed have also moved away from restrictive emigration practices.

Secondly, the Jackson/Vanik Amendment would impose continuing uncertainty on our new economic relations with the Soviet Union. If the original reason for the Amendment is gone, I see no reason to continue to impose such uncertainty. American business cannot plan efficiently nor can the Soviets. Given our economic importance, the Soviets cannot have a normal economic relationship with the whole world unless they have a normal one with us.

There are two methods within the Jackson/Vanik provisions to set its restrictions aside, but both impose uncertainty. A waiver requires that the issue be revisited every year. A Presidential statement that Jackson/Vanik provisions no longer apply to a particular country must be revisited every six months. Thus, the only way to remove the now inappropriate uncertainty inherent in the Jackson/Vanik provision is to repeal it.

I recognize that the Soviets could revert to earlier practices. The President, however, has sufficent authority outside of Jackson/Vanik to respond appropriately, and we both know that the Congress would not remain comatose in such circumstances. We recognize that refuseniks remain and that codification of emigration and other human rights is on the agenda. We hope, of course, the remaining refuseniks are released and codification occurs soon. It is important, however, to proceed with the negotiation of a new trade agreement aggressively.

While not specified as part of Jackson/Vanik, it is important to note that official discrimination against Jews has ended, Jewish cultural centers have opened, Hebrew and religious subjects are taught freely, and Jews have begun to organize with the first meeting of the Soviet Jewish Congress held last December.

The President spoke movingly after Malta about a new threshold that the United States, the Soviet Union and indeed the whole world can now cross. I believe this nation should endeavor to cross that threshold as unencumbered as possible by the archaic remnants of the old era. We should begin our new economic relationship by recognizing that the Soviets have answered the complaints that led to the passage of the Jackson/Vanik Amendment. To do otherwise is contemptuous of the significant steps the Soviets have taken and thus not worthy of the United States. The Jackson/Vanik Amendment has clearly served its purpose. It is time to repeal it. It is time to move on.

Sincerely,

EDGAR M. BRONFMAN.

IN MEMORY OF JOE ROBBIE

HON. LAWRENCE J. SMITH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. SMITH of Florida. Mr. Speaker, in a few short days we will be witness to Super Bowl XXIV. And while we all anticipate a tremendous game, we must not allow the festivities to obscure a truly sad event. As many of you know, on January 7, Joe Robbie, the owner of the Miami Dolphins, passed away.

The loss of Joe Robbie is felt not only by Miami Dolphins fans but also by anyone who ever loved football. He dedicated his life to building the Miami Dolphins into a talented and exceptional club.

Joe Robbie was born on July 7, 1916, in Sisseton, SD. Putting his education on the backburner in order to defend his country, Joe joined the Navy the day after the attack on Pearl Harbor, earning a Bronze Star for commanding landing craft in five Pacific invasions. Joe married his high school sweetheart, Elizabeth Lyle, on December 28, 1942, beginning a 47-year marriage filled with love, support, and children, 11 children to be exact. Returning to finish his education, in 1946 Joe earned a law degree from the University of South Dakota.

Joe Robbie was deeply committed to the political process and was elected South Dakota State Democratic chairman in 1948. In 1960, he was Hubert Humphrey's campaign manager in the Presidential primaries and then served as Humphrey's personal representative on the 1965 inaugural committee when Humphrey was elected Vice President of the United States.

But Joe's true passion was football. On August 16, 1965, with the help of entertainer Danny Thomas, Joe bought the Dolphin AFL franchise. Their 1972 undefeated season is still the only one of its kind, and much of the Dolphins' success can be attributed directly to the phenomenal man who owned them. Joe's dedication to his team further manifested itself in the beautiful stadium that he built, independent of tax moneys, in 1987.

Yet, there is a side to Joe Robbie few know. He was in fact one of Miami's most active community servants. Joe's philanthropy was practically anonymous—typically Joe. He was chairman of the Dade Public Health Trust. This organization oversees Jackson Memorial Hospital, which houses the only existing trauma unit in Dade County. He was involved in the improvement of race relations in south Florida, serving as chairman of the Dade Community Relations Board for 2 years. He committed his personal resources—emotional and financial—to various universities including Barry University, Notre Dame, and the University of South Dakota. Finally, he continued to promote education by sponsoring events such as high school debate tournaments and providing scholarships for American Indians and women law students.

I will miss Joe in many ways. I am going to miss Sunday afternoons with Joe watching his team play ball. I will miss his sharp wit. I will miss a friend committed to the welfare of south Florida. Mainly, I am sorry for the loss that the community now endures.

Joe is survived by his wonderful wife, Elizabeth, and nine children. Tim Robbie, who has been vice president of the Dolphins, will now take the helm and continue the Robbie family tradition. Even in their loss, they are blessed, as is all of Miami, to have been part of the life of so special a man.

H.R. 3772

HON. HOWARD C. NIELSON

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. NIELSON of Utah. Mr. Speaker, I imagine we have all heard the stories by now, or perhaps read about it and the growing nationwide concern regarding this unhealthy practice.

I'm referring to the dumping of untreated human wastes into our streams and rivers; in our towns and cities; and even on the hardworking men and women whose job it is to maintain our Nation's railways.

Mr. Speaker, I'm referring to Amtrak, America's passenger railroad, the only rail carrier that indiscriminately dumps and sprays raw sewage as it crisscrosses the United States.

Many people around the country have expressed serious reservations about this practice, and about Amtrak's rather cavalier attitude toward it all. I share their concerns, and have introduced H.R. 3772.

This bill requires Amtrak to stop the dumping within 3 years, and to begin assessing a service charge on every ticket it sells, to pay for equipment modifications and other changes necessary to achieve compliance.

Amtrak officials have estimated it will cost $147 million to retrofit the rail cars, and add about $2 to the price of a ticket.

Mr. Speaker, H.R. 3772 provides a reasonable, fair means to end this archaic and unhealthy practice. I ask my colleagues to join me in this effort by cosponsoring this legislation.

MICHAEL PARRELL, DIRECTOR OF WILKES-BARRE, PA MEDICAL CENTER RETIRES AFTER YEARS OF SERVICE

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. KANJORSKI. Mr. Speaker, I rise today to pay tribute to Mr. Michael A. Parrell, the director of the Veterans' Administration Medical Center in Wilkes-Barre, PA. Mr. Parrell is retiring after 16 years at the Wilkes-Barre VA Medical Center and has worked with the Veterans' Administration, now Department of Veterans Affairs, for the past 34 years.

Mr. Parrell began serving our area veterans on March 31, 1974. He has overseen the operations of a 405-bed medical facility, two satellite outpatient clinics, and a 120-bed nursing home. The Wilkes-Barre Veterans' Administration Medical Center provides care to veterans living in 19 counties in Pennsylvania, 3 in New York, and 2 in New Jersey. As director, Mr. Parrell was responsible for the management of all resources necessary to serve the veteran population serviced by these facilities.

A northeastern Pennsylvania native son, Michael Parrell was born in Hazleton, PA and graduated from Hazelton High School. He attended George Washington University in Washington, DC, and served in the military from December 1942 to December 1945 with the Army Corps of Engineers.

From 1946 until 1951, Mr. Parrell worked in the insurance division of the VA district office in Philadelphia, PA. He began as an underwriter training officer, became assistant chief of the underwriting section and supervisor of the underwriting unit, and finally held the position of administrative assistant of the underwriting section.

Mr. Parrell worked with the VA department of insurance in the Washington, DC central office from 1951 until 1963. In this department he served in a number of capacities including methods examiner, management analyst, senior evaluation survey officer, evaluation staff chief, and executive assistant to department head. In July of 1963, he became the executive assistant to the director of insurance service in the department of veterans benefits.

In 1964, Mr. Parrell began working with the department of data management in the VA central office. He served as associate director of systems operations service, executive assistant to the department head, and as director of planning and budget staff.

Prior to becoming director of the VA Medical Center in Wilkes-Barre, Mr. Parrell served in a hospital administrative trainee position at the VA Hospital in Washington, DC.

Mr. Michael Parrell has dedicated his life not only to the veterans of the 11th Congressional District but to veterans across the country. I know my colleagues in the House of Representatives will join me in congratulating Mr. Parrell on his retirement and for a career for which he can be proud.

HAVEL'S NEW YEAR'S ADDRESS TO THE NATION

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. LaFALCE. Mr. Speaker, 2 months ago Lech Walesa, in addressing a joint session of Congress, began his remarks with the words, "We, the people." Those words, lifted as they were from our Constitution, dramatically characterized Poland's triumph of democracy.

Just 6 weeks later, another Eastern European leader in another Eastern European country, echoed similar sentiments, telling his people about his dreams from "a republic of the people, [and] which serves the people." That man was Vaclav Havel, The country was Czechoslovakia. The occasion was his New Year's address.

Recently, I led a congressional delegation to central Europe, and had the great honor and privilege of meeting and talking with President Havel. I would like to take this opportunity to share his New Year's message to the people of Czechoslovakia, one which could aptly serve as a timeless message for the freedom-loving people of all nations.

HAVEL NEW YEAR'S ADDRESS TO NATION

Dear fellow citizens. For the past 40 years on this day you have heard my predecessors utter different variations on the same theme, about how our country is prospering, how many more billion tonnes of steel we have produced, how happy we all are, how much we trust our government, and what beautiful prospects lie ahead of us. I do not think you appointed me to this office for me, of all people, to lie to you.

Our country is not prospering. The great creative and spiritual potential of our nation is not being used to its full potential. Whole sectors of industry are producing things in which no one is interested, while the things we need are in short supply.

The state, which calls itself a state of the working people, is humiliating and exploiting the workers. Our outdated economy is squandering energy, of which we are in short supply. A country which could once be proud of the standard of education of its people spends so little on education that today it occupies 72d place in the world. We have laid waste and soiled the rivers and the forests that our forefathers bequethed to us, and we have the worst environment in the whole of Europe today. Adults in our country die earlier than in most other European countries.

Allow me to tell you about a little personal experience of mine. Flying to Bratislava recently, I found time during various meetings to look out of the window. What I saw was the Slovnaft [oil refinery] complex and the Petrzalka suburb immediately beyond it. That view was enough for me to understand that our statesmen and politicians had not even looked, or did not even want to look out of the windows of their planes. None of the statistics available to me would have enabled me to understand more quickly or more easily the situation we have gotten overselves into.

But not even all of that is the most important thing. The worst thing is that we are living in a decayed moral environment. We have become morally ill, because we have become accustomed to saying one thing and thinking another. We have learned not to believe in anything, not to have consideration for one another, and only to look after ourselves. Notions such as love, friendship, compassion, humility, and forgiveness have lost their depth and dimension, and for many of us they merely represent some kind of psychological idiosyncrasy, or appear to be some kind of stray relic from times past, something rather comical in the era of computers and space rockets. Few of us managed to cry out that the powerful should not be all-powerful, and that the special farms which produce ecologically sound and high-quality foodstuffs for them should send their produce to the schools, children's hostels, and hospitals, since our agriculture is not yet able to offer this to everyone.

The previous regime, armed with its arrogant and intolerant ideology, denigrated man into a production force and nature into a production tool. In this way it attacked their very essence and the relationship between them. It made talented people who were capable of managing their own affairs and making an enterprising living in their own country into cogs in some kind of monstrous, ramshackle, smelly machine whose purpose no one can understand. It can do nothing more than slowly but surely wear itself down, and all the cogs in it.

When I talk about a decayed moral environment, I do not mean merely those gentlemen who eat ecologically pure vegetables and do not look out of their airplane windows. I mean all of us, because all of us have become accustomed to the totalitarian system, accepted it as an unalterable fact, and thereby kept it running. In other words, all of us are responsible, each to a different degree, for keeping the totalitarian machine running. None of us is merely a victim of it, because all of us helped to create it together.

Why do I mention this? It would be very unwise to see the sad legacy of the past 40 years as something alien to us, handed down to us by some distant relatives. On the contrary, we must accept this legacy as something which we have brought upon ourselves. If we can accept this, then we will understand that it is up to all of us to do something about it. We cannot lay all the blame on those who ruled us before, not only because this would not be true, but also because it could detract from the responsibility each of us now faces—the responsibility to act on our own initiative, freely, sensibly and quickly.

Let us not delude ourselves: not even the best government, the best parliament, or the best president can do much on their own, and it would be profoundly unjust to expect them alone to put everything right. Freedom and democracy, after all, mean that we all have a part to play and bear joint responsibility. If we can realize this, then all the horrors which the new Czechoslovak democracy has inherited will suddenly cease to appear too terrible. If we can realize this, hope will return to our hearts.

In putting right the general state of affairs, we already have a sound footing on which to build. The recent times, and especially the last 6 weeks of our peaceful revolution, have shown what an enormous generally humane, moral, and spiritual charge and what high standards of civic maturity lay dormant in our society under the mask of apathy that had been forced upon it. Whenever anyone talking to me began to put categorical labels on our people, I always pointed out that society is a very mysterious creature, and that it is never

wise to trust only the particular fact that it is presenting to you, I am glad to have been proven right.

Throughout the world, people are surprised that the acquiescent, humiliated, skeptical Czechoslvak people who apparently no longer believed in anything suddenly managed to find the enormous strength in the space of a few weeks to shake off the totalitarian system in a completely decent and peaceful way. We ourselves are also surprised at this, and we ask where the young people, in particular, who have never known any other system, find the source of their aspirations for truth, freedom of thought, political imagination, civic courage, and civic foresight? How is it that their parents, the generation which was considered lost, also jointed in with them. How is it even possible that so many people immediately grasped what had to be done, without needing anyone else's advice or instructions?

I think that this hopeful aspect of our situation today has two main reasons. Above all, man is never merely a product of the world around him, he is always capable of striving for something higher, no matter how systematically this ability is ground down by the world around him. Secondly, the humanistic and democratic traditions—which are often spoken about in such a hollow way—nonetheless lay dormant somewhere in the subconscious of our nations and national minorities, and were passed on quietly from one generation to the next in order for each of us to discover them within us when the time was right, and to put them into practice.

Of course, for our freedom today we also had to pay a price. Many of our people died in prison in the fifties; many were executed, thousands of human lives were destroyed and hundreds of thousands of talented people were driven abroad. Those who defended the honor of our nations in the war were persecuted, as were those who resisted totalitarian government, and those who simply managed to remain true to their own principles and think freely. None of those who paid the price in one way or another for our freedom today should be forgotten. Independent courts should justly assess the appropriate guilt of those responsible, so that the whole truth about our recent past comes out into the open.

Neither should we forget that other nations paid an even higher price for their freedom today, and thus they also paid directly for us too. The rivers of blood which flowed in Hungary, Poland, Germany, and recently also in such a horrific way in Romania, as well as the sea of blood shed by the nations of the Soviet Union, should not be forgotten, primarily because all human suffering affects every human being. But more than that, they must not be forgotten because it was these great sacrifices which weaved the tragic backcloth for today's freedom or gradual liberalization of the nations of the Soviet bloc, and the backcloth of our newly charged freedom too.

Without the changes in the Soviet Union, Poland, Hungary, and the GDR, the developments in our country could hardly have happened, and if they had happened, they surely would not have had such a wonderful peaceful character. The fact that we had favorable international conditions, of course, does not mean that anyone was helping us directly in those weeks. For centuries, in fact, both our nations have risen by themselves, without relying on any help from more powerful states or big powers.

This, it seems to me, is the great moral stake of the present moment. It contains the hope that in the future we will no longer have to suffer the complex of those who are permanently indebted to someone else. Now it is up to us alone whether this hope comes to fruition, and whether our civic, national, and political self-confidence reawakens in a historically new way.

Self-confidence is not pride. Quite the contrary. Only a man or a nation self-confident in the best sense of the word is capable of listening to the voice of others, accepting them as equal to oneself, forgiving their enemies, and regretting one's own mistakes. As such people, let us try to introduce self-confidence into the life of our community and as nations into our conduct on the international arena. Only thus shall we regain self-respect and respect for each other, as well as the respect of our nations. Our state should never again be a burden or a poor relation to anyone else. Although we have to take a great many things and learn many things from others, we must do this, after a long period of time, as equal partners who also have something to offer.

Our first president wrote "Jesus and not Caesar." In this he followed up both on Chelcicky [medieval philosopher and priest] and Komensky [known as Comenius]. This idea has once again been reawakened in us, I dare say that perhaps we even have the possibility of spreading it further, thus introducing a new factor in both European and world politics. Love, desire for understanding, the strength of the spirit and of ideas can radiate forever from our country, if we want this to happen. This radiation can be precisely what we can offer as our very own contribution to world politics.

Masaryk founded his politics on morality. Let us try, in a new time and in a new way, to revive this concept of politics. Let us teach both ourselves and others that politics ought to be a reflection of the aspiration to contribute to the happiness of the community and not of the need to deceive or pillage the community. Let us teach both ourselves and others that politics does not have to be the art of the possible, especially if this means the art of speculating, calculating, intrigues, secret agreements, and pragmatic maneouvering, but that it also can be the art of the impossible, that is the art of making both ourselves and the world better.

We are a small country, but nonetheless we were once the spiritual crossroads of Europe. Is there any reason why we should not be so again? Would this not be another contribution through which we could pay others back for the help we will need from them?

The home mafia—those who do not look out of their airplane windows and eat specially-fed pigs—are still alive, true, and make trouble from time to time, but they are no longer our main enemy, and international mafias are even less of an enemy. Our worst enemy today is our own bad qualities—indifference to public affairs, conceit, ambition, selfishness, the pursuit of personal advancement, and rivalry—and that is the main struggle we are faced with.

We are going into free elections, and an election battle. Let us not allow that battle to sully the still clean face of our gentle revolution. Let us ensure that we do not lose the sympathy of the world, which we won so rapidly, equally rapidly by getting bogged down in a tangle of skirmishes for power. Let us not allow the aspiration to look after ourselves to flourish once again under the noble attire of the aspiration to serve the general cause.

Now the issue really is not which party, club, or group wins the elections. The issue now is that the elections are won by those who are best in the moral, civic, political, and specialist sense, regardless which party cards they hold. The future policy and the prestige of our state will depend on what kind of personalities we select and subsequently elect to our representative bodies.

My honorable task is to strengthen the authority of our country in the world. I would like other states to respect us for our show of understanding, tolerance, and love of peace. I would be happy if Pope John Paul II and the Dalai Lama of Tibet visited our country even for a single day before the elections take place. I would be happy if our friendly relations with all nations were strengthened. I would be happy if we succeeded even before the elections take place to establish diplomatic relations with the Vatican and Israel. I would like to contribute to peace also by my brief visit tomorrow to our two mutually related neighbors, the GDR and the FRG. I shall not forget our other neighbors either: fraternal Poland, Hungary, and Austria, which are becoming increasingly close to us.

I would like to conclude by saying that I want to be a president of action rather than words, a president who not only looks out of the windows of his airplane carefully, but one, above all, who is consistently present among his fellow citizens and listens to them carefully.

Perhaps you are asking what kind of republic I have in mind. My reply is this: a republic which is independent, free, and democratic, with a prospering economy and also socially just—in short a republic of the people which serves the people, and is therefore entitled to hope that the people will serve it too. I have in mind a republic of people with a sell-rounded education, because without such people none of our problems—whether human, economic, environmental, social, or political—can be tackled.

One of my most distinguished predecessors began his first speech by quoting Comenius. Allow me to end my first speech with my own paraphrase of that same statement: People, your government has returned to you!

VETO OVERRIDE OF H.R. 2712

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. UDALL. Mr. Speaker, today the House had an opportunity to finish the work we began last session. During the first session of the 101st Congress Representative NANCY PELOSI, concerned with the future of Chinese students living in the United States, introduced H.R. 2712. The bill, much debated, extended to Chinese students and scholars some sanctuary from the persecution that they would face from their native government. After the debate, this House spoke with a clear and decisive voice. Not one Member was opposed to the bill. Regrettably, the President choose to veto this important legislation. The President's decision ran contrary to the will of this body and I believe the sentiments of the American people.

The May demonstrations in Tiananmen Square were a tribute to the belief that power rests not with a party or state, but with the people. They appeared to be the natural consequence of the recent recognition by the party that China could not grow by isolation—that in order to grow as a country and as a people they must move ahead. Sadly, the carnage of June 4 demonstrated that China's leaders place more value on their continued rule than the lives of those they govern.

I supported President Bush's initial actions. I believe it was imperative that our country sever any ties to armed forces which would turn their guns on their own countrymen. However, after the clamor of the initial sanctions, the administration appeared to be trying to balance long-term economic and security interests with opposition to repressive regimes. That appearance was given substance by the Scowcroft-Eagleburger mission.

The President feels strongly that his personal form of diplomacy with the Chinese Government will reap the dividends that confrontation will not. While China will no doubt continue to play a pivotal role in world affairs, the administration overtures suggest that it is business as usual.

It is with that assessment that I take issue. The Chinese Government has not admitted the brutal repression of June 4. By all accounts, the persecution and prosecution of those suspected of antigovernment activities continues. The lifting of martial law in Beijing has done nothing to end the arrest, beatings, and executions of Chinese citizens suspected of having contributed their voice to the calls for reform of the Chinese Government.

It is ironic that while the eyes of the world are focused on the resurrection of democracy in Eastern Europe, repression continues in China. Until the Chinese Government prepares to account for its actions and the safety of Chinese scholars living in our country can be assured, I believe it is important that the protections of H.R. 2712 be put in place and be given the force of law.

EMPLOYEES COMPENSATION ACT

HON. JOSEPH P. KENNEDY II

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. KENNEDY. Mr. Speaker, today I am introducing legislation which will provide disabled individuals who receive benefits under the Federal Employees Compensation Act [FECA] with the means to maintain their independence in the privacy of their homes. This legislation will simply increase the personal care attendant allowance under FECA to levels which reflect current costs.

Under FECA, the maximum allowance for a personal care attendant is $500 a month or $16.44 a day. This level was set in 1974 and no further adjustment has been made, causing extreme hardship on disabled individuals who need daily assistance. This problem was brought to my attention by one of my constituents from Somerville, MA. This individual is a permanently disabled quadriplegic who qualifies under FECA for a full time personal care attendant, yet he cannot find anyone to care for him for $16.44 a day. In Massachusetts, it is extremely difficult to find an attendant for less than $7 an hour which not only causes financial hardship for those on a fixed income but also places individuals in the dangerous situation of going without care when finances are low.

The legislation I have proposed will provide a personal care attendant allowance equal to the allowance received under each State's Medicaid Program. In addition, this allowance will be adjusted every 2 years by the percentage increase in the Consumer Price Index. This way, automatic adjustments will be provided to keep up with the cost of living.

According to 1988 Department of Labor statistics, only 225 individuals qualified for an attendant allowance under FECA. This coupled with the fact that home care can prevent premature and costly hospitalization, should convince you that the cost of this initiative will be low. I hope I can count on your support for this legislation which would give these 225 disabled individuals a needed helping hand.

LOOKING AT THE CANADIAN HEALTH SYSTEM

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. STUDDS. Mr. Speaker, the debacle of the Medicare Catastrophic Coverage Act has highlighted the vexing questions we face in expanding Medicare coverage for acute, protracted illness. It has also revealed the striking lack of protection for seniors faced with the need for long-term custodial care in nursing homes.

These problems have prompted increased attention and examination of the Canadian health system, widely perceived to offer universal, comprehensive health care to its citizens—and to do so arguably more effectively and affordably than our own system.

Two editorials, which appeared recently in the Boston Globe, explore whether Canada has achieved its stated goal of health care for all. While acknowledging certain shortcomings in Canada's approach, the editorials detail many features to recommend it, especially when compared to the patchwork system which has evolved in the United States. I found them highly informative and commend them to my colleagues.

A MEDICAL-CARE MODEL—1

With curious eyes, American business and labor and Congress are peering across the border at Canada's national health insurance system. Despite its proximity, few Americans know much about their northern neighbor's medical plan. It is time they did.

Huge problems afflict the funding of health care in the United States; problems expected to dominate political debate as well as labor-management negotiations in the 1990s; problems that threaten the solvency of private insurance carriers and the stability of health-care delivery.

Neither American workers nor employers can afford the constant rise in health insurance premiums; premiums jacked up because they include hidden payment of medical bills for workers and nonworkers who lack health insurance.

The cost of the gigantic government medical programs—Medicaid for the poor and Medicare for the elderly—rises yearly even though the coverage is meager for many expensive aspects of illness—such as medicine or prolonged sickness. Nursing home bills are especially burdensome. Before government will pay nursing home bills, Americans must impoverish themselves.

Worst of all is that 37 million Americans—24 million of them with jobs—have no coverage, private or governmental. Another 60 million have inadequate coverage.

Canada has eliminated these problems. Step by step since 1947 when the province of Saskatchewan enacted the first plan to cover hospital bills, Canada has fashioned a unique national health system: a private system of care, paid for with tax money.

Health care is guaranteed everyone in Canada—citizen or not—within three months of residing there. Coverage is comprehensive. It pays for all doctor's office and clinic visits, including psychiatry; all hospital services—inpatient, outpatient and diagnostic studies; and home care and nursing home care. All that is required is that the care be medically necessary.

Provinces may add services not covered by the national plan, such as prescription drugs, cosmetic surgery, dental care, prosthetics and physiotherapy. Most do, in varying degrees. Unlike European plans, Canadians choose their own doctor. Doctors must accept the fee that they and the government set for physician services. They cannot ask patients to pay more.

Medical-Care providers must be nonprofit to participate in the plan. Hospitals are privately operated but publicly funded.

When the plan was established in 1971, half of the cost of health care in Canada was paid by the federal government and half by the provinces and territories. The plan was expanded and consolidated in 1984.

Today, federal funds are allocated to the provinces in amounts based on growth in the GNP and on population changes. The formula adjusts for inflation and transfers more money to less wealthy provinces with smaller populations to provide comparable medical care everywhere.

The "most striking feature of the Canadian experience," says Dr. Robert Evans, a health-policy analyst at the University of British Columbia, is its universal coverage at substantially lower costs than in the US. Costs. are not lower because Canadian doctors earn less, as is often alleged, than American doctors. In 1986 their gross average was U.S. $110,000.

American doctors have a higher average gross income, but their net is similar because their costs, especially for malpractice insurance, are high. In Canada there is no basis for large malpractice awards because if someone is injured medically—paralyzed, perhaps—lifetime care is paid for.

One significant reason why Canada delivers more health care for less is that it has minimized bureaucratic red tape and administrative expenses. All plans are operated by a nonprofit public authority—the provincial government or its agency. Administrative costs amount to only 2.5 percent of Canadian health expenditures; in the US they consume 8.5 percent.

No forms are needed to see if a procedure is covered; they all are. Eligibility need not be proved or monitored; everyone is covered. No bills are sent to patients; no one pays. No

money is spent chasing uncollected bills; there are none. There is no commercial overhead for insurance, no multiple sets of executives, no money spent to promote competing plans.

Canadians pay directly for almost nothing related to health care. In only three provinces is a premium of $20 to $60 a month still collected from workers or a token fee charged upon entering a hospital. Virtually all of Canadian health care is prepaid with taxes; nearly every dollar goes to medical care.

To Americans, perhaps the most amazing face of the Canadian system is that hospitals do not waste time, money and manpower preparing detailed bills to receive government payment. A hospital's operating costs are paid out of an annual budget it negotiates with the provincial ministry of health.

"We negotiate a year's budget with the government, and we receive 24 checks a year to run the hospital. We don't fill out bills for anybody—not the patient, not the government," says Victor Stoughton, head of Toronto General Hosptial and a former official at Brigham and Women's Hospital in Boston. In patient-care costs—not research or construction—he calculates that two Toronto Generals could be run for the price of one Massachusetts General Hospital.

In the US, hospitals spend millions every year processing government and private insurance forms containing thousands of variations in coverage. Administrative costs for health care in the US are nearly $100 per person; in Canada they are about $20. There, only doctors submit simple claims to collect their fees.

"What's going on in the American health-care system is insanity, it's such a patchwork," says Dr. Sydney Lee, visiting professor of health policy at Havard Medical School and formerly of McGill Medical School in Montreal. "We've got enough money in the system to pay for basic health care for everyone now. We need to allocate it differently. We could redirect $50 billion to $100 billion a year into health care that is now spent determining and monitoring eligibility and processing claims for a multiplicity of coverage. We're in the business of producing bills; they're not. That's a major difference."

A MEDICAL-CARE MODEL—2

Canada's guarantee of health care to all its residents, however remarkable, is not flawless. The tradeoff for universal coverage is delay—up to three months—for elective surgery or superspecialized treatment. Much will be made of this shortcoming in the Canadian system as discussion intensifies in the United States about how health care should be funded here. A clear-eyed perspective will be needed to evaluate the reshaping and refunding of American health care.

In Canada, the purchase and distribution of expensive medical technology—and for providing complex surgery—are controlled by the government and available only in major hospitals. Emergency patients are taken first, urgent cases next, and the rest scheduled in an orderly way.

The savings are enormous. There is little duplication of costly services, and equipment and expertise are fully used. Though patients must wait their turn, this flaw in the Canadian system can readily be overcome—more high-tech equipment and super-specialists, broadly distributed.

Fixing the American health-care system's far more complex problems—millions with no coverage and thousands of variations in health plans—will be exceedingly difficult. Many analysts here feel that patchwork efforts will not suffice; a fundamental change is needed.

Most measures of health-care spending in the United States versus Canada are fuzzy. One that is clear is how much each nation spends per person. In American dollars, the U.S. spent $2,268 in 1988, while Canada spent $1,580. But for $688 less per person there, everyone is covered from birth to death, while no one here has that degree of coverage, and millions have none at all.

Among the many indefensible aspects of health care here is the savagely uneven coverage of the poor. In Alabama, for instance, families of four who earn more than $1,416 a year are denied Medicaid—the national-state program for the poor. Even in states with liberal Medicaid coverage, 40 to 60 percent of those who are entitled to these programs never get enrolled.

The elderly in America now pay more in Medicare premiums and out-of-pocket costs than they did for their entire care in 1965 when the program was enacted. Yet, Medicare is far from comprehensive: it limits hospitalization and carries little meaningful coverage for long-term care or prescriptions.

Coverage for workers is a quagmire ranging from companies that provide broad plans—though few cover out-of-hospital psychiatric care—to companies that offer only partial coverage or none at all. Worse, how much a worker pays for health insurance is dependent upon his employer. As premiums rise, a get-tough attitude by business is now attempting to hand back to workers the cost of health insurance premiums.

As if this were not bad enough, it is the reliance on a private insurance method that is wreaking havoc on the health-care delivery system. Each time a patient requires medical care, a plethora of claim forms is generated. Hospitals, clinics and private doctors must pore through myriad billing forms to find out which patient has what coverage with which company under what restrictions, payment modalities or penalties.

Across the country, tens of thousands of state workers track compliance with Medicaid or Medicare eligibility, and verify claims. And as many more workers at hospitals and insurance companies process claims for payment and notification.

For two decades, medical economists pursued the notion that hard-nosed business practices and competitive health plans would reduce health-care costs. But competition has magnified the costs by compounding the multiplicity of plans, choices, promotion gambits and paperwork. And business-style monitoring of health care has created industries of computerized billing, marketing, collecting and analysis—all at high prices.

America's health-care system is now overwhelmed by payment rules and cost regulations, deadlocked in a framework of concern solely over which bits and pieces are paid for by whom. It has lost sight of the objective already achieved in Canada—health care in accordance with each person's choice for everyone.

HOME AND COMMUNITY-BASED CARE FOR THE ELDERLY

HON. THOMAS J. TAUKE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. TAUKE. Mr. Speaker, today I am introducing two measures to improve the elderly's access to home and community-based care under Medicare.

The first measure eliminates the current 210-day limit on the hospice care benefit. This limit discourages individuals from choosing this alternative to more costly acute care and discourages hospices from participating in the Medicare Program. The Congressional Budget Office estimates that this proposal will increase Medicare outlays by $1 million per year.

The second measure improves eligibility for Medicare home health care coverage by clarifying that "intermittent care" may mean care 7 days a week for up to 38 days. This improvement will help to address the growing need for home care as Medicare beneficiaries are discharged from hospitals more quickly than was often the case prior to the implementation of DRG's. The Congressional Budget Office estimates that this proposal if enacted will increase Medicare outlays by $182 million in 1991; $194 million in 1992; and $208 million in 1993.

I encourage my colleagues to join me in cosponsoring either one or both of these measures. Please don't hesitate to contact me or Jane Williams of my staff at 5-2911 for further information or to cosponsor.

Thank you for your attention to my comments.

CONGRATULATIONS TO THE PHILLIPS 66 COMPANY-SWEENY COMPLEX INDUSTRIAL RESCUE TEAM

HON. GREG LAUGHLIN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. LAUGHLIN. Mr. Speaker, I want to draw my colleagues attention to the achievement of the Phillips 66 Company-Sweeny complex industrial rescue team of Sweeny, TX. The team recently gained worldwide recognition in the first annual industrial rescue competition held in October of last year when the Sweeny team was selected as the grand champion in the competition. As the Congressman from the 14th District of Texas it gives me great pleasure to mention the names of the grand champions who went for the gold. They are Edmund Alvarez, Mark Atkinson, Terry Harvey, Chris Israel, Doyle Keith, Dale Marshall, Cleveland McGaughey, David Nobel, Dennis Parker, Chuck Richardson, Fred Van Wie, Richard Wilson, and Billy Jack Ward.

The industrial rescue team competition consisted of three categories; rescue techniques, emergency medical services, and safety. In addition to winning the grand championship

trophy the Sweeny team was awarded first place trophies in all three of the categories. The competition featured real world rescue scenarios taken from actual industrial settings. This included confined space problems, ladder manways, lowering from pipe racks, and scab air management problems.

Mr. Speaker, when these men are subjected to these potentially life threatening situations and have to think of safely using the appropriate rescue hardware combined with correct medical assessment and treatment for patients, their performance was outstanding.

The specialized, rescue skills of the Phillips 66 Company-Sweeny have already been put to use such as the 14 straight days they spent conducting rescue operations during the company's Pasadena tragedy. Furthermore, they have been on standby for service nationwide, such as the San Francisco earthquake. Clearly the Phillips 66 Company-Sweeny team will serve as a model for other companies and industries when developing a rescue team. Mr. Speaker, should industrial tragedy ever strike without doubt the Phillips 66 Company-Sweeny complex team will be ready to assist.

WE THE PEOPLE * * * BICENTENNIAL PROGRAMS

HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. HUGHES. Mr. Speaker, it is with great pleasure that I rise today to recognize Dr. John Reinard who has served as coordinator for the past 3 years of the "We the People . . . Bicentennial Programs on the Constitution and Bill of Rights" for my congressional district.

"We the People . . ." includes the National Bicentennial Competition, its noncompetitive companion program, Congress and the Constitution, and the National Historical Pictorial Map Contest. This program introduces students to the philosophical ideas of the founders, the historical background of the Constitutional Convention, and the issues and debates that shaped the Constitution. Students participate in simulated congressional hearings involving constitutional issues. Classes, then, can go on to compete at the district, State, and National level.

This program gives students the opportunity to gain a greater understanding of the history and significance of our Constitution. Students can learn from firsthand experience about the process in which they will soon become full members and hopefully enthusiastic participants.

Through John Reinard's efforts, hundreds of high school students have become involved in the program and now with the expansion of the program to elementary and middle school students I am sure that he will be successful in involving hundreds more. I admire and appreciate Mr. Reinard's contributions to teaching young people of New Jersey's Second District about the responsibilities and rewards of being a citizen of the United States and salute his outstanding work.

PROCLAMATION HONORING DR. MARTIN LUTHER KING, JR.

HON. RICHARD RAY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. RAY. Mr. Speaker, on Monday, January 15, 1990, I attended the Fourth Annual Martin Luther King, Jr. Unity Breakfast in Columbus, GA. During the program, Mayor James Jernigan of Columbus presented a proclamation to the Alpha Phi Alpha Fraternity designating "Dr. Martin Luther King Day." I believe this proclamation appropriately honors Dr. King, and I would like to share it with my colleagues.

PROCLAMATION

Whereas, January 14 has been designated annually as Martin Luther King Day; and

Whereas, the Reverend Dr. Martin Luther King, Jr. became a martyr by assassination April 4, 1968; his life ending at thrity-nine years with the bullet of bigotry. The world has always feared and crucified the spiritual giants among mankind who become effective through example, dedication to true spiritual growth, and personal sacrifice which enlists substantial followers. Their martyrdom is the seal of the effectiveness of their message.

Now, Therefore, I, James E. Jernigan, Mayor of Columbus, Georgia, and I, A.J. McClung, Mayor Pro Tem of Columbus, Georgia, do hereby proclaim January 15, 1990 as "Dr. Martin Luther King Day" in our community, as a memorial to this apostle of non-violence in the crusade for human rights; urging all residents to join us in rededicating ourselves to the principles of justice and equality for all.

REAR ADMIRAL KAUP'S TRIBUTE TO VETERANS

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. SKELTON. Mr. Speaker, on Veterans Day, a fellow Missourian, Rear Adm. (LH) Karl Kaup, spoke at the Veterans Day ceremony in the Missouri Capital in Jefferson City. Admiral Kaup is the Director of Strategic Submarine Division of the U.S. Navy. His speech struck a responsive chord within those present and I attach it here so the Members of this body may read it.

Congressman Skelton, Fellow Veterans, distinguished guests, ladies and gentlemen.

As a native of Missouri, it is always a privilege for me to return to my home state. I am particularly honored to participate in today's ceremony as part of your annual observance of Veterans Day. There can be no more fitting occasion than what you have organized today to remember the service of the men and women of the armed forces.

In Washington, D.C. where I work in the Pentagon in the undersea warfare directorate we are constantly reminded of and work with things military. In particular, submarines. As you know there is a submarine under construction at Newport News Shipyard in Virginia which will be named for our state's capital city.

The mission of your namesake, SSN 759, the JEFFERSON CITY, will be a tough one. She is an improved Los Angeles class, fast attack submarine, designed to serve in our front line of defense, designed to go in harm's way. When she is commissioned in 1992, she will represent the finest of this nation's scientific and technological advancements. She will be a dynamic platform, able to peform fascinating, yet dangerous arctic missions below the North Pole, and capable of vertically launching Tomahawk, and Harpoon missiles at targets far over the horizon. She will strike fear in the hearts of the enemy. The JEFFERSON CITY will be a formidable submarine; those men from Missouri and across the nation selected to man her will be fortunate to serve in such a superb fighting ship.

President Kennedy once said, "Since this country was founded, each generation of Americans has been summoned to give testimony to its national loyalty. The graves of young Americans who answered the call to service surround the globe."

On this Veterans Day, that statement still holds true—for Americans of this generation continue to fall in conflict. The 37 sailors who died on board the USS Stark last year, and the brutal slaying of Lt. Col. Higgins remind us all that those serving today exhibit the same dedication, sacrifice, and love of country has been found in any generation in any period of conflict. The lives of service members are at risk every day as America's commitment to world peace is being met around the world. Duty in our military is an inherently dangerous proposition. While their peers pursue college degrees or civilian careers, these young dedicated soldiers, sailors, airmen, and marines have become the quiet heroes of their generation.

Today is a day to honor such men and women—those individuals who have and continue to serve their nation in defense of freedom.

On this Veterans Day, I would like to share with you two thoughts. First, that Veterans Day should be celebrated by all Americans to honor all veterans. And second, that we must retain the will to fight for the same freedoms and liberties that the veterans we honor today have protected in the past.

As many of you will remember, this day marked the end of the fighting in World War I. This armistice day had deep significance for the people of this country because it marked a victory in a major war abroad. That war was the first in which large numbers of American troops and vast amounts of American material helped our European allies to turn the tide of battle.

The United States entered that war reluctantly and only after continued and mounting provocation by the Imperial German government. But once we did join, it became our declared objective, as well as our hope, to help win a victory that would make "the world safe for democracy." We did achieve that victory. The announcement of the armistice was a cause for joyful celebration as well as sober reflection on the tragic costs in deaths and casualties. It was ironic that we gained only some twenty years of uneasy peace with no permanent safeguards for the ideals we had defended.

Thus, when it was decided to commemorate November 11 of each year as "Armistice Day," the occasion became less one of celebration for a victory and more an event for paying tribute to more than four million fellow citizens in uniform who helped to

bring about that victory. In the 1920's and 30's this day also became an occasion to stress an isolationist philosophy that some thought to be wise—maintaining our interests in our own hemisphere behind the protective barriers of two great oceans.

As you know so well, this dream of perpetual peace through isolationism was shattered by events beyond our control. The mounting aggressiveness of war lords in Asia and the rise of dictatorship in Europe exploded into the most destructive war the world has ever known. Once again, huge numbers of Americans were sent overseas to fight, and this time not in Europe alone, but in virtually every part of the world.

When World War II ended at last in August 1945, millions of veterans had been added to the list of those who had unselfishly served their country. Although November 11 would still retain an important share of its original significance, it was fitting indeed to make this Veterans Day one to honor all the veterans who had borne arms in the defense of our nation's security and welfare.

Again the Allied victory in World War II failed to bring reason, mutual respect and peace to the nations of the world. And more than ever before, the interests and survival of our own country were to be affected profoundly by conflict far beyond our borders.

The rapid rise to power of the Soviet Union, and the subsequent formation of a bipolar world would set the stage for decades of struggle witnessed in the Cold War. The diametrically opposing forces behind the ideologies of communism and democracy were to square off in two major conflicts which would cost dearly in American lives.

With the memories of Korea and Vietnam so near at hand, we must be cautiously hopeful for the "Winds of Change" of recent times, the Glasnost and Perestroika of today. We must not react to what we hope or think will be the changes in the Soviet Union but only react to the real events that take place. After all, as we honor our veterans on this day we must not forget, nor forsake the great sacrifices made by past Veterans that truly brought about the changes we are seeing today.

Now my second thought, retaining the will, to continually fight to protect the freedom and liberty which those who preceded us held so dear.

In this country, we have taken upon our shoulders a most serious task of guarding the precious concepts of liberty and freedom. The United States must remain loyal to its ideals and heritage; it must remain steadfast to its obligations of world leadership; it must remain strong, and improve spiritually and militarily. Otherwise, we will not be able to keep faith with our departed veterans.

The rattle of the sword is not music to American ears. The fighting posture is not the typical American posture. Most of our veterans were private citizens. To them home, family, church, business, and friends, and the freedom to have and enjoy them constituted normal living. The business of war making was not to their liking. But when the tidal waves of danger to the nation that had made such things a reality rolled toward them they took up arms and, with courage and singleness of purpose, went out to fight, and to die, to protect and preserve the American way of life. As we attempt to pierce the veil of the future, our best recourse is to judge and evaluate current events and those of the recent past. We see that the responsibility which goes hand in hand with power has increased tremendously. We must not fail this responsibility.

Inherent in our position of international leadership is the requirement that we stand tall and strong-willed. We must ensure our Army, Navy, Air Force, and Marine Corps, are maintained at the highest levels practical, yet even as we carry out this responsibility of leadership we must face the grim prospect that the number of Veterans whom we honor will continue to increase.

If history repeats itself, we will see new trouble spots and new challenges to our security, our patience and our determination. So we must maintain, a military establishment which permits us to deter aggression, but when necessary, to engage and defeat aggression. In his speech concerning George Washington's forgotten maxim, Theodore Roosevelt stated "In all our history there has never been a time when preparedness for war was any menace to peace. On the contrary again and again we have owed peace to the fact that we were prepared for war." This maxim is still true today. Our bitter experience in the defense of freedom has taught us that there is no easy path to peace. There is no way to maintain peace and freedom without cost and commitment to risk.

But military strength by itself is not enough to achieve and maintain an acceptable peace. Our successes have been founded on the wisdom and discrimination of our political leadership, and the full understanding and support of the people. Today, we have the military strength. We also have leadership with discriminating judgment. Most importantly, this gathering today is renewed proof that our citizens will continue to support their nation's leaders in promoting the cause of world peace.

Thus, we can look to the future with confidence as long as we keep alive the concepts and ideals which represent the true meaning of Veterans Day.

To quote from a veterans benediction:

See that you hold fast the heritage that we leave you
Yea, and teach your children its value
That never in the coming centuries their hearts may fail them
Nor their hands grow weak

In their years of crisis, our Veterans exhibited great faith and did not fail us. May we and our children have the courage and strength to hold up that heritage they have left us.

God bless you and thank you very much.

MINISTRY OF DR. LARRY LEA

HON. RALPH M. HALL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. HALL of Texas. Mr. Speaker, before we adjourn today I wish to recognize Dr. Larry Lea and the 10th anniversary of his ministry at Church on the Rock in Rockwall, TX.

Ten years ago, in January 1980, Dr. Larry Lea began his local church ministry with 13 people meeting in a living room for a prayer meeting in Rockwall. In the past decade, the local church has grown to a congregation of more than 10,000 people.

More than 70 local church congregations have been founded across the Nation by this ministry, including a church in north Dallas of more than 1,700 and a congregation in south Dallas of more than 1,200. The foreign missions program, directly supported by Church on the Rock, touches more than 22 nations each year.

Pastor Lea has written three books including his benchmark book: "Could You Not Tarry One Hour?" which is credited by Christian leaders throughout the world as a life-changing book on prayer—including Pat Robertson, Oral Roberts, and countless others.

Three years ago, Larry Lea was encouraged to take his prayer message to the Nation; first, by way of television and his TV ministry now reaches more than 11 million homes each day.

Our world is a better place and we have hope in the preaching of the Word; we have faith that the message is a true and lasting message—and we have charity in the form of the giving of a life to our Lord and Savior Jesus Christ—that dedicated life is Larry Lea.

Mr. Speaker, as we adjourn today, let us do so with love and respect for Larry Lea, his beautiful wife Melva Jo, his associates and coworkers.

SERVING THIS PRESENT AGE: ST. PAUL BAPTIST CHURCH

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. DYMALLY. Mr. Speaker, during the month of April 1990, St. Paul Baptist Church will be celebrating its 83d year of organization. A full month of activities and services are planned. The highlight of the celebrations will be the church's anniversary banquet on Friday, April 27, 1990. The anniversary theme is "Serving This Present Age."

The St. Paul Baptist Church of Los Angeles was organized in April 1907. Since its founding, nine pastors have ministered to the church, each leaving an indelible mark of achievement, contributing to the recognition across this Nation, that the St. Paul Baptist Church is one of the great churches of America, a spirit filled church with love for everybody.

From 1930 to 1946, Dr. Samuel Aaron Williams served as pastor. During his pastorate many programs were inaugurated, the membership grew, and the seed idea was sown giving vision to a new church edifice. Dr. Williams became so totally consumed with the work of the church that his health failed. He passed away in 1946.

Rev. Dr. John L. Branham was called as pastor in 1946. Pastor Branham took the helm and led St. Paul into its golden era as one of the Nation's leading congregations. During his tenure, the church added more than 4,000 new members; the church originated a radio ministry featuring the world famous Echoes of Eden Choir, the broadcast was heard in more than 17 States. In 1949 the dream of Pastor Williams became reality and a new church edifice was started. The structure was completed in 1951 and is currently valued at more than $5 million. Dr. Branham led the church in paying off the debt 6 years ahead of schedule. Once again, membership grew and under the leadership of Pastor Branham, St. Paul

Baptist Church led in the support of missions and educational institutions as well as scholarship awards to students. In 1977 the church endowed a chair at a historically black college, Bishop College, in Dallas, TX, in the amount of $500,000. This gift was nationally recognized as the largest single grant by a black church to any college or university.

In 1985, after fighting the good fight and accomplishing and surpassing many records of achievement, Pastor Branham passed away and his assistant, Rev. Dr. Reginald M. Leffall was elected pastor. Pastor Leffall's tenure has been highlighted by innovative programs, outreach programs and ministries, great growth, and expansion.

Dr. Reginald M. Leffall is a native of Dallas, TX. He completed his undergraduate education at Bishop College, Dallas, TX, with honors. His graduate work was completed at the University of California at Los Angeles, where he was a Crown Zellerbach Fellow.

He has been employed as executive vice president and director of the Advanced Institutional Development Program at Bishop College. In 1985, he was elected as pastor of St. Paul Baptist Church. Under his leadership the church has experienced development of outreach ministries, programs, and great growth and expansion.

Pastor Leffall has received numerous awards and recognitions from various religious, civic, educational, and cultural organizations. He is the recipient of three honorary degrees. In 1973 he was named as one of the outstanding young men in America. In 1977, he was named as one of the outstanding educators in America.

Dr. Leffall is a world traveler, and has represented the United States in various international conferences: 1977, the Republic of China; 1978, the Soviet Union. In 1978 he was honored by President Tolbert of the Republic of Liberia located in Africa.

Pastor Leffall is a member of Phi Delta Kappa Fraternity and Frontiers International.

He is married to Maye Helen Arnold-Leffall, a children's service worker for the county of Los Angeles. Mrs. Leffall is also an adjunct professor at the University of Southern California and California State University at Long Beach.

The St. Paul Baptist Church is to be congratulated on its 83d year of celebration.

DR. HAROLD TAYLOR—1989 EXCELLENCE IN MATH INSTRUCTION AWARD WINNER

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. LANTOS. Mr. Speaker, we in the United States face our greatest threat not on the battlefields nor on our Nation's automobile showroom floors, but in our Nation's mathematics and science laboratories, and in our classrooms. Our Nation's junior high and senior high school students are slipping further and further behind their counterparts worldwide, in Japan, Europe, and the Soviet Union, and we must mobilize to reverse this disturbing trend.

In our national war against mathematical and scientific illiteracy, one of our finest officers is Dr. Harold Taylor. For his lifelong efforts, Dr. Taylor will receive the 1989 Presidential Award for Excellence in Mathematics Teaching at a Rose Garden ceremony.

The Presidential Award for Excellence in Mathematics Teaching is an annual program to recognize our Nation's outstanding math and science instructors. Administered by the National Science Foundation, the awards are made by the President to a teacher from each State in the Union.

Dr. Taylor has a long and distinguished commitment to mathematics and education. A 1958 graduate of Southeastern Oklahoma State University, he went on to earn a master's degree in Mathematics and a doctoral degree in Education at the University of Northern Colorado. Dr. Taylor taught, wrote and served as a school administrator with distinction for 30 years in New Mexico and, to the great benefit of many students in my congressional district, in San Mateo, CA.

Dr. Taylor's contribution to math instruction has had a national impact. He has served on many advisory councils, including the National Science Foundation's planning group on reforms in mathematical education. He is known nationally as a coauthor of such widely used textbooks "Algebra Book 1," "Algebra Book 2 with Trigonometry," "Basic Computation Series," "So You Think You've Got Math Problems," and "Developing Skills in Algebra One."

Mr. Speaker, as a former educator, I appreciate the positive impact of individuals such as Dr. Harold Taylor. A competitive educational system demands effective teaching, and we as a nation are in great debt to those who care enough to devote their lives to instructing our youth.

Mr. Speaker, our national security and our standard of living depend on a steady supply of highly trained young people. The key to education is dedicated individuals like Dr. Harold Taylor. I urge my colleagues to join me in paying tribute to him and to others who are being honored for their vital contribution to our American education system.

H.R. 1095—THE GOVERNMENT WORKPLACE SAFETY ACT

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. GRADISON. Mr. Speaker, in the previous session of the 101st Congress, I reintroduced legislation, H.R. 1095, to clarify the obligation and responsibility of the Federal Government to observe safety and health standards in the workplaces it owns, operates, or controls. I am pleased that over 110 of my colleagues, including several members of the Judiciary Committee, have joined me in this effort.

In the January 15, 1990 edition of Legal Times, Representative LARRY SMITH of Florida, a member of the Judiciary Committee, cogently argued the case for the adoption of this overdue change in the Nation's tort law. I commend Representative SMITH's article to my colleagues and urge them to support this important legislation.

[From the Legal Times, Jan. 15, 1990]

GOVERNMENT SHOULD DROP LIABILITY SHIELD

(By Lawrence J. Smith)

For more than 50 years, workers in Navy shipyards were exposed to asbestos without appropriate safeguards or warnings that—as the Navy well knew—asbestos can cause disability and even death. Asbestos in the Puget Sound Shipyard north of Seattle still poses a danger, according to an April 1989 report by syndicated columnist Jack Anderson.

The nuclear power plant in Fernald, Ohio, was in the news last year because of discoveries that the federal government had allowed the plant to continue operations despite significant radioactive leakage. Local residents and plant workers were exposed to extremely dangerous levels of radiation. Similar stories have been surfacing about nuclear plants in Savannah River, S.C., and Hannaford, Wash. Each of these plants produces munitions and is owned by the U.S. government.

Uranium miners in Arizona, Colorado, New Mexico, and Utah, who were extracting ore under U.S. government contracts, were exposed to high levels of radiation without their knowledge, although the federal government was aware of the risks. Raymond Joe, a miner with lung cancer, testified before the House Judiciary Subcommittee on Administrative Law and Government Relations last November that the working conditions of the miners were horrendous. The extraordinary physical risk of the job was underscored by Joe's statement that, of all the men with whom he had labored in his many years in the mines, only three were still alive.

All these workers and their families are victims. But, under current law, they are prohibited for suing the federal government for damages. Unlike U.S. citizens in any other situation, these people cannot get their day in court.

Citizens may sue the federal government only for certain injuries. The law bars suits when the government's action involved an element of choice and was based on public policy considerations. This legal technicality is called discretionary function.

Take the shipyard case, for example: The Navy had the choice between asbestos or another material when building ships for World War II. The Navy opted for asbestos. That decision falls under the definition of discretionary function. Consequently, injured citizens may sue the shipbuilder or the asbestos supplier, but they cannot sue the federal government that ordered the use of the hazardous product.

The original purpose of discretionary function was to prevent judicial interference in major governmental policymaking. But it has become a liability shield for serious negligence-negligence that has nothing at all to do with public policy.

I and many others in Congress believe that victims of governmental negligence have a right to governmental compensation for their injuries. That is why Congress is considering the Government Workplace Safety Act. This bill would prevent the federal government from avoiding all liability in situations where the plaintiff can show neglect. The bill specifically pertains to cases where the government has violated occupational safety or health standards or

where a harm was caused by negligence at workplaces owned by, operated by, or under contract with the federal government.

This is not a raid on the U.S. treasury. The number of cases in which gross negligence can be proved should not be large. Nor does the bill assume government liability. It would simply permit the injured party to bring the federal government into court where the two would be on equal footing. Asbestosis victims, for instance, would still have to demonstrate that the government knowingly required them to peform work harmful to their health.

Good government does not and should not arbitrarily risk the lives of its citizens. But if it has done so, the least it can now do is to give the victims the opportunity to receive just compensation.

A public opinion poll conducted last April by Houston's Terrance and Assocates suggested that two-thirds of Americans believe the federal government's discretionary-function immunity should be reduced. They are right. The uranium miners in New Mexico, the shipyard personel in Seattle, the families near faulty nuclear plants in Ohio—these people have worked for and believed in their government. Now all they ask is their rightful day in court. And they deserve it.

REAL FREEDOM FOR THE SIKHS!

HON. DAN BURTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. BURTON of Indiana. Mr. Speaker, the Sikhs are free in the Punjab. There is no more persecution in India. If you believe what you read in the national press, everything is just fine in the world's largest "democracy."

This Member of Congress knows better. The election of Prime Minister V.P. Singh has made the job of bringing true freedom to the Sikhs in the Punjab much more difficult. V.P. Singh has made superficial gestures of peace toward the Sikhs, which have allowed India to escape the close scrutiny of their human rights community and the world press. Yet, the repression continues unabated.

Amnesty International—still banned from working inside of India—reports that thousands of political detainees are still being imprisoned without charge or trial under the Terrorist and Disruptive Activites Act. Political activists and those suspected of assisting them have been deliberately and unjustifiably killed by police, paramilitary forces and armed forces; and no attempt has been made to bring those responsible to justice. The Times of India has stated that rape is occurring so frequently, that "cop molests woman" has become almost a daily affair for newspaper readers.

While we hope V.P. Singh can bring peace to the Punjab, there can be little progress until Sikhs regain the basic freedoms that people all over the world are striving for.

As Eastern Europe chooses freedom and the Baltic States and other nationalities are striving for freedom with United States support, our State Department refuses to acknowledge the repression of basic freedoms in the Punjab. Simranjit Singh Mann, a recently elected Member of Parliament, has said that no progress can be made in the Punjab until the government dismantles the repressive machinery of police and army forces in the state. Simranjit Singh Mann should know, for 5 long years he was brutally tortured in an Indian prison where he was held without trial.

Mann has compared Rajiv Gandhi to Adolf Hitler and called the Indian Government's policy in the Punjab a form of state genocide banned by international treaties. I don't have to remind you that Rajiv Ghandi is still in a position where he could regain his post as Prime Minister. Mr. Speaker, we must not turn our backs on the Sikhs in the Punjab.

I would like to submit for the RECORD a couple of statements from Dr. Gurmit Singh Aulakh who also is concerned that things have not changed for the better in the Punjab.

BODY OF SIKH MP FOUND IN CANAL AFTER FIVE DAYS—SIKH LEADER SUSPECTS DEATH WAS "THIRD AGENCY" ASSOCIATION

Washington, D.C., January 4—The corpse of newly elected Member of the Indian Parliament, Jagdev Singh Khudian, was found three miles downstream from his village in a canal yesterday, five days after he was reportedly abducted from his home.

K.P.S. Gill, the Punjab Chief of Police, arrived in Khudian village, Faridkot District, for the cremation ceremony for Mr. Khudian. Upon stating that Mr. Khudian had committed suicide, he was so badly heckled by the crowd that he had to leave.

The crowd reaction was also due to the widespread belief in Punjab that Mr. Khudian's death was the work of the Indian secret police. K.P.S. Gill and other Punjab officials are held responsible by the Sikhs for the thousands of cases of murder and torture of Sikh youth, as well as many cases of police abuse, including rape, of Sikh women.

Agitated MP's caused an uproar in the Parliament over the Khudian when Khudian was still missing. Simranjit Singh Mann, leader of the Akali Dal (Mann) group in parliament, accused Indian intelligence of killing him.

Dr. Gurmit Singh Aulakh, President of the Council of Khalistan, representing the Sikh freedom movement worldwide, said in Washington:

"We definitely suspect foul play and I strongly suspect that this was a political assassination executed by the Indian 'Third Agency' covert intelligence cadre."

The "Third Agency" was created by the Indian government in the early 1980's to create a Sikh radical bogeyman in the Punjab, according to the authors of Soft Target, Zuhair Kashmeri and Brian McAndrew. The book offers evidence that Indian intelligence operatives of the Third Agency were behind the terrorist bombing of an Air-India jetliner in 1985, blamed on the Sikhs.

Aulakh said that he had just talked with Mr. Khudian, a personal friend and college classmate, by phone a week before he died. Khudian told Aulakh that he was about to publicly take a stand in favor of a free and independent Sikh nation, called Khalistan. Khudian also told friends in Punjab about that time that he would make a pro-Khalistan statement in the Indian Parliament, where he had just been sworn in as a new member.

Khudian was one of nine newly elected Sikh nationalist candidates, who won recent landslide victories in the Punjab parliamentary elections. Aulakh noted that Khudian beat a Congress (I) candidate, a former Haryana governor, in his election contest.

Congress (I) is the party named after Indira Gandhi, who ordered the Indian military attack on the Sikhs' Golden Temple in 1984. Rajiv Gandhi carried on the Congress (I) tradition and presided over the most intense persecution of the Sikhs in modern India these past five years, said Aulakh.

Dr. Aulakh has written to President Bush, leading members of the Bush Cabinet, Congressional leaders, Indian Prime Minister V.P. Singh and all of his cabinet, and appealed to Amnesty International and the United Nations, urging an immediate, full-scale investigation into the murder of Mr. Khudian.

"Mr. Khudian becomes the first Sikh nationalist martyr of the Parliament with this atrocity," said Aulakh in a statement. "I have written to V.P. Singh that this murder proves to me and to most Sikhs that they have no guaranteed civil liberties in India, even under the leadership of Mr. Singh and his coalition.

"For just this reason, I see a free and independent Khalistan as the only real solution to the so-called Punjab crisis and the only real guarantee of freedom for the Sikhs.

"Just as you see the freedom movement catching fire across Eastern Europe after forty years of oppression, you are witnessing the same fight for freedom by the Sikhs in the Punjab. Mr. Khudian, my friend, is a casualty of that fight."

Aulakh added that "the shooting of elected Sikh officials will in no way staunch the tide nor the fervor or the Sikh nation for freedom, for independence, for Khalistan."

ANOTHER POLITICAL ASSASSINATION IN PUNJAB—SIKH STUDENT LEADER GUNNED DOWN IN OWN HOME, AMRITSAR

WASHINGTON, DC, January 24.—Harminder Singh Sandhu, Secretary of the pro-independence All India Sikh Student Federation (AISSF), was murdered today by three unknown assassins in a hail of automatic weapons fire in his own home in Amritsar, Punjab, according to sources inside the Punjab.

The gunmen came to Sandhu's home at 7 a.m. dressed like Sikhs with turbans and long shawls traditional for the cold season there. The assassins drove up to Sandhu's home, entered the front courtyard and said they had an urgent message for the student leader from Canada. Sandhu, a young man in his 30's, had spoken earlier to people in Canada via a long-distance telephone call.

Sandhu asked that the visitors be ushered into his room inside the house, where they pulled out their guns and killed him. People in the house dove for cover or ran away at the sound of gunfire, while the unknown assailants fled the scene in their car.

Dr. Gurmit Singh Aulakh, President of the Council of Khalistan, representing the Sikh independence movement worldwide, said:

"The style of this tragic and heinous murder is the classic Indian secret police assassination. It is also obvious that the killing was a well-planned conspiracy, since the assassins were aware that Mr. Sandhu had recently received a phone call from Canada and used this information to gain entry to his home.

"This is an extremely stupid move on the part of the Indian secret police and can only lead to an escalation of violence and killing in the Punjab. The tactic of disguising assassins like Sikhs is not new. The use of

such vigilantes by Punjab police to assassinate supposed Sikh "terrorists" was admitted publicly by former Punjab police commissar, Julio Ribeiro.

"I might add that Ribeiro was rewarded for his assassinations and persecution of Sikhs in Punjab with a double ambassadorship to Rumania and Bulgaria.

"The new Prime Minister, V.P. Singh, must be called to account for his tolerance of the old secret police network in Punjab, still headed by K.P.S. Gill and still employing search-and-destroy tactics against Sikh independence advocates.

"Prime Minister Singh has not moved to release the 15,000 Sikh political prisoners in Indian jails. He has done very little about the recent political assassination of a Sikh nationlist MP, The Hon. Jagdev Singh Khudian. Nor has he repealed the repressive TADA "black laws" which literally give police a license to kill whatever Sikhs they say are terrorists, without warrant, trail or any kind of due process.

Meanwhile, in Chandigarh, Punjab, the Chairman of the Punjab Human Rights Organization, Justice Ajit Singh Bains, reported today that police brutality has increased, rather than decreased, so far during the era of the V.P. Singh government. This includes an increase of illegal incarceration of Sikhs; extortion of money from Sikh families with relatives who are imprisoned for long periods—often years at a time—without trial or legal counsel; the torture and harassment of Sikh detainees, including women detainees; and the "faked encounter" killings of Sikh youth.

Dr. Aulakh said in a statement here that:

"Increased assassination and police harassment of the Sikh community will never kill the desire of the Sikhs for freedom and independence from the repression of India rule. This same repression is now evidenced in the Indian police action in Kashmir. India must recognize the independence and human rights of both the Sikhs and the Kashmiri Muslims.

"New Delhi can effect a peaceful solution to both these crises by simply demarcating the boundaries of free Khalistan and free Kashmir in negotiations with Sikh and Kashmiri leaders."

A TRIBUTE TO FDA OFFICIALS JACK HARTY AND PAT POUZAR

HON. CONSTANCE A. MORELLA

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mrs. MORELLA. Mr. Speaker, the country was shocked and saddened over the deaths of two officials of the Food and Drug Administration while in the Republic of Chile earlier this month. Jack Harty and Pat Pouzar were dispatched to Santiago in response to an invitation by the Chilean government to observe certain security measures that have been instituted to prevent a recurrence of last year's "crisis" involving cyanide-laden grapes.

That scare dominated the headlines, sent shock waves through the Nation, and adversely affected the Chilean economy. In an effort to rebound from this tragic episode that shook consumer confidence, a full-scale effort was mounted to ensure the safety of future U.S. imports of Chilean-grown fresh fruit.

In early January, Mr. Harty and Mr. Pouzar departed for Chile to review the protective measures which are designed to add a measure of safety in the food processing chain. The plane caryring the FDA officials and representatives of the Chilean government and a Chilean-based fruit exporters association crashed in the Andes Mountains, killing all of the passengers and the pilot.

The loss of these men is one that all Americans mourn. I was particularly moved by this tragedy because Mr. Harty resides in Silver Spring, MD, which is located in my district. His 25 years of service with the FDA were marked by high achievement and a strong commitment to furthering the agency's public health goals throughout the world.

His personal involvement and leadership during last year's investigation into the Chilean fruit problem earned him the FDA's highest civilian honor award—the award of merit, "for outstanding dedication and personal sacrifice in conducting foreign inspections to assure the safety of fruit exported to the United States."

The deaths of Mr. Harty and Mr. Pouzar represent a terrible loss of two outstanding public servants. I ask my colleagues to join with me in extending our deepest sympathies to Mr. Harty's wife Cathie and three children—John, Colleen, and Erin. Our condolences also go out to the families of the other men who lost their lives in this accident.

TRIBUTE TO COMDR. JOHN F. WANAMAKER, USN, RETIRED

HON. G. V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. MONTGOMERY. Mr. Speaker, I wish to offer a tribute to a man who has served his country long and faithfully. I cannot let the occasion of the retirement of Comdr. John F. Wanamaker, USN, retired, deputy director of Legislative Affairs for the Retired Officers Association pass without acknowledging the outstanding contributions he has made to his country and to the well-being of millions of current and former service members.

John Wanamaker joined the Navy in January 1943 and served in the Pacific islands during World War II. Upon discharge in 1945, he entered Ohio State University and was subsequently commissioned in the U.S. Navy, and designated a naval aviator in 1952. His illustrious and highly decorated military career spanned three armed conflicts. His distinguished military accomplishments alone would justify this tribute, but Commander Wanamaker did not retire from the Navy, he merely left active duty in 1977 after more than 32 years of service.

Commander Wanamaker continued his extraordinary service to this Nation later in 1977 when he joined the staff of the Retired Officers Association as deputy director of legislative affairs. Commander Wanamaker has devoted the past 13 years to ensuring that the rights and benefits of active, reserve, and retired members of the uniformed services and their families remained secure. Indeed, his masterful representation has contributed greatly to increases in many of the benefits now enjoyed by the total military community.

I personally owe him a large debt of gratitude for the assistance he gave me in enacting and modifying the Montgomery GI bill. His counsel has been invaluable, timely, and straightforward. Many young Americans now will be able to attend college because of the availability of educational benefits under the GI bill.

Commander Wanamaker has testified many times before House committees in support of military personnel, compensation, and related veterans' issues. His extensive background and thorough preparatory research have made his a major voice in matters of concern to veterans and their families. His influence on those he has advised has been immense because Commander Wanamaker has credibility—and he got it the old fashioned way—he earned it.

Among his many achievements, Commander Wanamaker played a major role in increasing the SGLI/VGLI insurance coverage from a maximum of $35,000 to $50,000 for active duty and reserve personnel.

Commander Wanamaker should also be recognized for his untiring efforts in defeating legislative proposals which would have hurt active, reserve, and retired military personnel. Most recently, he helped prevent the imposition of a user fee which would have been required each time an outpatient visit was made to a military medical facility. And, he repeatedly led the charge to block annual attempts to eliminate, cap, or delay cost-of-living adjustments to military retired pay.

We who make the laws of this great land, and all service members—active, reserve, and retired—should be forever grateful to John for his tireless efforts.

Mr. Speaker, we wish Comdr. John F. Wanamaker the very best in the future. He has given unselfishly to his country for some 47 years and he will be sorely missed.

MEDICARE BENEFIT IMPROVEMENTS ACT OF 1990

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. WAXMAN. Mr. Speaker, I am pleased to join with my colleagues, Mr. MADIGAN, the ranking Republican of the Subcommittee on Health and the Environment, and Mr. STARK and Mr. GRADISON of the Ways and Means Health Subcommittee, in introducing today, the Medicare Benefit Improvements Act of 1990. The purpose of this legislation is to provide Medicare coverage for a number of services that were originally included within the Medicare Catastrophic Coverage Act of 1988, Public Law 100-360, that was repealed by the Congress last year, Public Law 101-234. We are joined in this effort by several other Members of the House, including Representatives SCHEUER, WALGREN, SIKORSKI, BATES, COLLINS, and SYNAR, all of whom are members of the Health and Environment Subcommittee.

More specifically, Mr. Speaker, this legislation would provide—for the first time—Medicare coverage for mammography screening services and inhome respite care. In addition,

the bill would expand the current Medicare home health and hospice care benefits. All of these improvements—as well as the small increase in the monthly part B premium required to pay for the benefits—have been drafted to reflect the comparable provisions that were enacted as part of 1988 catastrophic legislation. A more detailed summary of the legislation is provided below.

The sponsors of the bill have been quick to introduce this legislation, Mr. Speaker, because the need for these Medicare improvements is so compelling. Indeed, throughout last year's debate on the repeal of the catastrophic law, Members on both sides of the aisle and in both Houses of the Congress, continued to propose that these benefits be maintained. The overwhelming support for such a plan was well-founded: mammography has proven to be the most cost-effective means of preventing death and disease from breast cancer; respite care and home health services have been shown to help keep the elderly at home, with their families, and out of institutions; and hospice care has been found to give dignity and comfort—as well as less costly services—to the terminally ill.

Unfortunately, Congress did not succeed last year in carrying out this plan. The bill is designed to do so this year.

I should point out, however, Mr. Speaker, that although this legislation picks up where Congress left off last session, it is in no way intended to address comprehensively two of the big holes in the current Medicare Program: coverage for preventive health services and long-term care. The mammography and respite care benefits established under the bill are important, but only small steps in closing these respective gaps. Clearly, even with the enactment of the bill much work remains to be done to strengthen Medicare in both areas.

Mr. Speaker, these Medicare improvements are long overdue and very much needed. They are inexpensive to provide and their return—in terms of lives saved and enhanced—go far beyond the dollars spent. In my view, it would be unwise and unfair to let the scars of the catastrophic debate stand in the way of this kind of real progress.

I urge all Members to cosponsor the bill and look forward to working with them on its enactment.

SUMMARY

MAMMOGRAPHY SCREENING

Mammography screening would be covered for elderly and disabled Medicare beneficiaries. For women 65 years of age and over, exams would be available every other year.

For disabled women under 65 years of age, a baseline screening would be available between age 35 and 40; between age 40 and 49 exams would be available every other year, except high risk individuals could receive a screening each year. Between age 50 and 64, an annual screening would be available.

The reasonable charge would be limited to the lower of $50 in 1991 indexed to Medicare Economic Index (MEI), or the current-law fee schedule. Quality standards would be required beginning in 1991.

IN-HOME RESPITE CARE FOR CHRONICALLY DEPENDENT INDIVIDUALS

In-home care (including homemaker/home health aide services, personal care services, and licensed nursing care) for chronically dependent individuals would be provided for up to 80 hours a year. Individuals would be eligible to receive such services for 12 months after they first meet the Part B limit ($1,780.00 in 1991).

A "chronically dependent" individual would be defined as an individual who is dependent on a voluntary care-giver for daily assistance with at least two activities of daily living (eating, bathing, dressing, toileting, or tranferring in and out of bed or in and out of a chair).

HOME HEALTH SERVICES

The requirement that limits Medicare home health care to "intermittent" visits would be expanded to allow beneficiaries to receive up to 38 consecutive days of care, 7 days a week. The current interpretation of the "intermittent" requirement limits the frequency of home health visits to no more than 5 days a week, for up to 3 consecutive weeks. Current guidelines allowing for the continuation of services under unusual circumstances would be recognized.

HOSPICE SERVICES

The Medicare hospice benefit would be extended beyond the current 210-day benefit period if a beneficiary's physician or hospice director recertifies that the beneficiary is still terminally ill.

HONORING BICENTENNIAL PROGRAM NEW MEXICAN VOLUNTEER

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. RICHARDSON. Mr. Speaker, it gives me great pleasure to recognize and honor a great New Mexican who has gone the extra mile in service to her country.

Michelle L. Giger of Albuquerque serves as New Mexico's Third Congressional District coordinator for "We the People. . . Bicentennial Programs on the Constitution and Bill of Rights," which includes the national bicentennial competition, its noncompetitive companion program, Congress and the Constitution, and the national historical pictorial map contest in the Third District.

Through the dedicated and voluntary efforts of Ms. Giger, hundreds of upper elementary, middle, and high school students in New Mexico have studied the program's curriculum. This curriculum, incorporated in the "We the People . . ." text, introduces students to the philosophical ideas of our founders, the historical background of the Philadelphia convention, and the issues and debates that shaped the writing of our Constitution. Students learn how our Government is organized and how it protects the rights and liberties of all citizens. Finally, and most important, students learn of the responsibilities which accompany the rights of citizenship in a democracy.

It is ironic that while those who have experienced repressive regimes throughout the world are clamoring for the right to vote in free elections, in the United States, only one out of five eligible voters under the age of 30 takes advantage of that very right. With so few young people understanding the purpose and importance of our Constitution, it is clear that we must do all we can to turn the tide of political apathy into a wave of active and informed participation.

I am most pleased to express my admiration and appreciation to Ms. Giger for her impressive contributions to the development of competent and responsible citizenship.

THE CUYAHOGA COUNTY BAR ASSOCIATION 44TH ANNUAL PUBLIC SERVANTS MERIT AWARD RECIPIENTS

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. STOKES. Mr. Speaker, on February 15, 1990, the Cuyahoga County Bar Association will host its 44th Annual Public Servants Merit Awards Luncheon. The event recognizes the exceptional work and contributions of selected county court system employees. The association will present the merit awards in honor of Attorney Franklin A. Polk, who served as chairman of the organization for 40 years.

I would like to salute the Cuyahoga County Bar Association and this year's six public service award recipients. These individuals have averaged in excess of 27 years of public service to their community and have amassed a total of 162 years in public service.

The honorees are: James B. Carter, administrative assistant to the clerk of courts; Michael P. D'Alessandro, probate court auditor; Doris E. Owens, supervisor of the record room, probation department; Gayle H. Price, payroll officer, juvenile court; James T. Sheridan, cashier, Cleveland Municipal Court; and Daniel J. Thomas, assistant chief court reporter.

At this time, I am pleased to share the accomplishments of the honorees with my colleagues.

James B. Carter has spent 29 years in public service in Cuyahoga County. He started in the office of the Cuyahoga County Clerk of Courts, eventually being promoted to chief filing clerk. He is currently the administrative assistant to the clerk of courts, where he has been honored by a proclamation from the clerk of courts in recognition of his excellent work toward the betterment of the clerk of courts office. In 1974, as a member of the Lotus Drive Street Club, Mr. Carter also received a resolution from the Cleveland City Council honoring Lotus Drive residents for their outstanding civic development and community pride.

Mr. Carter grew up in Alabama, and entered the military after graduating from high school. He was an acting corporal in the U.S. Army, earning a certificate from the chemical corps school during his service. Mr. Carter later returned to school to obtain a bachelor of science degree in commercial industries from Tuskegee University. He and his wife Rebecca still reside in Cleveland and have two grown children. Outside of his job, Mr. Carter is a coordinator of Red Cross blood drive and United Way services, and works on his neighborhood food collection drive, including organizing the annual Christmas party for needy children. He serves as the precinct committeeman of ward

1 and is a member of the Cuyahoga County Executive Committee. Mr. Carter also enjoys gardening, fishing, and boating.

Michael P. D'Alessandro began working as a deputy clerk in the accounts department in 1964, and has served the public for 26 years. In 1972, he was appointed probate court auditor, a position which he still holds. Mr. D'Alessandro receives a great deal of pleasure from his job because of the many people whom he meets and is able to help. He serves on the supervisory committee of the credit union and the Ohio Association of Court Administrators.

Mr. D'Alessandro was born and raised in Cleveland, and he and his wife of 39 years have lived for 17 years in Lyndhurst, where he was formerly the Democratic precinct committeeman. Mr. D'Alessandro is trustee of the RIPA social club and a bingo worker at St. Clare Church. In addition, he enjoys traveling, sports, and spending time with his seven children and his grandchildren.

Doris E. Owens has spent 26 years in the probation department of the Cleveland Municipal Court. She began as a typist, later moving to the records room, where she served as both a clerk and a records manager. She became supervisor of the records room 6 years ago. In 1981, Judge C. Ellen Connally presented Ms. Owens with the Outstanding Judicial Service Award.

Ms. Owens resides with her husband and son in Cleveland. Outside of work, she devotes much of her time to St. Henry's Catholic Church, serving the parent teacher organization and various other committees. She also helps to care for her father and grandmother by checking on them both daily before she goes to work. Ms. Owens loves to bowl, and also enjoys shopping and sewing.

Gayle Price entered the juvenile court office in 1963, and she has remained in public service ever since. She began in the steno pool, 4 years later moving to the office of the psychiatric clinic for a brief period. Next, she spent 10 years in the placement department before switching jobs again to assist in the opening of the juvenile court Lakewood branch office. Ms. Price currently serves as a payroll officer for the juvenile court and detention center.

Ms. Price grew up in the Cleveland area, and she and her husband Walter reside in Avon, where they enjoy spoiling their eight nieces and two nephews. Outside of work, Ms. Price is active in the heart fund, cancer society, and leukemia society, as well as in her church. She enjoys bowling, cooking, and music, although her real passion is collecting Elvis memorabilia.

James T. Sheridan joined the staff of the Cleveland Municipal Court in 1967 after spending 5 years working in private industry. Mr. Sheridan has spent 23 years in the cashier's department, where he achieved the second highest score on the last municipal court civil service test. He enjoys his job because of the frequent and long-term contact he has had with many attorneys, and he thinks of the people he deals with as friends and neighbors. Mr. Sheridan was raised in the Cleveland area. A YMCA member for the past 10 years, he has 3 children, and his hobbies are furniture refinishing and attending the theater.

Daniel J. Thomas entered public service in 1959, when he joined the court reporters department of the court of common pleas in Cuyahoga County. Prior to that, he served for 4 years in the U.S. Navy, reaching the rank of radioman 2d class petty officer and receiving Good Conduct and Victory Medals. Mr. Thomas has also received the National Shorthand Reporters Association's highest award, the Certificate of Merit.

Mr. Thomas and his wife Doris have three grown children, and have resided in North Olmsted for 28 years. He is a member of the board of advisers of the Academy of Court Reporting and the former treasurer and a board member of Ridgewood Men's Golf Association. Outside of work, Mr. Thomas enjoys reading and especially golfing.

Mr. Speaker, it is a special honor for me to join in the salute to these exemplary public servant. Employees such as Mr. Carter, Mr. D'Alessandro, Ms. Owens, Ms. Price, Mr. Sheridan, and Mr. Thomas make the system work for all of the residents of the Cleveland metropolitan area.

I join with the bar association, its president, Mr. Lawrence M. Baker, and the Merit Award Committee chairperson, Mercedes H. Spotts, in paying tribute to the 1989 Public Servant Award recipients.

TRIBUTE TO THE LATE PATRICK KELLY

HON. MIKE ESPY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. ESPY. Mr. Speaker, I rise today to give tribute to Patrick Kelly, who died on January 1, 1990.

Mr. Kelly, who was born 40 years ago on a farm in Vicksburg which is now in the Second Congressional District of Mississippi. He was the first American fashion designer to be elected to the 44-member French "Chambre Syndical" Club, a French designers' organization. Mr. Kelly was one of only a few foreigners to belong to this prestigious club, whose members included international designers Yves St. Laurent, Chanel, Christian Dior, and Lacroix.

Mr. Kelly died in Paris, his beloved home of 10 years, but he never forgot his Mississippi roots. He regularly visited his mother, Letha Kelly, who still lives in Vicksburg.

Brightly colored clothing dotted with buttons scattered at random was Mr. Kelly's trademark. The style was inspired by the unmatched buttons his grandmother used to mend clothes he wore while picking crops as a poor child in Mississippi.

Always one to take chances, Mr. Kelly went to Atlanta almost penniless, and opened a small boutique at age 18 by repairing and designing used clothes. He studied at Parson's School of Design in New York for a year before going to Paris in 1980. His small collection was bought by a Paris chain store in 1985, which connected him to the editor of Elle magazine. The magazine gave him a 6-page spread which subsequenty helped him receive contracts with New York retailers.

By 1988, only 3 years later, he had the backing of a major conglomerate and operated a showroom in Paris, generating a sales volume of about $7 million. That year, he became the first American admitted to the Chambers Syndical. He also was the first American to show his collection with international designers in the courtyard of the Louvre in October 1988.

Princess Dianna and performers Madonna, Jane Seymour, and the late Bette Davis were among Mr. Kelly's customers. His collections and the recent news of his death have been noted by the Washington Post, the New York Times, the International Herald Tribune, the Christian Science Monitor, French newspapers and numerous fashion magazines.

Mr. Speaker, I am proud to say that this internationally-reknown man was from Vicksburg, MS. Mr. Kelly's success proves that all Americans, including the poorer members of our Nation, can follow their dreams with passion and make a difference in our world. We are often unaware that we are affected by clothing designers, but in this case we can be sure that Mr. Kelly will inspire many young Mississippians. My fellow Mississippians and I deeply mourn the loss of Mr. Kelly, our native son.

WALTER D. HARRIS

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. JACOBS. Mr. Speaker, America has lost one of its most distinguished sons who was especially close to the U.S. House of Representatives.

Walter Harris was one of the finest people I have ever known. His knowledge of the history and workings of the House of Representatives and the beloved Marine Corps was seemingly endless.

The following news story appeared in the News-Gazette of Lexington, VA, on December 20, 1989.

Mr. Harris' death stilled a wise and friendly voice.

[From the News-Gazette, Lexington, VA, Dec. 20, 1989]

WALTER D. HARRIS

Walter Dunklin Harris, Jr., 64, former deputy clerk of the U.S. House of Representatives, died Sunday, Dec. 17, in Stonewall Jackson Hospital. The cause of death was lung cancer.

He was born Aug. 14, 1925, in DeSoto, Mo., the son of the county clerk for Jefferson County. He was appointed a page in the House of Representatives in late 1940 and served in that capacity until enlisting in the Marine Corps at age 17. During the war he served with Headquarters Squadron, Marine Aircraft Group 31 on Kwajalein Atoll and RoiNamur in the Marshall Islands. He was awarded the Navy and Marine Corps Medal for bravery in September 1944. After the war Harris had service in Peking, China, Korea and Guam. He was honorably discharged in February 1949 with the rank of staff sergeant.

Following military service Harris returned to the U.S. Capitol and was appointed

deputy clerk of the House of Representatives, serving until early 1961 when he joined the new Kennedy administration in the office of the executive assistant to the postmaster general. He was subsequently instrumental in the effort that culminated in the Postal Reorganization Act of 1970 and the transfer of postal functions to the United States Postal Service.

He retired from federal service in May 1971 and served for a year as a lobbyist for the American Medical Association. He subsequently moved to a farm near Libertytown, Md., and continued as a consultant to TRW, Inc., and the Commonwealth of Puerto Rico. He fully retired in 1977 and moved to Lexington and later to his farm on Rt. 2, Lexington.

Surviving in addition to his wife, Cynthia, and his mother, Mrs. Nelle Harris of Alexandria, are four children from his second marriage, Francis, Emily, Celia and Michael Harris, all of Rt. 2, Lexington. By a previous marriage to Mary C. Donovan he is survived by nine children, Karen C. Harris of Chicago, Ill., Walter Dunklin Harris III and David Ford Harris, both of Edinburg, Mary Christina Lopez of Spotsylvania, Nancy Burley of Burke, Julia Dodson of San Marcos, Calif., Kathleen P. Harris of Arlington, Timothy Harris of Los Angeles, Calif., and Patrick Harris of Fairfax County. He is also survived by one brother, David F. Harris of Alexandria, and eight grandchildren.

The funeral will be conducted Thursday, Dec. 21, at Grace Presbyterian Church at 2 p.m. by the Rev. Paul Carter, the Rev. William A. Cole and Rev. J. Morton Biber. Burial will follow in Collierstown Presbyterian Cemetery. The family will receive friends today (Wednesday) from 5 to 6:30 p.m. at Harrison Funeral Home.

VETO OVERRIDE ON CHINESE STUDENTS

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. ANDERSON. Mr. Speaker, we are here today voting to override a Presidential veto. While this Congress was out of session, President Bush vetoed H.R. 2712, the Emergency Chinese Adjustment of Status Facilitation Act. Due to this action, over 32,000 Chinese students in this country are vulnerable to deportation, their fate subject to an administrative decision.

The recent visit to China by Mr. Scowcroft and Mr. Eagleburger represents a policy of appeasement and reconciliation to a group of hard-line, repressionary politicians of the type we have seen recently toppled in Eastern Europe. It seems a bit too soon for two of our highest officials to knock at the door of Li Peng and Deng Xiaoping asking to rework our political and economic ties. At the same time, I have constituents who send me letters detailing their anger at the government shootout in Tiananmen Square. Along with those letters came one very poignant picture, the bodies of several students crushed by tanks.

Who pays the price of this appeasement? The Chinese students in this country pay, the Chinese people pay, and this country pays. The President says he did not want to offend the Chinese Communist Government and have China make good on its threat to revoke student and cultural exchanges. When have we started to heed such threats? Will we sacrifice the lives of those here for the promise of a few more students here tomorrow? And would these future students be graduates of 2 years on the work farms and a Marxist-Leninist-Maoist re-indoctrination?

But this decision involves more than just 32,000 students. It saddens me that this country, standing as the pillar of democracy in the world, a country that the people of the world turn to as symbolic for the condition they strive to attain, could then turn its back on those very people who actively fight for the same principles we hold so dear. I remind you of the image of a single man, standing alone in front of three oncoming tanks. With words and courage alone he stopped those tanks. He succeeded because he was willing to stand up to any power in order to achieve what he knew was right. Now, in the face of Mr. Bush's actions, all of Congress plaudits to that students deeds, to the bravery of his comrades, all our condemnations of the Chinese Government's actions go to naught. Will we stand idly by? I think we should not. I urge my colleagues to override a veto. This country must back up its ideals with actions. Support the Chinese students, let them experience the euphoria of democracy that has spread through Eastern Europe. Override the President's veto.

U.N. CODE OF CONDUCT ON TRANSNATIONAL CORPORATIONS

HON. GUS YATRON

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. YATRON. Mr. Speaker, I rise to discuss the status of the U.N. Code of Conduct for Transnational Corporations. As chairman of the Subcommittee on Human Rights and International Organizations, I conducted hearings on this issue last November to look at the outstanding issues and impediments preventing completion of the code, the administration's policy toward the code, and what positions the U.S. delegation should take to resolve remaining problems and promote completion of the code.

Transnational corporations [TNC's] have come to play an increasingly important role in the world economy since World War II, and foreign direct investment is one of the most widespread forms of international economic activity. The total value of such investment undertaken by approximately 20,000 TNC's with 100,000 affiliates exceeds $700 billion. With annual flows being approximately $50 billion, about one-quarter is directed toward developing countries. Transnational corporations are active in all economic sectors.

While an international framework exists for trade, money, and finance under GATT and the IMF, there is no corresponding regime for direct foreign investment. This fact has led to efforts to adopt international instruments dealing with the conduct and treatment of transnational corporations, under the auspices of the U.N. Commission on Transnational Corporations and the U.N. Centre on TNC's.

The primary purpose of the codes is to set out the rights and obligations of both TNC's and states, creating a stable and predictable framework within which their relationship would evolve in a mutually satisfactory manner, while at the same time minimizing the potential for friction and conflict arising from these relationships.

Twenty years ago the prevailing assumption in most developing countries was that such large business corporations were inherently bad and should be state controlled. Today, many governments feel that TNC's can play a constructive role in development. The U.S. has an interest in securing a stable, predictable environment for direct foreign investment to reduce global debt, promote world growth, expand American markets, project a positive U.S. image, and ensure expansion of free-enterprise systems. Moreover, the U.S. has become a major home market for foreign investment, a relatively new phenomenon, which carries serious implications.

About 80 percent of the code has been agreed upon. However, some key issues remain to be resolved, including noninterference in internal political affairs by TNC's, the applicability of a body of customary law, nationalization and compensation, jurisdiction and dispute settlement, and national treatment of TNC's.

The subcommittee conducted hearings in the past, and the previous administration was not very enthusiastic about completing the code. Our last hearing, which included prominent witnesses from the business community, consumer organizations, academia, and the State Department, revealed that the current administration is also reluctant to pursue code negotiations.

In an effort to encourage more serious consideration within the administration of working actively toward completing the code, I along with subcommittee colleague, Congressman WAYNE OWENS, wrote directly to President Bush. I am submitting a copy of the letter to the RECORD for review by the Members of this Chamber.

CONGRESS OF THE UNITED STATES,
COMMITTEE ON FOREIGN AFFAIRS,
HOUSE OF REPRESENTATIVES,
Washington, DC, December 21, 1989.

THE PRESIDENT,
The White House, Washington, DC.

DEAR MR. PRESIDENT: As you are aware, the Subcommittee on Human Rights and International Organizations conducted a hearing on the U.N. Code of Conduct on Transnational Corporations. We were somewhat disappointed by the Administration's unenthusiastic approach toward achieving an acceptable Code in the near future. We were hoping that, as a former U.N. Ambassador, your support for this endeavor would be stronger than your predecessor's. We are appealing to you to direct the State Department and the U.S. Mission to the U.N. to reconsider your policy and assume greater international responsibility in the development of fair and reasonable standards of corporate and financial activities carried across national boundaries.

The international financial environment has changed considerably over the past few years. In general, developing nations no

longer view TNCs with deep hostility, and internationally-recognized standards of appropriate conduct by TNCs cannot be considered an attempt to restrict the freedom of American firms. In fact, many of our home markets and many of our domestic firms have been taken over by foreign enterprises. Our country is greatly affected by business decisions made outside of our national borders.

Clearly, we are better able than less-developed countries to cope with offensive or illegal trade practices perpetrated by foreign firms. However, policies which would not be permissible for American-owned companies, are being persued by TNCs based overseas. Thus, it is important to American business and the world's consumers that international trade now be subject to comprehensive fairness and scrutiny. The U.N. Code of Conduct, we believe, could accomplish this objective. It would not be a binding set of laws, but an internationally desirable set of standards which would carry the imprimatur of the U.N. as representing good practices and good conscience in the world's marketplaces.

Sincerely,

WAYNE OWENS,
Subcommittee on Human Rights and International Organizations.
GUS YATRON,
Chairman, Subcommittee on Human Rights and International Organizations.

A HAND IN MEMORY TO THE HOLOCAUST

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, late last year a large bronze hand rose high into the midday Sun and settled softly atop an outstretched arm. This bronze hand exemplifies a Holocaust Memorial located in the heart of Miami Beach. On a 2-acre lot at Meridian Avenue and Dade Boulevard, the 42-foot sculpture rises from a rotunda and is sure to evoke powerful emotion from both Holocaust survivors and those who know of the Nazi death camps only from history books.

The Holocaust Memorial was built with private contributions to honor the 6 million Jews who perished under the Nazis. To mark the arrival of this tremendous monument, Nobel Peace Prize winner Elie Weisel will commence a dedication on February 4, 1990.

The memorial itself depicts a massive hand above Holocaust victims crying out for help. The nearly life-size forms of women holding crying babies, men lifting their arms in forsaken terror and bodies twisting across each other are images drawn from original photographs of the Holocaust.

Everyone who observes the monument will conceive a different reflection. Some may see the loving hand of a mother. Others may see hope in the hand opening toward the sky. But for all it will be a jarring reminder that abstract death counts sometimes cloak the individualized horror of genocide.

The most extraordinary part of the memorial is the architecture. It allows people to experience for themselves something that simply can not be expressed.

I am honored to salute the leadership and generosity of the many individuals involved in this project.

ABRAHAM CHARLES SUSSMAN

HON. JIM BATES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. BATES. Mr. Speaker, I rise to commend the enormous work that Abraham Charles Sussman of San Diego has done in promoting recognition for police officers.

Mr. Sussman was recently recognized by the Fraternal Order of Police and the Federal Bureau of Investigation for his work in establishing Peace Officers Memorial Day. On October 1, 1962, President John F. Kennedy signed into public law a commemorative designating May 15 of each year as Peace Officers Memorial Day and the calendar week of each year during which May 15 occurs as Police Week. This memorial day is in honor of police officers who have lost their lives or were disabled in their efforts to maintain law and order.

Police officers work tirelessly and selflessly on behalf of the people of our Nation regardless of the peril or hazard to themselves. They safeguard not only the lives and property of their fellow Americans, but our internal freedom as well. We owe much to police officers including protection against civil disorder and violence.

While recognition of the service that police officers perform was well documented in the Congress, the work Mr. Sussman has done has not been. Mr. Sussman personally lobbied for this commemorative. Beginning in 1958, Mr. Sussman wrote thousands of letters to many public officials in support of this cause, including the Governor of Kentucky, Albert Bennett "Happy" Chandler. Finally, in 1962, President Kennedy recognized Peace Officers Memorial Day on the national level. It is in large part due to Mr. Sussman's efforts that peace officers have received the high degree of respect that they so richly deserve. Abraham Charles Sussman was the moving force behind this recognition.

CITIZEN-VOLUNTEER GLYNN ATKINSON

HON. ROBIN TALLON

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. TALLON. Mr. Speaker, for more than a year now my Florence, SC, district office has benefited immensely from the hard work and dedication of Mr. Glynn Atkinson. Glynn's efforts on behalf of my office and the Sixth District of South Carolina go way beyond the ordinary call of duty as a citizen volunteer.

Glynn has answered phones, accompanied me on district visits, assisted in case work and stood in for ill staff. Throughout his time in my office, he has performed these eleemosynary duties with graciousness and eagerness. I would wish for my colleagues a volunteer of Glynn's caliber.

Glynn has a special commitment to serving citizens of this country and he has done so for his entire life. Most notable is his military record. Lance Cpl. Glynn Atkinson served with distinction in Vietnam. As a Marine in the First Division, he received the Presidential Unit Citation Award for combat service for the period of September 16, 1967, to October 31, 1968. He also recieved a Meritorious Unit Commendation awarded to 11th Motor Transport Battalion for the period September 16, 1967, to December 31, 1968.

Among his many other military citations is a Good Conduct Medal, National Service Defense Service Medal, Vietnam Service Medal with four bronze stars, the Republic of Vietnam Meritorious Unit Citation, and the Republic of Vietnam Campaign Medal with device.

The Purple Heart is Glynn's most telling award. He received the Purple Heart for wounds he sustained in action on July 7, 1968. Despite Glynn's 100 percent disability from his wounds, Glynn continues the spirit of the Purple Heart by seeking out service to his community and neighbors. It is a great honor that he has chosen to volunteer in my office.

TRIBUTE TO MAJ. MARTIN LIFSCHULTZ

HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. MRAZEK. Mr. Speaker, I rise to pay tribute to Maj. Martin Lifschultz of Dix Hills, NY. Major Lifschultz was recently named commander of the 2d battalion, 14th regiment, of the New York Guard.

The New York Guard is an organization dedicated to assisting our communities in preparing for and responding to manmade and natural disasters. The men and women of the Guard volunteer their time and efforts throughout the year to provide this essential service.

The 14th regiment, under the able leadership of Major Lifschultz, serves the Merrick-Freeport area as well as other communities on Long Island's South Shore.

Mr. Speaker, the dedicated men and women of the New York Guard prove that the values of voluntarism and community spirit are still alive and well in America today.

I am particularly proud of the efforts of Major Lifschultz. For the past 17 years, he has served the New York Guard with pride and distinction. In additon to his meritorious service to the Guard, Major Lifschultz holds a Bronze Star, Purple Heart with oak-leaf cluster, the French Croix de Guerre, and the New York State Conspicuous Service Cross for his wartime service.

On behalf of all Long Islanders, I want to thank Major Lifschultz for his selfless service to the community and wish him well in his future endeavors.

FRANCES HESSELBEIN: A LEADER AND A ROLE MODEL

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mrs. SCHROEDER. Mr. Speaker, I offer my best wishes to Frances Hesselbein as she leaves her post as the National Executive Director of Girl Scouts of the U.S.A. this month. As a former Girl Scout myself, I have a deep affection for the program.

Mrs. Hesselbein led the Girl Scouts for the past 13 years, and saw the organization through many changes. She has worked to increase membership throughout the eighties, including dramatic increases in racial/ethnic minorities. She is an excellent manager, leader and is unsurpassed in her dedication to community service.

Mrs. Hesselbein has been an excellent role model for the youth of America. She worked to change their lives for the better, and to provide equal access for all to her dream. She focused on each individual to help them attain their own potential and be the best they could be.

Mrs. Hesselbein's contribution to the education of our youth will always be remembered, and although she will be missed, she will forever be a part of the Girl Scouts, and I would like to thank her for all the effort and good will she has put into shaping the future of the Girl Scouts, and the youth of America.

IN CELEBRATION OF THE CHINESE NEW YEAR

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. GREEN. Mr. Speaker, as a Member of Congress privileged to represent Chinatown in New York City, I should like to announce that Saturday, January 27, marks the beginning of the Chinese New Year. The Chinese year 4688 is the Year of the Horse, a totem of stamina, speed, and reliability.

The Chinese New Year season is a time of kindness and goodwill to all, and a time of forgiveness and reconciliation. It is celebrated on the first day of the first month of the lunar calendar. The celebration lasts several days, beginning with family observances and ending with gala festivities. For the Chinese, it is a time of closing the business of the old year, clearing debts, and cleaning house.

The Chinese community is a source of immense pride to our city, and their culture brings enrichment to the lives of all New Yorkers. I am proud to celebrate with them at this special time and wish them a very happy new year.

"FIXING" THE NOTCH

HON. CASS BALLENGER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. BALLENGER. Mr. Speaker, the Social Security "notch" continues to be an issue that causes concern and misunderstanding among senior citizens. The most misunderstood point of all, however, is that legislation to fix the notch will actually be given serious consideration.

While many Members are eager to sponsor proposed fixes, few are willing to actually put this measure to an up-or-down vote. The leadership of the House, by refusing to bring this measure before Congress, protects those Members who seek to gain political mileage from their sponsorship of legislation. In public, sponsors can pretend to support "fixing the notch," while knowing full well the legislation will never come to a vote in the House.

In the 100th Congress, I signed a discharge petition calling for a vote on notch legislation. I have again signed a discharge petition this Congress. It is time to take this matter off the back burner and subject it to full and vigorous debate, resolving the so-called notch issue once and for all. I urge the cosponsors of notch legislation to join me and others to force a vote on this issue.

DORIS MORTON, A "WE THE PEOPLE . . ." LEADER

HON. WILLIAM H. NATCHER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. NATCHER. Mr. Speaker, we must not neglect to pass on to our youth the understanding of the fundamental principles and values of our democratic institutions that leads to a reasoned commitment to their preservation and improvement. The events that have occurred around the world during the past several weeks makes this more important than ever.

I am pleased to commend the efforts of one of our educational leaders in my congressional district whose dedication to the improvement of the civic education of our students has been exemplary. Through the dedicated and voluntary efforts of Doris Morton, thousands of our students have participated in a program designated as "We the People . . . Bicentennial Programs on the Constitution and Bill of Rights." This curriculum introduces students to the philosophical ideas of our founders, the historical background of the Philadelphia Convention, and the issues and debates that shaped the writing of our Constitution. In this program, students learn how our Government is organized and how it protects the rights and liberties of all citizens. Finally, and most important, students learn of the responsibilities which accompany the rights of citizenship in a democracy.

It is a pleasure for me to express my admiration and appreciation to Doris Morton for her impressive contributions to the development of competent and responsible citizenship.

INTRODUCTION OF A JOINT RESOLUTION DESIGNATING "NATIONAL WATER RECREATION SAFETY WEEK"

HON. JOHN J. RHODES III

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 24, 1990

Mr. RHODES. Mr. Speaker, today I am introducing a joint resolution designating the week of May 20, 1990, through May 26, 1990, as "National Water Recreation Safety Week."

This resolution is inspired by the drowning death of one of my constituents, K.C. Johnson, of Mesa, AZ. He died in a boating accident on an Arizona lake. This senseless, needless accident caused his family to establish the K.C. Johnson Memorial Foundation to assist families whose loved ones have died in drowning accidents. The foundation also provides public education regarding the dangers of water-based recreation and safeguards that should be taken in our recreational waters.

Drowning is the second leading cause of accidental deaths of persons 5 through 44 years of age in America. Alcohol and drugs are involved in 2 out of 3 of those accidents. The highest drowning rates occur among children under 5 years of age. On average, 1,200 deaths occur each year in the United States as a result of boating accidents.

These are preventable accidents that needlessly claim the lives of our children and young adults. This resolution will help increase public attention to the dangers as we approach the peak water recreation season this coming summer. I invite all of you to join in cosponsoring this legislation to help carry out the education and public awareness work of the K.C. Johnson Memorial Foundation, the National Water Safety Congress and similar organizations across the country.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, January 25, 1990, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

JANUARY 26

9:00 a.m.
Armed Services
To hold hearings to receive testimony from the Subcommittee on Defense Cooperation of the North Atlantic Assembly.
SR-232A

JANUARY 29

10:00 a.m.
Banking, Housing, and Urban Affairs
To resume oversight hearings on the activities of the Resolution Trust Corporation (RTC).
SD-538

JANUARY 30

9:15 a.m.
Labor and Human Resources

SD-366

HOUSE OF REPRESENTATIVES—*Thursday, January 25, 1990*

The House met at 11 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Teach us, O God, a unity of purpose that brings us together to do the good work that we have been called to do. We admit our differences, our prejudices, and we pray for the gifts of the spirit that free us to live lives that are worthy of our responsibility. Bless the men and women here and the people of our land, unite the nations of the world and every person of good will in an attitude of common respect. May we be faithful to do Your good will now and evermore. In Your name, we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. The Chair will ask the gentleman from Illinois [Mr. POSHARD] if he would kindly come forward and lead the membership in the Pledge of Allegiance.

Mr. POSHARD led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 228. Concurrent resolution to express the sense of the Congress regarding the 25th anniversary of Volunteers In Service To America.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 319. An act to effect an exchange of lands between the United States Forest Service and the Salt Lake City Corporation within the State of Utah, and for other purposes;

S. 1046. An act to amend the Wild and Scenic Rivers Act of 1968 by designating a segment of the Merrimack River in the State of New Hampshire for study for potential addition to the National Wild and Scenic Rivers System, and for other purposes; and

S. 1594. An act to revise the boundary of Gettysburg National Military Park in the Commonwealth of Pennsylvania, and for other purposes.

DENVER BRONCOS ARE GOING TO WIN THE SUPER BOWL

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, the Denver Broncos are going to win the Super Bowl. Not because Denverites are vulgar and believe "winning is the only thing." We do not just look at our past Super Bowl record. No, Denver is a compassionate city. We are very worried about what will happen if we do not win. Poor San Francisco will become known as "Titletown USA." San Francisco is not Green Bay, and I think it would be very embarrassing for them to continue to have the best football team on the planet. The Denver Broncos are going to spare them that embarrassment.

MAJ. EILEEN M. COLLINS NOMINATED TO BE FIRST WOMAN PILOT FOR SPACE SHUTTLE

(Mr. HOUGHTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOUGHTON. Mr. Speaker, I do not come from Colorado, and I do wish the Denver Broncos good luck. However, as New Yorkers are always looking over the next hill to see what the future will be, maybe it will be next year the Buffalo Bills' year. That is not the reason I am here.

Mr. Speaker, the reason I am here is I have very exciting news. It is from the southern tier of New York State.

NASA has just nominated an Elmira, NY, native, Maj. Eileen M. Collins, of the United States Air Force, to be the first woman pilot of the Space Shuttle Program.

This is not only great news for Major Collins and our district, but it is an important nomination for the future progress and development of the Space Shuttle Program.

On behalf of everyone in the southern tier of New York, I wish Major Collins the best of luck in her already successful career with NASA, and particularly congratulate her husband and her parents, Jim and Rose Marie Collins of Elmira.

DO NOT FORGET COAL MINERS IN CLEAN AIR DEBATE

(Mr. POSHARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. POSHARD. Mr. Speaker, this year starts on a very down note for me and my district in southern Illinois.

Here is the headline in the Southern Illinoisan newspaper: "Old Ben 21 Closes; 337 Left Jobless," 337 hard working men and women whose lives are being turned upside-down.

All of us in my area know someone who is personally affected. Two family members of my staff are among those being put out of work. And we fear this is the first dispatch of more bad news to come.

I know clean air legislation is a priority for this session. But I am here to ask my colleagues to join those of us from other coal States to modify any legislation that puts even more people out of work.

I support cleaner air, land, and water. But we cannot stand by and watch these cleanup efforts be financed on the backs of working men and women in the coal fields of this country.

They have worked too long for us to desert them now. Join me in standing by them, and standing up for them in this important debate.

The newspaper article follows:

OLD BEN 21 CLOSES; 337 LEFT JOBLESS

(By Norm Heikens)

Southern Illinois lost another 337 coal mine jobs over the weekend, a harbinger of $13 million in payroll draining from the economy.

Old Ben No. 21 employees received layoff notices Monday because the mine near Sesser is closing.

In announcing the end of the 30-year-old mine, Bill Hake, vice president of Old Ben's Illinois Division, said 288 union miners and 49 company employees will lose their jobs in late March or early April.

Hake explained that No. 21, the smallest of four mines Old Ben has in the state, had become too expensive to continue operating.

"There's still a little bit of coal left, but we can't mine it at a price utilities are willing to pay for it," he said, adding that the mine lost money last year. "The mine has to be able to stand on its own, and it couldn't do that."

United Mine Workers District 12 President Jerry Jones said the announcement came soon after miners' hope had begun to inch upward.

Old Ben had been put up for sale last summer by its parent company, British Petroleum, in an effort to consolidate its oper-

ations, but was taken off the market just before Christmas.

Employees hoped a purchasing company would have had coal contracts to keep the mine operating.

"We didn't know what was going to happen with the sale," Jones said. "When the sale didn't go through, there was a rumor there would be a pretty good-sized layoff in December."

Their jitters were just beginning to ease when the announcement was made.

Union employees will be put on call-back panels, but already 400 to 500 workers are on the list, he said. The problem is that no new mines are opening.

Salaried employees might be out of work permanently.

"Some of the ones with less seniority and less performance will be looking for work," he said.

Historically, No. 21 produced premium coal. Reserves on the west side of the mine were lower in sulfur, but about 30 miners were laid off in December when the reserves on that side ran out.

Reserves on the east side are higher in sulfur, and with utilities being reluctant to buy large blocks of coal, there was little assurance a market would develop if the mine continued to operate, Hake said.

Possibilities of opening new mines soon are practically nil, he said.

In order to justify a $100 million mine opening, it is considered expedient to have a utility contract for at least half the reserves, Hake said. That isn't about to happen in a day when utilities are buying on spot markets.

Utilities and mines alike are keeping a close eye on Congress as it begins work this year on clean-air legislation. Many observers feel tighter restrictions could ruin the market for Illinois basin coal, which generally is high in sulfur.

Jones thinks a few miners might be old enough to retire.

"We're hoping some people can improve their skills and move into other occupations," Jones said. But "We're very frustrated."

Jones said about 500 miners worked at No. 21 during peak employment.

The mine has produced 60 million tons from 650 feet below the surface, Hake said. It had been a longwall operation for a decade until October.

The other three Old Ben mines employ between 300 and 320 workers, Hake said.

ON THE FIRST ANNIVERSARY OF THE CEDC

(Mr. UPTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. UPTON. Mr. Speaker, today I rise to pay tribute to the Twin Cities area Community Economic Development Corporation [CEDC] on the occasion of their first anniversary. As the Representative for the Fourth District of Michigan, which includes the Benton Harbor area, I take great pleasure in recognizing the commitment the CEDC and the people of Benton Harbor and its surrounding neighbors have demonstrated toward revitalizing their community. Thanks to a strong partnership between local officials, individual citizens and the private sector, a new day is dawning for Benton Harbor.

Over 2 years ago, I held an economic development conference in Benton Harbor that was attended by more than 350 people. As my good friend and colleague Congressman CURT WELDON of Pennsylvania noted at this conference, the key to economic development is a strong alliance among education, business, labor and government leaders. The message I hoped to deliver with CURT was how our community in Benton Harbor could pull itself up by the bootstraps and flourish.

I am proud that the conference held that day helped serve as a catalyst for the formation of the Community Economic Development Corporation [CEDC]. The CEDC is at the heart of efforts to revamp the economy of the Twin Cities area. Government officials, members of the business community, and concerned citizens have formed a solid working coalition dedicated to improving the quality of life in the Benton Harbor area. It has been a great privilege for me to work with this talent laden organization, which revolves around the concept of shared responsibility and a strong private/public partnership.

The CDEC has been an astounding success, raising more than $1.2 million in pledges from individuals and the business community last year. These contributions will be matched by a major employer in the area, Whirlpool Corp. In 5 years, local officials hope to raise $5 million that will be matched by Whirlpool. These local funds were collected in near record time. The theme, "If not now, when?" moved people to action. It is inspiring to see local individuals and businesses place their trust in the future of Benton Harbor. Due to this community-wide effort, outside investment is once again starting to flow into Benton Harbor.

With the CEDC's aggressive marketing efforts, interested business people have been lured to the city. Twenty-five businesses have been approved under the city's enterprise zone status and by the end of this year, $142 million will be invested in Benton Harbor, creating nearly 150 new jobs.

Any major problem facing a community cannot be solved without the commitment of individual citizens who care enough to become involved. This is certainly true with the challenge of rebuilding distressed American cities. Individuals of all races and economic standing have volunteered in CEDC sponsored drives to make a difference through their personal participation.

On the first anniversary of the CEDC incorporation, communities throughout the Nation should take note of the teamwork and commitment in Benton Harbor. I hope others will form similar coalitions to promote economic development and save ailing cities. I am confident that the success during this first year is only the tip of the iceberg. The future for Benton Harbor and its neighboring communities will be bright due to the continued hard work and dedication of these people who dare to make a difference.

SAY IT IS NOT SO, MR. PRESIDENT

(Mr. NEAL of Massachusetts asked and was given permission to address the House for 1 minute.)

Mr. NEAL of Massachusetts. Mr. Speaker, those of us representing constituencies in the Northeast were shocked to learn that President Bush may propose a 25-percent cut in the Emergency Fuel Assistance Program when he unveils his budget next week.

The cold wave that gripped much of the Nation in December brought with it incredible, and in my view indefensible, increases in the price of home heating oil. The skyrocketing cost of fuel oil has devastated family budgets from Kearney, NJ, to Kingston, MA, to Kennebunk, ME. For the poor, the impact has been particularly severe. Some low-income families expended a winter's worth of Federal fuel assistance by the end of December, and do not know how they will contend with another bout of very cold weather.

It is a regrettable fact that the existing level of Emergency Energy Assistance Program funds serves only about one-third of the individuals eligible for it. States supplement Federal funds where they can, but I believe it is unrealistic to expect the States to do more. More Federal funds, not less, are needed in this program, and I believe the President should be proposing increases, not cuts.

Mr. Speaker, I hope the rumors about the President's position on the Emergency Energy Assistance Program are wrong. If they are not, I urge Mr. Bush to talk with his friends and neighbors in New England, and reexamine his position. In this land of abundant resources, it is simply wrong that people should be forced to choose between heating and eating.

SMALL BUSINESS IS GOING OUT OF EXISTENCE

(Mr. DUNCAN asked and was given permission to address the House for 1 minute.)

Mr. DUNCAN. Mr. Speaker, as we begin a new session of Congress, I hope we will focus at least some attention on a largely ignored but growing problem in this Nation. Small business is going out of existence at an alarming rate in the United States today.

Many other small businesses, while not going all the way under, are barely hanging on, whether it is the inde-

pendent drugstore, hardware store, auto-parts store, the mom-and-pop grocery, the family farm. Small business is in a real struggle for survival.

We frequently say that small business is the heart or backbone of the American economy. This is certainly true. However, today most Federal contracts can be done only by big businesses because only they can handle the paperwork maze required by the bureaucracy. Federal tax breaks generally go almost entirely to the big giants that can hire the lobbyists.

Federal rules, regulations, and red tape fall disproportionately hardest on small businesses. Federal bureaucrats seem to have a bias toward big business either because it makes them feel more important or it is simply easier to deal with bigger and fewer companies.

The Federal Government, to put it in plain language, is driving small business out of existence. We need to take notice of this and not make this situation worse in the legislation we pass this year.

TRIBUTE TO KONISHIKI

(Mr. FALEOMAVAEGA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FALEOMAVAEGA. Mr. Speaker, I rise to pay a special tribute to an outstanding young American of Samoan ancestry, whom I have had the privilege to know for the past several years. Not because he is a native Samoan, but he's a great American, and what he has accomplished is certainly a rarity in our country.

Mr. Speaker, you cannot help but take notice of this young man since he weighs only 490 pounds, stands 6 feet 2 inches tall, and participates in what is generally known as Japan's oldest national cultural sport; that is, the sport of sumo wrestling.

Mr. Speaker, this young man is Saleva'a Fuauli Atisanoe, or commonly known throughout Japan by his traditional wrestling name as Konishiki Yasokichi.

On November 26, 1989, Konishiki became the second non-Japanese since 1972 to win the coveted Emperor's Cup during the Grand Sumo Tournament in Japan. Just last week Konishiki made a respectable showing by winning 10 of 15 matches, and hopefully, if he should win another tournament, he stands an excellent chance for promotion to "yokozuna" or grand champion. This is the highest degree or level of achievement for a sumo wrestler to obtain.

Mr. Speaker, I would also like to express special thanks to Mr. Hiro Sasaki for his initial contact with Saleva'a when he first introduced Saleva'a to Jesse Kahualua or "Takamiyama," who later became Sale's trainer at the Takasago Beya or training center in Tokyo. Through hard training and disciplinary rules that all sumo wrestlers must go through, Konishiki quickly rose through the complicated divisions of promotions and recognition since his initial entry into the world of sumo wrestling in 1982. This is particularly noted in the fact that while it usually takes a sumo wrestler 5 years to train and compete competitively in the highest division of sumo hierarchy, Konishiki achieved this feat in 2 years.

Mr. Speaker, I would also like to offer a special congratulations to Konishiki's proud but humble Samoan parents, Orator Va'a Fuauli Atisanoe and mother, Tala.

My personal thanks and mahalo also go to my good friend and colleague, Congressman DANIEL AKAKA, of Hawaii, for making a special effort in joining me at a special family church service that was held recently in honoring Konishiki for his achievements.

Mr. Speaker, I submit the following articles also to be made part of the RECORD.

[From the Washington Post, Nov. 27, 1989]

THE WIN WORTH WEIGHING FOR—A HAWAIIAN TAKES SUMO WRESTLING HONORS IN JAPAN

(By Fred Hiatt)

TOKYO, Nov. 26.—One doesn't often see a 496-pound man cry, but Yasokichi Konishiki wept for joy today.

Konishiki, a Samoan American born in Hawaii nearly 26 years ago, took up the ancient Japanese sport of sumo wrestling in 1982. And today, after enduring anti-foreign hazing, poison pen letters, telephone death threats and a bum knee, the quarter-ton wrestler won his first professional tournament.

Konishiki received a congratulatory message from President Bush—"We're all proud of you."—and a host of cash awards and gifts, including four tons of rice, a barrel of shitake mushrooms, 5,000 eels and an outsize silver statue of a Coca-Cola bottle. But the ultimate compliment came from the director-general of the sumo association.

"He's a great wrestler now," Katsuji Futagoyama, a former sumo star, told the Japan Broadcasting Co. "He's no longer a foreigner."

Indeed, it was a red-letter weekend for Americans in Japanese sports. A former Montreal Expo, Warren Cromartie, was named Most Valuable Player of the Japanese Central League, while a former Los Angeles Dodger, Ralph Bryant, was honored as Pacific League MVP, the first time U.S. players have swept the awards.

Still, it was Konishiki's triumph over adversity in the most Japanese of sports that captured Japan's attention. Although the giant wrestler's sudden rise in the sport five years ago provoked a wave of xenophobia, his more recent troubles and his determination to overcome them seem to have won him acceptance as an honorary Japanese.

After clinching his bout today, Konishiki gave the obligatory television interview in flawless Japanese, as an attendant combed his oiled hair into the traditional topknot in preparation for the victory ceremony.

"I didn't want to cry, but I couldn't help it," said the soft-spoken athlete, still breathing heavily from his 20-second fight. "It's like a dream. I'm really surprised myself."

Konishiki was a high school football player named Salevaa Atisanoe aiming for college and law school when another Hawaiian, Jesse Kuhaulua, recruited him for sumo. Kuhaulua, wrestling under the name Takamiyama, eventually became a Japanese citizen, but in 1972 he had become the first and, until today, only foreigner to win a sumo tournament.

To an outsider, sumo didn't look difficult: two nearly naked fat men colliding with a thud and then spending a few seconds trying to throw each other to the ground or push each other out of the packed-sand ring. Konishiki gained almost 200 pounds here on a diet of fish and rice stew and began climbing through the professional ranks with unprecedented speed to become the first foreign *ozeki*, or champion-ranked wrestler.

But Konishiki also soon discovered that sumo is a test not only of bulk but of strength, speed, agility and, above all, mental toughness. As he began to succeed, he had to endure the normal indignities of the hierarchial, almost feudal sumo world, and the panic of Japanese who believed a foreigner should never be champion.

"Anyone who can't take a hazing probably doesn't have what it takes to succeed in sumo," Konishiki wrote in a Japanese magazine last year. "It a lot more difficult than it looks."

Konishiki was considered sure to advance beyond ozeki to the top rank of *yokozuna*, or grand champion. But his climb stalled; one strong tournament would be followed by a poor performance.

"I keep hearing people say they don't want a foreigner to win, that I shouldn't be promoted to yokozuna since I only win by brute strength," wrote Konishiki, the biggest sumo wrestler ever.

This year, Konishiki finished the September tournament with a miserable five wins and 10 losses and was in danger of being stripped of his championship rank. So when he practiced hard through the fall and came roaring back this month, the sports press took notice.

"Resurrection of the Monster of Hawaii," blared one. "Grand Champion Konishiki—Even Mike Tyson Would Pale," said another. A new sweetheart, a 24-year-old Japanese model, had turned Konishiki around, it was reported.

On Friday, Konishiki won his most difficult bout, against the Wolf, Chiyonofuji. Although Konishiki outweighs the reigning champion by 200 pounds, Chiyonofuji had always turned Konishiki's bulk against him, sidestepping him and making the American look foolish as he crashed to the floor.

But this week, Konishiki simply bulled Chiyonofuji out of the ring. And when he dispatched the 400-pound Kotogaume today in the same style, Konishiki clinched his victory. If Konishiki can win the next tournament in January, the experts say, he will become the first foreign yokozuna in history.

The crowd in the sumo hall in Fukuoka cheered wildly for his win, and again when Bush's telegram was read in Japanese. The threats and insults and stop-Konishiki campaigns seemed, for now at least, forgotten.

"People like Takamiyama because he became Japanese," said one young fan. "But people like Konishiki because he hung in there and did things his way."

[From Sports Illustrated, Dec. 11, 1989]

AN AMERICAN WINS BIG

(By Shelley Smith)

In a feat of truly immense proportions, Hawaiian-born sumo wrestler Konishiki weighing in at 488 pounds, last week won the Emperor's Cup, Japan's most prestigious sumo championship. The victory had the entire nation abuzz. Only one other foreigner had ever won the tournament: Jesse Kuhaulua, another Hawaiian, in 1972.

Strange as it sounds, the 25-year-old Konishiki (born Salevaa Atisanoe to Samoan parents) saw his triumph as a victory for thinness. After becoming a *sumotori* in 1982, he had eaten his way from 350 pounds up to 553—whopping even by sumo standards. By last December his knees were constantly aching, and he was losing so often that he was in danger of being demoted from the ranks of *ozeki*, the second-highest classification in the sport.

Fearing this, Konishiki took action. He checked into a Tokyo training center and went on a diet. "We tried to test his body fat," recalls Bob Beveridge, the American who runs the training center, "but we couldn't get the clamp around his arm. We tested his strength, and it was one-sixth of a 60-year-old man."

Eating only fish and tomatoes, and swimming three times a week, Konishiki began to shed weight. His knees felt better, and his strength grew. By the start of the 15-day Emperor's Cup in Tokyo on Nov. 12, he had lost 65 pounds.

Sumo is a test of power and leverage. To win, a wrestler must push, slap or shove his opponent out of the 15-foot ring. Displaying surprising agility, Konishiki won 14 of 15 Cup matches, dispatching even Chiyonofuji, Japan's sumo darling, whose muscled 270-pound body sharply contrasted with Konishiki's folds of flab. After Konishiki beat 400-pound Kotogaume in the finals, a congratulatory telegram from President Bush arrived, and Konishiki was presented with prizes, among them 5,000 eels, which he presumably won't try to gulp down in a single sitting.

Konishiki wept. "My dream has come true," he said. He may become the first foreigner to attain the highest sumo designation, *yokozuna*.

Konishiki's victory capped a grand week for U.S. athletes in Japan. Earlier, former big leaguers Warren Cromartie and Ralph Bryant had been named MVPs of the two Japanese major leagues—the first time Americans have won both titles.

[From U.S. News & World Report, Dec. 11, 1989]

CHARGE OF THE UNLIGHT BRIGADE

Americans worried about economic rivals across the Pacific, take heart. Good old Yankee competitiveness is alive and well in the ancient Japanese dohyo, or sumo ring. Last week, a 490-pound Hawaiian of Samoan ancestry, known as Konishiki, bulldozed Japan's highest-ranked wrestler to win the coveted Emperor's Cup.

It may seem paradoxical that the Japanese, who grew rich making TV's and cars smaller, adulate behemoth wrestlers with washtub-size bellies. But in Japan, size and power are revered. Fans also admire a sumotori's impassive dignity born of years of bootcamp-like training in dormitory-gymnasiums called stables. As they move up the rigid sumo hierarchy, young trainees wash and braid their seniors' hair, fetch and carry, and eat prodigious portions of rice and chankonabe, a steamy meat or fish stew.

Despite its documented history of more than 1,500 years, sumo has changed little over the centuries. In recent decades, minimum height and weight requirements have been raised, as Japanese males have grown taller and heavier. To accommodate TV, some prefight rituals have been trimmed, such as the prolonged foot-stomping on the ring's bare earth as opponents glower at each other and the number of times salt is tossed as purification (the fight itself is over in seconds). Perhaps the biggest change since the days of shogun and samurai retainers has been the addition of gaijin, or foreigners. Besides the quarter-ton Konishiki, one other American, Hawaiian-born Takamiyama, has made his mark in the "sport of emperors," winning the cup in 1972.

[From Time Magazine, Dec. 11, 1989]

READ MY EELS

While some Americans fret that the Japanese are buying up the U.S., the Japanese may have another concern: Yankee athletes are winning all the prizes. Americans picked up the most valuable player awards in both Japanese baseball leagues, and a 488-lb. Samoan-American sumo wrestler known as Konishiki, 25, last week became only the second foreigner to triumph in a major sumo tournament. Big even by sumo's broad standards, Konishiki was once called "meat bomb" by his detractors. Among his prizes: a congratulatory message from President Bush, 1.8 tons of rice and 5,000 eels. The wrestler is already one slippery customer in the ring.

COMMENDATION OF U.S. EMBASSY PERSONNEL IN BUCHAREST

(Mr. WOLF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLF. Mr. Speaker, I rise to commend the work of U.S. Embassy personnel in Bucharest during the turbulent revolution which overthrew the oppressive, tyrannical rule of Nicolae Ceausescu. I traveled to Romania in early January just as the violence in the streets of Bucharest was beginning to subside, and the people in our Bucharest Embassy were extremely courageous and a credit to the foreign service.

The Embassy personnel, their dependents and other Americans in Bucharest faced the quickly unfolding revolution with great strength. Ambassador Alan "Punch" Green and his staff are to be commended for protecting the lives of American personnel while continuing the job of reporting critical information to our Government as violence and firefighting filled the streets. Two Foreign Service officers even journeyed to Timisoara, where the revolution received its spark, before the outcome of the conflict was certain.

Mr. Speaker, I have a list of the U.S. Embassy personnel in Bucharest which I want to enter into the RECORD in recognition of their work.

Mr. Speaker, I would also like to mention that I will share my thoughts and recommendations on Romania during a special order beginning immediately after other congressional business is completed today.

The list referred to follows:

U.S. EMBASSY PERSONNEL IN BUCHAREST

NAME AND TITLE

Alan Green, Jr., Ambassador.
Larry C. Napper, Deputy Chief of Mission.
Brian M. Flora, Political Counselor.
W. Ross Newland, Political Officer.
Howard J. Steers, Political Officer.
Anita S. Booth, Administrative Counselor.
Virginia C. Young, Consul General.
Gordon K. Hellwig, Vice Consul.
Timothy A. Arnts, Economic Officer.
Agota Kuperman, Cultural Affairs Officer (Acting PAO).
Kay R. Kuhlman, Senior Commercial Officer.
Col. Branko Marinovich, Defense Attache.
Wol Joseph E. Krull, DAO Operations Officer.
Joanne Shelton, DAO Operations Technician.
Carl French, DAO Operations Technician.
Joanne Rizzo, Nurse Practitioner.
Daniel Aguayo, Communications Program Officer.
David Adams, Support Communications Officer.
Terry M. Cunningham, Telecommunications Officer.
Lauren Lyles, Telecommunications Officer.
Donald N. Haw, Telecommunications Officer.
William J. Maher, Regional Security Officer.
Karl W. Covington, Security Engineering Officer.
Jean H. Ishii, Regional Security Office Secretary.
SSgt. Jack Moore, Marine Security Guard Detachment Commander.
Sgt. Donald D. Brazeal, Marine Security Guard.
Sgt. Darryl M. Edwards, Marine Security Guard.
Sgt. Steve J. Elbert, Marine Security Guard.
Cpl. Hector Garcia, Marine Security Guard.
Cpl. Gordon A. Heap, Marine Security Guard.
Cpl. Steven A. Hill, Marine Security Guard.
Cpl. Phillip W. Lewis, Marine Security Guard.
Cpl. Reynaldo G. Morris, Marine Security Guard.
Cpl. Donald W. Salvaggio, Marine Security Guard.

I would like to show the American people the Romanian flag where the center has been cut out by the Romanian people in freedom. What they have said is that the United States Government ought not give the most favored nation status to the Romanian Government until they hold fair, free, open and verifiable elections.

COUNTDOWN TO EARTH DAY

(Mr. MAZZOLI asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. MAZZOLI. Mr. Speaker, on January 23, this week, I joined House and Senate colleagues and representatives of many environmental groups to commence countdown to Earth Day, 1990. Nineteen-ninety will mark the 20th anniversary of the original Earth Day.

This anniversary comes at a timely moment in the Nation's environmental history. We will take up in this session of Congress the Clean Air Act. Though I am in a cold State, I do believe we need a tough Clean Air Act.

Back home in Louisville, our Mayor Jerry Abramson, Deputy Mayor Joan Riehm, and the director of solid waste management, Rudolph Davidson, are preparing special events to mark Earth Day in April.

My commemoration is to introduce legislation that will call a White House conference on solid waste reduction and disposal. I hope my colleagues will join me.

Though the proliferation of meetings on solid waste is there, we need something like a White House focus to give this movement additional momentum. In other words, the only way to give lowly and smelly garbage respectability and fragrance is to take it into the White House and put it on the President's desk, and make sure that this then gets the national attention it needs.

Mr. Speaker, I will be introducing legislation which I will send around to my colleagues, and I hope my colleagues will support me.

TRIBUTE TO PFC. ROY BROWN

(Mr. COX asked and was given permission to address the House for 1 minute.)

Mr. COX. Mr. Speaker, in the wake of recent events in Panama, I rise to pay tribute to the President of the United States, our Commander-in-Chief, and all the men and women of our armed services who have sacrificed so much for their country.

As the Representative from Orange County, CA, I would like to pay tribute to one of Orange County's young men who was among the first to be killed in the opening hours of the assault on Panama.

A few days after his funeral, Pfc. Roy Brown's mother got a letter from him in the mail. Here is what it said:

Dear Mom: I haven't officially been told where my unit is headed, but I have a good idea. I believe we will be going to Panama in the next 48 hours. If you are reading this letter, then you already know that something has happened to me. Tell everyone in the family and all my friends that I love them and that my death was for a good cause.

Thanks for being the world's greatest mom.

The words of a 19-year-old infantryman say it better than any Congressman ever could. Ours is a good cause. It is a cause of freedom; and it is because of the leadership of our great President and the patriotism and courage of men and women like Pfc. Roy Brown that our world today is safe and free.

FAILURE OF UNITED STATES TO SIGN CONVENTION ON RIGHTS OF THE CHILD

(Mr. MILLER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MILLER of California. Mr. Speaker, this week, the Bush administration had an opportunity to demonstrate that its commitment to the world's children was as much reality as rhetoric.

But once again he has offered us a rhetorical ruse.

The Bush administration has been actively involved in drafting the United Nations Convention on the Rights of the Child. The convention calls for, among other things, the end of child exploitation, respect for the religious rights of children, a new resolution by countries to end child labor, improved access to education, and decent health care for all the world's young people. It calls for an end to the torture and extensive imprisonment of children, and takes a stand against execution for crimes committed by people under 18 years of age.

Most of it is not too complicated.

But today, the State Department refuses to sign the final document. Signing the Convention on the Rights of the Child would in no way tie the United states to a specific legislative program. Nor would it bind the Senate's ratification process. It would instead indicate this Nation's willingness to review the convention and, eventually, send it to the Senate for ratification.

However, by not signing the convention, this administration sends a terrible signal—to the countries and advocates around the world who have worked hard over decades to bring the convention to this point, as well as those across the globe who continue to ignore the human rights of children.

The message will be no harsher than the one the U.S. has already sent in the course of negotiating the convention, by apparently sabotaging efforts to raise the minimum age of combat from 15 to 18. It is a tragedy that this country, which does not itself induct 15- or 16-year-olds into the military, could not endorse a policy of keeping children from fighting in wars. Bush administration policy on this issue suggests that he has greater reverence for the lives of American children than for those from other countries. And that this administration does not care very much at all for the lives of any children.

The current episode adds the insult of not signing the convention to the injury of leaving the age of combat at 15. It is particularly arrogant of the administration to resist signing the convention after having gotten its way so decisively on the issue of the minimum age of combat.

The rhetoric is that this administration can't manage the convention through the Federal bureaucracy. The fact is that if this convention, and the well-being of children, really mattered, then bureaucracy would not be allowed to get in the way.

Once again, this administration fails to follow its high-minded language with concrete action. President Bush's disregard for the International convention on the Rights of the Child indicates that the posturing that was so evident in his first year in office will continue in the second. And the world's children will be asked to pay the price.

MAKE EDUCATION SAVINGS ACCOUNTS TAX DEDUCTIBLE

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, I rise today to introduce a bill to make education savings accounts tax deductible.

These accounts allow parents to save money each year to pay for a child's education at a particular university. They are a creative way to pay for an education; and by making them tax deductible, we can make them even better.

This bill will allow parents to deduct annual contributions of up to $1,500. It will be an important step toward making a college education available to every qualified student. I hope my colleagues will join me in working to reach that goal.

TURN PEACE DIVIDEND INTO REAL DEFENSE CUT

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, the President will submit his fiscal year 1991 budget to Congress on Monday. Amidst the ongoing speculation about what it will contain, it is appropriate to ask a very direct question: Will President Bush's budget contain an increase in defense spending or a decrease?

Given all the talk of the peace dividend, this seems like an odd question to ask. Most are wondering about how much the defense budget will be reduced. But the President may try to

pass off no changes, or even an increase, as a defense cut.

Let us not let him do that. We should look at the budget and focus the question in one area: Does the President propose to spend more or less in actual dollars than was spent last year?

□ 1120

Last year $296.7 billion was spent on defense. That included money for energy, arms production. This year we will look at the President's budget and we will ask, "Is it more that $296.7 billion or is it less than $296.7 billion?" And if the President's proposals do not actually contain a defense cut we must tell that fact honestly and forthrightly to the American people.

While a peace dividend is very much in order, Mr. Speaker, what we may be getting from the President is a peace assessment.

REDUCING DEMAND IS KEY TO WINNING THE DRUG WAR

(Mr. DONALD E. "BUZ" LUKENS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DONALD E. "BUZ" LUKENS. Mr. Speaker, as a member of a congressional delegation, I had the opportunity to once again visit Colombia, Bolivia, and Peru to assess the progress in our joint war on drugs.

Again and again we heard that reducing the demand is the key to winning the war, and I agree. Until we win here in the United States we will win battles, not the war. In the meantime, in Peru, the Socialist government, the devastating economic policy and the influence of the vicious and totalitarian Maoist Communist group Sendero Luminoso (Shining Path) combine to seriously hamper the progress there. This is most unfortunate considering Peru's soil and climate are ideal for growing coca and they grow up to 60 percent of the world's supply.

In Colombia, the Government is winning the war on most fronts but is hampered, as are Peru and Bolivia, by a corrupt Judiciary. A majority of the judges are honest men and women of courage, but there are far too many who have been bought with drug money and they are releasing these drug "animals" almost as quickly as they are captured. In Bolivia, a country twice the size of Texas with only 6 million people, considerable progress is being made, but the Government simply has difficulty policing a country that size. Bolivia, however, is poised to carve out the most dramatic effort in interdiction, education eradication and substitution. These three countries require our utmost support in both the short-and-long range fight. Mr. Speaker, I return here convinced that the war is winnable and that considering the difficult situations these three nations face, they truly deserve our political and financial support for hanging tough in their fight against drugs.

CBS ANCHORMAN SALUTES UNITED STATES MILITARY FOR PANAMA OPERATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi [Mr. MONTGOMERY] is recognized for 5 minutes.

Mr. MONTGOMERY. Mr. Speaker, CBS news anchor Dan Rather aired this commentary on his daily radio program on December 28, 1989. I want to share it with my colleagues because it is a very fitting tribute to the bravery and skill of the United States military personnel who took part in the invasion of Panama.

The commentary is attached:

DAN RATHER REPORTING. NEWS ANALYSIS AND COMMENTARY—AIRED DECEMBER 28, 1989

The men and women of the United States Armed Forces have done a superb job. They have performed bravely, efficiently and professionally. They deserve the thanks and respect of a grateful nation, and our prayers as they continue their service and their sacrifice.

This is true. And it needs to be said, to be marked and thought about before the moment passes. As a nation and as individuals, we should note it and discuss it before the trail grows cold.

Discuss what? Excellence, for one thing. Excellence, unfortunately, is getting to be rare in any endeavor in this country. Along with greed, mediocrity has become trendy in American life and work. For another, the role of the warrior in a peace-loving, peace-intending country such as ours. No matter how much of the world sees us, no matter how some among us see us, ours is, at base and in its heart a peace loving, peace intending nation. But in the land of the American dream, someone must protect the dreamers. There must be an arsenal of democracy and there must be among us those who know how to use it.

Ours is a citizen Army . . . and Navy . . . and Air Force . . . and Marine Corps. With, thanks be to God and the Constitution, civilian control, and with a strong system of checks and balances. Ours is, in the best sense of the phrase, a people's Army.

But I digress.

Listen, patriotic and honest citizens can and should debate whether this President in this situation made the right decision at the right time for the right reasons to send our sons and daughters to war. There are important questions not to be ducked about the Panama invasion. Such as: Can, should, a president—any president—be able to carry out a war such as this without approval from the people's elected representatives in Congress? There is an important constitutional question to be thoughtfully considered in all of this.

But that is not the point of this piece. The point here today is this: the men and women of the Armed Forces of the United States were given a mission by their Commander in Chief. They had their orders. They were given a job to do, and they did it well.

In the words of Tennyson's poetry, ". . . theirs was not to reason why, theirs was but to do or die." They did and some of them died.

Ours is to reason why, while honoring and thanking those who served and sacrificed. More . . . under the heading lest we forget . . . after this.

Any person, in uniform or out, whoever actually sees another person die in combat is not likely to forget, ever, what the reality was and is. Wars are real mud, real blood . . . real dread, real death.

It is easy to blow bugles, have the band play marches and wave flags. It is hard to storm the beaches, hit the silk and blow the barracks. Very hard and very dangerous.

Before the smoke clears in Panama, before the politicians and the propagandists complete weaving their self serving spells, it would be well for the rest of us to note and ponder the brave, efficient, professional service our citizen warriors have given our country in the streets and jungles of Panama.

SOUTH KOREAN BARRIERS TO BEEF IMPORTS FROM AMERICA

The SPEAKER pro tempore (Mr. BRUCE). Under a previous order of the House, the gentleman from Nebraska [Mr. BEREUTER] is recognized for 5 minutes.

Mr. BEREUTER. Mr. Speaker, today I will discuss an important issue concerning U.S. trade in beef with South Korea. In bilateral talks last week, South Korean representatives were unwilling to discuss any new ideas concerning their import restrictions on beef. This has been a contentious issue between the United States and South Korea for nearly 5 years. South Korea's continuing unyielding stubbornness, exemplified by the breakdown of last week's talks, is the reason for the lack of progress in resolving this dispute.

Why are the South Korean-United States talks a hot issue again? Because last week's talks were caused by at GATT panel ruling of last April which ruled in our favor. It ruled that South Korea's restriction of beef imports is inconsistent with the GATT; they are violating GATT. It found the South Koreans are illegally excluding beef. The American beef industry would be the major beneficiary of an opened market in South Korea.

On November 7 of last year, South Korea reluctantly said they accepted the ruling and an associated requirement to meet with the United States within 90 days to begin resolution of the issue. South Korea's refusal to discuss anything new, or to even agree to discuss an agenda necessary to allow eventual resolution of the complaint is very disappointing and unacceptable to America. They are stalling. They are not negotiating in good faith. This is no way for South Korea to treat an ally and very generous friend.

It is imperative that South Korea come to the table now with a willing-

ness to discuss a negotiating agenda which would quickly bring it into compliance with the GATT ruling and let more American beef into their markets. Time is of the essence. The deadline for a satisfactory outcome of these talks is February 7, 1990. More importantly, if South Korea has made no serious moves toward resolution of this GATT violation by April 27, the USTR is required under section 301 of the Omnibus Trade Act of 1988, to take retaliatory action. I would like to stress to the South Koreans that retaliation is not the preferred action of the United States, or arguably, even the intended action of section 301. But we will retaliate if we have no other choice. Section 301 was primarily designed as a mechanism to facilitate reductions of trade barriers, not create new ones. I would further urge South Korea to work cooperatively within the spirit of the GATT to move toward eventual resolution of this issue. Here is the message to the Government of South Korea. It is time for acting well past time. Bring down the barrier against American beef.

I would also like to take this opportunity to commend Ambassador Carla Hills for continued exemplary fulfillment of her role as USTR.

She has shown outstanding negotiating abilities and has already done much to open markets for U.S. products and reduce trade barriers world wide in her role as USTR. Removing barriers to trade around the world is one of the most important challenges facing the United States today, and if successful, represents one of the most exciting opportunities for the United States services and agricultural industries in the 1990's.

COLD FUSION: ITS UPS AND DOWNS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Utah [Mr. OWENS] is recognized for 5 minutes.

Mr. OWENS of Utah. Mr. Speaker, last March, we caught a glimpse of a pollution-free, energy-rich future from two scientists at the University of Utah in Salt Lake City. "Cold Fusion" made the cover of Time and Newsweek and fueled the Nation's imagination. It seemed too good to be true—and if the subsequent criticism was to be believed, it was.

While the rehabilitation of cold fusion since that low point has been slow it has also been very steady, what some considered a laughing stock now seems very blue-chip indeed.

While America's scientific establishment was chuckling, the Japanese, among others, were quietly working to validate cold fusion's claims. We have lagged behind because of that attitude in this basic research, as we have in so many other areas.

Mr. Speaker, the gauntlet has been thrown down by Japan and we are still not responding to the challenge.

□ 1130

A recent article in the Japanese Journal of Applied Physics establishes the process as not only nuclear but a promising energy source as well. The premise of cold fusion, that a nuclear reaction which generates excess heat can be achieved at room temperature, this premise has now been confirmed over and over again in labs throughout the country. Even the DOE's own labs at Los Alamos and Oak Ridge have reported indisputable positive findings. Ironically, despite their own labs' success, the DOE has more often been a stern critic of cold fusion research for reasons that may have less to do with science and more to do with the politics of establishing a new research program.

On the other hand, the National Science Foundation is now eager to support further research.

Scientists as credible as Edward Teller, the dean of America's physicists, agree something is clearly happening. It is nuclear. It is not due to experimental error. It has enormous potential. I want to see this research develop in the United States, not elsewhere. We found it, we should enlarge upon it and prove it out. We may have a genie in the cold fusion bottle. However, we will never know for certain unless our Government makes a concerted effort to fund the research.

It is intellectually dishonest, Mr. Speaker, and scientifically irresponsible not to fund this further research in cold fusion. This funding would not go to Utah and the University of Utah directly, if at all, but to the Department of Energy, to be disbursed as they in a normal scientific peer review process would decide.

We must not abandon yet another promising American technology to developments overseas.

ROMANIAN AID

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia [Mr. WOLF] is recognized for 60 minutes.

Mr. WOLF. Mr. Speaker, 1 month ago today on Christmas Day, the ruthless rule of Romania's Nicolae Ceausescu was ended by his execution. In Romania, under Ceausescu, not working on Christmas Day had long been declared a punishable offense. In fact, one priest once gave a sermon saying that Christmas Day should be a holiday, and he was killed. The Romanian people made this Christmas their first day of freedom from the most oppressive Communist state in the Soviet bloc. Their gifts were in human lives, given by thousands who shed their blood to remove a system that enslaved Romania.

In early spring I traveled to Romania to assess the Romanian people's opportunities to advance toward democracy. They asked for help. On all of the Government buildings in Romania, the Romania flag flew, with the center bearing the Communist seal, cut out. These flags are now flying all over Bucharest and Romania, as a symbol of their freedom and how they wanted to throw off the tyranny of Ceausescu and Communist rule.

The United States and other countries with democratic traditions must provide the help the Romanian people have requested in order to chart the course for a free and pluralistic Romania. The present system, Mr. Speaker, and its apparatus of oppression, must be dismantled and replaced by a democratic institution established by freely chosen leaders.

The National Salvation Front is Romania's interim government. The Front's ruling council now says it will field candidates, though not as a political party, in elections now rescheduled for May 20. I met with two members of the ruling council leadership, members of opposition parties, youth and student groups, religious leaders, the writer's union president, and the newly formed citizen action groups while I was there. I must admit, Mr. Speaker, that I was a little surprised to be greeted in Romania by some of the same faces of those I saw serving directly under Ceausescu in 1985 and 1988 during my two previous trips to Romania.

However, Mr. Speaker, there is hope. There is hope, mixed with skepticism in Romania today. I am hopeful, but also somewhat skeptical. Romanians I met referred to Yalta, and told me, "Mr. Congressman, pleased do not sell us out again." The Romanian people are pro-American, looking West, saying, "Preserve our chance for democracy. Do not automatically signal the legitimacy of the rule of the former Communists accommodating the National Salvation Front. Help us to be able to compete in free and fair and open and verifiable elections."

As I said, I am not questioning any person's motives in the Front. All sides have to be given an opportunity. However, we should test and see that there are open, free, fair, and verifiable elections held. Here is how the United States can best encourage success in the Romanian people's hard-won opportunity for democracy: By making a public commitment to the Romania people to grant Romania most-favored-nation status, MFN trade status, upon or after the completion of free, fair, open and internationally monitored elections. We must expect a substantial track record of human rights protection and movement toward de-

mocracy before granting MFN. Who could argue, no matter whether they are part of the National Salvation Front or the opposition party, or democratically elected governments in the West, that it would be not appropriate to say first have fair, free, open and verifiable elections in May, and they once the country has the elections, then we will grant the country this most-favored-nation status.

The United States can also encourage success in Romania by channeling precisely the kind of aid needed to prepare for free and fair elections, namely, the political training, the tools of democracy. The National Endowment for Democracy knows this business, and is capable of providing substantial support for perhaps as little as $1 million in U.S. funding, because most of the people we met said, "We do not understand how democracy operates. Help us." We had people ask for copies of the American Constitution and for copies of a booklet from Congress called, "How Our Laws Are Made." They asked for the skills and the knowledge. They asked for computers and copiers and material to reproduce and paper. Not very much, but the tools of democracy.

Finally, we can encourage the Romanian people by continuing to support basic medical and food assistance, promoting exchanges, and encouraging visits and the initiation of new business ventures by United States officials and companies to promote progress toward a market economy. Let Members invite Romanian doctors to the United States to learn the latest technology. Let Members invite Romanian Government officials to the United States to learn about democracy. Let Members send American businesses, the U.S. Chamber of Commerce, the National Association of Manufacturers, and small business representatives to Romania to see what kind of joint ventures and business opportunities we can have to help the Romanian economy.

Mr. Speaker, the world is beginning to learn the story of the suffering of the Romanian people. Yet our present foreign policy decisionmaking cannot overlook what the United States and the West did to earn part of the blame for this tragedy.

Mr. DONALD E. "BUZ" LUKENS. Mr. Speaker, will the gentleman yield?

Mr. WOLF. Mr. Speaker, I yield to the gentleman from Ohio.

Mr. DONALD E. "BUZ" LUKENS. Mr. Speaker, I thank the gentleman from Virginia [Mr. WOLF] for yielding.

I wish to bring a couple of facts to the attention of Members, facts that Members may not be aware of. I know that the gentleman from Virginia [Mr. WOLF] is a very modest individual.

I remember 2 years ago when the gentleman received an award from the Jamestown Foundation on his work in Romania with human rights. I am very interested, Mr. Speaker, as the gentleman knows, because I have been there several times myself, and involved myself with the same programs.

However, I wish to commend the gentleman singularly for the tremendous intensity with which the gentleman has followed the Ceausescu regime's many, many human rights violations, and particularly commend the gentleman on his activities with former director of the security service, Ion Pacepa, with whom I know the gentleman is familiar, who left Romania.

□ 1140

I would like, if the gentleman would, to have him tell me of his most recent venture in helping his daughter to come to America to join her father when Ceausescu specifically prohibited her from doing so after many, many requests that the gentleman had made.

Mr. WOLF. We had tried to get Dana and her husband, Radu Damaceanu, out, and we were not successful in 1988, but this January when we returned, we returned with his daughter to the United States, and she is now living here in freedom. She had been under house arrest for 11 years and had Securitate outside her door, and now she is living a free life in the United States.

Mr. DONALD E. "BUZ" LUKENS. Second, Mr. Speaker, I would like, if I may continue and if the gentleman would yield further, to say that I support the gentleman totally, as I know the Members of the House will, in any effort to attempt to help Romania in its tremendous task of rebuilding, a country that had been devastated economically, sociologically, and politically so much by this maniac.

I wish to commend the gentleman personally for his work in Romania, and I would say to the gentleman that I watched him on television just before I visited Romania. I know the gentleman was there, and I know he expresses for millions of Americans and many other people around the world the great joy and elation we felt upon their rescue as a nation and as a people from this tyrannical regime.

Mr. WOLF. Mr. Speaker, I thank the gentleman for his comments. I appreciate them very much.

I might say that one good, positive sign is that the National Salvation Front and the leaders of that front allowed Dana and her husband, Radu, to leave. That was a very positive sign. For that I am very appreciative of the members of the National Salvation Front. It was a very, very positive act.

Returning, if I may, Mr. Speaker, to my presentation, as I said, the world is beginning to learn the story of the suffering of the Romanian people. Yet our present foreign policy decisionmaking cannot overlook what the United States and the West did to earn part of the blame for this tragedy. It is a sad fact that some—not many, but a few—in the United States Government knew the extent of these abuses for years, and yet continued to extend Romania most-favored-nation trade status, a privilege accorded to only one or two other nonmarket economy countries at various times over the past 15 years. Both the Romanian people and the United States national interest suffered as a result of this policy, which while misguided, was perhaps well-intentioned.

We are not questioning anyone's motives. Reasonable men and women can differ on this issue. But I believe granting MFN was a mistake. Clearly, it was a mistake to give most-favored-nation status to Romania while Ceauseascu was there, but we have got to put that behind us and move on. I think we should ask ourselves today, what should our policy be in the future?

Mr. Speaker, MFN was renounced by Ceausescu in 1988 under pressure of its suspension by Congress, and I think it is appropriate to commend both the House and the Senate for overwhelmingly voting to suspend most-favored-nation status for Romania. Unfortunately, some in the Reagan administration wanted to continue to grant MFN, but the Congress, the House and the Senate, on several different occasions voted overwhelmingly to remove MFN. I might say that some of the people in Romania I talked with thanked me on their behalf, and said they wanted to thank the other Members of Congress for speaking out. They were thankful for the fact that the people's body, the United States House of Representatives, went on record in opposition to MFN and gave hope to the Romanian people that the people of the United States cared very deeply.

I might say that they found out what was going on in the House Chamber and in the Senate Chamber because Radio Free Europe and the Voice of America did such an excellent job in communicating the activities taken by the United States Congress.

MFN was renounced by Ceausescu, as I said, in 1988 under pressure of its suspension by this body and by the U.S. Senate. The Salvation Front's Ruling Council has declared this Ceausescu act null and void and has welcomed the return of MFN. Now Mr. Speaker, there are some of the same people in our Government who called for the continuation of MFN 2 years ago who call for its immediate restoration today. I repeat, we must not again, Mr. Speaker, sell out the Romanian people.

The negative effects of our past MFN policy are still clear. MFN sig-

naled the United States' recognition and approval of the supposed "independent course" taken by Ceausescu on foreign policy. It was hoped the United States relationship with Romania would drive a wedge into the Warsaw Pact. America, as well as its European allies, also recognized Romania for its perceived to be liberal—and in fact completely cynical—emigration policies. Formally, this was the trigger for granting MFN as the policy tried to fulfill its geopolitical intentions.

As former dissident Dorin Tudoran once put it, "Many Romanians call the MFN not the most-favored-nation status but the most-favored-dictatorship status."

Sadly, the legitimacy and the encouragement which MFN offered the Ceausescu regime also provided the resources to build his Victory of Socialism Boulevard and the infamous and disgraceful palace, which I had the dubious privilege to tour. MFN meanwhile discouraged the opposition from forging any meaningful protest and crippling any potential support. Romania was building the worst human rights record in the Eastern bloc while we were giving it most-favored-nation status. Meanwhile, Ceausescu would release a few dissidents from prison, and usually expel them, whenever time arrived for the United States to renew Romania's MFN status, which it did, from 1975 to 1987, when the Congress wisely acted.

The United States response to the litany of systematic and documented abuses against the Romanian people continued. We gave MFN right to the end, before the Ceausescu regime ended.

The system had bulldozed their churches and synagogues. Yet some still wanted to give them MFN. They bulldozed the Seventh Day Adventist Church, with its parishioners still in it. But still some wanted to give them MFN. It exported massive amounts of food and fuel and left the people to starve and freeze to death. We have all seen the pictures of the starvation and the destruction in Romania from that export policy, and yet some wanted to continue to grant MFN.

It forced the resettlement of thousands from rural villages to dark Stalinist colonies and destroyed villages on the Romanian-Hungarian border and rooted up their history and destroyed it. And yet there were still some who wanted to grant them MFN.

□ 1150

Mr. Speaker, this regime provided training grounds and facilities for terrorist groups, and yet there were some who still wanted to grant MFN. This government, the Ceausescu government, cynically sold tens of thousands of Jewish, and German and other emigrants desperate to leave Romania. They should have been allowed to leave on their own, but yet they were sold, and yet there were those who still wanted to grant MFN. This system established by Romania's Communists killed priests, jailed priests, bulldozed churches, jailed dissidents, crushed workers' movements, destroyed the labor movement in Romania, censored poets and intellectuals and thoroughly suppressed dissidents in every corridor of society, and yet, Mr. Speaker, there were some who still wanted to grant MFN.

As my colleagues know, I traveled to Romania in early January to find that the opposition to the Communist regime is alive, though not yet well, waiting, lying comatose under the rubble of Eastern Europe that spontaneously sprang to life when the Securitate forces ripped through a human chain surrounding and protecting the house of Pastor Laszlo Tokes in Timisoara. The people poured into the streets to protest, and the revolution was launched.

Mr. Speaker, we must help the Romanian people to stem their worst fears that this revolution may be hijacked. It is not encouraging, frankly, to hear the ruling council member Silviu Brucan tell the London-based Financial Times that the Front's committee will be so powerful, quote, "That there will be very little room outside of it." And for Brucan to go on to imply the denial of the right of opposition parties to receive Western aid. It is really not encouraging, Mr. Speaker, that no official public statements have mentioned abolishing the Romanian Department of Cults responsible for so much of the blood on the hands of those who have persecuted the church.

In fairness, Mr. Speaker, let me conclude by saying that the National Salvation Front's 10-point plan contains many positive directions, including the promise of established basic political and human rights, and we should applaud that, and we should commend those in the National Salvation Front who are committed to that.

But yet, Mr. Speaker, we must expect more than words. We must expect a track record of performance, which has not yet happened. Granting MFN now would constitute an incredible, ill-conceived, perhaps even immoral endorsement of the National Salvation Front and that would be wrong.

We must not endorse, or immediately condemn, the interim government, and my position is that, frankly, I want to wait and see. I wish the National Salvation Front and all the opposition parties well. I think there should be open, free, fair and verifiable elections, and they announced the other day that they would invite the United Nations in to verify the elections and I think that is a positive aspect.

Although I am skeptical, I am not passing judgment on the people in the National Salvation Front. Many may have honestly changed, and it is not for me to make that judgment on that sincerity. I think the Romanian people have to make that judgment, and so I am not questioning, I am not criticizing, the National Salvation Front, and I am not favoring any particular group.

However, Mr. Speaker, before the United States Government grants and gives that special privilege called most-favored-nation status, we should request and require that there be a proven track record, that Romania have open, free, fair and verifiable elections.

And then, Mr. Speaker, if they have those open, and free, and fair and verifiable elections, then I think it would be appropriate for the Bush administration to grant MFN to the Romanian people, to grant MFN and send businesses to Romania to build up trade, and joint ventures, and economic opportunity, and hope and the opportunity for exchanges, all these positive things. But we must see an open, free election first.

Mr. Speaker, the Congress showed overwhelming support to withdraw most-favored-nation status from Romania and I might say proudly that it was a bipartisan effort where Republicans and Democrats of all political viewpoints from all over this country came together to withdraw MFN at that time. I know the Congress would want to take the position that what these Romanian people have earned with their blood ought not be interfered with by the United States Government giving its approval to MFN before free elections to any political party, any groups, albeit how honest and how sincere that they are.

It would be my recommendation that we would not grant most-favored-nation status to the Romanian Government until they have open, free, and fair and verifiable elections.

Now, Mr. Speaker, it would be appropriate for the Bush administration, which I have great respect for, and I think they have done an outstanding job; it would be appropriate once these open, and free, and fair, and verifiable elections are held, and there is freedom of speech, and freedom of press, and freedom of assembly, and freedom of religion and an opportunity for religious leaders—such as rabbis to return to Romania, because now there is only one rabbi in Romania, and he is up in years—to return to Romania, and to allow more Bibles to be published in Romania, then at that time, after these things, then I think the United States people and the United States Government, should strongly support most-favored-nation status for Romania. We can then send our tools of de-

mocracy, medical assistance and other help—because all of the people of Romania, and I am not differentiating between any group, all, I believe, clearly want to have that freedom and that opportunity for democracy that they have not had for the last 45 years.

So, Mr. Speaker, I want to yield back the balance of my time, and I hope that as we ponder this issue, we will not listen to those few small voices that want to give MFN now, but we will listen to the overwhelming loud voice of a religious committee, and the students, and the various dissident groups, and the poets, and the intellectuals, and the people that have died for freedom and the family members of those that have died for freedom in Romania; we will listen to them and say, "We're going to help, and we're going to grant you MFN, but we will do it only after you have open, free, fair and verifiable elections in complete and total freedom."

Mr. HALL of Ohio. Mr. Speaker, I thank Mr. WOLF for taking out this special order so that my colleagues and I have the opportunity to address the situation in Romania. As you know, I have worked closely with my colleagues from Virginia and New Jersey to bring Romania to the forefront of our human rights concerns.

During our travels to Romania in 1985, we experienced firsthand the Government-sponsored persecution and repression of the Romanian people. We witnessed countless injustices, and lobbied hard to suspend most-favored-nation status to Romania as part of H.R. 3, the omnibus trade bill. This legislation was intended to send a strong message to President Ceaucescu that human rights violations and a healthy relationship with the United States could not go hand-in-hand. Now the very members of the Communist Party that attacked Ceaucescu's hard-line policies are running the provincial government, and are potential candidates for the expected popular elections.

Only free and fair elections can offer Romanians an alternative to communism and an opportunity to select new leaders. The potential for this is great. But precautions are necessary. The United States should not assume that basic civil liberties have been delivered to the people of Romania without evidence of legitimate elections. For this reason, I would support returning MFN status to Romania on the condition that these free and fair elections are first realized.

I have great hope for a permanent renewal of religious freedom and a return of the basic necessities of life to the Romanian people. Let us do our part to ensure that this becomes a reality by promising MFN after free and fair elections are in place.

GENERAL LEAVE

Mr. WOLF. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore (Mr. BRUCE). Is there objection to the request of the gentleman from Virginia?

There was no objection.

□ 1200

U.S. ACCUSED OF OVERSTATING MANAGUA ELECTION OFFENSES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio [Mr. DONALD E. "BUZ" LUKENS] is recognized for 5 minutes.

Mr. DONALD E. "BUZ" LUKENS. Mr. Speaker, I would like to bring to the attention of each and every Member in this body an article from today's Washington Post concerning the on-going electoral campaign in Nicaragua.

The article, which is entitled "U.S. Accused of Overstating Managua Election Offenses," accuses the administration of engaging in political manipulation of public opinion in this country by drumming up charges that the Sandinistas are trying to prevent free and fair elections.

I certainly do not believe that pointing out the flagrant election irregularities on the part of Sandinistas is political manipulation. In fact, it is impossible to ignore the repeated incidents of intimidation, harassment, and violence against UNO by the Sandinistas. Or the unlimited use by the Sandinistas of state resources to aid Daniel Ortega's campaign. Or the blatant manipulation and use of the media by the Sandinistas to broadcast their Marxist-Leninist rhetoric to the Nicaraguan people.

With 32 days to go before that election, the Sandinistas have repeatedly indicated by their actions that they will do anything it takes to win the election. That is the simple truth.

What is going on in Nicaragua is unbelievable and what is even more unbelievable is what is going on in Washington. At an institution where there will be a hearing at the drop of the hat, there is deathly silence on the election in Nicaragua.

And what is the Congress doing about it? Well, some Members of the more liberal persuasion are doing their very level best to ignore what is going on in Nicaragua. In fact, some Democrats on the House Foreign Affairs Committee are taking to it to such lengths to refuse to schedule a hearing before the elections.

Now, who wants to talk about political manipulation?

The article follows:

[From the Washington Post, Jan. 25, 1990]

U.S. ACCUSED OF OVERSTATING MANAGUA ELECTION OFFENSES

(By John M. Goshko and Al Kamen)

OAS officials acknowledge that there have been campaign abuses, attributable in many cases to the Sandinistas. However, senior OAS officials, while reluctant to disagree publicly with the administration, say that their report and the findings of OAS observers on the scene do not support the idea that free and fair elections are in jeopardy.

"The State Department statement greatly overstated the case," said the OAS official.

A senior U.N. official, closely involved with the world body's observer activities in Nicaragua, was more blunt. "You are seeing an exercise in political manipulation," he said. "The opposition in Nicaragua is doing everything possible to make it appear that its campaign is close to doomed by Sandinista persecution. UNO has made a great many charges against the Nicaraguan government, but when our observers ask for specifics, they seem very reluctant to back up their charges with specifics."

Although most observers expect a close race, almost all polls show Ortega in front. The latest, made public yesterday, showed him leading Chamorro 51 percent to 24 percent. It was conducted by the U.S. firm of Greenberg-Lake for Hemisphere Initiatives, a Boston-based American group whose polling and monitoring in Nicaragua is regarded as objective by many observers.

And, while many observers say that Sandinista bending of the rules has been a factor, they add that the greater blame for Chamorro's underdog status is due to UNO's lack of funds and the ineptitude of the UNO campaign. One Democratic Party official, recently returned from Nicaragua, described the UNO effort as "almost invisible once you get a short distance away from Managua."

Robert Pastor, an aide to former president Jimmy Carter who heads an observer group representing several former heads of state in the hemisphere, called Tutwiler's statements "rhetorical blasts aimed at one side. . . . Every issue that [Tutwiler] has raised has a response, but there has been little interest in the administration to look for that response. They communicate with only one side. They are a partisan actor."

What some critics see as selective use of anti-Sandinista information occurred Monday when Tutwiler cited an article published last Thursday in the Sandinista party newspaper, Barricada. Referring to charges that the Sandinistas are preventing part of $9 million in U.S. funds from reaching UNO, the article asserted that the delays were due to "the traditional Jew-style with which the U.S. Congress manages the taxes of the taxpayers." Denouncing the article's antisemitism, she called it "a contemptible and profound disservice to . . . all who want open, free and fair elections in February."

What she didn't say was that Barricada, the day after the article appeared and three days before her comments, published a statement disassociating the newspaper from the opinion of the author and asserting that Barricada's editorial policy "opposes any form of racial discrimination and respects all religions."

A senior State Department official, closely involved with Central America policy, denied that the department deliberately had ignored the clarification and said the department had not known about it when Tutwiler's statement was prepared.

The official, who declined to be identified, also acknowledged that "different institutions [such as the OAS and U.N.] will give differing interpretations of the situation inside Nicaragua." But he denied that the U.S. assessment is an attempt to discredit a potential Sandinista victory in advance or to mend the administration's fences with Re-

publican conservatives who believe Bush made a mistake in emphasizing elections over military efforts to oust the Sandinistas.

He recalled that the administration was sharply critical of deposed Panamanian dictator Manuel Antonio Noriega's rigging of that country's elections last May, and he added: "We don't but the argument that the Nicaraguan campaign is reasonably fair and that we should settle for a lesser standard just because it's Central America."

The administration also appears increasingly frustrated at the apparent failure of Chamorro to generate more vote support. In what many observers regard as a major mistake, she spent much of last month in the United States, undergoing orthopedic surgery and trying to raise money. A fund-raising event staged by a Nicaraguan exile group in Miami failed to raise anything close to the $4.2 million that her supporters say UNO needs.

David Carmen, president of a firm hired by the exiles to help with fund-raising, said his organization has been unable to come up with much more than a donation of 17,000 T-shirts imprinted with UNO slogans for distribution to Nicaraguan peasants.

HONESTY IN THE SOCIAL SECURITY FUNDS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Dakota [Mr. DORGAN] is recognized for 5 minutes.

Mr. DORGAN of North Dakota. Mr. Speaker, I wanted to make note here today that yesterday myself, along with the gentleman from Illinois [Mr. DURBIN] and others in the House of Representatives introduced legislation that would roll back the January 1 FICA tax increase. It is a plan that is similar to one being discussed by Senator MOYNIHAN over on the Senate side. I wanted to take just a couple minutes to explain to my colleagues why some of us think this is very important to do.

First, a little history. In 1983, the Social Security format was enacted by Congress. It was determined then that because of the needs after the turn of the century by the retirement of the baby boomer generation, we should begin now some forced savings in the Social Security Program. For that reason a number of things were put in place to build some revenues in the Social Security Program.

In this fiscal year, the revenues exceeding expenditures will equal $68 billion. Phrased another way, there will be a $68 billion surplus in the Social Security Program this year.

Now, is that being saved for future generations? That money clearly is taken from the paychecks of workers and from their employers and is represented, at least, to be put in a trust fund and saved.

Is it being saved? No, it is not. Under Gramm-Rudmann, there is a little clever device that brings the Social Security surplus back into the operating budget to help show a reduced Federal deficit. In fact, the Federal deficit this year will be around $210 billion, but because they have latched in the Gramm-Rudman Budget Act, a lever that brings the Social Security surplus back into that computation, the President and Members of Congress who want to show some progress on the deficit waddle around here saying that things are getting a lot better. They say, "You know, this is really remarkable. We are decreasing the Federal deficit."

We are not decreasing the Federal deficit. Things have not gotten better. What is happening is that the President and the Congress are misusing Social Security surpluses. It is not being saved. It is being used as an offset against Star Wars and welfare spending. That is what is happening, and I happen to be one who thinks we ought to stop it and stop it now.

There are two ways. The first I have worked on for a couple years. We ought to bring to the floor a bill that says that effective immediately the Social Security computations are outside the Gramm-Rudman budget proposal. What does that do? Well, immediately it takes the mask off the deficit. Nobody can play charades or pretend anymore.

The Federal deficit will be about $210 billion and the President and Members of Congress cannot crow about the progress that is being made on the deficit.

Yes, that would be troublesome. I understand why the President would not like to do it. He says, "Let's do it tomorrow. We will phase out the Social Security surpluses later."

Well, you know, that is the old Pa Kettle approach. I will do it tomorrow. They ought to tatoo that on their arms down there. They have been saying that since the early 1980's. Let us do it tomorrow.

I say, let us do it today and let us begin putting this country back on a fiscal policy track that makes sense for our future.

It does not make sense to use or misuse the Social Security revenues in order to show a lower operating budget deficit and then suggest that somehow we have fooled all America into believing that things are getting better. Things will get better when the President has the courage and when Members of Congress are willing to follow that lead to deal with the expenditure side and the revenue side of the budget in an honest way.

So I hope, Mr. Speaker, that the idea offered by Senator MOYNIHAN, the work that I and others, the gentleman from Illinois [Mr. DURBIN] and others have done here in the House of Representatives over the last year or so on this Social Security issue will be work that finally results in debate in the well of this House on the proper use of Social Security moneys, on how we ought to restructure our fiscal policy to really reduce the Federal deficit and to encourage savings, and encourage growth and economic opportunity in this country once again.

This country is off track and part of the reason is our fiscal policy, coming from the White House and adopted by Congress. We need to put it back on track and we need to do it soon.

Yes, that takes aggressive behavior, and yes, it takes some explosive activities here, such as the Moynihan proposal or the so-called take the medicine now amendment, which would remove Social Security from the computations immediately, and yes, that would be troublesome to the President and to the Congress, but that is a challenge we ought to accept on behalf of this country and its economic future.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. COX) to revise and extend their remarks and include extraneous material:)

Mr. BEREUTER, for 5 minutes, today.

(The following Members (at the request of Mr. FALEOMAVAEGA) to revise and extend their remarks and include extraneous material:)

Mr. OWENS of Utah, for 5 minutes, today.

Mr. MONTGOMERY, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

(The following Members (at their own request) to revise and extend their remarks and include extraneous material:)

Mr. DONALD E. "BUZ" LUKENS, for 5 minutes, today.

Mr. DORGAN of North Dakota, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. COX) and to include extraneous matter:)

Mr. MICHEL.

Mr. BILIRAKIS.

Mr. COUGHLIN.

Mr. HUNTER.

Mr. GEKAS.

(The following Members (at the request of Mr. FALEOMAVAEGA) and to include extraneous matter:)

Mr. SKELTON.

Mr. HOAGLAND.

Mr. KILDEE.

Mr. STARK in three instances.

Mr. MAZZOLI.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 319. An act to effect an exchange of lands between the United States Forest Service and the Salt Lake City Corporation within the State of Utah, and for other purposes; to the Committees on Agriculture and Interior and Insular Affairs.

S. 1046. An act to amend the Wild and Scenic Rivers Act of 1968 by designating a segment of the Merrimack River in the State of New Hampshire for study for potential addition to the National Wild and Scenic Rivers System, and for other purposes; to the Committee on Interior and Insular Affairs.

S. 1594. An act to revise the boundary of Gettysburg National Military Park in the Commonwealth of Pennsylvania, and for other purposes; to the Committee on Interior and Insular Affairs.

ADJOURNMENT

Mr. DORGAN of North Dakota. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 8 minutes p.m.), under its previous order, the House adjourned until Monday, January 29, 1990, at 12 noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2358. A letter from the Secretary, Department of Commerce, transmitting the annual report on export administration for fiscal year 1990, pursuant to 50 U.S.C. app. 2413; to the Committee on Foreign Affairs.

2359. A letter from the Chairman, U.S. Merit Systems Protection Board, transmitting the Board's annual report of its compliance with the Government in the Sunshine Act, calendar year 1989, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

2360. A letter from the Deputy Administrator, General Services Administration, transmitting a copy of a report of building project survey for Boston, MA, pursuant to 40 U.S.C. 606(a); to the Committee on Public Works and Transportation.

2361. A letter from the Secretary, Department of Veterans Affairs, transmitting a draft of proposed legislation to waive the reporting and waiting period requirements of section 210(B)(2) of title 38, United States Code, for a planned administrative reorganization of the regional field offices of the Veterans Health Services and Research Administration; to the Committee on Veterans' Affairs.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. WYDEN:

H.R. 3895. A bill to amend the Export Administration Act of 1979 to allow for the export of certain nonmilitary items to Warsaw Pact countries; to the Committee on Foreign Affairs.

By Mr. PEASE (for himself, Mr. DOWNEY, and Mr. LEVIN of Michigan):

H.R. 3896. A bill to revise the trigger provisions in the extended unemployment compensation program, and for other purposes; to the Committee on Ways and Means.

By Mr. BROOKS:

H.R. 3897. A bill to authorize appropriations for the Administrative Conference of the United States for fiscal years 1991, 1992, 1993, and 1994, and for other purposes; to the Committee on the Judiciary.

By Mr. BROOKS (for himself, Mr. KASTENMEIER, Mr. FISH, and Mr. MOORHEAD):

H.R. 3898. A bill to require certain procedural changes in U.S. district courts in order to promote the just, speedy and inexpensive determination of civil actions, and for other purposes; to the Committee on the Judiciary.

By Mr. BRUCE (for himself, Mr. MOODY, Mr. MADIGAN, Mr. RICHARDSON, Mr. WYDEN, and Mr. HALL of Texas):

H.R. 3899. A bill to amend title XVIII of the Social Security Act with respect to payment for certified registered nurse anesthetists under the Medicare Program; jointly, to the Committee on Ways and Means and Energy and Commerce.

By Mr. CONTE:

H.R. 3900. A bill to amend the Internal Revenue Code of 1986 to allow a deduction for contribution to education savings accounts and to provide that amounts paid from such an account for educational expenses shall never be subject to income tax; to the Committee on Ways and Means.

By Mrs. KENNELLY:

H.R. 3901. A bill to extend nondiscriminatory treatment to the products of the certain East European countries for 5 years; to the Committee on Ways and Means.

By Mr. KILDEE:

H.R. 3902. A bill to amend the Internal Revenue Code of 1986 to make permanent the exclusion for employer provided educational assistance, and for other purposes; to the Committee on Ways and Means.

By Mr. PALLONE (for himself and Mr. SAXTON):

H.R. 3903. A bill to prohibit the commercial harvesting of Atlantic striped bass in the coastal waters and the exclusive economic zone; to the Committee on Merchant Marine and Fisheries.

By Mr. SAXTON:

H.R. 3904. A bill to establish a commission for the establishment of a National Environmental Institute, and for other purposes; to the Committee on Science, Space, and Technology.

By Mr. GEKAS (for himself, Mrs. BENTLEY, Mr. BEVILL, Mr. BILIRAKIS, Mr. BORSKI, Mr. CARPER, Mr. CLARKE, Mrs. COLLINS, Mr. CONDIT, Mr. COSTELLO, Mr. COURTER, Mr. DEFAZIO, Mr. DE LUGO, Mr. DEWINE, Mr. DONNELLY, Mr. DORNAN of California, Mr. DYMALLY, Mr. FAWELL, Mr. FISH, Mr. FOGLIETTA, Mr. FROST, Mr. GALLO, Mr. GINGRICH, Mr. GUARINI, Mr. HATCHER, Mr. HAYES of Illinois, Mr. HAYES of Louisiana, Mr. HEFNER, Mr. HENRY, Mr. HILER, Mr. HORTON, Mr. HUTTO, Mr. HYDE, Mr. IRELAND, Mr. JOHNSTON of Florida, Mr. JONES of North Carolina, Mr. KOLTER, Mr. LAGOMARSINO, Mr. LANCASTER, Mr. LANTOS, Mr. LEHMAN of Florida, Mr. LEVIN of Michigan, Mr. LEWIS of Florida, Mr. LIPINSKI, Mr. LIVINGSTON, Mr. MCCOLLUM, Mr. MCDADE, Mr. MCGRATH, Mr. MARTIN of New York, Mrs. MARTIN of Illinois, Mr. MILLER of Washington, Mr. MOORHEAD, Mrs. MORELLA, Mr. OWENS of New York, Mr. PANETTA, Mrs. PATTERSON, Mr. PURSELL, Mr. QUILLEN, Mr. RANGEL, Mr. RAVENEL, Mr. RHODES, Mr. ROE, Ms. ROS-LEHTINEN, Mr. ROWLAND of Connecticut, Mr. SANGMEISTER, Mr. SCHUMER, Mr. SHAW, Mr. SHAYS, Mr. SKELTON, Mr. DENNY SMITH, Mr. SMITH of New Hampshire, Mr. STALLINGS, Mr. TOWNS, Mr. VALENTINE, Mr. WALGREN, Mr. WELDON, Mr. WOLF, Mr. WOLPE, and Mr. WYDEN):

H.J. Res. 464. Joint resolution designating April 22 through April 28, 1990, as "National Crime Victims' Rights Week"; to the Committee on Post Office and Civil Service.

By Mr. COUGHLIN (for himself and Mr. RANGEL):

H. Con. Res. 247. Concurrent resolution to urge the President to certify that Panama is fully cooperating with the United States in combating illicit drug trafficking, and to commend the Government of Panama and President Endara for Panama's demonstrated commitment to combat the scourge of drugs; jointly, to the Committees on Foreign Affairs and Banking, Finance and Urban Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 5: Mr. BORSKI.

H.R. 857: Ms. SLAUGHTER of New York.

H.R. 995: Mr. MCDERMOTT, Mr. JAMES, and Mr. CONDIT.

H.R. 1292: Mr. SMITH of New Jersey.

H.R. 1561: Mr. ESPY, Mr. SAWYER, Ms. PELOSI, Mr. LEWIS of Georgia, Mr. FAZIO, and Mr. MANTON.

H.R. 1774: Mr. UDALL.

H.R. 2285: Mr. FISH, Mr. ENGLISH, Mr. GOODLING, Mr. LEHMAN of California, and Mr. BROWN of California.

H.R. 2328: Mr. HASTERT.

H.R. 2743: Ms. SLAUGHTER of New York.

H.R. 2858: Mr. KENNEDY.

H.R. 3037: Mr. GILMAN, Mr. EMERSON, Mrs. KENNELLY, and Mr. STARK.

H.R. 3067: Mr. BRUCE.

H.R. 3143: Mr. KANJORSKI.

H.R. 3290: Mr. EDWARDS of Oklahoma.

H.R. 3423: Mr. BEILENSON, Mr. GILMAN, Mr. ESPY, and Mr. LEHMAN of Florida.

H.R. 3487: Mr. GORDON and Mrs. JOHNSON of Connecticut.

H.R. 3521: Mr. HAYES of Illinois and Mr. DYSON.

H.R. 3541: Mr. COSTELLO.

H.R. 3716: Mr. TOWNS and Mr. FRANK.

H.R. 3774: Mr. COSTELLO.

H.R. 3817: Mr. MORRISON of Connecticut.

H.R. 3818: Mr. MILLER of California.

H.J. Res. 82: Mr. DORNAN of California.

H.J. Res. 345: Mr. MILLER of Washington, Mr. HAMILTON, Mr. BLILEY, Mr. MURTHA, Mr. HATCHER, and Mr. MCDADE.

H.J. Res. 441: Mr. COBLE, Mr. FRENZEL, Mr. GUNDERSON, Mr. MAVROULES, Mr. CARDIN, Mr. CRAIG, Mr. BUECHNER, Mrs. MORELLA,

Mr. SLATTERY, Mr. STAGGERS, Mr. FASCELL, Mr. HALL of Texas, Mr. KASICH, Mrs. MEYERS of Kansas, Mr. MARKEY, Mr. LEVIN of Michigan, Mr. TOWNS, and Mr. WALSH.

H.J. Res. 462: Mr. FUSTER, Ms. OAKAR, Mr. TOWNS, Mr. CLEMENT, Mr. WALGREN, Mr. WOLF, Mr. BILIRAKIS, Mr. HENRY, Mr. HANSEN, and Mr. WALSH.

H. Con. Res. 85: Mr. MILLER of Washington and Mr. KLECZKA.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

135. By the Speaker: Petition of the City Council, Lakewood, OH, relative to ceasing aid to the Government of El Salvador; to the Committee on Foreign Affairs.

136. Also, petition of the City Council, Boston, MA, relative to the agreement between the National Archives with Philip Morris, Inc. regarding the Bill of Rights; to the Committee on Government Operations.

SENATE—*Thursday, January 25, 1990*

(Legislative day of Tuesday, January 23, 1990)

The Senate met at 9:45 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

He hath shewed thee, O man, what is good; and what doth the Lord require of thee, but to do justly, and to love mercy, and to walk humbly with thy God?—Micah 6:8.

Omniscient God who knoweth all things, from whom we have no secrets, to whom our thoughts are known and our words yet unspoken, immense issues confront the Senators, placing enormous demands upon them mentally, physically, emotionally, under the relentless pressure of scheduling. As Thou knowest our hearts, free us from every unworthy motive, attitude or action which would hinder righteous resolutions. Imbue the Senators with great purpose, pure motivation and high courage that this session will be totally productive, that they will adjourn in October with complete satisfaction of a job well done and the world a better place because of their labors.

In Jesus' name who is truth incarnate. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LEADER TIME

Mr. MITCHELL. Mr. President, I ask unanimous consent that the time for the two leaders be reduced to 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE

Mr. MITCHELL. Mr. President, after leader time this morning, there will be 5 minutes of morning business. At 10 o'clock this morning, under the provisions of the modified unanimous-consent agreement governing consideration of the President's veto message on H.R. 2712, there will be 4½ hours of debate equally controlled and divided between Senators KENNEDY and SIMPSON or their designees, with a vote occurring at 2:30 p.m. on whether or not to override the President's veto.

The 20 minutes prior to the 2:30 p.m. vote will be divided between the two leaders, with the Republican leader controlling the time between 2:10 and 2:20, and the time between 2:20 and 2:30 controlled by myself.

SENATOR ROBERT C. BYRD RECEIVES MINUTE MAN AWARD

Mr. MITCHELL. Mr. President, I would like to call to the attention of my colleagues, that last evening, the Reserve Officers Association of the United States, at its 1990 national council midwinter banquet, presented our distinguished senior colleague from West Virginia [Mr. BYRD], with the 1990 "Minute Man of the Year" Award. This award is presented annually by the ROA to "the citizen who has contributed most to national security in these times."

Mr. President, previous recipients of the ROA's Annual Minute Man of the Year Award include Presidents Ford and Reagan; Senators Stennis, Jackson, Russell, THURMOND, NUNN, WARNER, and STEVENS; and Representatives Vinson, Rivers, Sikes, Hébert, McCormack, Laird, Albert, Mahon, MONTGOMERY, and others.

Mr. President, the very able President pro tempore and chairman of the Appropriations Committee has a distinguished record of service to the Nation. In 1946, he first ran for political office, and was elected to the West Virginia House of Delegates. Subsequently, he was elected to the West Virginia Senate, the U.S. House of Representatives, and in 1958, the U.S. Senate, where he has served longer than anyone else in West Virginia's history. In addition to fulfilling his Senate responsibilities, in 1963, after 10 years of study at night classes in law school, he earned his law degree cum laude from American University, the first time in history that a sitting Member of either House of the Congress has accomplished that feat.

Senator BYRD became a Member of the Senate leadership in 1967, when he was selected by his party colleagues as secretary of the Democratic Conference. In 1971, he was chosen Senate Democratic whip. He was elected Democratic leader by his Democratic colleagues in 1977, a position he was reelected to five consecutive times. For the 12 years he held the position of Democratic leader—from January 1977 through 1988—Senator BYRD served as Senate majority leader for 6 years, 1977-80, 1987-88, and Senate minority leader for 6 years, 1981-86. In 1989, for the first time, Senator BYRD had the opportunity to serve as chairman of the Committee on Appropriations, and also in 1989, Senator BYRD was unanimously elected President pro tempore of the Senate, placing him third in line of succession to the Presidency. He now bears the distinction of having held more leadership positions in the U.S. Senate than has any other Senator of any party in Senate history.

Our distinguished colleague has supported a strong and practical national defense during his career, and as chairman of the Senate Appropriations Committee, he provided the leadership in which more than $1.3 billion for Guard and Reserve equipment was added to the administration's budget request.

Mr. President, I again offer my congratulations to the former majority leader former minority leader, and current President pro tempore and chairman of the Appropriations Committee.

I ask unanimous consent to have printed in the RECORD a list of previous recipients of ROA's annual "Minute Man of the Year Award" as well as a copy of Senator BYRD's remarks given to the Reserve Officer's Association Mid-Winter Banquet last evening.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

PREVIOUS RECIPIENTS OF ROA'S ANNUAL MINUTE MAN OF THE YEAR AWARD

1958—Brig. Gen. David Sarnoff.
1959—The Honorable Richard B. Russell.
1960—Col. Bryce N. Harlow.
1961—The Honorable Hugh M. Milton II.
1962—The Honorable Carl Vinson.
1963—The Honorable Dennis Chavez (posthumously).
1964—The Honorable Margaret Chase Smith.
1965—The Honorable L. Mendel Rivers.
1966—The Honorable John C. Stennis.
1967—The Honorable Robert L.F. Sikes.
1968—The Honorable F. Edward Hebert.
1968—Francis Cardinal Spellman (posthumously).
1969—The Honorable John W. McCormack.
1970—The Honorable Melvin L. Laird.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

1971—The Honorable Strom Thurmond.
1972—The Honorable Carl Albert.
1973—The Honorable Henry M. (Scoop) Jackson.
1974—The Honorable George H. Mahon.
1975—The Honorable Gerald R. Ford.
1976—The Honorable John L. McClellan.
1977—The Honorable Bob Wilson.
1978—The Honorable Charles E. Bennett.
1979—The Honorable Milton R. Young.
1980—The Honorable Samuel S. Stratton.
1981—The Honorable John Goodwin Tower.
1982—The Honorable G.V. (Sonny) Montgomery.
1983—The Honorable Ronald W. Reagan.
1984—The Honorable Sam Nunn.
1985—The Honorable William L. Dickinson.
1986—The Honorable Ted Stevens.
1987—The Honorable Bill Chappell, Jr.
1988—The Honorable Caspar W. Weinberger.
1989—The Honorable John W. Warner.

REMARKS BY SENATOR ROBERT C. BYRD, RESERVE OFFICERS ASSOCIATION MID-WINTER BANQUET, WASHINGTON, DC, JANUARY 24, 1990

In 1946, in an address at Fulton, Missouri, Winston Churchill said, "From Stettin in the Baltic to Trieste in the Adriatic an iron curtain has descended across the Continent."

Those words heralded the opening of the Cold War between communist tyranny and Western democracy.

In the decades since 1946, most of the military and foreign policies of this country have been aimed at preventing that communist tyranny from spreading further and enslaving more nations and people.

Today, that curtain is being shredded by courageous, valiant peoples who have embraced Demoractic values and rejected those of communism.

The Chinese have a double-edged benediction that runs, "May you live in interesting times."

Indeed, the era into which we are entering seems to be a response to that epigram.

Who would have prophesied, guessed, or dreamt, even one year ago, of the "interesting times" that we are witnessing in Eastern Europe?

One by one, nations once seemingly mired hopelessly in tyranny, are rejecting the rule of Communist parties, embracing pluralistic democratic forms, and struggling to achieve liberties that you and I take for granted. This is a stunning endorsement of the key political and economic values which our great country was founded upon.

And if current trends continue, in our lifetimes, Poland, Czechoslovakia, Hungary, East Germany, Romania, Bulgaria, and others may emerge as free and promising republics among the world's democracies.

As the Reserve Officers Association, you have chosen to honor me as the Minute Man of the Year.

It is a great honor for me. I am sincerely touched by this recognition.

In a like fashion, however, I want to pay tribute to you and to all of your military comrades who, since the end of World War II, have helped to make possible the rebirth of liberty we are witnessing in Eastern Europe.

As the Iron Curtain descended across Europe, we here in the United States might have chosen to turn our backs on the Old World and to let her sink into the permanent grip of communist slavery.

We could have reverted to isolationism and rejected our responsibilities to our fellow men. But we did not so choose. Instead, through the Marshall Plan, NATO, and the sacrifices of millions of Americans willing to serve in our Armed Forces, we held aloft to the people of Western Europe the light of our democratic way of life, and to the people of Eastern Europe the hope that someday they, too, might be free.

Since the end of World War II, we have enjoyed in our country and in Western Europe continuing material abundance and prosperity.

We believe—and rightly so—that such material prosperity is the fruit of liberty and democracy.

But prior to that material prosperity are the spiritual values that have made and kept us a strong and free nation.

In the end, for those spiritual values—faith in God, faith in our democratic way of life, faith in the honest and hard work of our hands, and faith in self-discipline and respect for our neighbors—for those spiritual values American military men and women served in Western Europe, fought in Korea and Vietnam, and sacrificed their youth and shared their abilities to defend our freedoms.

Throughout my career, I have held the men and women of our active Armed Forces, our Reserves, and our National Guard in high esteem. I have sought to keep those forces strong and ready to defend our national security and our liberties. I have believed, and I continue to believe, that our country has a covenant with those who have served in our Armed Forces and our military, and who have kept us free.

In the future, I shall continue to do whatever I can to keep our military strong and ready. As we draw down our active forces from the European theatre, in the context of the treaty emerging from the NATO-Warsaw Pact negotiations on conventional forces now underway in Vienna, Austria—the so-called Conventional Forces in Europe talks—the size of our active forces will undoubtedly diminish. At the same time, the role and the size of our reserve forces will increase. Many activities and functions now carried out by the active forces will be transferred to the reserves. So your responsibilities will grow. The security of our nation in times of a reduced threat still must be cared for, and in your hands, the hands of experienced generations of men and women—who remember how jarring and intimidating the threats and attacks of militant systems, be they Nazi or Communist—will be placed the heavy responsibility of keeping the nation ready when all seems tranquil.

And as the changing international situation allows for this shifting of military duties and roles, I shall work for the fair and intelligent use of funds to ensure that the Reserves can fulfill the expanded responsibilities and missions that will fall to them.

That will also include continuing to encourage improvements in the command and control of the Army Reserve.

The Iron Curtain is lifting, and a breath of liberty blows across Eastern Europe.

Let us rejoice in those changes. Let us enjoy the growing peace that we have earned through recent decades of preparedness.

But as the era of democratic promise continues, let us remember that this promise is the reward for vigilance and strength. Let us keep faith with our heritage, and let us ever keep America free and strong.

Mr. MITCHELL. Mr. President, I conclude by offering my own personal thanks and gratitude for the help, support, and counsel which the distinguished Presiding Officer has provided to me in my first year as Senate majority leader. It has been invaluable to me personally, and I am very grateful.

The PRESIDENT pro tempore. The Chair thanks the majority leader.

SENATOR MOYNIHAN'S PROPOSAL REGARDING SOCIAL SECURITY

Mr. MITCHELL. Mr. President, there has been a great deal of discussion about the proposal made a short few weeks ago by our distinguished colleague from New York, Senator MOYNIHAN, regarding the Federal Insurance Contributions Act and the Social Security system. There will continue to be much discussion about the proposal.

I personally believe that Senator MOYNIHAN has performed a valuable service to the Nation by calling attention to a serious situation which requires careful study, thought, and analysis by all interested public officials. I regret very much that one of the results of this has been a series of personal attacks upon Senator MOYNIHAN challenging his motive, attributing to him qualities and characteristics that he obviously does not possess. He is the Senate's and, I believe, the Nation's foremost expert on Social Security, and he has devoted his career to supporting the integrity of the Social Security system.

He is the most honest of persons, and recent remarks have suggested certain dishonesties on his part. I think they at least have implied that. I think that is regrettable. Senator MOYNIHAN is one of the most able, dedicated Members of the Senate. He is intellectually honest, personally honest, a man of great integrity and character. Whether one agrees or disagrees with his policy, I think we can all agree that his motives are the very finest.

So I hope we will concentrate our discussion now on the merits or disadvantages of his proposal and seek to deal with the problem in a serious manner.

Mr. President, I note the distinguished Republican leader is on the floor. I am pleased now to yield to him. I ask, if I exceeded my time, that the distinguished Republican leader be given an amount of time equal to that.

The PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF THE REPUBLICAN LEADER

The PRESIDENT pro tempore. The Republican leader is recognized.

PRESIDENTIAL VETO

Mr. DOLE. Mr. President, in a few moments we are going to begin the debate on whether or not the President's veto of legislation dealing with Chinese students should be overridden. I assume we will vote at 2:30. It will be a good debate. It will be a close vote.

But I say at the outset I hope we will again stick to the facts and not the emotion, the facts being the President has done by administrative action as much or more in every case as the legislation provides. That is why I believe many Republicans will vote to sustain the President's veto. The President directs foreign policy. The President is knowledgeable more than anyone I know in this Chamber on the People's Republic of China. This is an important vote.

As far as the President is concerned, it has become more or less a partisan matter. I do not know of any Democrats who are going to support the President. That indicates not much bipartisanship. But I hope we will have enough Republicans to sustain the President, who has indicated time and again, as most recently in a letter I put in the RECORD last night, that as long as he is President of the United States the students have nothing to fear.

And any suggestion that the President is going to change his mind next week, in my view, is an unfair characterization of the President of the United States. He has been consistent in this policy. He has given us his word. He has indicated to me in a letter—and he will be saying again later today—and I would say to the Chinese students, "You can count on President Bush."

Again, we will demonstrate in the debate that the administrative action goes beyond the legislative proposal. Things have changed since that bill zipped through the Senate and zipped through the House. And, as it should have, the administration has taken a number of appropriate actions to protect Chinese students and other Chinese in this country.

So I hope that the debate will reflect on the Senate and that it will not characterize President Bush as someone who is going to cow-tow to the Chinese. I believe that, if we listen to the debate, we will sustain the President's veto, and he will, as he has promised, not yield one inch in any effort to disrupt the Chinese students who are here in the United States. In addition, he would like to extend the exchange programs.

Martial law has been lifted. Voice of America—there are the discussions about getting that back on track. There are a number of things that Senator SIMPSON and others will be pointing out specifically that have been done, and I do not believe we want to dismiss a billion people and say we will play a little politics here on the Senate floor today: Do not worry about China, they are not important in the world. In my view the President has a pretty good understanding of that. He feels they are. And I feel that the veto should be sustained, and I believe it will.

Mr. President, I reserve any time I have.

MORNING BUSINESS

The PRESIDENT pro tempore. There will now be a period for the transaction of morning business.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DIXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,776th day that Terry Anderson has been held in captivity in Beirut.

STEN ANDERSSON, INTERNATIONAL DIPLOMAT OF THE YEAR

Mr. PELL. Mr. President, on September 29, 1989, the Pax World Foundation, as part of its charge to promote peace, honored Swedish Foreign Minister Sten Andersson as "International Diplomat of the Year."

During an intense 24-hour period in December 1988, Mr. Andersson worked closely with both Yasser Arafat and the United States State Department to craft Arafat's address before the United Nations renouncing terrorism and acknowledging Israel's right to exist in peace within secure borders. For the first time, the United States officially conversed with the PLO in an effort to promote peace between Israel and the Palestinians. Pax President Jack Corbett observed that "Andersson is a new breed of diplomat who effectively builds relationships and credibility with both sides of a conflict situation," noting also that Andersson's "reconciling spirit thus contributes to the climate for peace."

I was pleased to be given the honor of introducing Mr. Andersson at the September 29 award ceremony. In accepting his award, Mr. Andersson delivered an address entitled "Peacemaking in the World: The Swedish Experience." Other speakers preceding Mr. Andersson were Ambassador Richard Murphy, the key State Department official in the negotiations with Andersson and the PLO; Drora Kass, a member of the American Jewish delegation that met with Arafat in Sweden; and Khalil Jahshan, representing the National Association of Arab Americans.

Mr. President, I ask unanimous consent that the texts of all of these remarks, including the address of Mr. Andersson, be printed in full at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REMARKS OF AMBASSADOR RICHARD MURPHY

I appreciate your invitation to be here today to honor Foreign Minister Andersson.

Your news release about this meeting recalled that intense 24-hour period of activity last December involving the Foreign Minister, Swedish diplomats and the Department of State. Intense is the right adjective. But that moment was only part of a long series of diplomatic activity which on December 14 produced the announcement that the U.S. government would start a substantive dialogue with the PLO.

The Foreign Minister is known for his integrity, creativity and patience, all qualities essential to anyone trying to advance Middle East peace. Probably the Minister would agree that his ability to exercise patience was the most strenuously tested of all the needed qualities.

By late '88, the political context in the Middle East had changed. The *intifada* been in progress a full year; King Huseein had announced Jordan's disengagement from its West Bank responsibilities six months earlier.

Chairman Arafat's press conference on December 14, the day after his formal address to the U.N. in Geneva, met long-standing U.S. terms for dialogue. The United States did not draft Arafat's statement, as has subsequently been alleged. Our consistent position was that our terms for a dialogue had been clearly set out in 1975 and needed only to be met unambiguously for us to respond (ambiguity is often a useful technique in diplomacy, but would not have done the job in this case).

When Arafat spoke to the press on December 14 he acknowledged Israel's right to exist, accepted U.N. Security Council Resolutions 242 and 338, and renounced terrorism, an obligation levied during the Reagan Administration.

For 13 long years we had reiterated that if the PLO moved to accept our terms we would enter into a dialogue. After studying Arafat's December 14 statement and consulting with the President, Secretary Shultz announced that we were honoring our word.

The media asked me the following day whether this new dialogue would make our Middle East diplomacy any easier. I replied "no," but as a result of opening discussion we would be better positioned to play our role in advancing the Middle East peace process. I confidently predicted that the process would be long and tortuous, given

the complexity of the issues which need to be resolved in order to reach a general statement.

Since then, there have been several formal meetings between our Ambassador in Tunis and designated PLO representatives. Each side has commented on the slowness of the other's movement and suggested in various ways that the other party lacks seriousness.

Such comments are not surprising. I suggest it is neither surprising nor a bad thing that we cannot point to dramatic achievement after only nine months. There is a need for better understanding of the prospects and constraints operating on both of us, indeed on all of us, who want to see peace established. Our dialogue of the past nine months has just begun to de-demonize the U.S. in PLO eyes and vice-versa.

We are now hearing calls that this dialogue be broken off. The logic behind such a demand is thin. Even if man does not live by logic alone, logic has its place in diplomacy. The need to continue the dialogue is compelling. In honoring Minister Andersson today, we are honoring him for his efforts in the Middle East and further afield. His efforts have been firmly based on the need for logic, for persistence, and for the acceptance of present day realities on the part of all concerned if we are to move ahead.

REMARKS OF DRORA KASS, INTERNATIONAL CENTER FOR PEACE IN THE MIDDLE EAST

There are many superlatives one could use in describing Sten Andersson—and they would all be true.

Sten Andersson is a highly committed, deeply motivated, imaginative politician and an able diplomat. He is a negotiator of great skill and tenacity who inspires (seemingly effortlessly) the confidence of leaders, as well as that of the common man. And rumors—confirmed by Sten himself—even have it, that he is an expert omelet maker, not only political, but also culinary!

But for me personally, what is truly outstanding about Sten Andersson is the congruence between his public persona and his private self. All too often, we find politicians, diplomats and other individuals engaged in the promotion of peace who relate far more positively to humanity than they do to people; who love the human race, but cannot be bothered with human beings. In this arena, Sten Andersson is a breed apart, and we have seen ample evidence of this in the speech he has just delivered.

We, the five who went to Stockholm, share Sten Andersson's dream of peaceful coexistence between Israel and the Palestinians. We do so out of a deep commitment to the State of Israel and to its future well-being. We believe that only through compromise can this dream be fulfilled. We do not believe that this is a zero-sum game, where what is good for one side is necessarily bad for the other. Eretz Israel/Palestine is a land of two peoples, both of whom have a right to national self-determination and sovereignty in part of that land. Only through exchanging land for peace can Israel hope to remain strong, Jewish and democratic; only thus, can it redirect its energies and resources from physical survival to building a vibrant productive society.

We share Sten Andersson's belief that it is not enough to love peace, or to support it. As is written in the Bible, peace must be pursued actively. And the pursuit of peace between Israel and the Palestinians necessarily means active reinforcement of the moderate voices both in Israel and among the Palestinians, in their quest to replace emotions and violence with rationality and accommodation. The reaction by some of our critics to our Stockholm meetings and other steps in which we have been engaged in bringing Palestinians and Israelis together, has been that "we have waited so long for peace, let it mature and come to life on its own." But peace cannot come to life on its own, without active promotion and reinforcement of the moderate positions. By our silence, we necessarily lend support to the rejectionists on both sides. 100 percentism is the enemy of a peaceful resolution to the Middle East conflict. Passivity is equivalent to assertive support of the potentially explosive status quo.

In Israel, there is a widespread feeling across the political spectrum and among the people at large, that the status quo is untenable. The intifadah and its aftermath have made that crystal clear. But there is a gap between that understanding, or notion and the realization that there is an opportunity to move forward toward peace. Among some Palestinians as well, there is a notion that their compromises will not get rewarded; that there will be no response to what they perceived to be far reaching steps they have made toward peace.

It is the task of all of us to help convince the honest skeptics on both sides that there *can* be peace, so that these can press on their respective leaders and urge them to make the necessary sacrifices in order to draw it nearer.

I was touched by something written by an Israeli journalist who took part in the famous press conference which Chairman Arafat gave in Geneva last December. "Most of it sounded like empty rhetoric," she said. "But then for a moment, in that place, it seemed that our children and the children of the Palestinians need not be forever locked in deadly embrace."

If we are to expand that moment of belief in the possibility that things *can* be different, then we must first believe in it ourselves. And what better day to begin than today, the eve of the Jewish New Year, *Erev Rosh Hashana*, 5750.

In one our liturgy, this is a day of memorial and a day of judgment, Yom Hazikaron and Yom Hadin. It is a day of judgment, not in only in a divine sense, but in the sense that on it, we are charged with judging our own actions; it is an occasion of self-examination and earnest reflection.

It is also a day of remembrance, not only of great events of the dim past, but also of incidents of the journey we have made since the year began, of false steps we may have taken, or mistakes we may have made.

Let us take stock. And in the true Jewish tradition, let us replace old notions and mistaken ways by embarking upon new beginnings.

REMARKS OF KHALIL JAHSHAN, NATIONAL ASSOCIATION OF ARAB AMERICANS

It is indeed my pleasure and that of NAAA to take part in this very important event honoring Mr. Sten Andersson, Sweden's Minister for Foreign Affairs. For his personal role and that of the Government of Sweden for facilitating the events of December 1988, which produced the U.S.-PLO dialogue and brought the chances for peace in the Middle East closer to realization than ever before.

First of all, let me state that what took place in December 1988 and preceding months is not a new endeavor for the Government and people of Sweden. For many years, and quite often at a high price, Sweden has been playing a progressive and constructive role in peacemaking efforts throughout the world and particularly in the Middle East. For that they most certainly deserve our appreciation and gratitude.

As an American citizen committed to the peaceful resolution of the Arab-Israeli conflict, I would like to join Pax World Foundation in commending Mr. Sten Andersson and his diplomatic colleagues for their active role in the ongoing search for peace in the Middle East.

Our country, the United States of America, is a superpower with extensive national interests in that part of the world, matched by serious and often unfulfilled responsibilities. Sweden's assistance and moral prodding has over the years been of great help in overcoming domestic and ideological constraints preventing the U.S. from genuinely mediating the conflict and often from pursuing our own national interests in that strategically vital region of the world.

As a person of Palestinian origin, I am particularly thankful to Mr. Andersson and the Swedish Government for the excellent job they have done in bringing together Israelis and Palestinians—Arabs and Jews. Mr. Minister what you have accomplished is a difficult job that has been well done. However, I do have a request: the job is not complete. Arab and Jewish blood continues to be shed in the Middle East. Today, the Palestinian compromises announced in December 1988 remain unreciprocated in substance and spirit. Your responsibilities have not been totally fulfilled and your skills remain sorely needed.

Therefore, congratulations on a job well done. It is our hope that your efforts on behalf of peace would continue in the future with the same intensity and dedication that we have witnessed and admired in the past.

Thank you.

STATEMENT BY SENATOR CLAIBORNE PELL INTRODUCING FOREIGN MINISTER STEN ANDERSSON OF SWEDEN

I am delighted to have the honor of introducing Foreign Minister Andersson, who is being recognized as the International Diplomat of the Year. This is a personal pleasure for me because I have come to know and respect Foreign Minister Andersson during his previous visit to Washington, when he was our guest at the Senate Foreign Relations Committee.

Mr. Andersson continues a great tradition of Swedish diplomacy. Sweden's honor roll includes Count Folke Bernadotte who lost his life in the service of peace more than 40 years ago. It includes Dag Hammarskjoeld, widely recognized as the most creative Secretary General of the United Nations, who also gave his life in the service of peace. More recently, and closer to home, we have benefited from the diplomatic skill of your long-time Ambassador, my friend Count Wilhelm Wachtmeister, who is continuing his personal dedication to Swedish-American relations by making his home now as a private citizen here in Washington.

We are also pleased to welcome the new Swedish Ambassador, Anders Thunborg, who brings us a distinguished record of diplomatic service from his previous assignments as Swedish Ambassador to the United Nations and to the Soviet Union.

Last December, in its report on the breakthrough that made possible United States talks with the Palestine Liberation Organi-

zation, the New York Times had the headline: "Sweden Chalks Up Points for Its Foreign Meddling."

Mr. Andersson's diplomatic skills played a key role in bringing about that breakthrough. In 1988 Sweden invited American Jewish leaders to meet with the PLO in Stockholm, among them my friend Rita Hauser, a former U.S. Representative to the United Nations and a prominent lawyer in New York.

It was Foreign Minister Andersson's job to keep the diplomatic balls in the air until they came down in the right formation, when Mr. Arafat finally said the key words: "We totally and absolutely renounce all forms of terrorism, including individual, group and State terrorism."

This breakthrough was a beginning, the start of a new phase. The peace process continues in search of a solution in the Middle East. Perhaps Sweden, under the leadership of Foreign Minister Andersson, will continue to play a role, in this and other areas of conflict.

Let me conclude by remembering that Sweden has been a mainstay of the United Nations peacekeeping forces, which last year were awarded the Nobel Peace Price. More than 55,000 Swedes have served in such forces, and a number have lost their lives. For Sweden this is a recognized use of their military forces, one that is appreciated throughout the world.

The designation of Foreign Minister Andersson as the International Diplomat of the Year is an honor that he has earned by his personal initiative. It is also an honor to Sweden for its tradition of peacemaking.

If this is "foreign meddling." Mr. Foreign Minister, we hope you continue.

ADDRESS BY THE HONORABLE STEN ANDERSSON PEACEMAKING IN THE WORLD: THE SWEDISH EXPERIENCE

Dear Friends, I am greatly honoured and deeply touched with the Pax World Foundation has named me "Diplomat of the Year".

This honour is being bestowed upon me in recognition of the part I and my collaborators played last year in establishing a dialogue between the United States and the PLO.

This is very kind and generous of you.

It is both agreeable and satisfying to have hard work rewarded by such recognition, and I can assure you that I will not allow the pleasure I take in this honour to turn into passive complacency. There is little risk of this.

The success was first and foremost the result of a professional interaction between diplomatic competence and political experience. And this success would not have been possible without co-operation between several actors. We were not alone in bringing about this achievement.

First of all there were the parties themselves, the U.S. Government and the PLO. It is obvious that without their active endeavour, nothing could have been achieved.

The daring and far-sighted actions of George Shultz and the United States were of decisive importance. What I admired most was the courage of the American Jewish personalities who took the step to come to Stockholm and meet Yassir Arafat. They were the catalyst in the process—a process whose foundation was the new policy of the PLO.

Moreover, there were a number of other actors on the international scene involved. Countries such as Egypt and Saudi-Arabia played a crucial role. Also other countries played important parts.

I am proud that Sweden had the privilege to be among the parties contributing to this process. What made this possible was above all the confidence that all parties concerned have shown Sweden.

One of the reasons for this confidence in Sweden is to be found in our history:

For centuries, Sweden was one of the most belligerent countries in Europe. In the seventeenth century, Sweden was a major power and conquered countries all around the Baltic Sea. The Swedes fought their way far into Russia and Germany. This violent period ended in 1814.

Sweden has now lived in peace for 175 years. We have been able to develop our society and our democracy freely, without foreign interference. We therefore have obligations to other less fortunate peoples. All those who lack freedom and suffer under oppression, in war and misery—or in a poverty that is beyond our comprehension—have the right to count on the solidarity of a people blessed by fortune.

This solidarity is based not only on humanitarian feelings, but also on our own self-interest.

Two threats of annihilation are hanging over mankind; nuclear war and environmental destruction. They cannot be eliminated unless the rich peoples of the world help the poor, in a spirit of solidarity.

In the gap between the rich and poor countries continues to grow, the risks of trouble, antagonism, conflicts and war will continue to increase.

But if the poor countries raise their standard of living, using similar means and methods of production that we have employed, environmental catastrophe will be inevitable.

Therefore, the rich countries must develop new production methods which economize on resources and are environmentally sound, and—in a spirit of solidarity—place them at the disposal of the poor countries. For the sake of the poorer nations but also for our own sake.

Sweden is a small neutral country outside military alliances. It is essential for us to safeguard international law, including our own and other peoples right to self-determination an human rights. We must condemn violations of international law wherever they take place, and whoever commits them.

BOB SNEED: A FRIEND AND COLLEAGUE DEPARTS THE SENATE

Mr. HOLLINGS. Mr. President, at the end of 1989, the Senate bade farewell to a much valued, much respected colleague, Bob Sneed. I use that word "colleague" advisedly, because "staffer" just does not do justice to the nature of the professional relationship many of us have had with Bob. The fact is, Bob possesses what is too often lacking in the people we rely on for advice and technical support around here: seniority, a rich institutional memory, a seasoned and shrewd judgment, plus a sense of history and perspective that comes only from years of laboring in the legislative vineyard.

After a decade in the comptroller's office at the Department of Defense, Bob Sneed came to the Senate in 1976 as the Budget Committee's senior defense analyst, in which job he was like a right hand to Ed Muskie. Four years later, when Senator Muskie became Secretary of State and I assumed the Budget Committee chairmanship, Bob began working directly with me on a day-to-day basis. More recently, while still deeply involved in Budget Committee issues, he has also served on my Commerce Committee staff and as my nuts-and-bolts man on the Defense Appropriations Subcommittee.

Bob was present at the creation of Gramm-Rudman-Hollings in 1985, and provided critical, expert advice to me during debates on ratification of the SALT II, ABM, and INF treaties. His knowledge of defense issues and the Defense Department can only be described as encyclopedic. Indeed, I dare say that few congressional staffers can match his breadth of policy expertise, or his skills in the budget and appropriations processes.

Mr. President, after 26 years of Federal service—14 of them in the Senate—Bob Sneed is moving on to new professional challenges. During countless late-night sessions and in the thick of the most difficult legislative fights, Bob has always been there when I needed him. On behalf of the many Senators who have worked closely with Bob down through the years, and on behalf of the institution of the Senate itself, which he has served so loyally, I express our appreciation and best wishes to a great friend and truly exceptional colleague.

STATEMENT ON PRINTING MASS-MAIL COSTS

Mr. FORD. Mr. President, Senate Resolution 212, which was agreed to on November 19, 1989, made three changes in the publication of the mass-mail costs of the Senate. It requires that quarterly reports be published in the CONGRESSIONAL RECORD 2 weeks after the close of each quarter or as soon thereafter as practicable. It also requires that the number of pieces per capita and mass-mail costs for committees and other Senate offices be included in the report.

The report for the quarter ending December 31, 1989, has been compiled, and I ask unanimous consent that it be printed in the RECORD immediately following these remarks. The report includes only charges to the fiscal year 1990 appropriation.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

SENATE QUARTERLY MASS MAIL VOLUMES AND COSTS FOR THE QUARTER ENDING DEC. 31, 1989

Senators	Total pieces	Pieces per capita	Total cost	Cost per capita
Adams	13,108	0.00282	$11,313.16	$0.00243
Armstrong	0	.00000	0	.00000

FORT BRAGG UNITS TO PANAMA

Mr. SANFORD. Mr. President, all of us here have made various remarks regarding the recent United States military action in Panama. Much has been said, and will continue to be said, about the merits of our actions in that Central American country. With the capture of Manuel Noriega and his return to the United States to face criminal charges, "Operation Just Cause" is a success.

The Nation awoke on the morning of December 20, 1989, to find that we were engaged in the largest American military operation since the Vietnam war. In my home State of North Carolina, just as in the rest of the Nation, the support for the United States efforts in Panama was overwhelming.

Though the country is always proud of those that serve her in uniform, there was exceptional pride displayed by the citizens of North Carolina. Fort Bragg, NC is home to the 82d Airborne Division, the 18th Airborne Corps, and the U.S. Army Special Operations Command (Airborne), all of which participated in Operation Just Cause.

We must remember Mr. President, that as with most armed conflicts, Operation Just Cause was not void of the loss of life. As we cheer the colors being returned home triumphantly, we cannot forget those same colors draped over the coffins of those who gave their all for the Nation. They did so so that others may have the very blessings of freedom and liberty that they bravely fought and died for.

I wish to offer my sympathies to the citizens of Panama who lost family members during the recent fighting. The grief brought on by the loss of life during war transcends all international and cultural boundaries.

This Senator stands proud of the 18th Airborne Corps and the U.S. Army Special Operations Command. As a combat veteran once attached to the 82d Airborne Division, I stand extremely proud of them on the execution of their duties with the highest degree of skill and professionalism during Operation Just Cause.

Mr. President, I ask that the names of all the units that deployed to Panama from Fort Bragg, NC, be entered into the RECORD.

There being no objection, the information was ordered to be printed in the RECORD, as follows:

THE 82D AIRBORNE DIVISION

Division headquarters.
1st Brigade headquarters.
1st, 2nd and 3rd battalions, 504th Parachute Infantry Regiment.
4th Battalion, 325th Airborne Infantry Regiment.
Company A, 3rd Battalion, 505th Parachute Infantry Regiment.
1st Battalion, 82nd Aviation Brigade.
3rd Battalion, 318th Airborne Field Artillery Regiment.
An element of 3rd Battalion, 73rd Armor Regiment.
18th Airborne Corps:
Command group.
18th Aviation Brigade.
18th Airborne Corps Artillery.
525 Military Intelligence Brigade.
20th Engineer Brigade.
35th Signal Brigade.
1st Corps Support Command.
44th Medical Brigade.
U.S. Army Special Operations Command (Airborne):
1st Special Operations Command (Airborne).
4th Psychological Operations Group (Airborne).
96th Civil Affairs Battalion.
528th Support Battalion (Airborne).

CONGRATULATIONS TO THE INDIANAPOLIS CHAMBER ON ITS CENTENNIAL

Mr. COATS. Mr. President, I take this opportunity to call to the attention of my Senate colleagues an historic event which is currently taking place in the capital city of my home State—the 100th anniversary of the Indianapolis Chamber of Commerce on February 6, 1990.

All year long the citizens of Indianapolis will celebrate the centennial anniversary of their city's chamber of commerce with a program of gala activities, starting with a banquet to be held on February 3.

One hundred years ago this month, Col. Eli Lilly, already a prominent Hoosier businessman and civil leader, was elected the first president of the then Commercial Club of Indianapolis. As Colonel Lilly's own enterprise and hard work led to the development and growth of the corporation that today still bears his name—Eli Lilly & Co., so, too, the vision he had for his community took hold and grew. In December of 1912, the Commercial Club took several organizations under its civic wing and became officially the Indianapolis Chamber of Commerce.

Colonel Lilly's ideas and aspirations for this organization have borne fruit. Through its century of service, the chamber has provided the kind of leadership, support, direction and continuity, in times of war and peace, through periods of prosperity and adversity, that the residents of Indianapolis have needed and come to expect. Working individually and together through the organization's diverse civic programs and philanthropic efforts, the business men and women of the chamber have given, and continue to provide, their time, their talents and their resources so that Indianapolis could become the prosperous, healthy and dynamic metropolis it is today.

As I salute the outstanding work of the chamber and celebrate its present and future contributions to the life of Indianapolis and the welfare of my

fellow Hoosiers, I wish to recall the words of Colonel Lilly as he closed his annual address to the members of the Commercial Club on February 8, 1882. While these sentiments are not quite 100 years old, they convey a timeless message:

And now, gentlemen, in closing let each one pledge himself anew to the earnest support of the administration of our public work that therein hearts and hands may be strengthened in every undertaking for the public good. And to our city government we would say, see to it that you diligently exercise your powers to the end that our beloved city shall be not only all it should be to ourselves but a gem well fitted to its setting, the proud and noble state of which the gifted Sarah Bolton has so truly sung:

The winds of Heaven never fanned,
The circling sunlight never spanned,
The borders of a better land
Than our own Indiana.

THE TRANS-ANTARCTICA EXPEDITION

Mr. DURENBERGER. Mr. President, I rise in this new year to bring my colleagues up to date on the 4,000-mile International Trans-Antarctica Expedition.

While we have been in recess, the team has continued its trek across the bottom of the Earth. They have traveled 2,825 miles, nearly three-quarters of the 4,000-mile trek. On Monday, they left the Soviet research station at Vostok. Their destination, Mirnyy on the continent's east coast, is about 1,100 miles away and should be reached in early March.

After reaching the South Pole on December 11, 1989, the team traveled through the "Area of Inaccessibility." The area is so named because of its logistical difficulty. The team is the first to traverse the area by foot. In addition, team member Qin Dahe of China took the first snow samples in history from this inhospitable land.

Vostok is infamous. It has the lowest temperature on Earth: 129 degrees below zero.

Although the team will not face temperatures that low, they will face temperatures as low as 70 degrees below as winter comes to Antarctica.

Mr. President, the team's international makeup and cooperation should be an example to us, especially as the world moves into the 1990's with all its opportunities and pitfalls.

Let me introduce the team members: coteam leader and close friend of mine, Will Steger of Ely, MN. Will has been an explorer all his life, and in 1986 led the first dogsled trek to the North Pole. On that North Pole trip, Will met coleader and Frenchman Jean-Louis Etienne, who was cross-country skiing to the North Pole. It was at their meeting that the Trans-Antarctica Expedition was hatched.

Geoff Somers is from Great Britain and handles the dogs. He also serves as the team's navigator. Qin Dahe is from the Peoples' Republic of China, specializing in geology and glaciology research. Victor Boyarsky is from the Soviet Union and has been instrumental in getting logistical support from the Soviets. And rounding out the six-man team, is Keizo Funatsu from Japan who handles the dogs and is the youngest member of the team at 34.

Through inhospitable weather, difficult terrain, and logistical setbacks, the multinational team of explorers has proven the power and spirit of international cooperation. Although the team members did not know each other very well nor the difficulties they would encounter when they embarked on this trek last August, they have pulled together and developed bonds that only adversity can create.

Despite their isolation, the team has been following the events in Eastern Europe with joy and hope. In many respects they view the international aspects of their trek as a role model for the world. I agree. Their cooperation and unity show that when faced with a common goal, people of different nations can pull together and accomplish great challenges. World peace and freedom is such a challenge, and the six men of the Trans-Antarctic Expedition prove that if leaders commit themselves to achieve it, world peace and freedom can be reality.

CONCLUSION OF MORNING BUSINESS

The PRESIDENT pro tempore. Under the previous order, morning business is closed.

CHINESE STUDENT STATUS IMMIGRATION ACT

The PRESIDENT pro tempore. The Senate will now proceed to the consideration of the veto message on H.R. 2712, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 2712) to facilitate the adjustment or change of status of Chinese nationals in the United States by waiving the 2-year foreign assistance requirement for J nonimmigrants.

The Senate proceeded to reconsider the bill.

Mr. MITCHELL. Mr. President, prior to the commencement of debate pertaining to the reconsideration of H.R. 2712, I ask unanimous consent that the memorandum of disapproval, dated November 30, 1989, be printed at this point in the RECORD.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The Memorandum of Disapproval ordered to be printed in the RECORD is as follows:

MEMORANDUM OF DISAPPROVAL

In light of the actions I have taken in June and again today, I am withholding my approval of H.R. 2712, the "Emergency Chinese Immigration Relief Act of 1989." These actions make H.R. 2712 wholly unnecessary.

I share the objectives of the overwhelming majority in the Congress who passed this legislation. Within hours of the events of Tiananmen Square in June, I ordered the Attorney General to ensure that no nationals from the People's Republic of China be deported against their will, and no such nationals have been deported. Since June, my Administration has taken numerous additional and substantive actions to further guarantee this objective.

Today I am extending and broadening these measures to provide the same protections as H.R. 2712. I am directing the Attorney General and the Secretary of State to provide additional protections to persons covered by the Attorney General's June 6th order deferring the enforced departure for nationals of China. These protections will include: (1) irrevocable waiver of the 2-year home country residence requirement which may be exercised until January 1, 1994; (2) assurance of continued lawful immigration status for individuals who were lawfully in the United States on June 5, 1989; (3) authorization for employment of Chinese nationals present in the United States on June 5, 1989; and (4) notice of expiration of nonimmigrant status, rather than institution of deportation proceedings, for individuals eligible for deferral of enforced departure whose nonimmigrant status has expired.

In addition, I have directed that enhanced consideration be provided under the immigration laws for individuals from any country who express a fear of persecution upon return to their country related to that country's policy of forced abortion or coerced sterilization.

These further actions will provide effectively the same protection as would H.R. 2712 as presented to me on November 21, 1989. Indeed, last June I exercised my authority to provide opportunity for employment to a wider class of Chinese aliens than the statute would have required. My action today provides complete assurance that the United States will provide to Chinese nationals here the protection they deserve.

It has always been my view, and it is my policy as President, that the United States shall not return any person to a country where he or she faces persecution.

I have under current law sufficient authority to provide the necessary relief for Chinese students and others who fear returning to China in the near future. I will continue to exercise vigorously this authority. Waivers granted under this authority will not be revoked.

Maintaining flexibility in administering our productive student and scholar exchange program with China is important. As many as 80,000 Chinese have studied and conducted research in the United States since these exchanges began. I want to see these exchanges continue because it is in the national interest of the United States to promote the exchange of technical skills and ideas between Chinese and Americans. It is my hope that by acting administratively, we will help foster the continuation of these programs.

My actions today accomplish the laudable objectives of the Congress in passing H.R. 2712 while preserving my ability to manage foreign relations. I would note that, with respect to individuals expressing a fear of persecution related to their country's coercive family policies, my actions today provide greater protection than would H.R. 2712 by extending such protection worldwide rather than just to Chinese nationals. Despite my strong support for the basic principles of international family planning, the United States cannot condone any policy involving forced abortion or coercive sterilization.

I deplore the violence and repression employed in the Tiananmen events. I believe that China, as its leaders state, will return to the policy of reform pursued before June 3. I further believe that the Chinese visitors would wish to return to China in those circumstances, in which case I would hope that the knowledge and experience gained by the Chinese visitors temporarily in our country be applied to help promote China's reforms and modernization.

The adjournment of the Congress has prevented my return of H.R. 2712 within the meaning of Article I, section 7, clause 2 of the Constitution. Accordingly, my withholding of approval from the bill precludes its becoming law. *The Pocket Veto Case*, 279 U.S. 655 (1929). Because of the questions raised in opinions issued by the United States Court of Appeals for the District of Columbia Circuit, I am sending H.R. 2712 with my objections to the Clerk of the House of Representatives.

GEORGE BUSH.

THE WHITE HOUSE, *November 30, 1989.*

The PRESIDENT pro tempore. Time for debate on this message is limited to 4½ hours, with 4 hours and 10 minutes to be equally divided between Senators KENNEDY and SIMPSON, or their designees, with the time between 2:10 and 2:20 p.m. reserved to the Republican leader, and with the time between 2:20 and 2:30 p.m. to be reserved for the Democratic leader.

The Senator from Illinois [Mr. DIXON].

Mr. DIXON. Mr. President, acting as the designee of the distinguished senior Senator from Massachusetts [Mr. KENNEDY] I allocate to myself 5 minutes in support of the attempt to override the President's veto.

The PRESIDENT pro tempore. The Senator from Illinois [Mr. DIXON] is recognized for 5 minutes.

Mr. DIXON. Mr. President, yesterday the House of Representatives voted 390 to 5 to override the President's veto of H.R. 2712, the Emergency Chinese Student Relief Act. It is now the Senate's duty, Mr. President, to do likewise. Ever since the brutal massacre of hundreds of students and other prodemocracy supporters in Tiananmen Square in June, the Chinese have attempted to reeducate not only those who speak such counterrevolutionary words as "freedom" and "democracy"; they have attempted to reeducate this administration, Mr. President.

We have been told by the Chinese Government that only a few hooligans lost their lives. We have been told that the lifting of martial law is significant. We have been told that the Chinese students in this country would be welcomed back with open arms. Well, Mr. President, I do not buy that at all.

My sole interest in this issue has been, from the start, to provide sufficient, reasonable protection for the Chinese students in the United States of America. These students are just as likely to face kangaroo courts and imprisonment today, this very day, in China, as they were in June. I have no reason at all to believe that the situation in China will change before the end of the President's original deferred enforcement departure program.

I do not understand, Mr. President, why the President of the United States believes the enactment of this legislation will have such far-flung, dire consequences upon the Sino-U.S. relationship. If the Chinese are likely to be so upset with this legislation, as the President of the United States contends, would they not be just as likely to be upset with the President's administrative directive? The President himself has claimed that his effort would provide essentially the same protection, the very same protection as this bill. But, of course, the protection depends upon one man, the President of the United States of America, and this legislation protects for all time 40,000 Chinese students in the United States.

The main difference, it seems to me, is the President's effort rides on shaky legal ground. Can he provide a blanket waiver authority, when current regulations clearly indicate that waiver can only be granted on a case-by-case basis? The jury is still out on that question.

Only by supporting H.R. 2712 will this body ensure reasonable protection for all the Chinese students. Many of us in the Senate, including this Senator, introduced legislation back in June seeking protection for the Chinese students in this country. At that time I felt it was necessary to correct the flaws in the Bush administration's 1-year extension plan, and H.R. 2712 does just that.

H.R. 2712 would grant, by law, Mr. President, a 4-year extension of student visas for Chinese nationals. It would allow, by law, a waiver of the 2-year home residency requirement for Chinese students on J visas, and it would allow, by law, all Chinese students to accept the administration's original deferred enforcement departure status, without prejudicing their entitlement to any future immigration benefit they might seek under existing law.

Unfortunately, Mr. President, the administration has been more concerned with champagne toasts than with Chinese students in Champaign, IL, or in Chicago, or in San Francisco, or in Cambridge. That is the crux of this problem and why we need to override the President's ill-advised veto of H.R. 2712.

Mr. President, I undertake the consideration of any override vote most seriously. This issue is one of those instances when I deeply believe that the President of the United States is acting at cross-purposes to the best interests of the Chinese students in this country, and against the best interests of the United States of America, as that great beacon of democracy for the entire world.

Mr. President, I urge my colleagues to vote to override the President's terribly ill-advised veto of H.R. 2712. I thank the Chair.

Mr. SIMPSON addresssed the Chair.

The PRESIDING OFFICER. The Senator from Wyoming [Mr. SIMPSON].

Mr. SIMPSON. Mr. President, that got us off and running I think. A rather spirited peroration there.

The PRESIDENT pro tempore. How much time does the Senator yield himself?

Mr. SIMPSON. I yield myself 10 minutes.

The PRESIDENT pro tempore. The Senator is recognized for not to exceed 10 minutes.

Mr. SIMPSON. Mr. President, I was a little tardy with the rain and traffic. Is the control of the time under the Senator from Illinois representing Mr. KENNEDY?

The PRESIDENT pro tempore. The control of the time is under the control of Mr. KENNEDY and Mr. SIMPSON or their designees.

Mr. DIXON. I allotted myself 10 minutes acting in the capacity as floor manager.

Mr. SIMPSON. Mr. President, that was a very spirited review. The only

thing is it does not have anything to do with the debate. Other than that it was magnificent, I thought.

Mr. DIXON. I thank my friend from Wyoming.

Mr. SIMPSON. Under the direction of the President of the United States, nothing is going to happen to the Chinese students. So if we can start with that basic premise maybe we can get something resolved.

George Bush was our Nation's Ambassador to the People's Republic of China for a year and a half. He knows the players. He knows who is in favor. Who is not in favor. He knows who the hardliners are, the conservatives, the imperialists. He knows the moderates. He knows those who want change in their country, and he knows them by name. He knows more about China than anyone in this body, bar none, on either side of the aisle. Let us keep that in context.

And you know if we are going to come into this cooking on all boilers I can do that, too. I did a little of that yesterday. I was severely reprimanded. However, it seemed appropriate at the time because we were talking about partisanship. I said, you know, there is a partisan tinge to this, and do not let anybody miss it.

First, I do not think it comes from the fine sponsor in the House, NANCY PELOSI. I think she is very sincere and, in essence, a progressive person trying to do her very best for a remarkable constituency. But, as we say, when they had their visit up in Harvard on January 3 and 5, she fell in with evil companions because up there at that little session was John Sasso, who is the fellow that personally cut JOE BIDEN'S bicycle tire, and he is an individual who is a raw partisan.

She was there in the best interests of her constituency. Senator KENNEDY'S person was there. Also there were Congressman GEPHARDT'S person, Congressman BARTON'S person, or maybe the Congressman himself. It was a bipartisan group. Also there was Rick Schwartz, who is an advocate of anything that has to do with opposing anything in our immigration or refugee policies that are at least sensible.

It was called a group to plan strategy to override the President's veto. That is what it was and what they met for. They did not meet in a social event on the banks of the Charles River at Cambridge. That is that. I believe Congresswoman PELOSI when she tells me that she did not sense a severe partisan tinge to this.

But after hearing Senator DIXON I am reminded of that old story of the woman of the WCTU, the Women's Christian Temperance Union gaining force in the thirties promoting prohibition. She was railing and exhorting, bringing down the fire, the brimstone, and the terror from the cliffs, heavy stuff, on the evils of booze and the degradation, depravation and ruination of the family with the grain and the grape and how they had led to the grave. She said "Our Lord would never have stood for it." The guy in the back loosely composing himself, his breath familiar to all around him, said, "How about that time when He turned water into wine down there at the wedding in Cana?"

Well, she drew herself to her full proportion and she said, "I'd thought more of Him if He hadn't done it."

I think I sense that here. "I would have thought a whole lot more of George Bush if he had not done it." But he did do it, because he knew what he was doing.

And why did he do it? I hope we can get away from hearing too much more about champagne toasts. That seemed to trigger a lot of glands in the United States. Somebody ought to talk to Brent Scowcroft and get, as Paul Harvey said, "the rest of the story."

Why did Scowcroft go on a secret mission to the People's Republic of China? Because if he had gone publicly they would have repudiated him totally.

I thought George Bush, our fine President, expressed it beautifully yesterday when he said, "What would you think would have happened if I called the fine majority leader," who accused the President of kowtowing. I think our fine majority leader has stepped up his gunfire. If he wishes to do that we have a lot of people to return the fusillade over here. We have some skilled people to do that well. I am surprised at the renewed partisanship and intensity of our majority leader.

He threw another gratuitous shot into the game this morning, something about George Bush seeing the light on the EPA Cabinet position. He didn't know how he came about to reverse his position. He did that yesterday.

If that is what we are in for we have some remarkable cannoneers on this side of the aisle. But he opened that door and if that is what he wants to do fine. He called it kowtowing.

What is the purpose of bringing this up on the first and second day when we come back if it is not partisanship? Somebody please tell me. I want to hear that, and I know I will hear it in the debate. We can wait 2 months and find out what happened, and in 2 months if nothing happens then we can do it to him in spades.

Let us review why Scowcroft went to the People's Republic of China. He went secretly. And what George Bush said yesterday I think is so important. He said, "What if I had gathered the majority leader, and the other Members of their party together and said weeks ago, what would you think if I send somebody secretly to China, and if I did that we might get them to lift martial law? We might get them to release and give amnesty to 561 people. We might be able to get the Peace Corps back underway in that country, those remarkable carriers of democracy? We also then would reopen the Fulbright programs and other exchange programs. What would you think, should I do that?"

I bet you from my 10 years of knowing the majority leader and the assistant majority leader and others in that party they would have said, "It is worth the risk, Mr. President; try it."

I think all of us in this Chamber will admit that that is the way that would have been handled. And I think anybody would honestly say the same thing.

So he did it and then this drumfire of patter because it looks good, it looks very good for a free swing at the President and his policy. This is a freebie; you cannot lose a nickel on this one.

So Brent Scowcroft went, and he went so he could give them the business, and he went to tell them the President of the United States was trying to be reasonable, diplomatic—that being his nature as a diplomat—and that when the Congress came back into session they were going to do a number on the Chinese Government. Brent Scowcroft told them, "And the Congress will do a tremendous number on you, and if you do not believe it, you are lost in the swamps."

That is what he told them. He said, "We are repulsed and revulsed by what you did in Tiananmen Square." That is what he told them.

And amidst all the clinking glasses somebody left out a very important part of the speech, where he said, and you can get a copy of that if anyone cares to do that, "It would not be honest of me to come here if I did not tell you that we have profound areas of disagreement. Your complaints against us in your official organs are repugnant to us. And it is not what the administration did to you that is causing you pain. It is what the Congress is doing to you that is causing you your pain and you are going to get it in spades."

That is what he told them.

So, we have the reason it is just a curious debate is that we have a mixture here, and we do not seek purity over here, but I can tell you this, we have people who feel very strongly on our side of the aisle that this is an opportunity for those who still believe deeply in the transgressions of Red China, that is deep in their bosom, our strategy with regard to Taiwan and its recognition, that is there in their bosom, very real.

There are some who look upon this as the greatest opportunity of outreach into the Asian community and the Asian fundraising community that we would ever know, a new part of Fort Knox. I understand that. There

are some repelled by the coerced sterilization of the Chinese people and this triggers them.

Mr. President, I ask unanimous consent I be allotted an additional 7 minutes.

The PRESIDENT pro tempore. The Senator does not require unanimous consent. He controls the time and he is recognized for 7 minutes.

Mr. SIMPSON. I thank the Chair.

Red China. Forced sterilization, abortion, Taiwan, all these things impelled many of our people to support Ms. PELOSI in her effort. I understand that. And it is very important to understand that none of those fine people will do anything but express themselves beautifully right here today in this Chamber. And you will hear the debate.

I can only say to you that yesterday at the White House I thought George Bush was more directed, more committed, more vigorous than I have seen him on any single issue, because he is offended to think that someone would think that his position is somehow equated with sending these fine young people back to their deaths. No one is going to go back to their deaths. And if that is what is going to take place in this debate, I will respectfully rebut that at every turn in the road.

That is where we are. It is going to be a very spirited debate. You remember that the administrative action he has taken insures that no Chinese student is returned to any unsafe conditions. And then remember this—and this is an element of selfishness which I do not think is becoming at all for the Chinese students. They are tough. They are not just kind of wandering through America with wide eyes about democracy. They have people who are really setting them up. They have FAX machines, they have used the computer systems of every major university. I received 1,000 Christmas cards, and that is more than I get from Wyoming. They are good and they know exactly what they are doing. They want to stay here. The bulk of them want to stay right here. Let us not miss in any of this debate what is really happening. They want the ability to work here and they want to stay here just like every other soul, almost, that ever came here on a student visa.

Senator KENNEDY and I have been in this—I have been in it for 11 years, he has been in it for 27 years. So we put in an old immigration bill the point that a student who comes here to utilize our fine educational systems must return to their own country for 2 years. They say they want to come, learn and take back. We said fine, we will put that in the law.

So it does mean they go back. Then they pass on our ideals of freedom and democracy to their own people. Then they can come back here. That is why we put that on the books. A lot of people do not like that. They get here. They savor the flavor of democracy, and they have not the slightest desire to return to their native country. Keep that in mind. I just throw it out. It is partly there.

But, in any event, none of these young people are in jeopardy. I can tell you that some have done a selfish act, because under the President's directive, he is taking care not only of the Chinese students but he is taking care of all Chinese nationals in the United States. Hear that. I hope you hear that. That is what George Bush did. His action takes care of students, businessmen, academicians, teachers. The other bill just takes care of students, period.

And, if we are going to hear more about the issue of harassment, let us get that one clear. These young people are being harassed. I say to you, join me in a bill to say that anyone from an embassy who we host in our country who does that will be subject to severe penalties. In fact, I have that bill and I will put it in today. I am sure I will have some cosponsors. Senator SIMON of Illinois has indicated already that he would cosponsor that.

But harassment is not even an issue here because the Pelosi bill does not say anything about harassment. It would be nice if the Pelosi bill said that if these young people are harassed and so on, yet it says nothing. So I hope that that part of the debate will not get too intense, because there is nothing that will be resolved by that—nothing. I ask you only to read the bill, which I know is a hazardous thing to ask, but I do.

Whoever says that this President is returning Chinese students to a situation of insecurity and fear for their safety is misleading you either intentionally, or unwittingly, or lying just a tad.

Then they say it is not a certain status because it is subject to legal challenge. And I say that is pure bunkum. Let me tell you where that claim of legal inadequacy comes from. It comes from long-time and tough opponents of the President of the United States who are looking for legal hooks too hang their battered hats on that does not smell of the high stench of the partisanship that motivates them. While reasonable people disagree on whether there is authority for the grants of status, the administrative action may not be challenged in a court of law because there is no way a group could obtain standing to sue. I hope you hear that.

The Immigration Service is faced with these things all the time. On the providing of benefits, to sue this Government one needs to prove that he or she is injured as a result of the Government action. This injury has to be clear and specific, not speculative or attenuated. Prior suits challenging these grants of status have routinely and always been dismissed in the courts for lack of standing. A witness at the hearing Tuesday said he thought he could receive standing. He cited five legal arguments and none of them would indicate that he would receive any standing at all. So let there be no doubt. The administrative grant is as good as the bill. It is that simple. And it is more generous.

Mr. President, I see my colleague from Illinois and my colleague from Massachusetts. I am controlling time. I have concluded my remarks and will begin to yield time on the issue to those on this side of the issue. But I think it appropriate that the Senator from Massachusetts be recognized at this time.

The PRESIDENT pro tempore. The Senator from Massachusetts, [Mr. KENNEDY] is recognized.

Mr. KENNEDY. Mr. President I yield myself 3 minutes.

The PRESIDENT pro tempore. The Senator is recognized for 3 minutes.

Mr. KENNEDY. Mr. President, I see a number of my colleagues who want to address this issue. I have some more extended remarks which I will make shortly, but I would at this time like to ask our membership to focus on one very basic and fundamental issue, and that is not the good will of the President of the United States or his commitment to these students. As one that will urge our body to override that veto, that is not in my mind. I believe that he is committed. I believe, as my friend from Wyoming has stated, that he is committed to see the results of his administrative action.

But, having stated that, Mr. President, there is absolutely no certainty that my good friend from Wyoming or any other Member of this Senate or any person in this country can give that that particular administrative action will not be challenged in a court of law. As much as we might believe that that action will be sustained in any court in the United States, there is no one here in this body that can state with assuredness of the outcome or that the President's regulations will prevail. And yet, on the other hand, should we override this veto, those students will have the protections which this body has insisted on, with 74 cosponsors, Republican and Democrat, 26 Republicans, virtually unanimous in this body.

Mr. President, we will have an opportunity to debate that. I know, as we heard in our Immigration Subcommittee hearing just a few days ago, we have a Congressional Research Service legal opinion that believes that there are opportunities for standing in American courts by various groups. That can be dismissed, or argued as a legal issue. We have other very distin-

guished legal authority that believes that there can be standing, that the regulations can be challenged.

Why go through it? Why bother with it? If we are concerned about these students, why risk it, Mr. President? That is the issue.

We have the opportunity to give the assurance to those students. Some question has been raised: why the students; why not every Chinese? The fact is, the students have been the heart and soul of the democracy movement. That is the reason. We do not have to be enormously knowledgeable about what happened in Tiananmen Square to know that the students have been the leaders of the democracy movement, as they have in Eastern Europe.

Mr. President, America is graced today by the presence of some of the best and brightest of China—over 40,000 young men and women of great achievement and great potential for the future of their nation are now in the United States as exchange students.

For many of them, their future is clouded. They have been forced to flee their homeland, and they continue to be harassed and intimidated by the cruel regime that perpetrated the massacre of their brothers and sisters in Tiananmen Square last June, whose only crime was that they dared to speak out and stand up for democratic reforms.

We have an opportunity today to stand on the side of freedom—to stand with the courageous Chinese students and to express our abhorrence of the cruel tactics of the Chinese leaders in Beijing.

We know that the oppression goes on. Two days ago, at a hearing by the Immigration Subcommittee, we heard first hand evidence of the continuing harassment of Chinese students by their government. We heard that the efforts of the Chinese Government to eradicate dissent have now extended to the United States itself. Chinese students in this country who have continued to speak for freedom have been threatened by Chinese Embassy officials and their families in China have been harassed and interrogated.

The harassment has escalated since the President's veto. The Chinese Government has apparently been emboldened by the veto to intensify its repression, with less concern for the international outcry.

The secret White House missions to China have dealt a serious blow to the confidence of Congress in the administration's China policy, and to the confidence of the Chinese students that the administration has their best interests at heart. This legislation will allay those fears.

The enactment of this bill will be a clear signal to the beleaguered democracy movement in China, at a time of ongoing repression, that their struggle is not in vain, and that the Congress of the United States is prepared to use the full extent of the law to protect the courageous young men and women who dared to speak out against their oppressors.

The administration claims that it has taken executive action to protect the students, so that a statute is unneeded. But as one of the students emphasized at the hearing:

> The fact that Beijing is lobbying the White House so hard to oppose the override convinces us that the critics are right—there is a big difference between an administrative directive and congressional action.

Winston Lord, the United States Ambassador to China during the Reagan administration, also testified that the veto makes a big difference, and he urged Congress to override it. Ambassador Lord stated:

> Fairly or unfairly, the veto, if sustained, would reinforce the mindset and the mandate of those who have proceeded from massacre to repression; those who predict America will be lulled by cosmetic gestures and return to business-as-usual; those who dismiss the Chinese as a people apart from the global winds of change.

The administration has cited recent steps by the Chinese Government as a sign that its policy has been productive.

We all welcome the promises of the Chinese Government to halt its sale of missiles, the lifting of martial law in Beijing, and the reopening of the Voice of America. Perhaps China's leaders are beginning the long march back from the massacre of defenseless students and citizens last June that shocked the conscience of the world.

Yet, none of these stops touches the heart of the issue before us today—the ongoing repression of the Chinese students and those who participated in the democracy movement.

Martial law continues outside of Beijing. Fang Li Zhi—the Andre Sakharov of China—remains a refuge in his own country behind the walls of the United States Embassy in Beijing. The government has not relented in its charge against him of "counter-revolutionary propaganda and instigation."

We welcome the release of hundreds of detainees last week. But human rights monitors suggest that thousands were imprisoned for their prodemocracy protests. And many of those freed continue to suffer persecution—their academic degrees are withheld and they are assigned lowly jobs.

Yesterday, the House of Representatives voted to override the President's veto by the overwhelming bipartisan margin of: 390 to 25. Today, the Senate will also have the opportunity to vote for democracy in China—to stand with the courageous Chinese students, and to express our abhorrence of the brutality of the Chinese leaders.

It was wrong to veto the bill, which would have provided the Chinese students in America with the full protection of immigration law.

The administration has announced that it will provide the same protections which the bill would establish.

But no amount of explanation can refute the fact that a congressional statute will provide greater protection than executive action. What is established administratively can be taken away administratively.

In addition, it is by no means clear that administrative action can legally accomplish what the President says it will.

The Congressional Research Service has analyzed the administration's position. It reports that the administration may not have the authority to protect the students as fully as a statute will protect them.

For example, the waiver authority, which is the heart of the bill, is narrowly defined in current law. By longstanding practice, many legal experts state that the administration's action providing a blanket waiver is subject to judicial challenge.

And the presumption of continuous lawful presence in the United States—a necessity for Chinese students whose visas may have lapsed since June—is something on which, again, the Attorney General has little authority. As CRS puts it, there is "a serious question about the Attorney General's authority to waive a statutory requirement for relief."

The world will never forget the tragic events of last June 4 in Beijing and the courage and determination of the Chinese students—and neither should the United States Senate. No tanks, no guns, no prison cells can long deny the day when democracy and human rights will finally come to China. The message we send today will be heard around the world, and we should send it loud and clear.

We are all familiar with the Chinese proverb that a journey of a thousand miles begins with a single step. It may seem, in the aftermath of the atrocity in Tiananmen Square, that the restoration of democracy in China is a journey of a thousand miles. But if the Senate fails to take this step, if the Senate sustains this veto, the journey will be even longer.

The best way to affirm our commitment to democracy in China is to override this veto.

The Chinese students deserve more than administrative action. They deserve a law. This bill is for them.

Mr. President, I yield 10 minutes to the Senator from Washington.

The PRESIDENT pro tempore. The Senator from Washington [Mr. GORTON] is recognized for 10 minutes.

Mr. GORTON. Mr. President, the distinguished Senator from Wyoming

has already waved the bloody flag of partisanship over this debate and I simply want to state that he reminds me of the old story about the young man who murdered his parents and then asked the court for mercy on the grounds that he was an orphan.

This issue was not a partisan issue when the bill was passed by the House 401 to nothing. It was not a partisan issue when it passed this Senate by a voice vote. It was not a partisan issue when 76 Senators wrote to the President, asking him to sign the bill. It became a partisan issue only when the distinguished Senator from Wyoming felt that, on the merits, the veto would be overridden and in his desire to get one-third plus 1 vote to sustain the veto.

The issues here are profound and deep, having to do with our relationship with the present and the future of China and with our own commitment to democracy and human rights. The fundamental impact of our vote here today will be found on three distinguishable groups of Chinese people.

The first, of course, will be its impact on those who ordered the massacre on Tiananmen Square last June 4. The President believes that we can do business with those butchers. Those butchers now know that they can get much of what they want and at the same time hold onto the results of their brutality.

I ask my distinguished colleague from Wyoming what their next demand will be after this one has been granted without any real reciprocity?

I ask all of the Members of the Senate why the butchers should dictate the conditions the United States must meet to improve the relationship between the United States and the present Government of China?

It seems clear to me that this veto sends precisely the wrong signals to those who are presently in power in Beijing, the signal that they can get away with what they have done and retain their power, if not with the approval of the United States, at least with its acquiescence. In my view that is wrong.

The second group of Chinese who are impacted heavily by this debate are the Chinese students who are here in the United States today. I can begin my remarks on this part of the subject by stating that it may well be that the Executive order granting them protection may be as effective as any statute on the same subject. The point, however, Mr. President, is that the students who have demonstrated for democracy here in the United States do not believe it, and do not believe they can act upon it.

They are clearly told by representatives of the People's Republic of China that sooner or later they will be sent back to China; that sooner or later the President will make an agreement under which they must go back to China. And while I agree fully with and compliment the Senator from Massachusetts on his belief that that will never happen, as long as they believe that it will happen it will affect their willingness to commit to a democratic movement in China itself.

Reports on the radio this morning from Beijing indicated the great desire of that Government to have those students returned to China because of their importance, because of their education, because of their training, because of their skills. It is exactly because the People's Republic of China wishes them to return that we should protect them most strongly and give to the Government of the People's Republic of China an incentive for real reform rather than hollow words, in order to provide the safety and the incentive so that those students will voluntarily return.

The third group of Chinese impacted by this debate, of course, are those hundreds of millions of Chinese in China who are not a part of the current ruling regime and who hope for freedom and democracy and improvement in their lives. We are told a great deal about those moderates who are just waiting to take over China, and how sustaining the President's veto will help them.

My first thought is that those moderates may be as mythical as those in Iran a few years ago, who we were attempting to encourage. Maybe they have moved from Tehran to Beijing. But even if they do exist, I cannot imagine that those who are out of power will be encouraged or strengthened by our bowing to the will of those who are in power at the present time. Nor will that be the case with all those other hundreds of millions of Chinese who yearn for freedom. They want the United States to stand up for that freedom. They believe that in the past we have. That is, perhaps, the reason they had a statue of liberty in Beijing during the democracy movement. They do not want us supporting the present government.

Fundamentally, Mr. President, this veto should be overridden because the President has bet on the losing side. If the events of the last several months in Eastern Europe have shown us anything, they have shown us that a steady dedication to the principles of democracy and human rights on the part of the people of the United States will ultimately inspire any enslaved people to rise up against their oppressors. The only true question in this case is whether or not that power will be given up freely, as it was by the Communists in East Germany, or whether the present leadership will suffer the fate of Ceausescu.

In any event, we should be on the side of freedom, not on the side of repression; on the side of the future, and not on the side of the past. For that reason, Mr. President, we should override the veto.

Mr. SIMPSON. Mr. President, I yield 3 minutes to my friend from Missouri, Senator DANFORTH.

The PRESIDENT pro tempore. The Senator from Missouri is recognized for 3 minutes.

Mr. DANFORTH. Mr. President, I think there are basically two stated reasons for voting to override the President's veto and I do not think either of those reasons is persuasive. The first reason is that it is said that while the President has issued an Executive order providing for maintaining Chinese who do not want to return to their homeland in this country, an Executive order can be undone. It is said that a statute is more permanent. It is said that the Chinese Embassy is already in touch with Chinese students, warning them that they better come home now because they will be shipped home if they do not come home voluntarily.

I raised this issue yesterday with the administration. I immediately got a handwritten note from the President. The President says, in his note:

> Let me give you this assurance. As long as I am President, no student will be sent back to China against his/her will.

That is the commitment of the President of the United States. It could not be a stronger commitment. I say to Chinese students who are concerned about their future: Do not be sucked in by threats that are made by the Chinese Embassy or anybody else. You are not going to be sent back to China, regardless of how this vote turns out. It is not going to happen. The President of the United States is a person of his word.

The second reason, Mr. President, is frequently stated on the floor of the Senate. It is said that it is important to send a message from the United States to the Government of China. Mr. President, the content of the message is not in doubt. Everybody abhors the actions of the Chinese Government. Everybody in this country sympathizes with the people of China, those people who were victims of the repression last year within China. Everybody is in agreement on that.

I only suggest, Mr. President, that if we are in the business of sending messages, the best way to send a clear message is to do so with one voice. The best way to do so clearly is for Congress not to try to drown out the President of the United States.

It is not possible, in the opinion of this Senator, for the United States of America to send a clear signal in foreign policy if we do so through a weak President. It is basically the issue that is before us relating to the Presidential prerogative that compels me to

support the President in this veto override vote.

Mr. KENNEDY. I yield 10 minutes to the Senator from Maine.

The PRESIDENT pro tempore. The Senator from Maine [Mr. COHEN] is recognized for 10 minutes.

Mr. COHEN. Mr. President, time turns quickly in the world of future shock.

The morning news is obsolete by evening. Tomorrow, in the blink of an eye is yesterday's headline.

Because time has been accelerated by events, we have difficulty holding onto images and emotions that touched us little more than a moment ago.

But there are some events so momentous, some images so vivid, and some emotions so intense that they can never be burned from our memories.

A few weeks ago, we witnessed the fall of the Berlin Wall, an event that few of us believed would occur in our lifetimes.

Last spring we saw Manuel Noriega turn his dignity battalions loose upon those who opposed him in free and open elections. The sight of their bloodied bodies reminded the world of the sport of corrupt and ruthless dictators.

Then last summer we sat mesmerized before our television sets and watched students in China erect a replica of lady liberty in Tiananmen Square.

We saw a solitary, faceless young man display the courage of an army as he forced a column of tanks to change direction, and in those few moments he turned history itself. And sadly, we also witnessed the Chinese Army move through the throngs of students and demonstrators with tanks and bayonets. It was a brutal exhibition of military force. We cannot say how many died. There is no body count. But there were hundreds, perhaps even thousands.

What followed was equally brutal. Student demonstrators were hunted down and arrested. They were coerced into signing confessions. A number of them were summarily executed.

Justice came at the end of a gun barrel with a bullet in the brain.

The world was horrified at this display of barbarity.

But nearly as stunning was the attitude of Chinese officials immediately thereafter. They put on a mask, a smiling face and said: "There was no bloodshed. There were no students killed. The only people harmed were innocent soldiers trying to save the nation from counterrevolutionaries."

They did what George Orwell warned us of 45 years ago. They kept repeating a falsehood so often that it would eventually be taken for the truth.

Love is hate.

Ignorance is wisdom.

Peace is war.

Slavery is freedom.

And two plus two equals five.

Some countries accepted the Chinese Government's actions and declarations. After all, it really was a matter of China's internal affairs. They adopted a business as usual attitude.

The U.S. Congress did not. We passed legislation unanimously in the House of Representatives and by a voice vote in the Senate to grant a measure of security to Chinese students in this country, to give them safe haven.

President Bush is determined to provide Chinese students with the same protection by Executive Order and I truly believe that he will do so.

If it were only the issue of whether to protect Chinese students by Executive order or legislation, I would be supporting the President.

But there is more involved.

There is the issue of the importance of America's symbol to a world struggling to throw off the chains of dictators.

We cannot send aid to Eastern Europe and troops into Panama to liberate desperate people and at the same time accommodate the pride of those who want the Western World's trade and technology but not the values that it places on human rights.

I had hoped that the Chinese Government might concede that it had made a mistake, that it had had little experience in dealing with democracy or dissent. I had invited the Chinese Government to say that the United States, the champion of democracy, has not had an unblemished record in dealing with dissidents or human rights. I had hoped that they would call off the manhunts, the persecutions and the purges, and instead provide complete amnesty for those who were demonstrating for nothing more than the right to be free.

Instead, after suppressing every voice of dissent, the Chinese Government only recently declared an end to martial law. But according to reports that I have seen, it has not brought an end to the repression of its people.

The Senate Judiciary Committee received testimony earlier this week from Chinese students that since the President's veto the pending bill, consular officials of the Chinese Government have intensified their efforts to end the prodemocracy activities of Chinese students in the United States. This campaign of intimidation has included:

Government officials are identifying and targeting prodemocracy leaders and participants in prodemocracy activities. These students are being pressured to renounce their prior prodemocracy activities and to gather information against other students.

In meetings with students, Chinese officials have promised to provide no objection letters to those receiving the waiver of the 2-year home return requirement. In exchange for getting Beijing's blessing and the promise of no retaliation, the students must: First, stop participating in prodemocracy activities which including lobbying for an override; and second, cooperate with Chinese officials by providing information on their fellow students. Those who do not accept this offer are threatened with charges of treason and not receiving passport extensions.

Chinese officials have warned that prodemocracy activities will result in severe reprisals against the students and their relatives in China.

Family members in China are being used to intimidate the students:

One student leader in Massachusetts received a phone call from his father in China shortly after a consular officer has visited his campus. The father cried uncontrollably on the phone and asked his son, "Why are you doing this to us? Why don't you care about our safety?"

Another student received a letter from his father telling him that their relatives in China would be held responsible for his activities.

Students have also reported that Chinese officials continue to engage in active surveillance, collecting photographs and videotapes of students' activities.

Students who have returned to China to visit their families have been coerced into signing a confession of counterrevolutionary activities and a statement of self-criticism which are aimed at discrediting any stories they might tell.

China is a large and powerful country. Its very size and population make it a major player on global issues.

It may be that in the wake of this vote, China will choose to turn inward and even more repressive than it did during the cultural revolution. It may decide to revoke student exchanges, to terminate military cooperation with the United States and, indeed, foment even more problems in Cambodia. That is a risk that we run.

But if China decides to walk backward into the future, then it will do so at its peril as the rest of the world rushes toward the gates of freedom.

For that reason, Mr. President, I intend to vote to override the President's veto.

Mr. KENNEDY. If the Senator will yield, I yield myself 4 minutes.

The PRESIDING OFFICER (Mr. DIXON). The Senator from Massachusetts is recognized.

Mr. KENNEDY. I want to commend the Senator from Maine for an excellent summarization of where we find ourselves today. He mentioned in his statement the continued repression of the students here in the United States.

I, for one, find that enormously offensive. I served in the Senate when we had the Iranian secret police involved in the harassment and assassination of Iranian students here. We had some time ago the South Korean secret police, the Taiwan secret police, and Qadhafi killed more than 11 people here in the United States.

We have debated the issue about foreign action in terms of intimidation of their nationals here. I welcome the statement of my friend from Wyoming about trying to devise some kind of law to ensure that any diplomat caught in doing that would not be able to continue residency here. We are exploring the possibility of drafting a bill.

But I think I—gather from what the Senator has stated, and I just want to see if he agrees—that the conclusion that Ambassador Lord had at our subcommittee is the harassment and the repression, both here in the United States and also in China, is greater than it has ever been before. Now today, as of this past week, is that an impression that the Senator from Maine has as well?

Mr. COHEN. I am not able to quantify whether it is greater than ever before, but certainly it does continue, from the reports that I have heard.

Mr. KENNEDY. I yield time to the Senator from California.

The PRESIDING OFFICER. The senior Senator from California is recognized for 10 minutes.

Mr. CRANSTON. I thank Senator KENNEDY, and I thank him also for this leadership on this very important issue. I rise with my colleagues to join in following his leadership and join others, too, in voting to override President Bush's veto of H.R. 2712, the Emergency Chinese Immigration Relief Act of 1989.

This bill was intended to provide sorely needed legal protection to Chinese exchange students and visiting scholars, who would otherwise be forced to return to the People's Republic of China when their J-1 visas expired. Many of these students courageously voiced their support for the prodemocracy movement that was so brutally silenced in Tiananmen Square last year. They are now known to the Chinese Government, many are being harassed in this country by Chinese agents, and many are certain to be persecuted if they are forced to return home. The safety of these students should be of paramount importance to all who cherish democracy and freedom—in other words, each and every one of us in this distinguished Chamber.

Mr. President, when President Bush vetoed this bill and put in its place an administrative directive, he said he did so because he opposed congressional micromanagement of foreign policy, and that such legislation, and I quote, "puts America in a straitjacket and can render us incapable of responding to changing circumstances." Understandably that statement has sent a chill of fear through the Chinese student community in this country.

The students are justifiably concerned that the administrative directive does not carry the weight and protection of a statute. The students are also worried that the President does not have the legal authority to issue this type of an administrative directive. But what really frightens these students is that the President could rescind the order for reasons of political expediency—the "changing circumstances" referred to in the veto message. All of these are legitimate concerns.

Many of the students affected by the President's veto are studying and teaching in universities in my State of California. I have received from them letters that have touched me deeply. I think that their eloquent testimonials serve as the most compelling arguments I can present to my colleagues in support of the override. I would like to read excerpts from two such letters. In consideration of the students' personal safety, I will not disclose their names.

A student from a campus of the University of California writes:

> I am afraid that the Chinese Government will soon convince President Bush that it is "safe" enough for the Chinese students to return and that he should revoke his Presidential order. And President Bush did imply in his directive that he would do so at an appropriate time. * * * President Bush's veto will help the Chinese Government get rid of dissenters among the Chinese students studying abroad. The reason is simple. If you know you will return to serve the repressive regime, will you dare to say anything critical of it? * * * I feel very depressed. I can't even stand up for freedom and democracy without fear in this land that cherishes those values. * * *

Writes a student from a northern California university:

> The veto of this bill sent a wrong signal to China, to East Europe, to the whole world. * * * I was confused when the President vetoed the Pelosi bill because he wanted to maintain flexibility in foreign policy. The natural question will be, is he going to be flexible with our lives? * * * I am really worried that Chinese students in the United States will be used as a bargaining chip in relations with Beijing * * * 40,000 Chinese students in the United States are the surviving voices of Chinese democracy * * * in order to keep this voice alive, in order to be able to work openly and effectively for Chinese democracy, we need the statute protection much more than a questionable and changeable directive. For the cause of human rights and freedom in China, for the safety of Chinese students in the United States, I appeal to you to vote in favor of the override.

Mr. President, I share the students' apprehensions over the Bush administration's recent actions, which are inconsistent with the values for which America stands in the international arena.

Does the administration believe that the people of China are doomed to fail where others have succeeded in the drive to achieve greater freedom? Is the Bush administration asserting that East Europeans can naturally evolve toward democracy but that repression is the norm for the peoples of Asia?

I reject the view that there is no strong commitment to democracy in the Chinese mind—as if it were culturally incompatible. This is a mistake, a double standard which reveals a bias which has no place in American foreign policy.

Consider the contrast: While the administration applauds the sweeping changes underway in Eastern Europe, it fails to support similar change in China. Instead of championing the cause of democratic reform in Beijing, the administration is all too eager for reconciliation.

In recent days, we have heard from downtown how important is the lifting of martial law by the Beijing regime. This is a canard. Chinese authorities have simply shifted the burden of oppression from the army to the secret police. A totalitarian Communist regime like the PRC does not need martial law to crush dissent. Indeed, in recent weeks PRC authorities have moved to bar even the most rudimentary forms of protest.

I have been a consistent supporter of efforts to build a stronger relationship between the people of China and the American people. I supported recognition and the exchange of diplomatic missions. And I am fully cognizant of United States national interest in not encouraging isolation of the Chinese people.

But the ball is in China's court. It is China which remains at war with its own citizens—people whose yearning for democracy and human dignity has been brutally suppressed by a Communist dictatorship. It remains essential for China to take real, meaningful steps demonstrating greater respect for human rights and away from the repugnant policies represented by the Tiananmen Square massacre.

The cosmetic step of lifting martial law is insufficient justification to lift sanctions against China. The roundup and persecution of those advocating greater freedom in China continues, warranting continued American censure of the PRC.

Now is decidedly not the time for business as usual.

Mr. President, let us take this opportunity to do what we can to protect adequately the Chinese students within our own borders. Let us send a message to the students in China that we stand firmly behind them. Let us vote to override the President's veto.

The PRESIDING OFFICER. The Senator from California yields the floor. Who yields time?

The Senator from Wyoming.

Mr. SIMPSON. Mr. President, if I might yield myself such time as is necessary to respond to my colleague, then I will yield to Senator COCHRAN. But I think Senator GORTON is entitled to a response. He asked about partisanship.

We did have a spirited exchange. There is no one I respect more than the three people who are on the other side of this debate. Senator ARMSTRONG and Senator COHEN, were classmates of mine; we came here in 1978. They are marvelous people with deep wellsprings of good for other human beings. And Senator GORTON, a splendid legislator, a former State legislator, is a parliamentarian and a superb craftsman in this art. So it is difficult to be on the other side.

When we finish the shot and shell of this one, no one will be on the score card. There will be no Republican list; that is not the way we do our business. There are too few of us—45 of us. If you did that, you would never be the majority. We lust for that. Excuse me, if I might say that to my colleague from Massachusetts.

Back to partisanship. I want to commend Senator KENNEDY for having that hearing, the other day the only one held in either body. It was a good hearing, I appreciated him allowing us to state our case with very great patience. I appreciate that. That characterizes his relationship with me for 11 years.

We discussed then this level of bipartisanship that exists, and there is an element of partisanship, and an element of racism, an element of China bashing, of abortion, of forced sterilization, of the Asian community, an element of fundraising ability of the Asian community. All of that is in here. That is why it is such an interesting, mixed bag of people.

But while there will be Republicans who will vote to override, that in itself does not make this issue bipartisan. Forget the House. Everybody gave up on that long, long ago; heavy groundwork was needed there.

The issue was bipartisan when it left here, bipartisan because Senator KENNEDY and I were in a conference, and we approved the Pelosi bill. I admire that lady, she did a fine job. And the conference bill, with all respect to our Senate colleagues, was a better bill than the one that left the Senate. I thought that one was going too far. So NANCY PELOSI put one together that was just about right, she felt. The President felt so, too. Please hear that.

So, administratively, he approved everything her bill did. He just did not want it in the legislation, figuring that he is the President of the United States; he should have this power to deal with the issue as the President of the United States. It is not something that should be done by the Congress.

So the issue was bipartisan, until the President gave the same benefits administratively, as contained in H.R. 2712. But then the Democratic leadership announced that that still was not enough. It was enough when it left conference. It was enough when it was approved here, when we approved the conference committee report, and when the House did so, it was enough. But then when the President did this little twist, it was somehow not enough, and they wanted more. It was an attempt by some to say "let us one-up George Bush." How are we ever going to nail this guy. This is old 80 percent Bush. This guy is driving us crazy. He is the symbol of frustration for a great many. He does the right thing, and he includes the Democratic leadership in his discussions before he does the right thing. He did not discuss the Scowcroft visit with me or anyone else. It was not an attempt to run a whizbang. He reaches out and tries his best to include the majority party in the Congress, because he has been here. So it is frustrating.

But is turned partisan right there, and then the little visit up in Harvard and the gathering there. Let us face it, to some this is very definitely a trash-the-President movement. Do not miss that. Not to everybody, obviously. Good heavens. When I called it a partisanship move the other day, somebody said, "What are you trying to do, drive us all out of the Republican Party?" I said that I did not say a thing about driving anybody out of the party. I said it was a partisan issue. That cannot be distorted in any way.

I am disappointed, indeed, that some of my colleagues have been co-opted by the movement, but they have their own rich, personal reasons for doing that. I can tell you, as we discussed at the hearing with the bill's sponsor, about this meeting in Boston to plan a strategy to override—partisanship was the purpose of the meeting and it disturbed me. One of the people present was John Sasso, who was Governor Dukakis's campaign manager, who did the magnificent number, and a crude number, on JOE BIDEN. I do not care if he was just sitting there as an observer, or whatever his role was, but he was not there to stimulate support for George Bush. I can tell you that. His presence in the override campaign illustrates a strong partisan element that has invaded the nonpartisan issue of immigration. I can say that with great honesty.

Senator KENNEDY and I have stood side-by-side in our work on immigration. We do not always agree. We grapple when we deal with refugees, immigration. It is the most unromantic thing I have ever been in, and the toughest thing, filled with emotion, fear, guilt and racism; and yet we continue, because that is the job assigned to us in this place.

We do not hit very many areas of partisanship in immigration. This is an immigration issue. This is about people who come to our country, and we give them the right to come to our country, and they go to our consulates and they come.

Remember, we are talking about the J-1 and F-1 visa, a student visa. Remember why people are looking at this, and remember that from the People's Republic of China, I would say there are not 1 percent of the people who come here on regular visas that ever go back. Those who come here on a regular F-1 visa from the People's Republic do not return. Many of these other students simply do not want to return, and they want to lock it in. They are using some remarkable arguments that strike our compassion, our care, our love for freedom and democracy; but let us remember that almost 100 percent of People's Republic people who come here on any other kind of visa do not return. They get jobs; they try desperately to change status; they marry, and they do not want to go back. After hearing this debate, who would? Raise your hand. Does anybody want to go back? Well, that is the point.

During the time that the President will assume his administrative duties under his directive, is somebody saying they do not trust the President? That is what I am hearing. I thought trust but verify was something that Reagan used on Gorbachev. I did not know that is what Republicans and Democrats used on the President of the United States.

The 2-month delay is so reasonable and logical that I am absolutely mystified as to why that would not be allowed to take place. If we delayed this override vote for a couple of months to see if the present foreign policy will work, what is the problem, the rush?

The rush is, in this situation, partisanship. Eighty percent Bush is still out there. He will probably be out there longer than I will be around. So the only interpretation I can reach for some is—I do not think for any on our side of the aisle, none—that some in this body are so eager to defeat George Bush on any ground, no matter the damage it might do to our foreign policy, to our Chinese foreign policy, that they will cast prudence and good judgment to the winds in order to make some dramatic, political statement.

I have visited in the last few days with former President Nixon. I do not know who could speak more clearly about China. China was a totally closed society when he went there, closed tight, snared, snapped shut.

They told him not to go, that these were butchers and people who did this and that. And he went.

They are butchers. They butchered young men and women in Tiananmen Square, and nobody has argued that that was a good thing to do, nobody. Everyone was offended, including Scowcroft, when he went there to tell our story. Let me share with you, and then I will yield to Senator COCHRAN, what President Nixon has shared with me. I hope you will hear this. It is very short.

Those who insist on overriding President Bush's veto and applying even more sanctions say it will make America feel good to punish a few hardline Chinese leaders. But what sanctions will do in the process is hurt hundreds of millions of Chinese people. Our foreign policy should not be a salve for our own offended sensibilities, a mechanism for making us feel noble and true. Our foreign policy should be a tool for protecting our interest, and where we can, improving the lives of people around the world.

And by acting to protect 40,000 Chinese students already covered by President Bush's pledge, override supporters will dash the hopes of 40 million Chinese students in China, none of whom will ever have the chance to come to the United States if the door slams shut.

Before President Nixon went to China in 1972, no Chinese students were studying in the United States. Is that what China's critics want once again? That is what they bring about by overriding this veto. And remember, 7,000 Chinese students have come to this country since June 4, since Tiananmen Square; 7,000 Chinese students have come on visas to the United States. Do you want to shut that off?

That is what you are going to do. You cannot miss.

Then, President Nixon concluded. He said, "Today a powerful struggle is underway between hardliners and reformers in the Chinese leadership."

I add, parenthetically, George Bush knows every one of them by name and who they are. The argument was made that they will never come up again, that the moderates will never rise. But it only takes one. In the Soviet Union was one man, Gorbachev. And that is what is waiting in China, some one man, one moderate, one 50-year-old person who can lead that country to the same reforms that Gorbachev has led the Soviet Union.

But he concluded. He said, "I know what has happened. The reformers hold out the hope in China." He went there. "The reformers hold out the hope for more progress for China through stronger ties to the West. Weakening those ties, as China's critics propose to do today, weakens the reformers and strengthens the hardliners. Is that what the opponents of the President's policy favor?"

That is what will occur with the override of the veto.

Finally the Senator from Washington says, "China's next demand—what will it be? What will China's next demand be, what will they ask for, what will they bludgeon us with? How will we respond?"

Let me tell, you we are not responding to Chinese demands in any event. The question to this debate is how do we respond to our President and his foreign policy decisions? Whether the Chinese leaders believe the bill is an interference in their internal affairs is not at issue here. It is second guessing, micromanaging the President's foreign policy. That is the issue. He decided to do two things to protect the students and to keep the door to China open. That is what he is doing. That is the purpose of this activity.

Mr. CRANSTON. Will the Senator yield briefly?

Mr. SIMPSON. I yield.

Mr. CRANSTON. I would like to say that my very good friend from Wyoming, and he is a very close and dear friend of mine, stated that there are those in this Chamber who simply want to inflict a defeat on the President. That is not my desire, that is not the desire as far as I know of other Senators on this side of the aisle and obviously on the other side of the aisle who differ with the President's view on this issue.

We are concerned about a foreign policy issue and an issue that relates directly to the concerns and possible fate of some Chinese students, lovers of democracy, and fearful of returning to the People's Republic of China. It is our desire to make sure that they are protected to the best of our ability. We believe we can do it better by law than by executive action.

I am fully prepared to support the President and I do when I think he is right. I have a responsibility to differ when I think he is wrong. And rather obviously the many, many Republicans and overwhelming majority in the House who voted to override were not seeking to inflict political wounds on the President or defeat him. They were voting their conscience on an issue of very great importance.

Mr. SIMPSON. Mr. President, I say to the Senator from California I hear that very clearly. I do have great regard for him. We share together the same capacity that Senator KENNEDY did. He and I served together as ranking member and chairman of committees. I am not indicating in any way that the entire issue is partisan any more than I am indicating in any way its entirely attributable to Asian politics and fundraising or to Chinese policy on abortion and forced sterilization. I am saying it is an element.

I do personally know of persons, who happen to be on that side of the aisle and not our side of the aisle, who look upon this gratuitous chop at George Bush in a partisan way. They are not legion. There are some. There are some who are involved in the other issues I have just suggested, but indeed it is not a wholly partisan issue. But there are indeed persons on that side of the aisle who indeed have put that touch on it very clearly.

The PRESIDING OFFICER. The Senator from California is yielded time by the Senator from Massachusetts.

Mr. KENNEDY. Yes.

The PRESIDING OFFICER. The Senator from California is recognized for 2 minutes.

Mr. CRANSTON. I say by the same token I am sure my friend ALAN SIMPSON will agree that people on the Republican side of the aisle who are really voting for no override out of partisan loyalty to the President, out of loyalty too. I know some on that side attempted to vote to override are not going to vote that because they want to be loyal to President. That is to some degree a partisan politics.

The PRESIDING OFFICER. The Senator from Wyoming. And I assume the time is allocated by the scorer. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, that is an element, again I described where the issue turned into partisanship and that was after we did our work, did it well, approved the conference report and then the President did his act. Through administrative action, he did everything we had done statutorily. When he did his act it was determined by some to turn it into a partisan issue.

The PRESIDING OFFICER. The Senator from Wyoming yields the floor.

Mr. SIMPSON. I yield to Senator COCHRAN for 10 minutes.

Excuse me, I withdraw that request.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I would like to yield myself 4 minutes.

The PRESIDING OFFICER. The Senator is recognized for 4 minutes.

Mr. KENNEDY. Mr. President, I cannot let the remarks of my good friend go by without some response.

The meetings which were held up in Cambridge, MA, were held by the Chinese students who had very direct and I think reasonable fear for their future. It was not a partisan meeting. Congressman BARTON, a Republican was invited to that meeting. He sent his staff. Senator GORTON, Republican from Washington, was also invited to that meeting.

It was the intention, and I read through the materials for the meeting, to include Members of the Senate, to

invite all those to be involved, Republican and Democrat alike.

With respect to Mr. Sasso, I do not think he should be the issue when voting on the floor of the United States here today.

Second, I think as the Senator from California and the others have pointed out, the vote in the House yesterday was 390 to 25, including Republicans and Democrats alike, and I think that absence of partisanship has been true even during the debate in the course of the debate this morning. The reasons for supporting or opposing this issue have been expressed by Members from both the Republican as well as the Democratic Party.

A final point: I reject as unseemly the argument that the lists of so-called lobbies which has been stated here—on the abortion issue, on partisanship, on campaign financing—are the basis of action by the American people.

Are we supposed to say that those who supported with Lech Walesa were just reacting to the Polish lobby? Are we to say that those who spoke out here about the intimidation and the repression in Burma were responding to the East Asian lobby? Are we supposed to say that those who speak out in the support of glasnot and perestroika are motivated by the Soviet lobby?

I would like to believe there are people here who are speaking for the freedom lobby. We are speaking of an issue of fundamental importance that has swept the world, and all those who speak today can agree when it comes to Eastern Europe that our urgent statements were bipartisan. But somehow when it comes to China, on the same issue of freedom, we are accused of narrow, mean politics and grubbing to fundraisers. That is hogwash, Mr. President, and it does not deserve to be given consideration here on the floor of the Senate. This issue is one of fundamental human rights.

I will also be glad when we have the time to debate what I consider to be a very important question, and that is whether there could be a legal challenge to the administrative action of the President of the United States. Nothing, not one word, not one action, not one statement by the Senator from Wyoming or anyone else who supports the President's position can say definitely that a judge might not grant standing to the People's Republic of China, to challenge the administration's actions—a risk that does not exist with a statute.

The Chinese Government made an agreement with us with the understanding that those students were going to return to China. They paid out the money to support those students. Those students were supposed to return for a period of 2 years to China before they could come back to America. It cost the Chinese Government millions and millions of dollars. So the agreements were based upon that understanding.

Now the President waives the two-year return requirement. He says it does not apply. The Senator from Wyoming cannot state with any absolute assurance that some judge might not take into consideration those arguments. The Senator from Wyoming cannot say that maybe that judge will stay the effect of the President's order while they consider the Chinese Government's arguments.

Mr. President, we have strong legal authority that suggests that that is a very reasonable possibility. And why? Why put these young people at some kind or risk especially when we have the constant, continuing harassment of these students by their own embassy, students who have been the backbone of the democracy movement?

Mr. President, I do not question the President's commitment and desire and his willingness to help the students. I believe his handwritten note. I believe him when he says he does not want to see Chinese students returned. Many think maybe after 1992, he will still be in the White House, so he can continue the protection. Maybe yes; maybe not. But we may have a different person in that White House at that time. And I think if what we are talking about is establishing this kind of protection for those individuals, even beyond 1992, then the statute is necessary.

Finally, Mr. President, my good friend from Wyoming and I have some differences, as we have seen, on this issue. But on the issue of whether Chinese nonimmigrants overstay their visas, I will ask to include in the RECORD a report from the Immigration Service that they have one of the best records in the world for returning upon the expiration of their visas—one of the best. I am suggesting that Chinese nonimmigrants have one of the highest rates of return in the world. I do not question that some of these students might want to stay. No question about it. But I also believe that many of them are committed to trying to do something about their own country.

Why is it that we think we are the only people in the world committed to democratic institutions? We say all of our students always return to the United States. But maybe some of the Chinese students care about these values. Maybe some of them care about freedom, those that died in Tiananmen Square. Maybe some of them care about building democratic institutions. I, for one, am not prepared to say that they are all money grubbing young people in China; that all they want to do is find some quick job here in the United States. I think to say that does a disservice to these committed students. No one can remember what has happened to many of their colleagues on the streets of Beijing and doubt the real commitment and sincerity of those young people to democratic institutions.

Mr. President, I now ask unanimous consent that the previously mentioned report from the Immigration Service be printed in the RECORD at this point.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

ANNUAL ESTIMATES OF NONIMMIGRANT OVERSTAYS IN THE UNITED STATES: 1985 TO 1988

(By Robert Warren, Statistics Division, Office of Plans and Analysis, Immigration and Naturalization Service)

ESTIMATED NONIMMIGRANT OVERSTAYS, BY AREA AND SELECTED COUNTRY OF CITIZENSHIP: 1985 TO 1988

[Year refers to fiscal year of entry. Base of rates in table A–2.]

Area or country	Estimated overstays				Percent overstay			
	1985	1986	1987	1988	1985	1986	1987	1988
Total	217,300	242,700	226,500	254,900	2.4	2.4	1.9	1.9

[1] Rounds to zero. Numbers rounded independently.

The PRESIDING OFFICER. The Senator from Massachusetts yields the floor.

The Senator from Wyoming is recognized.

How much time does the Senator from Wyoming wish?

Mr. SIMPSON. Four minutes.

The PRESIDING OFFICER. The Senator from Wyoming is recognized for 4 minutes.

Mr. SIMPSON. Mr. President, every single time that Senator KENNEDY and I have debated there is always a rich tapestry of rhetoric. I know when to expect it, but is very impressive. He is speaking from his heart when he speaks on this issue, a lifetime commitment to human and civil rights and it builds up. He is very civil, but he just gets pretty rich in that and he is very, very real. That is the very authentic part of it. I admire that and always have.

I could not help but think of my father and another lawyer in Cody, WY. They were on one side or the other of every case in town for 25 years. One day in a terrible anguish of comment, Ernest J. Goppert rose in great indignation and said, "If that is the law, I will eat the statute book," to which my father responded, "And, Judge, if he does, he will have more law in his gut than he has got in his head." And they had a rich discussion of that, I can tell you, after they both went through contempt proceedings.

I guess we will have to decide what is real with regard to the legal aspects. That is an interesting point. And I would certainly share with Senator KENNEDY that it is.

But, this President has made a commitment to protect the Chinese students. The issue of harassment entered Senator KENNEDY's remarks. Please remember that this bill does nothing with harassment. Nothing. We ought to, if we are really concerned with harassment, we ought to add a dimension to the bill, add a section to the bill, do something with the bill.

I have a bill which has already been agreed to be cosponsored by my friend from Illinois with regard to what happens if embassy personnel harass their countrymen. The unfortunate part is, we have Chinese students who are harassing their fellow Chinese students because they will not toe the line on this issue. Do not miss that one. Purity is not a great long stream that just runs through all human conduct. There are Chinese students saying to their colleagues, "You better get in this." And they are saying, "I do not want to. Too risky for me. My old man is in the Communist Party over there. I am not going to play that game." And they say, "Yes, you are." I call that harassment. I do not know any other word for it.

Then the odd and final part of this exercise: Do you remember years ago when we were talking about Romania? You remember the same people sometimes who were saying give them a break, give them most-favored-nation status, they are going to be all right, they will be all right. What did they do? Butchered people up and down the roadways of Romania, and Ceausescu paid the price.

So it is a great interesting business, this. But you have to leave this heavy lifting to the President of the United States, you have any trust in the executive branch of government, especially a man who lived in the country for a year and a half of his lifetime.

I yield to Senator COCHRAN 10 minutes.

The PRESIDING OFFICER. The distinguished senior Senator from Mississippi is recognized for 10 minutes.

Mr. COCHRAN. Mr. President, I thank the distinguished leader on this side of the aisle for yielding to me. I want to commend the Senator from Wyoming for his very fine leadership in this discussion, and I hope the Senate will consider the real issue in this debate.

First of all, the issue is not whether the Chinese students will be sent back to China against their will. No students will be forced to return to China. Under orders from the President, the Attorney General has directed much greater relief than that provided in this bill. All Chinese nationals are included in these protective orders, not just students.

The issue is not whether we should express disapproval of the repressive and egregious acts of the Chinese regime. We did that before Christmas when the Senate expressed its contempt for the heinous acts of the Chinese regime. The House of Representatives expressed the same kind of disapproval in the strongest possible terms. The President of the United Stated has time and again very clearly expressed his condemnation of the repressive tactics used by the Chinese regime during the demonstrations for democratic change.

We can throw up our hands in holy horror all day long today, and it will not add to the indignation that has been expressed by our country and our leadership for what has gone on in China. Overriding the President's veto will not add weight to our expressions of indignation. That is not the issue.

Mr. President, the issue before the Senate today is whether the Congress will express confidence in the President to conduct the foreign affairs of the United States, specifically with respect to the sensitive relationship with the People's Republic of China. The issue is whether the Senate will vote today to repudiate the leadership of our President. That is the real issue.

Taking a look at the facts, we find differences, Mr. President, between what is happening in China today and what was happening in China several months ago, at the time this legislation passed the Senate and the House.

Certainly the Chinese situation remains unsatisfactory. That is not the issue either. We agree on that. I think everybody here agrees on that. But there are signs that President Bush's calm diplomacy and thoughtful leadership are working.

China has given assurances that it will refrain from selling missiles in the Middle East; martial law has been lifted in Beijing; nearly 600 Chinese political prisoners have been released; new Chinese flexibility has been shown on Cambodia; the Chinese have initiated discussions on a renewal of Fulbright fellowships and the operation of the Peace Corps in China; an important United States training program administered by the Office of International Cooperation and Development of our Department of Agriculture is operating now in China to the mutual advantage of our two countries. These are probably not all the changes that have occurred in recent months, but they are significant changes that are encouraging and that indicate success on the part of our President in developing a new era of understanding and influence with the Chinese regime.

Some are questioning the credibility of our President, like some of yesterday's speakers in the House of Representatives, but we should not be unduly influenced by their doubts. Nor, certainly, as the Senator from Massachusetts said, should we be influenced by the size of the vote in the House of Representatives. They have their obligations. This institution has its obligations.

We are considered to be the deliberative body. I do not think it is characteristic of the Senate to react to the emotions of the moment. We have talked about the purpose the Senate serves in helping develop and conduct foreign policy. We have many responsibilities in that regard which the House does not share.

One of those responsibilities is to ensure that our foreign policy is coherent, that it is predictable, and that our President is given the standing to articulate that policy in his dealings as our spokesman with the leaders in the rest of the world.

If we look at the situation that exists right now in Eastern Europe and in the Soviet Union, change is taking place so fast our negotiators can hardly keep pace. Before arms control reductions can be agreed upon, arms have already been reduced. Before we can negotiate a new configuration of the Warsaw Pact and NATO, the relationships have already changed.

What I am saying, Mr. President, is that the Congress cannot act quickly enough. It is not constitutionally or institutionally established to do that, to substitute its judgment in every instance for that of the President of the United States.

If we override the veto, Mr. President, mark my words, we undermine our own President and his standing to

conduct the foreign policy of the United States at a time in history when it is vital that we stand solidly behind him. I cannot believe the Senate will do that.

I urge the Senate to support the President and to sustain this veto.

The PRESIDING OFFICER. The Senator from Mississippi yields the floor. Who yields time?

The senior Senator from Colorado seeks recognition for how many minutes? I am sure that the Senator from Massachusetts would yield.

Mr. ARMSTRONG. Mr. President, I believe it was the intention of the Senator from Massachusetts to yield me 15 minutes.

The PRESIDING OFFICER. The senior Senator from Colorado is recognized for 15 minutes.

Mr. ARMSTRONG. Mr. President, I thank the Chair and my colleagues. Yesterday the other body, as we like to call the House of Representatives, voted by a margin of 390 to 25, to repass H.R. 2712, notwithstanding the veto of the President of the United States.

Mr. President, in doing so, the House reaffirmed the highest and best traditions of this country. It put itself again squarely on record in support of the ideals of human freedom which have been the essence, really the distinction of our country even from its birth and before the time of the birth of this country.

At the same time, Mr. President, Members of the House made it clear that they deplore the brutality of the regime illegitimately in power in Beijing, and have made it clear that they are not willing to be accomplices in the terrorizing of Chinese students who happen to be in the United States.

More than that, Mr. President, it is very clear that the action of the House has an overtone, it has an implication, and it says a lot about the spirit of this country. My colleagues will remember this bill became necessary not because of some theoretical concern but because of a gross abuse of human freedom; because Chinese students, fearing for their lives, fearing for their safety, were being threatened with repatriation against their will to China where they faced imprisonment, torture, persecution, forced sterilization, abortion, and other terrors.

A few moments ago my colleague from Wyoming mentioned Romania. I recall the Senator from Connecticut [Mr. DODD] and I asked the Senate to withdraw MFN status from Romania. And we cited at that time a lengthy rollcall of abuses of human rights in Romania, particularly the persecution of church people in Romania. At that time I recall vividly what the response was from the State Department.

They said: We do not condone what is going on in Romania, but we urge you do not do anything rash. Do not go off the deep end. Do not take matters into your own hands. No matter what you do, however strongly you feel about this matter, leave it to us because we know how to deal with the regime in Romania, with Ceausescu, and so on. As a matter of fact, they really pulled out all the stops to defeat that effort, but in the end they were not successful.

Members of the Congress and thoughtful people around the country prevailed and MFN status, after a lot of jockeying and filling, was withdrawn and the result is history.

China is not Romania, but the issue is really the same. The issue is, where does Congress want to position itself in the worldwide battle for human freedom?

Mr. President, we are not talking, as I mentioned a moment ago, about some kind of theoretical concern. We are talking about real people who are suffering real abuses, who are being subject every day to threats and intimidation and the tactics of terror.

Let me tell my colleagues about the case of Jin Han Chang, 33 years old, father of two, who escaped from China and applied for asylum in the United States. At his deportation hearing Chang testified one of the reasons he fled China was he feared government retribution because of his refusal to be sterilized after the birth of his second child.

The Board of Immigration Appeals, in a unanimous ruling issued on May 12 of last year, denied Chang's appeal and ordered him deported. In its ruling the BIA said that policy guidelines issued by the Attorney General in August 1988, which directed asylum adjudicators to give "careful consideration" to asylum claims from Chinese nationals fleeing their government's coercive population control policy, "were directed to the Immigration and Naturalization Service, rather than to immigration judges and to this Board." Thus the Board found it need not grant asylum.

The Board then went on to determine that China's "one couple, one child" policy was not "on its face persecutive" and that it could not grant Mr. Chang asylum. Fear of reprisals for violating China's population control policy, which can include forced abortions, coerced sterilizations, loss of job, housing, health care and income does not constitute a "well-founded fear of persecution" as defined in the Immigration and Naturalization Act, the BIA said.

The matter of Chang is a precedent. It is a precedent which we seek to overturn with the passage of H.R. 2712.

There may be some way that this can be done by executive action and, in fact, that is the representation of the Attorney General.

Let me just point out that the case of Chang has been on the desk of the Attorney General since last May. If it is his policy to overturn this precedent, he could do that this morning before noon. He could have done it yesterday. He could have done it before the passage of the Pelosi bill. He could have done it while the veto is pending.

I assume at some point in time he will do so because that is the policy of the President of the United States and I think it is going to happen.

I only mention this case—and I could mention many, many others, and some of them have already come to the attention of the Senate—because I think it must be crystal clear we are not dealing with a theoretical problem. We are dealing with a real abuse of human rights.

Since yesterday, when the House of Representatives voted by such a huge margin to repass the bill and reaffirm its support for this legislation, the administration has done a really skillful job of lobbying this issue. They are doing their job well.

The President, the Vice President, members of the President's Cabinet, former Presidents, a lot of people who are interested in this issue on the administration's side, have made a lot of house calls. They made telephone calls. They have had people down there for lunch. They have contacted people in the home States. They have done a thorough, first-rate job.

Frankly, I think it is likely that they are going to prevail; it probably will be quite close, but I learned a long time ago that when it comes to overriding Presidential vetoes, there is a lot of talk about it but, frankly, it does not happen very often. The reason is because all the political leverage is on the side of the administration, and uniquely so on this issue. There just is not any political leverage on this side.

There is a handful of Members of the Senate and a bunch of Chinese students, who, by definition, are not even citizens or voters on one side, and then there is the President and the political establishment and all that that implies on the other side.

So maybe as a consequence of that, notwithstanding what we think is the justice of this case, maybe the veto will be sustained. My hunch is that it will.

I hope not, however, Mr. President, and I would like to explain why. But before I do so, I want to deal with two or three issues that have been raised in one way or another which I really do not think constitute the crux of the matter.

First of all, I do not think the system is breaking down because we are having this kind of debate over overriding the veto of the President of the United States. Personally, I think

that proves the system is working. I think the debate itself has been useful; it has clarified the issue, and whatever happens, whether this bill is in fact passed over the veto of the President, I believe the very fact this has become the focus of national attention is good for China, good for Chinese students, good for the Congress, and afforded another degree of protection.

Some people, including some lawyers—may I say some lawyers who are not, as they have been characterized, adversaries of the President—have reason to believe that all of this debate may be about a statute that has already been enacted. There is a legal theory which says that in the manner in which he submitted his veto, he just did not cross all the t's and dot all the i's, and therefore the bill became law long before this session of Congress started.

I do submit for the RECORD—I ask my colleagues to take a look at it at the right time—this memorandum of law prepared by Lincoln Oliphant, who is legal counsel to the Republican Policy Committee, in which he explains that line of reasoning.

I do not contend this is true. Frankly, I do not know that it is, and I do not want to get into an argument among lawyers, but I just note in passing that that is a question and the way in which a President may exercise his authority of a pocket veto needs to be clarified and will be clarified at some time. Perhaps there will even be a lawsuit on this issue; I do not know, but in any case for legal scholars and others who are interested, I ask unanimous consent that Mr. Oliphant's brief be printed in the RECORD.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
REPUBLICAN POLICY COMMITTEE,
Washington, DC, January 24, 1990.

To: Senator Armstrong.
From: Lincoln Oliphant, Legislative Counsel.
Re Notes on the Constitutional Posture of H.R. 2712, the Emergency Chinese Immigration Relief Act of 1989.

Under the terms of a unanimous consent agreement the Senate will proceed tomorrow to "the veto message" on H.R. 2712, the Emergency Chinese Immigration Relief Act of 1989. This afternoon, by vote of 390-to-25, the House of Representatives "overrode" "the veto." However, the House may have taken an unnecessary and ultimately futile act—it may have acted on a bill that has already become law.

THE PRESIDENT'S DISAPPROVAL

The bill H.R. 2712 was passed by both the House of Representatives and the Senate last fall. It was presented to the President on November 21, 1989. On November 30 the President issued a "Memorandum of Disapproval" with respect to H.R. 2712 and delivered both the memorandum and the enrolled bill to the Clerk of the House. The great portion of the President's memorandum dealt with the merits of the bill, but the last paragraph, which is quoted here, explained the President's method of disapproval:

"The adjournment of the Congress has prevented my return of H.R. 2712 within the meaning of Article I, section 7, clause 2 of the Constitution. Accordingly, my withholding of approval from the bill precludes its becoming law. *Pocket Veto Case*, 279 U.S. 655 (1929). Because of the questions raised in opinions issued by the United States Court of Appeals for the District of Columbia Circuit, I am sending H.R. 2712 with my objections to the Clerk of the House of Representatives." 136 Cong. Rec. H 4 (daily ed. Jan. 23, 1990) ("Memorandum of Disapproval from the President of the United States").

The President was attempting a "pocket veto," but he may not have succeeded. Note that although he sent the papers to the Clerk of the House the President denies that he was "returning" the bill within the meaning of Article I of the Constitution. He was, he holds, merely corresponding with the Clerk of the House and not (in constitutionally efficacious terms) returning a bill, with his objections, to that House in which it originated.

THE CONSTITUTION

The relevant constitutional text is as follows:

"Every Bill which shall have passed the House of Representatives and the Senate, shall, before it become law, be presented to the President of the United States; If he approve he shall sign it, but if not he shall return it, with his Objections to that House in which it shall have originated, who shall enter the Objections at large on their Journal, and proceed to reconsider it. If after such Reconsideration two thirds of that House shall agree to pass the Bill, it shall be sent, together with the Objections, to the other House, by which it shall likewise be reconsidered, and if approved by two thirds of that House, it shall become a Law. But in all such Cases the Votes of both Houses shall be determined by Yeas and Nays, and the Names of the Persons voting for and against the Bill shall be entered on the Journal of each House respectively. If any Bill shall not be returned by the President within ten Days (Sundays excepted) after it shall have been presented to him, the Same shall be a Law, in like Manner as if he had signed it, unless the Congress by their Adjournment prevent its Return, in which Case it shall not be a Law." U.S. Const., Art. I, sec. 7, cl. 2.

Therefore, the Constitution provides four options for a bill that has passed both houses and been presented to the President: One, the President may sign it and it then becomes a law. Two, he may veto it and send it back to the originating house (together with his objections); Congress may then vote to override the veto. Three, he may do nothing in which case the bill becomes law automatically unless, four, "the Congress by their Adjournment prevent its Return, in which Case it shall not be a Law" and no override is possible.

The President thought he had chosen option four. The House has decided that the President actually exercised option two. (See, the reply of the Speaker to the Parliamentary inquiry by Mr. Michel, 136 Cong. Rec. H 5 (daily ed. Jan. 23, 1990). Tomorrow, the Senate is expected to formally agree with the House. (Whether a Senator votes to override or sustain the "veto" he will be agreeing *sub silentio* that the Senate has before it a genuine presidential veto.) However, the President may have exercised neither option four nor option two but option three: H.R. 2712 may have become a law automatically because (1) the President neither signed it nor vetoed it, (2) ten days (excluding Sundays) have passed since the act was presented to the President, and (3) at no time since November 21, 1989 has the Congress adjourned so as to prevent the bill's return.

INTERSESSION ADJOURNMENT

Both the House and the Senate have provided a method for receiving messages during recesses and adjournment.

"Rule III.5 of the House provides that '[t]he Clerk is authorized to receive messages from the President and from the Senate at any time that the House is not in session.' At the beginning of this Congress, the Senate by unanimous consent provided 'that for the duration of the 101st Congress, when the Senate is in recess or adjournment, the Secretary of the Senate be authorized to receive message from the President of the United States." 135 Cong. Rec. S 16677 (daily ed. Nov. 21, 1989) (remarks of Sen. Mitchell).

Section 4 of the adjournment resolution (H. Con. Res. 239, adopted November 22, 1989) reiterated that officers of the House and the Senate would continue to receive messages from the President during the adjournment period. The President received a certified copy of that adjournment resolution.

It is true, of course, that Congress adjourned last November and only recently returned but that is not the constitutional standard. The Constitution may be read to allow a pocket veto if and only if the adjournment is of a type that prevents a bill's return, and the recent intersession adjournment was not of that type because the Clerk of the House and the Secretary of the Senate were authorized to receive "returns" during the period of adjournment.

CASE PRECEDENT

The leading Supreme Court cases are ambiguous and confusing. *The Pocket Veto Case*, 279 U.S. 655 (1929) greatly strengthens the President's position. *Wright v. United States*, 302 U.S. 583 (1938) undermines it. More recent decisions of the United States Court of Appeals for the District of Columbia Circuit are extremely destructive of the President's position. *Kennedy v. Sampson*, 511 F.2d 430 (1974); *Barnes v. Kline*, 759 F.2d 51 (1985) ("The existence of an authorized receiver of veto messages, the rules providing for carryover of unfinished business, and the duration of modern intersession adjournments, taken together, satisfy us that when Congress adjourned its first session *sine die* on the day it presented H.R. 4042 to the President, return of that bill to the originating house was not prevented. We therefore hold that H.R. 4042 became law. . . ."), *vacated and remanded with instructions to dismiss the complaint as moot, Burke v. Barnes*, 479 U.S. 361 (1987).

The following note from *The Constitution Annotated* is most interesting:

"The Administration declined to appeal [*Kennedy v. Sampson*] to the Supreme Court. . . . Subsequently, the President attempted to pocket veto two other bills, one during a 32-day recess and one during the period which Congress had adjourned *sine die* from the first to the second session of the 93d Congress. After renewed litigation, the Administration entered its consent to a

judgment that both bills had become law . . . and it was announced that President Ford 'will use the return veto rather than the pocket veto during intra-session and intersession recesses and adjournments of the Congress', provided that the House to which the bill must be returned has authorized an officer to receive vetoes during the period it is not in session." Library of Congress, *The Constitution of the United States of America: Analysis and Interpretation* 136 n. 22 (1987) (citation omitted).

CONCLUSION

The Executive Branch and the Legislative Branch have clashed repeatedly on veto policy and law during the past two decades. The President's actions on H.R. 2712 and the Congress's response are but the latest in a string of thrusts and parries. The President believes he exercised a "pocket veto" and the bill is dead. The House has treated H.R. 2712 and its papers as though the President exercised a traditional "return veto." The Senate is preparing to concur in the House interpretation. There is another reading of the facts and the law, however. Under this alternative reading, H.R. 2712 became law on December 2, 1989 without the President's approval.

Mr. KENNEDY. Will the Senator yield at that point?

Mr. ARMSTRONG. I will be happy to yield.

Mr. KENNEDY. The Senator has brought up a very important point—the actions that we take may very well be questioned—and that is the power of the President in the application of the pocket veto. We have had the decisions by the courts that the President of the United States cannot pocket veto when the Senate is in brief recess. The question was whether we were in sufficient recess this time. That is a question where there are very substantial differences of legal opinion.

Many constitutional authorities believe that the pocket veto only applies when the Congress actually adjourns. So the point that is taken by the Senator from Colorado is whether the President is going to rely on the pocket veto, which he has said he may very well do this time. It is not clear now whether he is relying on the pocket veto. And in questioning the counsel for the administration, they have some differences on that; they take issue about whether we are dealing with a pocket veto or a real veto. But if it should be a pocket veto, then it would not have to be respected. You would have a difference in the legal situation as well.

I thank the Senator for bringing that up, because it is something that should be considered.

Mr. ARMSTRONG. Mr. President, I appreciate the comments of the Senator from Massachusetts. I do not know what a court would hold, and I do not know that this is going to result in a lawsuit, though it may, but I submit that information for the RECORD just for the benefit of persons who are interested.

I really do not want to bog down in the legal arguments. I am perfectly content to let the lawyers argue this out among themselves after 5 o'clock at a local pub or in court or wherever else they want to take it up. I just do not want to get in the middle of that.

I also want to note, however, one other legal issue which I think is significant, and that is the theory of the Attorney General that he may solve this problem by regulations, assuming that the statute has been validly vetoed and is not overridden. That is open to dispute by some lawyers.

The Senator from Wyoming made the point that the lawyers who argue this are partisan opponents of the President. I do not know whether that is true or not, but I would just like to tell you who the legal authorities are that have brought this to my attention. One is Robert Charles Hill. He came to the private practice of the law from the U.S. Department of Justice where he served during the Reagan administration as deputy director and counsel in the Office of Asylum Policy and Review, a highly specialized unit which was created by the Attorney General in light of the now infamous Medvid incident, which may be recalled by some Members of the Senate. So he is a person who has expertise in this field. He has some credibility about it, and I have no reason to believe that he is a political opponent of the President, although someone may have information about that which I do not have.

This is also a concern raised by senior members of the American Immigration Lawyers Association, specifically by Mr. Jimmy Wu, who is a member of the board of governors of the Immigration Lawyers Association, and by Mr. Edwin Rubin, who is the president-elect of the American Immigration Association, a separate issue, and I ask unanimous consent also, Mr. President, to print their statement in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JANUARY 23, 1990.

Hon. WILLIAM L. ARMSTRONG,
Hart Senate Office Building, Washington, DC.

DEAR SENATOR ARMSTRONG: We have reviewed the regulations promulgated today by the Attorney General regarding applications for asylum from foreign nationals who fear persecution because they have violated their country's coercive population control policies.

While the Administration believes that these regulations would afford greater protections than those contained in H.R. 2712, we remain concerned that they may not provide relief to some applicants. In particular, the regulations may not overturn earlier rulings by the Board of Immigration Appeals (BIA) which say resistance to forced abortion and sterilization does not constitute political dissent.

Neither China nor any other country is specified in the regulations as having coercive population control policies. Since the burden of factual proof is on the asylum applicant, he or she would have to prove in each case that China's policies were in fact coercive. This is precisely what the BIA has refused to find; indeed, the BIA has gone out of its way to find the Chinese program to be a legitimate exercise of governmental authority. As in previous cases, the BIA could simply determine that any individual horror story was a local enforcement problem, and that in any case the applicant was not being singled out for persecution.

Nothing in the regulations defines resistance to coercive population policies as meeting the legal definition of refugee under Section 101(a)(42)(A) of the Immigration and Nationality Act. Thus, even if the applicant proved that China's policies were coercive and that he or she would likely be punished for violating them, the BIA still could find that such applicant did not meet the legal definition of a refugee.

It is our view that the regulations leave doubt and ambiguity where H.R. 2712 is unambiguous and clear. In light of the brutal means which the Chinese government employs to enforce compliance with its population control policies, ambiguity can have disastrous consequences. Therefore, we believe H.R. 2712 is by far the most certain method to protect these men and women from China's unconscionable practices.

Sincerely,

EDWIN RUBIN,
JIMMY WU,
ROBERT HILL,
Former Deputy Director, Asylum Policy and Review Unit, Department of Justice.

Mr. ARMSTRONG. Mr. President, I do not want to go any further in the legal issues because in the end this is not going to be settled on some kind of basis of disputing the fine points of law, nor do I think it is going to be settled on the basis of partisanship.

I appreciated that my friend from Wyoming clarified his earlier observations and made it clear that he did not accuse everyone of being partisan. I still do not quite agree with him in his interpretation of that meeting up at Harvard. I do not know John Sasso. I have heard a lot about it. I was not there. I do not know whether I was invited or not. If I was, I did not go. I have only been to Harvard once in my life and enjoyed my experience, and if invited by Mr. Sasso, the Chinese students, or Harvard, I would probably go back. But the implication is what happened is a bunch of Democrats went up there and figured out some way to embarrass the President and sharpen the partisan nature of this issue.

The Senator from Massachusetts says that is not so. I guess that is right; he probably would know about that. But suppose that is exactly what happened. I do not think that is anything to criticize.

Ladies and gentlemen, that is what the Democrats are here for, in part, to draw a partisan line with the Republicans, and, by gosh, that is in part what we Republicans are here for, to tell why we are different from the Democrats. The system is not breaking

down when that happens. It is working.

When we just go off, as we do sometimes, into a closed room and make a deal behind closed doors instead of arguing out the issues in public, the losers are the voters back home who do not know what the differences are, who do not have a basis to choose between the two parties.

I am not going to get indignant because John Sasso or some Senators or somebody else went back to Harvard and dreamed something up, if that is what they did. And it does not reflect that this becomes, therefore, a suspect issue.

It does not say that no good Republican can back this issue. In fact, I just happened to be reading this morning——

The PRESIDING OFFICER. I am reluctant to advise the distinguished senior Senator from Colorado the time has expired. Does he ask unanimous consent for further time?

Mr. ARMSTRONG. Mr. President, I ask if the Senator from Massachusetts has sufficient time available to him that he could yield me perhaps 5 or 6 more minutes.

Mr. KENNEDY. Five more minutes.

Mr. ARMSTRONG. I am very grateful.

I happened to be reviewing the rollcall in the House yesterday. It turns out that the honor roll of the Republican Party voted to override the veto of the President. When it is all said and done, whatever the outcome is in the Senate, there are going to be more Republicans in Congress who vote for this bill than vote against it.

So if there is any Senator who thinks he cannot vote for this bill because it is tainted by some association with the meeting at Harvard with a bunch of Democrats or something else, forget it. You will be linking arms with the majority of Republicans in the Congress of the United States. So, it is clearly not a majority of Republicans in this Chamber.

Mr. President, I do not think partisanship is the issue. I do not think in the end the arcane details of the law constitutes the nexus of this or the crux of it. I think the real issue comes down to this: Why should we pass this bill? The reason is simple because in doing so we make an unequivocal statement. We make a statement of legislative policy on a matter that is properly a legislative determination.

This is not really a foreign policy issue. In the end it is an immigration issue, a different legislative jurisdiction, a matter about which Congress traditionally kept much power to itself. If there is no difference—that is the representation, that there is really no difference between the result of an executive branch action and the result of a legislative branch action—why should we argue with you over it if it is all the same?

I am certainly not one that doubts the President's intention or the ability to kill what he says he is going to do. What is the difference?

The difference is this: We may think it is the same, but the Chinese Government very clearly does not. Somehow the Chinese Government thinks the legislative action is more permanent, is more definitive, that somehow an executive branch action is more temporary, more provisional, more subject to subsequent negotiation, and more subject to bargaining.

And I tell you who else believes that. It is the Chinese students, the students who are getting telephone calls, who in Rochester University in the last few days were summoned to a meeting by Embassy officials and, in effect, this is what they were told. "We are going to get you. Pretty soon Congress will turn its attention to other issues, and sooner or later we will reach an accommodation with the administration. Sooner or later, we are going to get you back in China. If you know what is good for you, you had better sign this statement, you had better come now, you had better sign this confession," as one student told me this morning, "because if you do not do it now, it will go harder for you later."

That is the issue. Do we just talk about public perceptions, about Chinese student perceptions, about the perception of the Chinese Government? I am not one of those who say perception is reality, but, ladies and gentlemen, in this case, that is evidently true.

Mr. President, this is not the first time we have had this argument. We had it over Romania. We had it over the Medvid case. We had it over and over again about Jackson-Vanik. And at every instance when this has arisen, somebody has come forward and said to Congress, "Leave this issue alone. You are making a mistake. You do not know what you are doing. Do not get too tough. Do not paint them into a corner. Leave it to the State Department to work this issue out."

That is exactly what they are telling us now. Maybe they are right. They were not right on Medvid or Romania and they were not on Jackson-Vanik. I do not think they are now. This is a matter about which thoughtful, reasonable people can disagree. I am convinced the best thing we can do for the students, for China, for the reputation of our country, for the reputation of the Senate, and for the cause of human freedom is to support this bill and repass it, notwithstanding the President's veto.

Several Senators addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Massachusetts yield time?

Mr. KENNEDY. Mr. President, I would like to rotate.

Mr. SIMPSON. Mr. President, I yield 10 minutes to my friend from Alaska.

Mr. MURKOWSKI addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. I thank my friend from Wyoming.

Mr. President, when I returned home last summer, to my home in Fairbanks, AK, I had just gotten off an airplane after an extended 13-hour trip, I was tired, I was unpacking, and I heard some turmoil out in my front yard. I looked out the window and found a number of students from the University of Alaska in Fairbanks driving into the driveway. I had no idea what this was in connection with until I looked out and noted that many of the students were Chinese.

I went out in the yard and greeted the students and found a terrified group. The incident in Tiananmen Square had just occurred. Their fear was that they would have to go back to China, that they would have to leave school, that those who were attending graduate school who had to work would lose the ability to work in the United States. I know this is an occasion that occurred all over the United States and was shared by many of my colleagues.

Mr. President, I made a commitment to those students that we would work out a situation so they could stay in the United States if they chose, they could work in the United States, and they could continue to have jobs in the United States.

Mr. President, this is a commitment that is being met. It is being met by our President, by our administration, and it is a commitment that all of us believe in.

We have heard a good deal of rhetoric today, much of it from my colleagues on this side who believe in a principle of supporting the President on the one hand, but enunciating that there is a different set of circumstances before us.

I appeal to my colleagues to recognize that the President has been and continues to be responsive to the concerns raised by the Congress about the safety of the students by commiting to never allow any action that would force the return of Chinese students if their lives or liberty are in any way at risk.

At the President's direction, we have seen our Attorney General not only provide to all Chinese students in the United States the same benefits that H.R. 2712 would grant, but extend those benefits to all Chinese aliens.

So he has gone beyond what H.R. 2712 would provide, in effect, providing even more humanitarian relief than what was required by the legislation.

I ask unanimous consent that the Attorney General's letter be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

OFFICE OF THE ATTORNEY GENERAL,
Washington, DC, January 16, 1990.

The PRESIDENT,
The White House,
Washington, DC

MY DEAR MR. PRESIDENT: On November 30, 1989, you directed me to take certain actions to improve the immigration status of nationals of the People's Republic of China ("PRC") currently in the United States. You requested that I report to you on the status of these actions. This letter sets forth the actions I have taken. In each instance, the action I have taken affords relief equivalent to, our greater than, the relief that would have been provided by H.R. 2712 (the "bill"). (I have attached copies of my letter to the Immigration and Naturalization Service ("INS") of December 1, 1989, and INS' cable to its field offices of the same date, implementing your directives).

1. You directed that I provide PRC nationals with an irrevocable waiver, that they may exercise until January 1, 1994, of the foreign residence requirement of 8 U.S.C. § 1182(e).

I have waived this requirement for all PRC aliens present in the United States as of December 1, 1989. This waiver is irrevocable. Any such alien who makes a nonfrivolous application for adjustment or any change of status may avail himself of the waiver until January 1, 1994. This action provides adjustment relief equivalent to that provided by the bill.

2. You directed that I take steps to assure the continued lawful status of PRC aliens lawfully present in the United States on June 5, 1989.

I have directed that PRC aliens who were in lawful status as of June 5, 1989, be considered to have maintained lawful status for the purposes of adjustment or change of nonimmigrant status. Again, this action provides relief equivalent to that provided by the bill.

3. You directed that I provide authorization for employment of PRC nationals present in the United States on June 5, 1989.

I have directed that INS grant all PRC aliens who were present in the United States as of June 5, 1989, the necessary authorization to engage in employment. This action provides employment opportunities greater than those afforded by the bill, which would have granted employment authorization only to certain PRC aliens, *i.e.*, Chinese students in the F, J, or M visa categories.

4. You directed that I provide notice of expiration of nonimmigrant status, rather than institution of deportation proceedings, to PRC aliens who are eligible for deferral of enforced departure and whose nonimmigrant status has expired.

I have directed that any PRC aliens who are eligible for deferral of enforced departure and whose authorized period of stay has expired be given notice of expiration of nonimmigrant status. This notice will be nonadversarial in nature and will explain the options available. This action provides for notification equivalent to that required by the bill.

5. Finally, you directed that I provide for enhanced consideration under the immigration laws for individuals from any country who express a fear of persecution upon return to their country related to that country's policy of forced abortion or sterilization.

I have directed that, with respect to all applications for asylum, withholding of deportation, and refuge status, careful consideration be given to applicants expressing fear of persecution related to family planning policies of forced abortion or sterilization. If an applicant establishes that the applicant has refused to abort or to be sterilized, he or she will be considered to have established a well-founded fear of persecution. All other factors that may contribute to a determination of eligibility for asylum, withholding of deportation, and refugees status, will also be given additional weight. These actions provide broader relief to persons fearing coercive family planning policies than that provided by the bill, which extended only to PRC aliens. Draft regulations to implement this directive, effective upon publication, will be available within a week.

In addition to these measures, INS has established an Outreach Program to assist PRC aliens in the United States. INS has held briefings and consultations with respresentatives of PRC student leaders, the National Association of Foreign Student Affairs, and private groups interested in the PRC, to inform them of available options. Many INS district offices have also arranged meetings with local Chinese community and educational institutions. Each INS District Office has designated a point of contact specifically to assist PRC nationals under this program.

INS field offices are also making every effort to expedite the processing of applications for benefits provided under the emergency relief measures. As of January 12, 1990, INS has granted work authorization to 2,779 PRC nationals; granted adjustment to permanent resident status for 87, with 108 cases still pending; authorized a change in temporary status for 225; and granted waivers of the foreign residence requirement of section 1182(e) for 70.

Initial results of the program indicate that these outreach efforts have been successful and that PRC aliens are aware of the available options and are filing applications. Of course, I will continue to monitor developments to assure the success of your policy of providing necessary relief to PRC nationals present in the United States.

Sincerely,

DICK THORNBURGH,
Attorney General.

Mr. MURKOWSKI. I appreciate that, Mr. President.

The President's position on this matter is clear. He has given his word. He has given his word to the American people, and he has given his word to each one of us. If anyone doubts what that means I would suggest they read the Attorney General's letter that details the actions that have already been taken to protect the Chinese students. The safeguards are there. I have copies of the letter in my offices in Anchorage, Fairbanks, and Juneau, for those Alaskans and Chinese-American students in Alaska that are concerned with this matter. I submit to you not enough people have read that letter.

Those who want to override the veto portray this issue as demonstrating concern for the protection of the Chinese students now in the United States, but that is not what this vote is really about.

This override vote is really a political challenge to the President's constitutional authority to set the tone of our relations with China. It is rather extraordinary that a President with the popularity rating of 80 percent in this country is being challenged on an issue where the President has given his word. I believe the challenge is ill-advised. I think it works against our national interest, and is likely to cause a further deterioration in the relationship with China. Others differ, but I think it is a legitimate concern.

The President is recognizing the reality that China, a country with 20 percent of the world's population, simply cannot be ignored.

It is also a challenge to a President who served as a United States representative to China, as Ambassador. Obviously, George Bush knows China well. He knows the leadership. He knows that reform is under way there. I think our President also knows what his responsibilities are, and he is willing to be held accountable for those responsibilities. I think that is important, as we reflect on just where the buck stops, Mr. President.

I had the opportunity to make several visits to China. A few years ago I made a very special visit; it was the first time that in a visit with Chairman Deng, the profound statement was made that there could be one China and two systems. It was made to a small group of us traveling under the Georgetown Institute. It gave one a clear understanding of the mentality of the Chinese leadership and the fact that there is a process and a procedure. And when you confront that leadership directly, they feel that they must fundamentally respond in a little different manner than we do here.

The point is, there is change occurring in China now. That change can be fostered by a process that our President supports. So the fundamental question before the United States is what policies should we adopt to encourage a return to the reform movement in China? I think the President has the correct solution and an appropriate game plan.

In the President's judgment, H.R. 2712 could pressure the Chinese Government to retaliate, in strengthening the position of the hardliners now in power by not having a potential way out, in weakening the moderate reformers that are in the second and third tiers now. Our educational, sci-

entific, and cultural exchange programs could be in jeopardy. That would be a serious setback because the intellectual force behind the prodemocracy movement in China came from those very Chinese students who visited and studied in our country and came to appreciate the values of American democracy.

In the final analysis, Mr. President, it is our President who has the constitutional authority to conduct foreign policy. The United States should speak to the world in one voice. The 535 Members of Congress debate foreign policy issues, as we are doing now, but our public debate should end at our own shore. We should not let the satisfaction of a quick emotional response of partisan politics blind us to our long-term objective of a more open and democratic China.

In the first important vote of this session, Mr. President, we face one of the most difficult decisions under our democratic system—whether the Congress should exercise its authority to override a Presidential veto. Our common interest in seeking to support change in China, toward a more open and democratic society, is best served by sustaining the veto, in this Senator's opinion. I urge my colleagues to vote to support the President. I thank the chair and yield the remaining time that I have to the floor managers.

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER. Who yields time.

Mr. KENNEDY. I yield 10 minutes to the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 10 minutes.

Mr. SIMON. Mr. President and my colleagues, I rise in strong support of the move to override the veto. I ask unanimous consent that at the end of my remarks a list of organizations that have contacted me on behalf of this legislation be placed the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. SIMON. Mr. President, this is not a partisan thing. It was not very many weeks ago, before we recessed, that I was here on the floor defending a Bush administration foreign policy effort against someone from the other side of the aisle. And to illustrate this in a powerful statement, the former Ambassador to China, Winston Lord, appeared before the subcommittee that Senator KENNEDY chairs. He is an Ambassador appointed by President Reagan. Among other things, he has these sentences that I think are very, very important:

> This I strongly believe: fairly or unfairly, the vote on this issue will be interpreted, abroad and at home, not just as a decision on how best to protect Chinese students in America, but more fundamentally as a referendum in our posture toward the current Chinese regime.
>
> This is the reality. Fairly or unfairly, the veto, if sustained, would reinforce the mindset and mandate of those who have proceeded from massacre to repression, those who predict America will be lulled by cosmetic gestures, and return to business as usual, those who dismiss the Chinese as a people apart from the global winds of change. This, too, is the reality. The legislation, if enacted, would send a powerful message of encouragement to those in China whose voices have been silenced and to Chinese citizens everywhere who seek a freer, more open country.

I do not think you can summarize where we stand more appropriately than he has done.

I confess I approached this whole issue not as objectively as maybe some of my colleagues. My parents were missionaries to China. They were in the United States 1 month when I was born. I grew up in a home with Chinese art around me and Chinese visitors frequent. I am probably the only Member of the United States Senate who grew up playing Mah-Jongg, a game that the Chinese play.

I feel a kinship with the Chinese. They are one-fifth of the world's population. And what is at stake is, are we going to send a strong signal for the cause of freedom to the people of China? My hope is that we will send that signal.

After Tiananmen Square there were those who advocated, "Let us sever diplomatic relations with China." I opposed that. I think we ought to stand up, frankly, more firmy than we now are. I do not suggest that the President is less dedicated to freedom than any Members of this body. But the blood at Tiananmen Square was hardly dry before we were sending diplomatic missions to the government there. I think that was a mistake. I think the veto of this legislation was a mistake, both in terms of guaranteeing freedom to the Chinese students who were here in terms of what it signals to the rest of the world. I think we are sending the wrong signal, and I think it is extremely important that we send the right signal.

Now, my friend from Wyoming has suggested that some of these students may want to stay here just for economic reasons some may. And let me just add, if we get a few more engineers and architects and brilliant specialists in a variety of fields here in this country as a result of this, that is no great disaster to this country.

But what has impressed me more than anything else is the yearning that the Chinese students have to return to China and bring democracy to that great country. Some of them are saying, "No matter what happens to me, I am going to return." There are not going to be massive numbers that are going to say we do not want to go back. It is very significant that at Tiananmen Square the Goddess of Liberty, who bore a striking resemblance to the Statue of Liberty, became a symbol of it all, which was repeated right out here by the Capitol just 2 days ago.

We have been an inspiration to the rest of the world for freedom, and we ought to continue to be an inspiration for freedom. But those students, also, are an inspiration for freedom.

The students who stood up at Tiananmen Square I think excited the world, just as what is happening in Eastern Europe is exciting the world. I want to send a signal.

Now another argument that is used by the opposition is this may cut off exchange students from China from coming to the United States. There is that possibility. Seven thousand students have come since the Tiananmen Square tragedy. It is possible the Chinese Government is going to cut off all student exchanges, but frankly the Chinese Government is not sending those students over here because they want to benefit the United States. They are sending them here because it will benefit the economy of China. And I doubt that you are going to see any long-term cutting back in the numbers of students.

We have a chance first overall to protect students with this legislation. There is no question the law is more permanent than an Executive order. An Executive order that is adopted 1 day can be changed or modified the next. But I think Ambassador Winston Lord was absolutely correct when he said we are talking about more than just protecting the students. This is a signal to the world, this is a signal to the people in China, and I want to send that signal that is a signal of freedom. I want that signal to be heard around the world.

There was another example on this floor, I think it was 3 years ago when we overrode a President's veto on sanctions on South Africa. Again what Congress did on behalf of freedom was heard in South Africa, around the world. I do not think Nambia would be almost at the verge of independence today but for the sanctions action here.

I want to send a signal to one-fifth of the world's population we yearn for freedom for you just as we yearn for freedom for the people of Eastern Europe. That is the signal that we can send. We ought to send that signal.

Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, on behalf of the junior Senator from Wyoming I yield 10 minutes of the time of the Senator from Wyoming to the senior Senator from Wyoming.

The PRESIDING OFFICER. The senior Senator from Wyoming is recognized for 10 minutes and the time charged to the junior Senator from Wyoming.

Mr. WALLOP. Mr. President, I thank the Chair and thank the Senator from Massachusetts.

Mr. President, I have struggled with this. Senators in this body will recall that it was I who put together the little piece to rename that tiny plot of ground across from the Chinese Embassy, "Tiananmen Square Park."

I had, as did others, echoes of Romania in the back of my mind as I watched the President veto this. So I examined this with more than a little bit of care. Those will recall that in the case of Romania the State Department was continually down here arguing with us that if we would only grant them one more year of most favored Nation trading status, we would see the reflection in benign new postures on the part of that most hateful regime. I was offended by that then and I am offended by it still, especially since we determined what happened during that time. But the credibility of the President's veto, which I support and intend to vote to sustain, stems from the fact that the President, unlike the State Department, has something in hand. He has changes in Chinese behavior, albeit small ones, but he has them. He has an end to martial law, although not an end to a police presence. He has seen an opening for the Peace Corps and for Fulbright exchanges. He has an agreement in which, I assume, he will insist on a ban on the sale of missiles in the Middle East.

There is one other point that I wish to make as I begin these remarks, Mr. President, and that is that Chinese students alone are not the only victims of Chinese repression, nor were they the only heroes of the democratic movement. They were great heroes and they were stern and they caught the imagination of Americans as they fully intended to do. And it tells again of the force and value of America's presence in the world. But other Chinese were there and other Chinese are here in America. Unlike what Congress seeks to do, the President has sought to protect the presence of all Chinese visiting in America, not Chinese students alone.

Now, the legal question has been raised as to whether or not the President has the full authority to exercised this by Presidential order, or Executive order. Mr. President, I would suggest to the Senate that were the legality of it to be challenged, which I do not think it would be, and somehow or another those students had to go back, how long does anyone think it would take this Congress to act on what both have stated to be our goal and purpose—protection of Chinese students and businessmen and academics and others who may be in this country fearful of reprisals in their homeland? So then Congress could act quickly and decisively if one can presume that we both have that same end.

Mr. President, by the same token, if we in Congress find regression from the state in which we now find ourselves on the part of either the Chinese Government or the President of the United States, which I find offensive to contemplate, but supposing we do, if we can do it in the first place to restate what we say is now our common goals, surely this Congress could, in the same period of a couple weeks, pass the protections necessary to assure the pursuit of democratic freedoms and human rights which all of us state to be our common goal.

So in the case of the Chinese Government, Mr. President, I would say that if the Congress, even without the President, finds that the Government of China not only is not regressing but is failing to progress down a road toward a more open society and more political freedom, then we can again as well reenact this legislation, and I would be the first sponsor of such a piece of legislation.

So, passage of this bill, on the other hand can result in Congress allowing the rollback and the dissolution of what the President has already achieved. I do not think that is a posture that the Congress ought to put itself into or a test that it ought to try at this moment.

I say again this Congress can act and has shown a will to act and will, in my judgment, act very swiftly were we to find no further progress on the part of the Chinese Government or failure on the part of President of the United States to live up to his commitment.

Mr. President, I conclude by saying I find it more than a little bit offensive for people to question George Bush's commitment to democracy and human rights. I find it more than a little offensive for people to question whether he intends to keep his word. That is not an appropriate role for the Congress of the United States.

We have not seen his word violated. We have no reason to believe he would not uphold his commitment. But should it ever be the case, we have the tools in hand to deal with that.

Mr. President, I yield back whatever remainder of time I have by saying I strongly urge the Senate of the United States to support the President in this initiative to continue the progress that has taken place toward peace and freedom in China.

The PRESIDING OFFICER. Who yields time?

Mr. BUMPERS. Mr. President, I had cut a deal with the distinguished floor manager on this side for 5 minutes and I ask unanimous consent that I now have 5 minutes.

The PRESIDING OFFICER. Without objection, the Senator is recognized for 5 minutes.

Mr. BUMPERS. To be charged to the Senator from Massachusetts.

Mr. President, I had not intended to speak on this but as I listened to the debate this morning I felt compelled to—out of a sheer feeling of frustration about the tone of this debate. First, I want to say that even in politics as well as in foreign policy there ought to be some absolutes. A foreign policy that is always pragmatic on every single issue—and there is no issue on which we are not willing to be pragmatic—is no foreign policy at all.

What happened in Tiananmen Square would have gotten you executed in this country. We would have had gigantic trials and put people in prison for life for what they did to those students. That is one of our absolutes. You may not take the life of another.

When we invaded Panama, we did so at a considerable loss of life to ourselves and a much greater loss of life to the Panamanians. The end result is that the President is now asking this body to appropriate $1 billion to take care of the damage. But we went in at a considerable loss of life and removed a tyrant, a tyrant whose brutality against his people pales in comparison to what the leaders of China did to an innocent, unarmed, nonviolent group of students who simply wanted to have some say-so over their future.

We all have been rhapsodic about what has been going on in Eastern Europe, and what has gone on in Eastern Europe is something contagious, not only there but around the world. It simply says that governments that are enemies of the people may not stand. Yet here we are voting to condone the most incredible acts of brutality, certainly in the recent past.

When you vote to sustain the President's veto, make no mistake about it, you are voting to condone the Chinese Government's bloody response. We will always have a tendency to deal with dictators in this country because their word is good. They do not have to go to a Congress. But very seldom has it turned out right.

Now we are saying to those dictators who have pictures of literally hundreds, maybe thousands, of Chinese students who are in the United States in their files, "Come on home. All is forgiven." If you believe that, you will buy swampland in Florida. You will be sending a lot of these youngsters to a certain death and the fact that the President says, "No, I am going to take care of that by Executive order or administrative directive," is not sufficient. It is not our role to believe that George Bush is going to do that because the whole point is that he will not be around forever. This law will be. I do not doubt his sincerity and his motives.

I do not understand how this bill could pass here, something like 97 to 0, and all of a sudden people who thought it was a wonderful idea, a great bill, are now saying we have to be loyal to the President. I am loyal to the President when I agree with him. When I ran for office—and I daresay I speak for every single Senator in this body—not one said, "I will vote to be loyal to the President." You can train a chimpanzee to do that.

When you ran, you said: "I am going to represent you and the values of this country." And if the President is going to do it by Executive order, why can't we do it here? The argument is absolutely impotent. Loyalty for loyalty's sake is corruptive.

One of the most beautiful things I have ever read, Mr. President, was the inaugural speech of Vaclav Havel, the new President of Czechoslovakia. He is a playwright, and believe you me, he has a wonderful way with words. He said to the people of Czechoslovakia: "We are sick. We are the ones who are sick. We have become morally unfit because for 40 years we have said one thing and believed another. And he said above all"——

Could the Senator from Massachusetts yield 3 more minutes to me?

The PRESIDING OFFICER. Does the Senator from Massachusetts yield an additional 3 minutes to the Senator from Arkansas?

Mr. KENNEDY. Two minutes.

The PRESIDING OFFICER. The Senator from Arkansas is recognized for an additional 2 minutes.

Mr. BUMPERS. He said they had forgotten the words "justice, mercy, compassion." And it was up to them to solve their problems. There are a lot of people in this body and in the Congress who for a very long time have said one thing and believed another—about our deficit, about the state of the economy, and about this issue today.

We are dealing, Mr. President, with a moral absolute. The sight of Brent Scowcroft and Lawrence Eagleburger clinking champagne glasses with Li Peng and the others who ordered this massacre against their own unarmed citizens made me sick. What made me even sicker was to find out that they had been there before—as the distinguished Senator from Illinois said, almost before the blood dried in Tiananmen Square.

Mr. President, if you vote to sustain today, we are saying it is OK to kill innocent citizens. You are saying we condone it; we applaud it; we are putting our stamp of approval on it. Who here did not get tears in his or her eyes watching one of the most poignant things in the history of the world—a young Chinese student standing in front of a tank? We can't even get our kids to go vote to defend democracy. Only 18 percent of the 18- to 25-year-olds in this country vote. Yet these Chinese students are bearing their breasts to bullets for that right. I got tears in my eyes watching that. And a vote to sustain this veto today is saying we favor the authority of that tank. But if you vote to override, you are saying, "I am with that Chinese student."

I yield the floor, Mr. President.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, I yield 5 minutes to the Senator from Tennessee.

Excuse me, on behalf of Senator SIMPSON, how much time does the Senator desire?

Mr. LOTT. Five minutes.

The PRESIDING OFFICER. Without objection, the Senator from Mississippi is recognized for 5 minutes on the time chargeable to the Senator from Wyoming.

Mr. LOTT. I thank you, Mr. President, and I thank the distinguished Senator from Massachusetts for making sure I had this opportunity.

Mr. President, this is not a question of whether or not we were inspired about what happened in Tiananmen Square. We all were. It is not a question of whether or not we admire and respect and appreciate and support the students and what they did there. That is not what is at stake here.

When I came back to Washington last week I, frankly, was inclined to vote to override. I had not given a lot of thought to it except that I was impressed with what I had seen in Tiananmen Square, and I wanted to be certain that these students would not be sent back against their wishes, to be prosecuted, imprisoned, or killed. But then I started reading and talking and listening. I did not like a lot of what I was hearing in this city, the way this vote was scheduled, or what was being said by Members of the Congress on both sides of the aisle, frankly, about the motives that were involved and what the President had done or not done.

I talked to the President about it. I asked questions of the Attorney General about it. I spoke to the Secretary of State about it, trying to look not only at what this action would do now, but what we need to do for the longer haul in our relations and dealings with China.

What is the principal question here? What is our principal goal? It is to make sure that these students and others are not arbitrarily or unfairly

sent back against their wishes to China to an uncertain fate.

I have asked the President and I have asked the Attorney General, "Are you prepared to assure me that these students will not be sent back there, that they will be able to stay here?" And the answer is yes. the Chinese students will not be deported if the Senate sustains the President's veto.

Beyond that, then, what is the next question? Do we want to stick it to the leaders? Nobody here appreciates what the Chinese leaders have been doing or saying. But do we also want to nudge them toward changes, improvements, openness, hopefully a change in governments? That is what we want, yes.

We have a President who has served time in China, who understands the people and the nuances, and he is trying to effect the longer term, not only our relationship with the Chinese but what they do internally.

I believe that he knows what he is doing. I believe that he is trying to do the right thing, not only for the Chinese students here in this country and others who might be sent back, but to try to effect freedom and opportunity and, hopefully, democracy in that part of the world.

I am not going to say that the President has absolute control and authority in foreign policy or in immigration. Certainly we have a role. But I do believe very strongly that you have to have a leader, a President of whichever party, who can speak for this country and act for this country not only on the passions of the moment but for the long term.

The President has taken necessary actions. I feel what is involved here today is a lot of symbols. It is a question of saving face: the Congress insisting on its position; the President on his role. How will it be interpreted by the Chinese in this country? And by the leaders in China? Maybe that has gotten out of control.

But I do feel that on an issue like this, the President should be heard. We should support him. We should not tie his hands or take an action that, in the longer term, will not only hurt our relationship with the Chinese and their government but also have an adverse effect on freedoms within that country.

I am going to support the President because I think in this case he deserves the benefit of the doubt.

I yield.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. I yield 5 minutes to the Senator from Tennessee [Mr. GORE].

The PRESIDING OFFICER. The Senator from Tennessee is recognized for 5 minutes.

Mr. GORE. Mr. President, let us briefly review the facts. A group of young Chinese students created a replica of the statue of liberty in Tiananmen Square. They quoted Thomas Jefferson. They adopted the tactics of Martin Luther King, Jr. They sang, in English, "We Shall Overcome." They talked about the ideas of self-government and representative democracy. And they nonviolently requested a chance for freedom.

A brutal dictatorship murdered them because they spoke out for the ideals of the American dream.

Other Chinese students who supported them here in the United States became fearful of what would occur if they had to go back home. The American people en masse expressed support for these young Chinese men and women seeking freedom, and expressed concern for the safety of those who were visiting in our Nation while the tragedy occurred.

This Nation stands for freedom. But our President stood for geopolitics instead. He secretly sent emissaries to Beijing in the immediate aftermath of the massacre. He wanted them to be able to take a token, a gift. He gave them a veto message.

He gave them a veto of legislation, passed here in the Congress, designed to protect the Chinese students who were demonstrating for freedom here. Former President Reagan sent emissaries to the Nation of Iran to trade weapons for hostages, a dishonorable act. He sent with his emissaries a token, a gift: a cake baked in the shape of a key; a bible inscribed to the butchers of Tehran by the President of the United States. That cake baked in the shape of a key served the same function as the veto message sent with President Bush's emissaries to Beijing.

Now, that veto message has been brought back from Beijing and lies before us in this body. We are asked to affirm the President's action or overturn the President's action.

Symbolic? Yes. Meaningful? Yes. We must override this veto. What is the basis for American power and influence in the world? Is it really tanks and missiles and weapons? We need them and we need allies. But the real base of our true strength is ideas, principles, values.

The Berlin Wall was not pushed over by tanks. It was destroyed in the minds and hearts of East Europeans before the first chisel hit the first stone. What pushed over the Berlin Wall was hope, the dreams of freedom, the principles for which our Nation stands. This issue is really very simple, Mr. President.

Passing this override measure is necessary because it is the only way to document beyond doubt the one thing we want the people of China to know, that if it comes to a choice between maintaining links with the Government of China or links with the people of China, the people of the United States are saying to their Congress: "Speak to the Chinese people for us because the President of the United States in this instance is not speaking for the American people."

The fundamental issue is whether it is more important for our Nation to build its future relations with China on the basis of our faith in that country's rising generation, a generation which believes in freedom, a generation that was violently put down in Tiananmen Square; or on the basis of our fear of displeasing the old generation still clinging to power by virtue of violence and terror alone, the generation that massacred its young rather than yield to its pleas for freedom.

We may, if we follow the President's advice, curry favor with the old and discredited leadership of Beijing. But in a few years, for natural, if not political reasons, they will no longer be on the scene and the China with which we will have to live for another generation may well—indeed we hope it will be so—be the China of the students who dreamed and demonstrated and died for liberty.

The President argues that legislation is not needed because he already is using his executive authority to shield Chinese students in this country. But that is not the point. This legislation represents the authentic disposition of the American people. It is a message from the heartland to both the present government and the rising generation of China.

The message is, "If you think we will forget what has happened and if you think we will allow things to go back to normal for the sake of convenience or great power politics, forget it. We are a young country, but we have lived already to see the failure of many tyrannies, and we will be here to welcome freedom when it arrives in China."

The message is that if the present leadership of China doesn't like that fact about us, we'll live with the consequences. How much worse things will have to get in United States-Chinese relations is up to the authorities in Beijing. But the message is that if they think it is possible for them to alter the course of this legislation by threatening us, then think again.

It is extremely unfortunate that we have to override this veto, but we must, to make sure this message comes through loud and clear. Because the President's message to the people and government in China is obscure and contradictory. The American people do not support his missions to Beijing. They are embarrassed by them. The American people hear him when he tells us that United States-Chinese relations will suffer in the short term if we pass this bill: But they think he is

yielding to intimidation, when he asks Congress to support his veto.

Passing this bill is necessary because it is the only way to document beyond doubt the one thing we want the people of China to know. That is, if it comes to a choice between maintaining links to the Government of China or links to its people, the people of the United States are saying to their Congress: "Speak to the Chinese people for us, because the President of the United States in this instance is not."

The PRESIDING OFFICER. Who yields time?

Mr. STEVENS. Mr. President, who is controlling time on our side of the aisle?

The PRESIDING OFFICER. The Senator from Wyoming is controlling time on the Senator's side of the aisle. In his absence——

Mr. STEVENS. In his absence I yield myself 5 minutes.

The PRESIDING OFFICER. Without objection, the Senator from Alaska is recognized for 5 minutes, with the time chargeable to the Senator from Wyoming.

Mr. STEVENS. Mr. President, I am not without prejudice on this vote. When I was a young man, I was sent by our Government to China in World War II. Throughout my life, since that time, I have tried to become what I have called a China watcher. I have spent a great deal of time with my late good friend, Senator Henry "Scoop" Jackson, in China. I have also spent a great deal of time trying to understand and become acquainted with the various people who have represented the People's Republic of China here in their Embassy in Washington.

I am one who supports what the President has done. In my judgment, it is wrong to pass a bill responding to the problems of Tiananmen Square. And I say that while at the same time having in my mind probably the most startling picture I ever saw. That was the picture of that one young man stopping that row of tanks. I think everyone in our generation ought to see it time and time again, to see the raw courage of one person stopping atrocity.

Yet, I ask the Senate: What does this bill do for that man? What does it do for the people who stayed in China, and tried to bring about a change in their country? It responds to the people who came to our country and sought the solace of democracy, and are exercising the rights of freedom in our Halls today, to petition us to overrule our President.

I believe much more in the people who are still there. There are generations of Chinese who want to be friends with the United States.

There are some of the oldtimers who were there when I was there, and they are still in control of their government, who find it very hard to understand our way of life and our system of government, and particularly the freedoms that their students were trying to express in that square.

In my judgment, what the President has done in issuing the executive order which covers not only students, but other Chinese who are lawfully in our country, has been sufficient to deal with the people who fear the consequences if they were to return to China at this time.

I believe that we should reach out more to China. They have 20 percent of the population of this globe.

Mr. President, I remember when I had the honor to represent the Senate at the time our then majority leader could not make the trip to China, and I went in behalf of Senator Baker, who was our leader at the time. I met with Deng Xiaoping. One time I said to him, "How many people really live in China now?" And he said, "Well, a billion, give or take 20 percent."

I said, "Do you realize that the margin of error is about equal to our population in the United States?" He poked his finger at me and he said, "Yes, but do you?" Do we realize what it is to try to deal with a population that is exploding like theirs is? Do we know what it means to bring change into an area like China and try to maintain some type of stability?

I do not accept that way of life or government at all, but I accept the fact that it is their government, and those people who are in control of it are in control of it. If we want to help bring about change, make it more conducive to change, make it more open to the freedoms in which we believe, then I believe we should support the President's veto and let this matter be handled under Executive order. We have to be flexible in order to have an opportunity to assist these people who have reason to fear going home, but at the same time we must leave the conduct of foreign policy in a situation like this, where I believe it should be, and that is in the hands of the President.

I will vote to support the President's veto, and I urge my colleagues to do the same.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. I yield 7 minutes to the Senator from Wisconsin.

Mr. KOHL. Mr. President, it is the Chinese New Year this week, and Chinese everywhere will be celebrating the year of the horse. But I suspect that two groups of people will have rather subdued celebrations—the victims of China's repression, and the Chinese students in our country who are keeping alive the Democratic dream.

Frankly, there is not a whole lot we can do to make this a better year for those suffering in China. We can impose sanctions, and denounce Beijing for violating basic human rights. But China is not Panama: America cannot restore democracy in China with military might. Instead, we must fulfill our obligations by pressuring the regime and by supporting the forces of democracy. Unfortunately, the administration has not been willing to do that—despite the directions given by Congress and despite the demands of the American people.

Instead of pressure, the President sent his advisers to praise China's rulers while they still had blood on their hands. Instead of supporting the opposition, the administration is subsidizing the Chinese Government by blinking at the trade restrictions that the President and the Congress had initially imposed. It would have been unthinkable to be so kind to Rumania's late dictator. It is just as disgraceful in the context of China.

So this debate is about more than immigration law. The President himself said so yesterday. He urged Congress to put this vote "in the totality of a policy." I agree. We are discussing more than visas. We are determining what kind of vision we have of our role in the world. Will the United States remain the beacon of hope for people yearning to be free? Or are we now just another player in the game of geo-politics? If it is the latter, then I suppose the President's China policy is acceptable. But if his Nation truly stands for something—if we really believe in freedom for all—then there's no excuse for the administration's position.

I am glad the President issued regulations to help the Chinese students. But we have to recognize that he did so only after months of pressure from Congress and the students themselves. Initially, you may recall, the President offered regulatory relief which the students said would do more harm than good. In response to their concerns, Representative PELOSI and I introduced legislation to expand the President's promise of protection. Then—in vetoing that bill—the President said his new regulations went just as far as our bill did.

President Bush is right in theory. But in practice, the regulations do not provide the kind of long-term assurance that our guests need and deserve. The rules can be revoked the moment they become "inconvenient" or inconsistent with whatever geo-political pattern the administration wants to follow at the moment.

I believe the President wants to keep the commitment these regulations represent. But in a sense, it doesn't really matter whether Congress trusts the President to keep his regulations in place. What matters is whether the Chinese students trust him. And they do not. They have looked at the administration's China policy in its total-

ity. They know that actions speak louder than words. And their lack of faith has two effects: First, some students will drop out of school prematurely to come under the regulations. Second, many students will just stop speaking out for democracy. That is not in their interest or our own.

Let me turn briefly to some of the arguments that are being offered in defense of the President's veto. Opponents of an override say that China will cut off future exchange programs if the bill is enacted. I must admit that I am confused by this argument. If the regulations are stronger than the bill—as the President maintains—then why would the weaker law threaten exchange programs? Why would China accept a policy from the President and be outraged if Congress adopts the same plan? It makes no sense—unless China thought the regulations would change but knew the law would not. And even if China has threatened to cut off exchanges, since when do we let foreign governments dictate our own policy? I do not want to choke off the flow of democratic ideas into China—but neither will I allow China to shape our immigration laws.

Mr. President, I also reject the argument that Democrats are exploiting this issue to bash the President. That argument ignores the broad bipartisan support for the bill. It ignores people like SLADE GORTON and NEWT GINGRICH, both proud Republicans who support an override. And it belittles what's at stake. We are dealing with the security of at least 40,000 people. We are dealing with their physical safety and their peace of mind.

I do not regard our override as a matter of partisan politics. It is a question of principle. The bill was passed without objection in the Senate. That was a function of principled opposition to what China had done. The principle has not changed—the politics have. In fact, the partisan politics have come from the administration. It is asking Republicans to "support the President" even if they do not support his policies. This is political—and it is a political fight the Democrats did not seek and sought to avoid.

Mr. President, 1989 was a momentous year. Millions of people around the world seized freedom. They marched in the streets to demand their rights and to assert their faith in popular democracy. The marches began in China, not Eastern Europe. The dream began in China. Let us keep it alive—keep it from being crushed by the tanks.

In China, this is the year of the horse. But here in America, if we fail to override the veto, this will be the year that our commitment to human rights becomes a Trojan horse. We need more than that. The democracy movement in China needs more than that. The millions of people struggling to keep their new-found freedom in Eastern Europe need more than that. They need—and we need—to override the veto of H.R. 2712.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, on behalf of the Senator from Wyoming, I yield 5 minutes to the Senator from Rhode Island.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized for 5 minutes with time chargeable to the Senator from Wyoming.

Mr. CHAFEE. I thank the Chair.

Mr. President, all of us were horrified at the brutal suppression of the prodemocracy demonstrators in Beijing last summer. Both the administration and the Congress share the paramount objective of protecting the thousands of Chinese nationalists now in the United States who face possible persecution upon return to their homeland.

Also, we would like to bring about change in that country, in the mainland of China. After closely examining the content of this bill, I believe the administration has already taken the actions necessary to meet and in some cases surpass the objectives contained in this legislation.

The administration has taken five substantive steps to address the problems that the Chinese students face. In three cases, the President has provided protection that is equal to provisions in the bill; and, in the remaining two, he has gone even further then the intent of this legislation.

First. With regard to notifying Chinese students about expiration of their visas, the President provides for nonadverserial notice with no forced departure, as does H.R. 2712.

Second. The President's Executive order, like the bill, extends lawful status to Chinese nonimmigrant visa holders whose visas have expired, providing they were here on June 5, 1989.

Third. The administration's waiver of the 2-year home residence requirement is effective for 4 years. The bill would do the same thing.

Fourth. The bill would provide employment authorization to only certain Chinese visa holders. The administration has extended the opportunity for employment to all Chinese nationals in the United States as of June 5, 1989. In other words, it goes beyond what the legislation does.

Fifth. The bill would give special consideration to refugee applications from Chinese nationals who express fear of China's forced family planning policy of "one couple, one child". The President's directive applies to all foreign nationals. It goes beyond that.

The President is well justified to veto this bill. Through his administrative actions he has given protection to the Chinese students that are not only equal to those in the bill, but exceed the all-important goals of the bill's supporters.

Some would question why the President wishes to press this matter to a vote, since he and the Congress clearly agree on treating the Chinese students with the utmost compassion. Sustaining the veto of this superfluous legislation is essential in order to provide the President with the necessary flexibility and authority to conduct foreign affairs. Already we have seen significant steps taken by China, as a result of the President's policy of maintaining open channels of communication with the Beijing Government:

China has virtually ended its propaganda attacks on the United States

Chinese security forces have stopped harassing our Embassy in Beijing.

Martial law has been lifted in Beijing. That is not the end of everything but certainly it signals that the regime will respond to carefully applied international pressure.

Step by step, the administration has moved forward on its China policy. And we have seen positive results. To override the President's veto, at this critical and early stage, would greatly impede the potential for improvement in United States-China relations.

The most likely target of Chinese countermeasures would be to limit, if not terminate, cultural, scientific, and educational exchanges. Shortly after President Nixon's 1972 China trip, United States-China exchanges began with the participation of a handful of Chinese scholars in short-term orientation programs. The number of Chinese scholars in the United States has grown to an astounding 80,000. China now ranks second in total number of foreign students studying in the United States. That is the second largest number from any nation in the world. All of that stemmed from the outreach that President Nixon made in 1972.

Both the United States and China benefit from such exchanges. In fact, the democratic ideals for which the prodemocracy movement is working have their roots in these exchange programs.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. CHAFEE. May I have 1 more minute?

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. China, throughout its history, has accepted the willingness to accept isolation from the rest of the world. They did that in the 15th century when Jesuit missionaries were out there. They did it in the 18th century when the European powers wanted to go to China.

And of the years from the end of the war in 1947 until the time of the visit of President Nixon in 1972 they

showed they were willing to accept isolation. So I hope we will sustain the President's veto.

I would like to say a final word, Mr. President. This is a political vote here today. There is no question about it. I question whether there is going to be a single Democratic Member who will vote to sustain the President's veto. The objective here is to get to the President. There is no question about that. He is riding high with an 80 percent favorability rating. So what do the Democratic Members wish to do? They wish to cut him down. Forget the merits of the legislation, which are all on the President's side. This is clearly a political endeavor. I think it is unfortunate that this is occurring so early in the session. I hope the Senate will sustain the President's veto.

I thank the Chair.

Mr. KENNEDY. I yield myself 3 minutes.

Mr. President, the vote of 390 to 25 in the House, Republicans and Democrats alike, I think addresses the view of the bipartisanship in the House of Representatives. But let me specifically read into the RECORD to my friend from Rhode Island Ambassador Lord's testimony on the progress that has been made in China that he refers to. Here it is.

Senator KENNEDY asks:

So in your view have the Administration's actions, the lifting of sanctions, veto of the Pelosi bill, and the high level envoys been matched by comparable actions in Beijing?

Ambassador LORD. Absolutely no.

This is Ambassador Lord, an ambassador there for 3 years, and counsel to Mr. Kissinger and President Nixon and President Reagan. Ambassador Lord continues:

First of all, let's recall that General Scowcroft, we now know, first went there in July, so we are talking about six months, and in that six months the situation in China has gotten worse, not better.

With respect to some of these gestures, I'm not saying in their totality they have absolutely no meaning; I am saying on the whole, they are extremely cosmetic.

Let's take each one. For example, martial law. They lift martial law, and what they do is replace soldiers with policemen. In a way, at least with soldiers, you know who they are. And it has not been lifted elsewhere, for example, in Tibet.

Furthermore, the instructions against demonstrations underneath martial law are removed when martial law is lifted, and then the very next day reissued again in another form.

Another example, journalists were hampered under martial law. They lift martial law, and then a few days later, they issue new instructions once again hampering journalists again. So there is no practical difference.

Voice of America—this is another gesture that has been cited as progress. When I was in China for three and a half years, we had a situation of either two or three correspondents and no jamming of Voice of America. What happened? They start jamming it; they reduce our correspondents to one. Then they let one more correspondent in. So now we have two correspondents and jamming versus two or three correspondents and no jamming. I don't consider that progress.

Missiles are an important question. I was heavily involved in that. But on that issue and on Cambodia, the Chinese are basically going to act on the basis of self-interest and not tawdry gestures like sending high-level emissaries.

And let me make a point that Senator Simpson raised. Again, none of us are talking about isolation. And on these important international issues, we can discuss them through our ambassadors and through U.N. forums and forums in Paris, for example, on Cambodia. I could go through each of these, if you wish.

Prisoners—some have been released, but I have a feeling that is being doled out for public opinion purposes, even as they sentence and convict others.

The Fulbright Program—

We are talking about 24 exchange students—restoration of Fulbright is 24 students. We would like to see it. But it is 24.

I hope that can be resumed. But again, we are in a position where they cut everything off, and then restore a few things, perhaps with new conditions—is that considered major progress?

It is a long answer to your question, but my point is there has been no real progress, and in many ways the situation is worse.

I think it is important that we recognize that this is, I believe, a very accurate representation from the former Ambassador about what the current conditions are in China at this time.

Mr. President, I yield 1 minute from Senator SIMPSON's time.

Mr. CHAFEE. Mr. President, we have a problem around here. The problem is everybody wants to be Secretary of State, and everybody wants to be President without running for the post. The handling of our foreign policy should be in the hands of the President of the United States. If we do not like it, we can change Presidents. But instead of passing laws and interfering in his territory, let us give him the authority to do the job.

In rebuttal to the points made by the distinguished Senator from Massachusetts, he dismisses it. I do not know how you satisfy him. They cut off the Fulbright Program. Now there are more Fulbright scholars renewed, he says around 24. What does he want? How many does he want? Would he be happy with 100? He says on the Peace Corps volunteers—I do not think he touched on that. Those were terminated. Now they are started once again.

But the important point, it seems to me, is we have to have an ability to bring China back into the family of nations. We are not going to do that by the Congress of the United States passing these laws that removes the power from the person who can negotiate for the United States, and that is the President.

Mr. KENNEDY. Mr. President, I yield myself time. I heard those arguments at the time we were fighting the Vietnam war: let us not interfere with the President. But it was Republican Senators who joined in terminating the financing for the war.

Second, I heard the same argument when we debated South African sanctions: let us continue constructive engagement with the South Africans despite the policy of apartheid; let us not second-guess the President; he has been elected.

The Senate, Republicans and Democrats, rejected that. I reject the argument that every time we agree with the President, we are statesmen, and when we differ on an issue that is a basic and fundamental issue, such as supporting in an important way the real freedom movement in China, we are somehow partisan. It does not wash, Mr. President, one way or the other. I yield——

Mr. CHAFEE. May I have 15 seconds?

The PRESIDING OFFICER. Without objection.

Mr. CHAFEE. The debate has disintegrated when somebody has to rake up the Vietnam war to sustain their position. That clearly shows that the Senator from Massachusetts is on extremely weak ground.

Mr. KENNEDY. Does the Senator differ with my argument regarding sanctions, when we had President Reagan veto the sanctions bill, and we heard that debate as the floor managers time in and time out: Let us keep the Congress out. The President knows better. I will give the Senator the sanctions bill.

Mr. CHAFEE. The Senator is coming a little more recent, up to date.

Mr. KENNEDY. Which way did the Senator vote on the sanctions bill?

Mr. CHAFEE. With the Senator from Massachusetts, on that issue.

Mr. KENNEDY. Thank you. I am glad that the Senator voted with the Senator from Massachusetts and repudiated the President's policy on constructive engagement. At that time he saw the value and the wisdom of congressional action. And I hope he would demonstrate the same wisdom here.

Mr. CHAFEE. The Senator is wrong at the top of his lungs. Here we have the largest nation in the world, a billion people, and the Senator from Massachusetts says, put them over in a corner by themselves, lock them out. They are not going to be part of the community of nations. I think that is nonsense.

The President of the United States knows a good deal more about relationships with China than either of us put together. Mr. President, not only is the President right on this particular issue, he is right on the issue of sending emissaries to China to work with that nation to try to bring it back into the family of nations.

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER. Senator Kennedy.

Mr. KENNEDY. That is a wonderful rationale. You have one policy for China with a billion, on human rights, and something else, evidently, with some other smaller country. We are talking about 1.5 billion, and that is too much, I guess, too big, too overpowering to stand up for basic and fundamental rights. Well, certainly those students in Tiananmen Square were prepared to do it. I hope we will, too. I yield 5 minutes to the Senator from Washington.

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. Mr. President, if we do not know the difference between Albania and China, we have problems.

Mr. ADAMS. Mr. President, the Senator from Massachusetts yielded 5 minutes, and this is an appropriate time.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. I am glad to withhold, if my friend from Rhode Island has something.

Mr. SIMPSON. I yield 2 minutes of my time to the Senator from Rhode Island.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized for 2 minutes, chargeable to the Senator from Wyoming.

Mr. CHAFEE. Let us get into the China policy. Set aside this veto we are dealing with here, although that is part of the whole. The question is, there is a nation there with a billion people that has a history of being prepared to accept isolation. One approach is to stand on our high horse and say you are not conforming to the rules as we see them, so go off in the corner, you pariahs, and stay there and shut your borders down. The other approach is the President of the United States says this is a nation of a billion people, and to isolate them does not get anybody anywhere. So these outreaches have to be made.

Surely, every step is not going to be forward in this relationship. It requires patience. But what is the objective? The objective is to see that human rights are observed in that nation, to make them part of the world. One way is to send them off as pariahs, and that is going to go anywhere. That is the procedure the Senator from Massachusetts wishes to follow, apparently. Criticize, criticize, criticize. That is easy. Somebody is responsible. It is the President of the United States.

I think this outreach program that he is doing—certainly we have sanctions of the type imposed on them, but gradually he is going to succeed in bringing China back into the family of nations. I think that is a worthwhile objective. He is proceeding on the right path. I thank the Chair and the Senator from Wyoming.

Mr. ADAMS addressed the Chair.

Mr. KENNEDY. I yield 5 minutes to the Senator from Washington.

Mr. ADAMS. Mr. President, this is a good time for me to enter this debate. I have prepared remarks, but coming to this floor and listening to Senator KENNEDY and Senator CHAFEE, reminds me of the fact that those of us that are friends of China are going to be voting to override this veto.

In 1956, Warren Magnuson and I debated trade with Red China. We were the only ones for it, I think, in the whole United States. We understand that we must deal with China, it is part of this world. But we must vote to override this veto.

I spent a lot of time in China, as the Senator from Massachusetts has, and as many other Members of this Senate have, both in public life and in private life. I want you to know that this is not a partisan issue. This is an issue that deals with values and with quality of life and with message and, yes, with symbols. That is why I rise to express my support for the vote to override President Bush's veto of H.R. 2712, the Emergency Chinese Immigration Relief Act of 1989. This legislation initially passed the House by a vote of 403 to 0, and by a unanimous voice in the Senate. Yesterday's vote in the House to override the President's veto was 390 to 25. To say that this measure enjoys broad, bipartisan support is an understatement. To suggest, as President Bush did yesterday, that "crass politics" are behind this effort to protect Chinese students living in our country, is a sad commentary on this administration's inability to grasp the seriousness of the American public's shock caused by the actions of the Chinese leadership last spring, and the fear that is felt by those students living in our country. We are all aware of the intense political pressure being exerted by the administration on Members of the minority in this body. This issue cannot be reduced to a question of partisan loyalties. It is not a fight between Republicans and Democrats. Rather, it must be elevated to a bipartisan loyalty to the most basic and cherished tenets of our faith in democracy. No political party has cornered the market on those values. I want to express my admiration for the political courage shown by my colleague from Washington [Mr. GORTON] who has been a leader in this effort for many months, and has spoken so eloquently here today.

China is a country with a long history, and a long view of history. Unfortunately there is an attitude in Beijing that this worldwide criticism of the Tiananmen Square massacre will soon pass away, particularly if Chinese leadership continues to insist that the incident never occurred. But we must send a message so they know, the world knows that innocent Chinese citizens were killed last spring because they dared to stand for peaceful democratic change. Living as we do in a country that was founded by patriots who stood up and sometimes gave their lives in opposition to tyranny, we see in the deaths in Tiananmen Square a modern example of the choice faced by Patrick Henry, "Give me liberty, or give me death."

I recently met with Chinese students who are studying at the University of Washington in Seattle. They are among the best and the brightest of the new generation in China. They are shocked and saddened by the tragic deaths of their friends and loved ones, and they are fearful for their own safety and that of their families. President Bush assures us they have nothing to fear, that his administrative action provides a full measure of protection. Those students told me that without passing this veto override, we will send the wrong signal to the Chinese Government. Much as they would like to believe in and trust our President, it is their own Government they fear. How can we refuse to honor their request?

To argue the relative levels of protection between H.R. 2712 and the President's administrative actions misses the point of today's action. China is a country to which the subtlety of symbols and actions mean more than words. Ralph Waldo Emerson said, "Sir the noise of your actions is so loud I cannot hear the words you speak." One student in Seattle told me he has remained an avid reader of the Peoples Daily while at the University of Washington. He said the events in Eastern Europe, where peaceful democratic change has been sweeping away repressive governments in country after country, has been ignored in the Peoples Daily. Likewise, the Tiananmen Square massacre has been ignored in that newspaper. One event that did receive full, front-page coverage, with several pictures, was the secret visit by President Bush's personal emissary, National Security Adviser Brent Scowcroft. The administration would have us believe that the President's summit meeting at Malta necessitated the visit. The Peoples World told the citizens of China that the visit was intended to demonstrate our ongoing mutual interests. The Chinese students living in Seattle believe that our mutual interests are in the truth, and in peaceful democratic change in their society. We must deal with values.

Long after this vote, we will be left with mental images of events that began peacefully in Tiananmen Square and continue today here in this Chamber. We shall never forget

the sight of one brave man standing in front of a row of tanks, bringing them to a halt with a show of courage that inspires all freedom loving people. It is a tragedy that millions of Chinese citizens are denied the right to know that one of their fellow citizens showed such courage. And yet the Peoples World is only too eager to remind the Chinese people of General Scowcroft's toast, when he said:

In both our societies there are voices of those who seek to redirect or frustrate our cooperation. We both must take bold measures to overcome these negative forces.

I urge my colleagues on both sides of the aisle to take a bold measure to stand with the voices in both of our societies who seek to advance the cause of peaceful democratic change.

Mr. President, I urge the Senate of the United States to override the President's veto of the Emergency Chinese Immigration Relief Act.

I hope we will override this veto and do it by a big margin and a bipartisan margin today because that is the way it should be, as those values are what is carrying the world today.

I thank the President and I thank the Senator from Massachusetts for yieiding me this time.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. Would you review the time please, Mr. President?

The PRESIDING OFFICER. I will. Thirty-nine minutes and 43 seconds for the proponents side; and 19 minutes for the opponents.

Mr. SIMPSON. Mr. President, I have a few more requests. I yield 5 minutes to my friend from New York.

The PRESIDING OFFICER. The Senator from New York.

Mr. D'AMATO. Mr. President, it seems to me that what is taking place here is a terrible misconception; one I do not want to be painted with. It is somehow if we support the President and say that we believe that in this matter and other matters the President should conduct foreign policy, that somehow we are not concerned with freedom and democracy in China. That we are opposed to democracy; that we are not concerned about human rights and the terror that comes with its abuses saw we all shared revulsion at the crushing of the students in their drive for democracy and the ruthless manner in which it was put down.

Mr. President, that is just simply at variance with the facts. Literally every Senator supported the resolution of May 31 calling for and encouraging the democracy movement in China and on July 14 the sense-of-the-Senate resolution condemning China for repression of the student movements in China. Every Member joined in the outcry.

Indeed to suggest that somehow because the President of the United States had indicated that not only does he support the principles of the legislation, but goes beyond that which we are considering, and indeed feels that he will have greater leverage in the ability to conduct foreign policy in a manner in which will give freedom an opportunity in China, that the second guessers come forth and charge that is tantamount to saying that we do not share concern for human rights, that we are not outraged is itself outrageous.

I am outraged at what took place. I am outraged at the statement that the foreign ministry of China issued today. And I ask unanimous consent that a copy of this press release which I submit be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EMBASSY OF THE
PEOPLE'S REPUBLIC OF CHINA
Washington, DC, January 25, 1990.

FOREIGN MINISTRY SPOKESMAN ON U.S. HOUSE OF REPRESENTATIVES' ANOTHER BILL CONCERNING CHINESE STUDENTS

BEIJING, January 25 (Xinhua).—A Chinese Foreign Ministry spokesman today expressed "great indignation" at the adoption by the U.S. House of Representatives of another bill concerning Chinese studying abroad.

In disregard of the repeated opposition from the Chinese side, the spokesman said, the U.S. House of Representatives has gone so far as to adopt yet another bill on the question of Chinese studying in the United States, trying to obstruct their return to China for service in their home country on the excuse of their possible "persecution" after return to China and attempting, through this, to support the members of the reactionary organizations of the "Front For Democracy in China" and the "Democratic Federation of China" in their activities against the Government of the People's Republic of China.

Ignoring the facts, he said, the House of Representatives has based its law-making on rumors, fully revealing its anti-China position.

He said the move also runs counter to international practice and the agreements reached between China and the U.S., disrupts the Sino-U.S. exchanges in the cultural and educational fields and interferes grossly in China's internal affairs.

"We express great indignation at and strongly condemn this hegemonist act of the U.S. House of Representatives," he said.

Should the U.S. Senate also adopt such a bill, the spokesman said, it would certainly do serious harm to Sino-U.S. relations and further impair the cultural and educational exchanges between the two countries.

"We urge the U.S. side to take prompt and effective measures to prevent the deterioration of the situation," he said, "otherwise, the U.S. side must be held responsible for all the consequences arising therefrom."

Mr. D'AMATO. The Chinese Foreign Minister says that he expresses "great indignation" at the adoption of the U.S. House of Representatives of another bill concerning Chinese studying abroad.

How dare he condemn the Congress of the United States and threaten, by implication, the Senate and threaten, by way of this release, that somehow things will be different whatever the course of action that we undertake. I resent that.

I think it is wrong. I think that it further feeds the fears and anxieties that people might have. But I have to tell you something: I have trust in the President of the United States and when he said to me yesterday, "Senator, no student will be forced to leave against his will," I believe the President of the United States. I do not know what we would gain by embarrassing him, and that is exactly what is being attempted here today.

Are we really saying that George Bush does not care for human rights, that he does not care, that he is not concerned? We may differ as to how he conducts foreign policy, and that is legitimate, and I think it may have been a faux pas to send a delegation over there and have Scowcroft photographed toasting champagne, and have all the implications we heard attendant with it. But it is nothing but naked politics to suggest that the President in attempting to conduct foreign policy in the best manner he sees fit that he is somehow compromising freedom, or somehow does not care about human rights.

That is wrong. That is a brutal attack on the foundations and the institutions of this country and it is a personal attack. And while I may have had misgivings about our conduct of foreign policy and whether or not we may or may not have been sending the wrong signals, I want to tell you we will be sending the wrong signal as it relates to the kind of leadership we need today not only in dealing with the problems of China but elsewhere in the fast-moving, changing dynamic times in world events.

And that is why I am going to vote to sustain the veto notwithstanding my indignation at the Chinese leaders, notwithstanding the prepression, the brutal repression that we saw take place in Tiananmen Square, notwithstanding what their Foreign Minister said today, I am going to support our President.

I thank you, Mr. President.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. KENNEDY. I yield 4 minutes to the Senator from Iowa.

Mr. HARKIN. Mr. President, I rise in strong opposition to President Bush's veto of H.R. 2712, the Emergency Chinese Immigration Relief Act, and in support of the motion to override the President's veto.

In the months before June 3, Americans—indeed, the entire world—watched with admiration as the students and workers in Tiananmen Square demonstrated peacefully for freedom. The students' struggle for

freedom and democracy so closely resembled that of our own forefathers more than two centuries ago, and the similarity could not go unnoticed when the students constructed their own Goddess of Democracy in the center of the square.

But hope turned to horror, and the students' cries for freedom turned to screams of pain and grief for those brutally gunned-down by the so-called Peoples Army, ordered to the scene by Chinese leaders Deng Xiaoping, Li Peng, and other Communist hardliners.

Repression inside China continues, only it is not as public as or as televised as it was in June. Also today, according to our Immigration and Naturalization Service, the United States hosts 40,000 students from China.

Mr. President, we have a responsibility—to the cause of freedom and democracy in China as well as to ourselves—not to subject those Chinese students now in our country to the same fate their brothers and sisters suffered last June and continue to endure today.

We have a solemn responsibility to guarantee, not just to promise, those Chinese students that they will not be sent back to their homeland where all will loose their freedom and some their lives.

Repression persists in China, despite Deng's limited pledge to lift martial law in Beijing.

The Chinese Government continues to round up students accused of supporting the prodemocracy movement.

Reeducation camps have been established.

These actions are clear indications that the Chinese Government will suppress any freedom of expression and severely punish those who advocate democracy in China.

Mr. President, the choice we face today is clear.

The choice is not between Republicans and Democrats.

It is a question of whether we seek to guarantee the safety of Chinese students. It is a question of whether we will condemn those responsible for the June massacre and the continued repression of the prodemocracy movement in China.

It is a question of whether we tie our foreign policy to the future of China, a future of freedom and democracy, or whether we align with the forces of the past, of repression, political stagnation and corruption.

Unfortunately, the administration has made its choice.

And it's wrong—dead wrong.

During one of his secret visits to Beijing, the President's National Security Adviser, Brent Scowcroft, met with top Chinese leaders.

In both our societies, there are voices of those who seek to redirect or frustrate our cooperation. We must both take bold measures to overcome those negative forces.

Today, Mr. President, we must choose to align ourselves with positive forces—those forces represent the vast majority of the Chinese people as well as the people of the United States. Positive forces represent the overwhelming majority of the House of Representatives, the American people, and I believe the Senate as well. And those forces are represented by thousands of Chinese nationals who will be protected by the legislation we are considering today.

Mr. President, I ask my colleagues to join me in voting to override the President's veto of H.R. 2712, the Emergency Chinese Immigration Relief Act, and to stop this betrayal of the struggle for freedom in China.

Mr. President, I ask unanimous consent to have printed in the RECORD two articles on this subject.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Des Moines Register, Jan. 24, 1990]

SEND MESSAGE TO BEIJING

Concerned about the fate of pro-democracy Chinese students in the United States with time running out on their visas, Congress last November passed a law allowing those students to extend their stays. The lawmakers' concerns, expressed by a unanimous vote in the House and a voice vote in the Senate, were on target.

The Chinese government still is prosecuting and jailing students who participated in last spring's demonstration. There's no telling what retaliatory action would be taken against those Chinese students in the United States who only supported the demonstrations and who now are faced with having to return home.

But President Bush, arguing that the congressional act could jeopardize future Chinese exchange programs, vetoed the measure.

Today, Congress is set to attempt an override. The effort, aimed at protecting the students but also at sending a strong human-rights message to Beijing, deserves enthusiastic support.

The United States cannot isolate the Chinese, the president argues, and can best improve human rights in the country by maintaining contacts and nurturing relationships with Chinese leaders. That, of course, is what the Reagan administration tried to do in South Africa. But the policy of "constructive engagement" didn't work with Pretoria. It has been rejected by the Bush administration. Why should anybody think things will be different with Beijing? The president notes that the Chinese have declared an end to martial law. But that cosmetic action in one way signaled an improvement in human rights.

There's been no indication that the Chinese government takes seriously American entreaties to allow freedom of expression and movement. To the contrary, the Bush administration has rewarded Chinese brutality by sending top-level missions to Beijing in violation of U.S. policy, and by lifting some sanctions against China.

Regarding the students, Bush claims to have done what Congress wanted by signing an executive order protecting the Chinese students' status under the existing law. That's a limp approach—executive orders easily can be changed. It undermines the Chinese students in the United States as well as the forces for freedom in China.

Congress needs to communicate its views not only to Beijing but also to the White House. It can do that by overriding the president's wrongheaded November veto.

[From the New York Times, Jan. 14, 1990]

CHRONOLOGY OF BETRAYAL

(By A.M. Rosenthal)

This is the chronology of the American betrayal of the struggle for freedom in China. It is worth studying. There is still a chance to recover some of America's honor.

June 4, 1989: The Communist rulers of China order military troops to shoot down students and workers peacefully demonstrating for a taste of freedom. Hundreds, possibly thousands, die. In the weeks that follow thousands are arrested; most are still in jail.

June 20: President Bush orders some mild sanctions against China. He says any high-level contacts with the murderers of Beijing are suspended until they acknowledge the validity of the demonstrators' aspirations.

Early July: Exact date still secret. Mr. Bush sends a high-level mission to China but keeps that fact hidden.

July-November: More executions. New waves of arrests, closing in tighter on student leaders who had escaped; purging of officials who had shown any sympathy with them.

Nov. 30: Mr. Bush vetoes an act of Congress, passed without opposition in the House and Senate, to guarantee that Chinese students now in this country would not be forced to return to China as long as they were in danger.

Dec. 9: A top-level mission is sent publicly to Beijing. Warm exchanges of toasts with the men who ordered the murders. Administration refuses to say whether other secret missions were sent to China.

Dec. 10-24: Mr. Bush says some sanctions well be lifted. Brushes aside protests from Republican and Democratic members of Congress.

Administration makes it plain that it expects gestures from Chinese Communists before Congress reconvenes to try to override the President's veto.

Jan. 2-3, 1990: American organizations like the International League for Human Rights provide information detailing arrests and executions, which have continued since the June murders.

Chinese students say at least 10,000 demonstrators are still in jail, beg Mr. Bush to demand their release.

Chinese Communists denounce Eastern European revolutions, show even stronger determination not to loosen their own control.

Jan. 10: Chinese Communists, as predicted, announce lifting of martial law in Beijing—not in any other place where it was imposed publicly or secretly.

Many soldiers transferred to police force, which now numbers more than 1.5 million in addition to army about twice that size. Laws allowing arrests without explanation, secret trials, executions, indefinite detention without trial, forced labor, press control, brutal student "re-education" camps—all still on the books and recently made even harsher.

Denunciation of "lifting" of martial law as meaningless cosmetic trick comes from all over the world. In Washington, the President orders steps to permit World Bank loans to Chinese Communists.

Jan. 11: Mr. Bush hails the Chinese Communists for taking a "very sound step." Washington reports possible repeals of other sanctions.

That is the chronology so far.

In the last days of the 1980's the Bush Administration deserted the struggle for freedom in China. Whatever the reasons—outdated, stale geopolitics and Mr. Bush's misplaced confidence that he really "knows" China best—the Administration picked the wrong China, the China of the oppressors over the China of the oppressed.

In the first days of the 1990's it did something almost as bad—it made a fool of itself. It said that a contemptuous piece of cynical playacting by the murderers of Beijing was a step toward freedom.

Now here is a date for the future:

On Jan. 24, the day after it reconvenes, Congress will try to override Mr. Bush's veto of the bill to protect Chinese students in the United States.

This was always important, to help the students. Now it has taken on profound political significance.

An override would signal to the entire world that at least the legislative branch of the United States Government remains on the side of the freedom fighters of China. It would be an act of hope and loyalty for the Chinese and the freedom movements still struggling in Eastern Europe and the Soviet Union.

Override of a veto requires a two-thirds majority. The White House is working hard to persuade Republicans who voted for the bill to vote against an override.

Between today and the date of that vote, every American can get in touch with his or her representative and senator and urge them to vote against the veto and for the people of China.

This will give us all a chance to take part in the chronology of Chinese-American history and wipe away part of the stain.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. KENNEDY. I yield 4 minutes to the Senator from Tennessee.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. SASSER. Mr. President, I rise today to urge my colleagues to join in overriding the President's veto of H.R. 2712, the Chinese Adjustment of Status Facilitation Act.

Last summer, the world watched with respect and admiration as Chinese students staged a peaceful pro democracy rally in Tiananmen Square. The world watched in awe as a lone student—armed only with moral courage—stood in front a tank and brought the military might of a repressive regime to a halt.

Later, we watched with horror as the tyrants who rule China ruthlessly crushed the students' cry for freedom.

We now know that only weeks after that night in Tiannanmen Square, our National Security Adviser, Brent Scowcroft, secretly met with those same tyrannical rulers. And only 2 months ago, just as the walls of repression were coming down in Eastern Europe, we watched the National Security Advisor of the United States raise a glass to toast the Chinese leaders whose own repressive tactics stand in stark contrast to the wave of freedom and democracy sweeping the world. Those visits—and this veto—send the message that the United States values friendship over freedom.

The President's inadvised veto puts Chinese students here in the United States in grave danger and it puts their families in China in danger as well.

The President's proposal to handle this issue through administrative means is simply insufficient. In fact, it puts the students in more danger. The students believe that to be the case.

First of all, it rests on shaky legal ground. A recent Library of Congress legal analysis concludes that—in the absence of specific legislation—the President may not have the legal authority to impose his administrative remedy.

Second, it requires Chinese students here in the United States to apply for an extension of their visas. The Chinese Government regards such an act as a rejection of Chinese citizenship—in fact as an act of treason. The Chinese Government has already contacted students warning them not to apply for the President's program.

I believe we owe these brave young students better than that.

The legislation we are considering today will offer real protections to Chinese students. First, it waives the 2-year home country residence requirement for nationals of the People's Rebublic of China. Thus, students who have demonstrated for freedom can apply for residency in the United States without returning to China.

Second, it presumes continuous U.S. residence for the purpose of status adjustment or changes of status for students who were in lawful nonimmigration status as of June 5, 1989.

Third, it allows Chinese students lawfully in the United States on student and exchange visas to work, to make a living.

Mr. President, this is real protection for the students. This is real security for them. And by giving them automatic coverage they will not have to take any individual actions which will endanger their families in China.

Mr. President, the model the students chose for their rally was one of the most inspiring symbols of American freedom—the Statue of Liberty. The President's veto of H.R. 2712 flies in the very face of everything that statue stands for.

At the foot of the Statue of Liberty lies a broken chain which represents tyranny. What lies at the foot of the President's veto is the broken hopes of these Chinese students in the United States who so bravely demonstrated for an end to tyranny in their homeland.

Mr. President, we should override this veto. Not to do so is to send a message to the Chinese Government that repression is acceptable. That is the message President Bush wants to send.

It is the wrong message.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. SIMPSON. Mr. President, I yield 3 minutes' time to the Senator from Texas [Mr. GRAMM].

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. Mr. President, what is at issue is not whether these students are going to be sent back into an oppressive country to face punishment from a totalitarian government. Both our actions and the President's actions have guaranteed that the students are not going to be sent back against their will.

Quite frankly, Mr. President, I am delighted the students are here. I want to see more come. If things should turn out so they should decide not to go back, we are talking about over 40,000 people, the smartest people in China. And if that intelligence is combined with the ingredient that America provides best—freedom—I have no doubt that there are Noble Prize winners in this group of students, I have no doubt that they can contribute greatly to America and to the world. I look forward to that contribution.

What is at issue here is not are the students going to be sent back. Whether we override the veto or whether we do not, they will not be sent back and we all know that. What is at issue here is whether we are going to make the decision or whether we are going to allow the President to make it.

I think it is interesting, Mr. President, that 30 years ago this debate probably would never have occurred. If President Eisenhower had picked up the telephone and called Sam Rayburn and Lyndon Johnson and said, "I know there is concern about the students; I want to assure you they are not going to be sent back; I am going to issue an Executive order; I believe, based on my experience with dealing with the Chinese, that that is the best way to do it," my belief is—and I think history, if we look back at it, would probably indicate that I am correct—that Speaker Rayburn and Majority Leader Johnson would have said, "That is fine with us, Mr. President, if that is what you think is best."

What we have seen, as we all know, is that partisanship has not died at the Nation's shores, and we have a continuing attempt in Congress for each of us to play as if we are President. I am swayed by the President's opinion. I personally do not agree. My guess is, if I were President, I would sign this bill. If I were President, I

would move not only to allow these students to stay, but to allow them to become permanent resident aliens. But George Bush has been the Ambassador to China. So far as I am aware, there is not a Member of the Senate that has anything remotely similar to his experience in dealing with China in terms of their qualifications.

The President says that he believes that this is the best way to deal with this problem. I submit, Mr. President, under those circumstances, that it is wise and prudent policy for us to protect the students, something that we all agree on, and that we allow the President, based on his experience, based on the fact that he is in fact President, to make this determination.

If, in the future, the President should decide to change his mind—which he has assured me that he will not—or if circumstances change, then we can come back and act. But I believe under the circumstances, where there is legitimate reason for doubt, that when in doubt we should let the President conduct the foreign policy of the country. That is why I will vote against overriding the veto.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. I yield 3 minutes to the Senator from Florida.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mr. GRAHAM. Mr. President, the debate we are having today is not a new debate. In fact, it is one of the oldest in American history. If we were here 200 years ago we would be debating what should America's position be in relation to the human rights issue raised by the French Revolution. Fifty years ago we would be here debating whether America should come to the defense of Great Britain, as the long shadows of World War II fell across Europe. Those are the kind of debates we have had in the United States Senate over our 200-year history. This is the appropriate forum to discuss those basic questions of America's position in the world.

There have been two basic trains of thought throughout that 200-year period. One is what I would describe as the Jeffersonian, and that is that we meant it when we wrote in the Declaration of Independence that all men are created equal and there are certain inalienable rights that are universal, and America stands for the upholding of those principles.

Another theory has been that America is like any other European state and that we should conduct our foreign policy in a manner that maximizes the nuances of our national interest; that we should apply principles which later would become associated with personages such as Metternich and Bismarck.

I want to clearly say that I stand as a Jeffersonian in this debate.

But the point I wish to make today is that even if you took a Metternich-Bismarck approach to foreign policy, you would not be very happy at the consequence of what has occurred as a result of the President's action.

I would like to point to one specific example of that relationship, Mr. President, and that is what has happened between Communist China and one of the other last vestiges of the old Stalinist regime, Communist Cuba. What has happened to this relationship in the time period that we have been trying to reach out to them by vetoing bills against students in this country; sending high emissaries twice to China?

What has happened is that Communist Cuba and Communist China have just signed, as of the 14th of December, a $500 million trade agreement, representing an 11-percent increase in the trade between those two countries.

Why is it happening? Clearly it is because Cuba is realizing that its old allies, the Soviet Union and central Europe, are no longer reliable. It is looking for new economic relationships and is has found them in Communist China.

What has that relationship led to? It has led to Castro making a statement that the relations between the two Communist countries are getting better and better. It is reflecting itself in purchases by Cuba from China of bulldozers for use in construction and building drainage systems and sugar cane fields. Castro recently stated that Cuba has purchased ships for its merchant fleet with Chinese credit.

Mr. President, this policy has failed both in terms of where America stands best, when it stands for human rights, and it has failed even in its attempt to manipulate the Chinese to a policy that is more consistent with American interests. By any standard, this policy has failed. By any standard, the Senate should vote today to override the President's veto.

We must remind the Chinese Government and President Bush what it is we stand for.

We in the United States, stand for democracy and respect for human dignity. We stand with that courageous young man who singlehandedly halted that tank.

We stand with that man and those students and their ideals.

And we stand with the Chinese students in the United States who are now afraid to return home.

We must not force them to go back. We must protect them with a law, not a Presidential directive that could be withdrawn at any time.

We must send a message to those students, to our President and to the world that we in the Congress will stand up for democracy and human rights.

That is why I will vote today to override this veto.

Mr. President, I ask unanimous consent that editorials from newspapers in Miami, Tallahassee, and Washington be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FIRST: OVERRIDE BUSH'S CHINA VETO

The allegiance of the American people is with citizens of other countries struggling for freedom—dying even for the right to openly dissent.

Yet last November President Bush vetoed a unanimously-passed congressional bill to protect Chinese students enrolled at U.S. universities. The veto was in keeping with President Bush's shamefully weak support for the pro-democracy movement. When the protest started last April, he was cautious. After the killings had stopped, he was forgiving.

As much as what the bill promised to do was its importance in showing U.S. solidarity with the pro-democracy movement in China. President Bush apparently wants solidarity with Chinese leaders anxious to divert attention from their ruthless crackdown to the U.S. reaction.

The bill would allow thousands of Chinese students to stay in the United States, if they believed they would be endangered returning home. Without such a change in immigration policy, the students would have little recourse but to return to China and possibly face severe penalties.

ORDER OFFERED TOO LITTLE

President Bush's executive order, which he said accomplished the same goals as the legislation, falls short of the protections in the legislation.

Congress must now show the world whom the United States sides with in struggles for democracy by overriding Bush's veto when it reconvenes Jan. 24.

It is inconceivable that the United States would have supported an East German government that turned tanks and guns on demonstrators demanding reform and the dismantling of the Berlin Wall. In East Germany, the people are now storming hated secret police stations. In China, they are banned from congregating in Tiananmen Square.

A veto overide in defense of Chinese students would be a fitting post-script to the many birthday tributes to Martin Luther King Jr. It was King who believed no man is ever truly free until all are. Congress should prevent the United States from sending students back to a certain loss of freedom and perhaps even a loss of life.

DEMONSTRATORS KILLED

Last June, the Chinese Army killed hundreds, perhaps thousands, of pro-democracy demonstrators. Americans who had followed news of the long-running student protest in Tiananmen Square watched the crackdown in horror. The Chinese Army even turned its guns on the outer walls of the U.S. embassy compound—a grievous diplomatic affront.

The exact number of Chinese dead is in dispute. And the Beijing government even cynically tried to deny the killings. But eyewitnesses attest to the deaths. And since the crackdown, hundreds of others have been arrested; many secretly executed.

President Bush, who served as envoy to China in the early '70s and who believes he

knows how to deal with their aging leaders, continues to appease those who ordered the killings. It is a mistake. And one with a high price—undercutting the democratic ideals we want to see take root in China.

The president's manipulations are all the more dismaying considering his pleas on behalf of Panamanians yearning to be free. Such seeming foreign policy schizophrenia suggests it is control of cheap labor markets that interests the president. Not freedom.

Bush has sent special envoys to deal with China's leaders. He has repealed sanctions. He vetoed the student bill, which passed unanimously.

Congress should override the veto unanimously, too. The case is clear cut. Either we stand with freedom—or with those who would deny it.

HAVANA COURTS THE CHINESE

(By Mimi Whitefield)

As trade relations with Cuba's traditional Soviet bloc trading partners become more difficult, the Cubans have gone prospecting for trade in China and Latin America.

China and Cuba recently signed a trade agreement that will boost Cuban-Chinese trade to $500 million this year, an 11 percent increase over 1989. Cuba also has been courting Brazil, Venezuela, the Dominican Republic and other Latin American countries.

Even though Cuba is making progress in forging trade ties outside the Soviet trading bloc, analysts said it will be hard to fill the gap left as Cuba's Eastern European partners move toward a free market and trade with the West.

"There's not anyone in the position to supply them with the kind of economic assistance they've got from the Soviet Union and Eastern Europe. China is about the only place they can turn but China hasn't been willing to give them any subsidy or assistance—mostly because it can't afford to," said William Leo-Grande, a government professor at American University.

Cuba's most immediate concern is dwindling trade with Eastern Europe. The Soviet-led trading bloc Comecon decided Wednesday to phase in the use of convertible currencies and world market prices.

SPECIAL TREATMENT TO LAST

But even when Comecon adopts new trade rules, analysts speculated that the Soviet Union would continue to give Cuba special trade treatment. But Eastern Europe probably will not, they said.

"I have serious doubts whether China will be a substitute for the quality of exports Cuba receives from the Eastern European countries," said Carmelo Mesa Lago, an economist at the University of Pittsburgh.

Another problem is that Cuba's trade with China isn't conducted in hard currency so Cuba doesn't earn the foreign exchange it needs to go shopping in Western nations, or that it will need for future Comecon purchases.

Still, China appears to be the economic alternative that offers Cuba the most potential.

Last month during a visit by Zheng Tuobin, China's minister of foreign economic relations and trade, President Fidel Castro said relations were "getting better and better. They are very good."

Castro also has accepted an invitation to visit China but no date has been set.

Cuba and China weren't always on such cozy terms. In fact, China was the adversary as Cuba aided with the Soviet Union.

A "MARRIAGE OF CONVENIENCE"

Nelson Valdes, a Cuba specialist at the University of New Mexico, said the warmer relationship still strikes him as a "marriage of convenience. I don't think the Cubans have a love affair with China but they are trying to strengthen economic linkages."

In the early 1960s, Cuba tried to remain neutral in the Soviet-Sino dispute but its strengthening ties with the Kremlin deeply disturbed the Chinese.

In 1966 Castro raged against China, and China canceled an important rice-for-sugar deal. The two countries seemed to be on the verge of breaking diplomatic relations.

In the 1970s relations were still strained. Beijing's rapprochement with Washington didn't play well in Cuba.

Even in the early 1980s the Chinese still considered Cuba an outpost of the Soviet Union. But economic relations have improved markedly in recent years—despite Cuba's skepticism about China's experiments with free enterprise.

Last month Castro called trade between the two nations "certain" and based on mutual interest.

Cuba's main export is sugar, but it also sends China foodstuffs, raw materials and some light industrial goods. A joint venture in Cuba produces fans and bicycles.

CHINA PROVIDES VARIETY

The Cubans get a variety of goods from the Chinese. "It is difficult to find someone who has not used a Chinese thermometer. It is difficult to find a child in this country who has not drunk out of a Chinese bottle. It is difficult to find someone who has not used Chinese fabric, some Chinese medicine," Castro said during Zheng's visit.

Among recent Cuban purchases from the Chinese are bulldozers for use in construction and to build drainage systems in sugarcane fields. Castro said Cuba also recently purchased ships for its merchant fleet with Chinese credit.

Another sign of the times: During Zheng's trip the Cubans inaugurated a remodeled five-story Chinese restaurant, the Pacifico, in Havana's Chinatown.

OVERRIDING REASONS

Congress returns today from its long holiday recess, and its first order of business will be an effort to rectify a dreadful mistake that President Bush made last Nov. 30. That's the day that Mr. Bush vetoed a bill to permit Chinese students now in this country to remain here rather than be sent home to face persecution.

Tomorrow Congress will vote on overriding that veto, and on this vote there can be no quibbling. As a demonstration of America's conscience, Congress must override the President. Republicans should heed their GOP colleagues, such as House Minority Whip Newt Gingrich of Georgia, and join with Democrats to set aright this shameful episode.

The bill to protect the Chinese students, H.R. 2712, passed the House 403–0 and the Senate by a unanimous voice vote in November. The President vetoed it on Nov. 30, offering the lame reason that it was not helpful to U.S.-China relations or to improving human rights within China.

Just nine days later, National Security Adviser Brent Scowcroft and Deputy Secretary of State Lawrence Eagleburger were in Beijing, clinking glasses with the butchers of Tiananmen Square. It then was revealed that a U.S. delegation secretly had visited China last summer, after the June 3–4 massacre of pro-democracy demonstrators. And on Dec. 10, President Bush lifted some of the U.S. sanctions imposed on Beijing after the slaughter.

Granted, with his veto Mr. Bush did issue a Presidential directive that allows the Immigration and Naturalization Service to waive visa requirements for the Chinese students. But the directive has no force of law; it can be withdrawn at whim; and its key provisos conflict with existing law.

No, H.R. 2712 is needed as law, because only a law can protect the Chinese students from being sent home to face heaven-knows-what repression. Congress must tell China's rulers something quite different from the cooing that they're hearing from the White House. It must tell Beijing that the United States Congress, at least, stands for human rights and is not willing to overlook murder, wholesale arrests, and continuing repression.

The only way to send Beijing's butchers that message is to override—resoundingly—the President's veto of H.R. 2712.

Mr. KENNEDY. Mr. President, how much time do I have?

The PRESIDING OFFICER. The Senator has 6 minutes and 36 seconds remaining.

Mr. KENNEDY. I yield 2 minutes to the Senator from Connecticut.

Mr. DODD. Mr. President, I join with my colleague from Massachusetts and others who are rising to support the override of the Presidential veto. I regret that we have arrived at this point.

Frankly, it is an unfortunate situation. It is the President who decided to make this issue as contentious as it is. The passage of this emergency legislation for Chinese students enjoyed broad bipartisan support a few months ago; it was a clearcut matter. Frankly, the division surrounding the question of this override has been created by the President himself. We should not be in this mess.

Mr. SARBANES. Will the Senator yield?

Mr. DODD. I will be glad to yield.

Mr. SARBANES. A letter was sent to the President signed by 74 Senators urging him to sign the bill after it passed by unanimous voice vote. It was overwhelmingly passed by the House. The bipartisan expression has been in favor of this legislation, including 74 Members of the Senate actually signing a letter urging the President to sign it.

Mr. DODD. Once again my colleague from Maryland is absolutely correct. The mess we are in has been created by the President. Let us be clear on that.

Mr. President, before I get to the rest of my statement let me point something out that has just come to mind. There is, in existing law, a measure that was passed in 1981 that absolutely prohibits any nation from intimidating individuals from that nation who are living in the United States. The law states that letters of credit shall not be issued to any nation

that the President has determined are engaged in the consistent pattern of acts of intimidation, or harassment directed against individuals from that nation who are living in the United States.

The record is replete with examples of Chinese students and their families being harassed by the Chinese Government.

As we sit here today debating the nuances of constitutional law and administrative law, the Chinese Government is in direct violation of this legislation authored by Congressman SOLARZ in 1981. My hope would be that our colleagues should unite in overriding this veto and then get about the business of trying to rebuild our important relationship with the People's Republic of China.

It would be regrettable to see us go back to the mindset of 1950's or 1960's when the United States and China were engaged in a relationship of misunderstanding and suspicion. That does not serve either of our nations well. But I hope that the People's Republic of China can appreciate that when decisions like this are made we must remain true to ourselves.

Let us join together and send a united message of resolve and move forward. Let us not send a confusing signal with the President appearing to be on one side of this issue and Congress on the other. That would be a tragedy, Mr. President.

Mr. President, a Senate override of the President's veto of H.R. 2712 sends two important signals.

First, it sends a signal of solidarity to Chinese students in the United States and to the Chinese fighting for democracy in China that the United States stands with them. We do not stand with the aging Communist leadership that perpetrated the massacre of Tiananmen Square and continues its repression through arrests, intimidation, reprisals, censorship and denial of basic human rights.

Second, it sends a signal to the White House that United States-China policy is not made exclusively on Chinese terms. If we do not send a signal of solidarity to our Chinese brethren, if we do not send a strong signal to the leadership in Beijing, our policy toward China will remain hostage to threats of those who sent tanks into Tiananmen Square.

The arguments in support of sustaining the President's veto are in my view, wrong.

The argument that the identical immigration relief legislatively sought has been provided by the President is insufficient. The truth of the matter is that, in legal terms, the President's administrative order could be withdrawn at any time and in fact, could be challenged in court as illegal and in conflict with existing immigration law. As has been well documented in the months since the Tiananmen Square massacre and most recently in hearings this week, Chinese students across the United States have made clear that the President's directive does not provide them with the protection they seek—and need. They need statutory protection that can be changed only by subsequent congressional action. As elected representatives of the greatest democracy in the world, we owe them that protection.

The argument that overriding the President's veto will impede or cause the future cancellation of educational, cultural, and other programs such as the Fulbright, just does not hold up. For that argument to be true and for the argument justifying the President's Executive order as equivalent to legislative action to be true, the Chinese would have already embarked on widespread cancellation of such programs. They have not. They clearly see nonlegislative action as a soft rebuke and they know that they cannot afford losing their educational, cultural, and scientific exchanges with the United States.

There is no question that the bilateral relationship between the United States and China is one of the most important bilateral relationships in the world. And like all bilateral relationships that we preserve through both conflict and agreement, we do so by holding true to principles fundamental to the sustaining greatness of our own democracy.

If we do not override the President's veto, we violate our own principles of commitment to human rights, to the fundamental dignity of individual men and women, to the supremacy of the people in matters of society and government, to the hope symbolized by the Statue of Liberty and by her sister Miss Liberty.

We cannot afford to make Chinese exceptions to our principles. We must believe that the principle of freedom is sure to prevail—even in China.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. I yield 5 minutes to the Senator from Pennsylvania [Mr. HEINZ].

Mr. HEINZ. Mr. President, I think there are two issues that have to be addressed in this debate. The first is the substance of the President's Executive order, and how it compared to the legislation he vetoed. On that point I think the President has to get credit for providing full protection for Chinese students and, indeed, greater protection than provided by the bill. Not only that, but the Executive order is broader than the legislation under discussion in at least two ways.

First, it grants all Chinese, some 40,000 of them, not just the students, authorization for employment while in the United States.

Second, the order directs that all aliens seeking asylum from coercive family planning policies be given special consideration; not just Chinese aliens, by the way, as the legislation provides.

The other substantive legal consideration here is whether the President's order will withstand legal challenge. Some argue that an Executive order does not have the staying power of legislation. What I say is that when George Bush says he is going to do as well or better than legislation, Mr. President, I believe he means it and will do it.

While it is impossible to exclude the possibility of some kind of court challenge to any part of this Executive order, I have to tell my colleagues that this administration is well placed, owing to the discretionary authority granted to the Attorney General, to implement waivers and other changes that will protect Chinese students seeking to extend their stay in our country.

The other major issue here is the foreign policy context of our decision. This President, if I might say so, is different from the previous President, President Reagan, who was very interested in big ideas but, frankly, left implementation to others. George Bush is, if anything, the other way around. He cares about what gets done after he makes the decision.

We can all debate how much of a role in foreign policy by Congress is warranted at any time. We debated it before and we will again. But where George Bush is concerned, let me say to my colleagues this. We are talking about a President who has conducted the foreign policy of the United States during his first year in office in an exemplary and successful fashion that has brought remarkable results. He has made progress in arms control, at the Malta summit. He and Gorbachev have set a target date for this June to sign a nuclear reduction treaty that will cut nuclear arms by 50 percent. That is a success by anybody's measurement.

Even before the changes in Eastern Europe this fall, George Bush had an agreement to cut Soviet troop and United States troop levels to a common level in Europe, 10 percent below existing levels. By the way, that means a 10-percent cut. That was back, as I say, in June, before peace broke out on a large scale in Eastern Europe.

I submit he has steered a thoughtful and deft course in Eastern Europe in our relationships with those countries and the Soviet Union, that has allowed the changes wrought by freedom and democracy to reach their full extent—and fuller still, we hope.

This is a President who has thought through his options on Panama and

acted appropriately. He acted effectively, he acted successfully, and that is why General Noriega is in jail. It is not because we in Congress told him what to do.

Now, with respect to China, this is a President who has spent more time in China than anybody in this body, than anybody probably in his administration or any other, and he is well prepared because he knows to assume the risks associated, if any, with his policy because he has that knowledge. He is this Nation's President. His foreign policies are producing success on every continent. He knows China as well or better than anybody we know in a policymaking job, and he deserves the support of this body.

Let me say in conclusion that if Congress prevails on this override and should the results in China turn out to be bad, should the oppression continue, should the hard liners gain the upper hand, it is Congress that will take full responsibility for subsequent repression, for subsequent disaster in China. It will not be a George Bush, who is willing and able to shoulder that responsibility and has the knowledge to do something positive about it.

Mr. President, on the issue before us, this President will protect the Chinese students and the Chinese people better than any legislation, and I submit that it is foolish and partisan to second guess a President whose foreign policy judgments have proved so accurate and successful for this Nation's interests.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. I yield 2 minutes to the Senator from Arizona.

Mr. DECONCINI. Mr. President, the brutal killing of peaceful demonstrators in Tiananmen Square last June has been followed by increasing Government repression and persecution of students for their participation in the prodemocracy movement. Human rights abuses continue. As a result, Chinese students currently residing in the United States have a well-founded fear that they will be persecuted if forced to return to China at this time, and they deserve the full protection of the world's most powerful democracy.

On November 30, 1989, President George Bush vetoed the Emergency Chinese Immigration Relief Act of 1989. This bill would have allowed all Chinese nationals now in the United States on student visas to remain and work in this country for a 4-year period without fear of deportation. By vetoing this important piece of legislation, President Bush allowed the Chinese Government to coerce him with the threat that future educational exchanges would be severely curtailed if the United States adopted a policy of protection for Chinese students.

The Chinese students who currently reside in this country are learning democracy firsthand. At the same time, they are those most vulnerable to repression by the Chinese Government. The United States must not only take strong steps to protect these students, it must also demonstrate to the Chinese and the world that it will not stand idly by while totalitarian regimes attempt to suppress the voices of liberty.

As Chairman of the Helsinki Commission, I believe that the protection of human rights must never be sacrificed for the sake of political or economic expedience. For years we have loudly condemned the Soviet Union for its human rights abuses and restrictive emigration policies. In Iran and Iraq, in South Africa, in Central America, and Eastern Europe, the United States has stood firm in insisting on improved human rights as the basis for improved relationships with our country.

Our tough human rights policies finally appear to be paying off. After decades of abuses, the Soviet Union has dramatically changed its internal and external policies and is entering a new era of greater freedom for its people. Poland was the first Warsaw Pact country to reject Communist rule and institute a democratically elected government. Then the Berlin Wall came tumbling down and, like dominoes, the other Eastern European nations are beginning to replace the mantle of totalitarianism with the cloak of freedom and democracy. Why should China be held to a different standard on human rights?

By giving in to the Chinese Government, the United States is sending the wrong message at the wrong time. Enactment of the Emergency Relief Act would send the People's Republic of China a strong message that human rights will remain the underpinning of the United States foreign policy. By overriding the President's veto as our first order of business this session, Congress will send the right message to nations struggling for democracy and improved human rights around the globe.

Mr. BOSCHWITZ addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, how much time do I have?

The PRESIDING OFFICER. Four minutes and 20 seconds.

Mr. KENNEDY. I yield 2 minutes to the Senator from Minnesota.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. BOSCHWITZ. Mr. President, I am most often in the President's corner and I expect that that will continue, but today I will not be. Vast strides, Mr. President, have been made in the field of human rights worldwide during this past decade, and during this past decade we have really carried the concern of human rights to the Soviets and some of the other nations in the world and gained their respect.

In the Reagan administration, we had two Secretaries of State in fast order, and I inquired of my friends in the State Department whether or not human rights was really being taken not at the end of the conversation with the Russians but up early and often and aggressively. Indeed, I was assured that that occurred, and we indeed made progress.

I am convinced that we have to deal in a similar way with the Chinese, that we have to stay engaged with them to be sure, but we have to stay engaged on our terms. So when I hear the Chinese Foreign Minister saying that this vote will injure our relations, as Senators you must vote to uphold the President's veto or there will be retributions, then that alone almost convinces me I must vote in this instance against the President; that we have to take the business of human relations to the Chinese and do so aggressively.

My friend, Senator GRAMM of Texas, said a few moments ago that this debate would not have taken place 30 years ago, that the leadership would have arranged everything.

Unfortunately, this debate did not take place 50 years ago, either, when I was a youngster in Europe, and I simply cannot be a part of that once again.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. SIMPSON. Mr. President, may I have the time allotment?

The PRESIDING OFFICER. 24:29.

Mr. SIMPSON. I thank the Chair. Let me yield 10 minutes of that time to Senator LUGAR of Indiana.

Mr. SARBANES. Will the Senator enable me to make a statement before the Senator begins his statement?

Mr. SIMPSON. I yield time from my side.

Mr. SARBANES. Mr. President, I will vote to override the President's veto of H.R. 2712, and I want to urge my colleagues in both parties to do the same. Barely 2 months ago this legislation was approved by the House of Representatives without a single dissenting vote, and by voice vote in the Senate again without any dissent expressed. Yesterday, the House of Representatives voted overwhelmingly 390 to 25, in a dramatic bipartisan expression of opinion, to override the President's veto. It is now time to make very clear that where fundamental principles are at stake, as they are with the Chinese students, the Congress will not give its consent to a policy which fails to respond to egregious human rights violations. Regrettably, such a policy is precisely what the veto represents.

The objective of H.R. 2712 is straightforward: To protect by statute, beyond any possibility of legal challenge or policy reversal, Chinese nationals currently studying in the United States against the government retaliation and repression that would be visited upon them if they were required to return to their own country. It is also to reaffirm U.S. support for the prodemocracy movement so brutally shattered, but not extinguished, by the Tiananmen massacre last June 5.

This legislation will renew American support of the struggle for freedom in China. In a moving column in the New York Times, A.M. Rosenthal sets out what he describes as the chronology of the American betrayal of the struggle for freedom in China. He then details the failure of the United States to respond to the brutal repression of those seeking freedom in China.

Passage of this legislation over the veto would send a clear message around the world that the United States Government is on the side of the freedom fighters of China. As A.M. Rosenthal says in his column:

It would be an act of hope and loyalty for the Chinese and the freedom movements still struggling in Eastern Europe and the Soviet Union.

I ask unanimous consent that two Rosenthal columns entitled "Chronology of Betrayals" and "Betrayal in Beijing" and a number of newspaper editorials be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

CHRONOLOGY OF BETRAYAL

(By A.M. Rosenthal)

This is the chronology of the American betrayal of the struggle for freedom in China. It is worth studying. There is still a chance to recover some of America's honor.

June 4, 1989: The Communist rulers of China order military troops to shoot down students and workers peacefully demonstrating for a taste of freedom. Hundreds, possibly thousands, die. In the weeks that follow thousands are arrested; most are still in jail.

June 20: President Bush orders some mild sanctions against China. He says any high-level contacts with the murderers of Beijing are suspended until they acknowledge the validity of the demonstrator's aspirations.

Early July: Exact date still secret. Mr. Bush sends a high-level mission to China but keeps that fact hidden.

July-November: More executions. New waves of arrests, closing in tighter on student leaders who had escaped; purging officials who had shown any sympathy with them.

Nov. 30: Mr. Bush vetoes an act of Congress, passed without opposition in the House and Senate, to guarantee that Chinese students now in this country would not be forced to return to China as long as they were in danger.

Dec. 9: A top-level mission is sent publicly to Beijing. Warm exchanges of toasts with the men who ordered the murders. Administration refuses to say whether other secret missions were sent to China.

Dec. 10-24: Mr. Bush says some sanctions will be lifted. Brushes aside protests from Republican and Democratic members of Congress.

Administration makes it plain that it expects gestures from Chinese Communists before Congress reconvenes to try to override the President's veto.

Jan. 2-8, 1990: American organizations like the International League for Human Rights provide information detailing arrests and executions, which have continued since the June murders.

Chinese students say at least 10,000 demonstrators are still in jail, beg Mr. Bush to demand their release.

Chinese Communists denounce Eastern European revolutions, show even stronger determination not to loosen their own control.

Jan. 10: Chinese Communists, as predicted, announce lifting of martial law in Beijing—not in any other place where it was imposed publicly or secretly.

Many soldiers transferred to the police force, which now numbers more than 1.5 million in addition to an army about twice that size. Laws allowing arrests without explanation, secret trials, executions, indefinite detention without trial, forced labor, press control, brutal student "re-education" camps—all still on the books and recently made even harsher.

Denunciation of "lifting" of martial law as meaningless cosmetic trick comes from all over the world. In Washington, the President orders steps to permit World Bank loans to Chinese Communists.

Jan. 11: Mr. Bush hails the Chinese Communists for taking a "very sound step." Washington reports possible repeals of other sanctions.

That is the chronology so far.

In the last days of the 1980's the Bush Administration deserted the struggle for freedom in China. Whatever the reasons—outdated, stale geopolitics and Mr. Bush's misplaced confidence that he really "knows" China best—the Administration picked the wrong China, the China of the oppressors over the China of the oppressed.

In the first days of the 1990's it did something almost as bad—it made a fool of itself. It said that a contempuous piece of cynical playacting by the murderers of Beijing was a step toward freedom.

Now here is a date for the future:

On Jan. 24, the day after it reconvenes, Congress will try to override Mr. Bush's veto of the bill to protect Chinese students in the United States.

This was always important, to help the students. Now it has taken on profound political significance.

An override would signal to the entire world that at least the legislative branch of the United States Government remains on the side of the freedom fighters of China. It would be an act of hope and loyalty for the Chinese and the freedom movements still struggling in Eastern Europe and the Soviet Union.

Override of a veto requires a two-thirds majority. The White House is working hard to persuade Republicans who voted for the bill to vote against an override.

Between today and the date of that vote, every American can get in touch with his or her representative and senator and urge them to vote against the veto and for the people of China.

This will give us all a chance to take part in the chronology of Chinese-American history and wipe away part of the stain.

[From the Baltimore Sun, Jan. 25, 1990]

AT CROSS-PURPOSES ON CHINA

What does the bloody fall of Nicolae Ceausescu have to do with the repudiation of President Bush's China policy on Capitol Hill? More than a glimpse at the map would indicate.

The overthrow of the authoritarian Romanian dictator in December must have struck Peking's hardliners as a fate they avoided by massacring students in Tiananmen Square on June 4. They had seen less iron-willed Communist regimes fall to a democratic tide in Eastern Europe. And they had embraced Mr. Ceausescu as a brother in arms and ideology just weeks before he was executed.

So while Chinese dissidents took heart from Eastern Europe and continued their passive resistance, the Chinese regime continued its crackdown. Oh yes, the authorities lifted martial law as a cosmetic gesture. They let a Voice of America reporter back into the country (even while threatening foreign correspondents with censorship and worse). They accepted Peace Corps volunteers. They released a few hundred political prisoners.

How depressing it was to hear President Bush rattle off these supposed gains from his China policy at yesterday's press conference. For he knows China well, has a feel for its nuances. But his overtures smacked of Nixonian geo-politics, not Wilsonian idealism at a time when moralism (cynical or otherwise) is good coinage on the Hill. So what made good sense when he twice dispatched his security adviser to Peking to promote liberalization has turned into a nightmare.

The administration's first miscalculation, wholly its own doing, was to try to keep its diplomatic initiatives secret, thus inflaming sentiment here that the policy move was premature and overly conciliatory. The second miscalculation, utterly out of Washington's hands, as the Romanian revolution and the reaction it set off in Peking.

Given these events, Mr. Bush's decisions to veto a bill guaranteeing Chinese students in this country four more years of residence and then to fight the override by Congress are myopic. The president says Congress will have "only itself to blame" if China retaliates. Yet in the next breath he says his own administrative actions will keep the students as safe from forced repatriation as anything Congress can enact. If this is literally true why would Peking "retaliate" against congressional but not presidential action?

According to the president, retaliation could take the form of denying students now in China an opportunity to study in the United States. This logic is also suspect. After the Cultural Revolution, China sought a jump-start on the technology and science its students had missed by sending legions to this country. This remains a national imperative for China as it strives to catch up economically. So if China retaliates, the regime would only be hurting itself and hastening the day when the pro-democracy movement revives.

[From the New York Times, Dec. 12, 1989]

BETRAYAL IN BEIJING

(By A.M. Rosenthal)

These have been days of joy and light for all who now march in the streets for freedom and all who live in its grace.

For those who fought tyranny in China but were ground down by the Communist regime, this has been a time of hope that the era of liberation would bring their own freedom closer.

But overnight and in stealth the Bush Administration betrayed that hope and those who hold it.

Without advance notice to Americans or their representatives in Congress, the Administration sent two top officials to placate, dicker with and thus strengthen the thin, wicked top layer of Communist officials who massacred their own people just six months ago.

This was a clandestinely made reversal of a publicly announced policy of world importance—that the Unitd States would end high-level relations with the Chinese Government to show its support for the people of China.

Examine the timing.

Deputy Secretary of State Lawrence Eagleburger and Brent Scowcroft, head of the National Security Council, were sent to Beijing when Congress, opposed to the appeasement of the Chinese Communists, was between sessions and will not meet again until Jan. 23.

The journey was not announced until the middle of the American night on a weekend. That prevented advance discussion and over the first critical days allowed the Administration to dominate media "reaction."

The explanation given by Mr. Bush after the act, that he did not want to "isolate" the Chinese people, was not respectful of American intelligence. It was not the people who were isolated but their despotic Government.

Beijing, naturally enough, was triumphant about the American turn-around. The Communist regime's goal was to show the people it was strong and secure enough to make the mighty United States kowtow, go back on its word and make a political pilgrimage to Beijing.

But why did the Bush Administration break its promise that there would be no high-level dealings unless Beijing changed?

Why did it, by this reversal, make clear to freedom fighters everywhere, in Eastern Europe and the Soviet Union as well as China, that the word of the United States was not to be relied upon—not for more than six months anyway?

Perhaps the Beijing regime will throw a bone or two to the U.S. Mr. Bush says Beijing will hold up delivery of missiles sold in the Middle East. That will allow eager American commercial satellite launchers to shovel more dollars into China, which can still use the money to make more missiles to sell elsewhere.

But will bones from Beijing erase the world's memory of American toasts to the killers of Tiananmen Square? American statements were made in Beijing implying that the massacre was just an incident to leap over and that the United States and Communist China had too much in common to allow unspecified "negative forces" in both countries to interfere. What forces? Chinese students? Members of Congress?

What strategic interests made this journey in the dark necessary now? The revolution sweeping Eastern Europe and heading into the Soviet Union has eliminated Communist China as a lever to be used against Moscow—if it ever existed outside the imaginations of American geopoliticians.

What made it necessary to kiss Deng Xiaoping's bloodied hand when the Dalai Lama was receiving one of the world's highest honors? What a hideous irony—the United States sidling up to the jailers of imprisoned, brutalized Tibet the day the Dalai Lama received the Nobel Peace Prize for his struggles against them.

No great mystery. President Bush is deeply affected by his personal and political ties with China, where he was envoy under President Nixon. Like others in that Administration, he was part of the "opening" of China; it was a high point in their lives.

These men, in or out of office, now are not flexible enough, or do not care enough, to see it is time for a clean, new policy supporting Chinese freedom, not the dying Chinese despots with whom they once did business.

It there were a massacre in Prague or Leipzig or Kiev, would our envoys be sent six months later on a journey in the dark to embrace the killers? If not, are the lives of Chinese fighters less dear?

The Administration has shown its answer to that question. Now there is only the hope that Congress will rebel against appeasement of Beijing and try to save American honor, at least part of it.

[From the Washington Post, Dec. 12, 1989]

EXPLAINING THE CHINA MISSION

Was there, we wondered yesterday, a better explanation for the extraordinary acquiescence to Chinese demands constituted by the Scowcroft-Eagleburger mission—an acquiescence made in the absence of any visible evidence of a post-Tiananmen let-up on the persecution of those who had demonstrated for democratic reforms? A day of official American briefings compels the conclusion that nothing like such evidence has been produced. On the contrary, the briefings by, among others, President Bush, compound the sense that something wrong was done. It is clearer now that the American delegation did not simply conduct talks in a businesslike way. By the large public gesture of going to China, by the delegation's high profile, by acceptance of China's terms for the secret planning and travel, by the banquet and the toasts and the publicity uses made of them; by all this fandango of manipulation, the Americans let themselves be used by a Chinese government that is still holding uncounted Chinese in detention, still rounding up others, still maintaining an unrepentant attitude to the atrocities it committed in Beijing.

Was there, we wondered, something else the United States got for giving this boon of respectability to Beijing? The suggestion emerged yesterday that there was a quid pro quo—an alleged new Chinese readiness not to provide any more long-distance missiles in the Middle East. Mr. Bush, pronouncing himself "pleased," made and underlined a link between the mission to Beijing and a Chinese foreign ministry statement promising missile restraint.

Well, missile restraint is a good thing. The United States has been after the Chinese to choke off this dangerous form of military proliferation. The subject needs to be kept on the agenda. But assuming the very most, which is that the Chinese actually have changed their missile export policy and that they did it, if not at Mr. Bush's bidding then to ease their relationship with Washington, there is still something wrong with proceeding in this way. Is not the implication that we somehow were compelled to stop protesting one damaging, reckless act on the part of the Chinese government in order to prevent it from perpetrating another? Couldn't this have been dealt with—*shouldn't* it have been dealt with?—within the normal context of diplomatic business that was, after all, still being conducted between the United States and China via our ambassador there and others?

Mr Bush insisted yesterday that the United States remains "positioned in the forefront of human rights concerns" as, simultaneously, it seeks to draw China out of isolation. How much better if he had said the United States condemns the Beijing repression and its consequences and regrets it cannot resume its good relations with China until the regime ends its self-imposed isolation by letting up on those it is persecuting whose offense was a demonstration for freedom.

[From the Washington Post, Dec. 11, 1989]

THE CHINA MISSION

Perhaps The Bush administration has a better explanation of its surprise bow to the Chinese government that just a few months back massacred hundreds of demonstrators in Beijing than that which it was offering yesterday. We truly hope it does. For what it was offering yesterday were mainly perfunctory and unconvincing statements that it of course takes human rights violations seriously—statements put in such a way as absolutely to signal their relatively low priority in the administration's hierarchy of concerns—and an utterly misleading suggetion that the only choice for the American government lay between yielding abjectly to an unrepentant Beijing and going back to a sort of pre-recognition breakdown of all relations. This of course is not the choice.

So the questions that cry out to be answered are these: Did the Chinese give something in return for what they got, which was a breach of the administration's pledge that no high-level visits would be undertaken (and presumably that no high-level professions of admiration and solidarity would be made) until the Chinese take steps to undo the damage they did in June? Or will it be a limited "show" reciprocation, such as, for example, China's relenting in its torment of a couple of famous victims, while proceeding with its remorseless search for and persecution of those who dared to demonstrate in the name of democratic freedoms?

On its face, the announcement made it look as if Mr. Bush had merely sent his emissaries to China to indicate to the people responsible for the crime that the United States is getting ready to let bygones be bygones. He appeared, in fact, to be all but apologizing to the Chinese government for the American sanctions still in place, and has surely undermined our ability to argue to friends and allies that they should keep the pressure on China. Last summer this country said that any improvement in relations would have to depend on a demonstration of greater respect for human rights in China. That is why it is so crucial to find out what if anything the Chinese did to demonstrate such respect. The alternative is to concede that after six months the administration is backing down and explaining to the Chinese that it was only kidding.

What a message this would be to send at this moment to the Soviets, and to those Communist hard-liners in Eastern Europe who still command armies and police forces and must be toying with the option of violently repressing the pro-democracy uprisings there. Until now the United States has given valuable support to the democratic movements in Eastern Europe by letting the world know that armed repression would

immediately be answered by broad and exceedingly costly economic sanctions. Does the mission to China add, "but on the other hand, after a few months, maybe not"?

Incredibly, Mr. Bush's emissary, National Security Adviser Brent Scowcroft, is reported to have said to his Chinese hosts in a formal toast at a state dinner in Beijing, "In both our societies there are voices of those who seek to redirect or frustrate our cooperation. We both must take bold measure to overcome these negative forces." Just what does that mean? That the Chinese who massacred the students and the U.S. government that imposed sanctions were merely victims of a misunderstanding and of malevolent prodding from troublemakers in each of their realms? That the Bush administration and the Beijing government that perpetrated the massacre are on the same side in this matter, both having been pushed into their apparent conflict by these "negative forces" at home? In fact the statement sounded exactly like the kind of specious reasoning Gen. Scowcroft and others have rightly rejected over the years when it came to giving in to the Soviets in pressure politics and negotiations on grounds that the differences at issue were merely the handiwork of "cold warriors" on both sides.

There haven't been many massacres here, by the way, raising Chinese protests. The negative forces in China are Communist officials, bitterly anti-American and prepared to shed any amount of blood to preserve the party's power and their own families' interests.

Mr. Bush appears to be bending his policy to meet Chinese demands because the Chinese refuse to bend. The government there remains adamant in its insistence that, first of all, nothing except a politically inspired outbreak of street hooliganism happened in Beijing last June and beyond that, the way it treats its people is nobody's business but its own. The Chinese official position is accurately conveyed in a communication from Chen Defu on the Chinese Embassy, printed on the opposite page.

The president should not be making placatory concessions to a repressive and bloodstained Chinese government. Is there a better explanation than the one the public has been given so far?

[From the New York Times, Dec. 12, 1989]

HAILING THE BUTCHERS OF BEIJING

Three bitter questions reverberate over the Bush Administration's startling overture to China:

Why now? No one thinks the U.S. will remain permanently estranged from China because of the June massacre in Tiananmen Square. But why rush to kiss the feet of a Beijing regime whose rejection of reform becomes clearer day by day?

Why so furtive? If the initiative is as sensible as President Bush insists, why wasn't it disclosed until the wee hours Saturday, after his high-level delegation arrived in China?

And finally, considering the widespread horror ignited by the massacre, how could the visitors raise such a fulsome toast, declaring they had come "as friends to resume our important dialogue"?

The best answers the president could summon up yesterday sounded more like diplomatic doubletalk—about not sending signals of total normalization and not diluting our indignation or principles. And he claims credit for a suspect Chinese promise to curb missile sales to the Middle East. He is right; Washington cannot ignore China. Yet Beijing can't ignore the U.S. either, and this symbolic reconciliation appears to have been carried out entirely on Chinese terms.

Absent better answers, the overture undercuts American outrage over Chinese repression. It betrays China's democrats. And it sends the worst possible signal to the Soviet Union and Eastern Europe about America's attitude toward attempts to halt reforms by force.

Only six months ago, Deng Xiaoping and his hard-line allies ordered troops to fire on student demonstrators, killing hundreds. Since then a realigned leadership has reversed a decade of reforms, reimposing police-state controls and purges. Power now seems left in the hands of a shaky coalition of octogenarians. Reform-minded Chinese hope for a not too distant succession.

Beijing has paired repression with a shrill diplomatic campaign of accusation. It blames Washington for encouraging Chinese demonstrators even though this spring's protests had deep Chinese roots. And it has insisted that America make the first move toward reconciliation. Now, incredibly, Mr. Bush appears to have complied.

Americans can be proud that Chinese students identify with U.S. values, to the point of constructing a statue they called the Goddess of Democracy. Yet Mr. Bush, who served as chief U.S. diplomatic in China 15 years ago, seems to identify more with China's aging autocrats than with its brave young democrats.

After the Tiananmen massacre, under public and Congressional pressure he announced sensible sanctions to protect present policies without prejudicing future ties. Ever since, however, his Administration has seemed determined to restore normal ties. Now, just as U.S.-Soviet relations have changed dramatically, reforms in China have been thrust into reverse.

Chinese influence is important on regional questions from Cambodia to Japan, as is its role as an arms supplier in the Middle East. Yet effective diplomacy turns on clear American as well as Chinese interests. To ignore China denies reality. To rush to toast its present leaders and policies dishonors democracy.

[From the Wall Street Journal, Dec. 12, 1989]

INDECENT INTERVAL

"Decent interval" has a new definition: six months.

Six months ago, the Chinese rolled the tanks into Tiananmen Square and across the bodies of pro-democracy protesters. A short time later, protesters "convicted" of treason were dispatched, with a bullet to the back of the head. Today Fang Lizhi remains a hostage in the U.S. Embassy. Other members of the intelligentsia who were rounded up are still under arrest. Reuters reported yesterday that the Chinese have begun secret political trials of the Tiananmen students who were arrested.

Yet only six months after the bloody repression, George Bush's emissaries, Brent Scowcroft and Lawrence Eagleburger, are in Beijing toasting the men who sent in the tanks. Dont' let anyone ever say these prudent Bush men aren't tough enough to buck opinion polls. Now if they ever figure out how to hang tough at the right time, American foreign policy will be on track. At the moment, one has to wonder.

Again, the unfortunate Panama example looms in the background. Given every reason in the world to take out Noriega, the Bush administration came up with every reason imaginable why it couldn't. The hang-back rationale was pretty thin. The careful but decisive Philippine intervention gave reason to hope that Panama was an isolated instance. But now, at the very moment when the world is witnessing this century's greatest flowering of democratic courage and hope, Mr. Bush boldly offers absolution to the year's anti-democratic miscreant.

It has to go down as one of the great tinear exercises of our time. Yes, we understand the importance of China, and yes, at some point the U.S. will need to seek a rapproachement. We agree that the Nixon-Kissinger opening to China was a triumph of Realpolitik. But though members of the current administration participated—Mr. Scowcroft and Mr. Eagleburger as Kissinger colleagues and President Bush as envoy to China—this is not the time to relive that success. Just now the whole Communist world is teetering, not because overwhelming military might is arrayed against it, but because of the power of ideas, values and symbols. This is scarcely the season to sell the democratic birthright.

President Bush was at some pains to defend the trip, saying he did it because "I do not want to isolate the Chinese people." You can argue, as the Japanese did after receiving Mr. Scowcroft Sunday, that continuing China's isolation creates problems of "stability" in the Pacific region (the Tiananmen crackdown upset a planned $5.7 billion Japanese loan to China). But the Chinese Communists have done nothing to earn the gift the U.S. has just bestowed on them, nor is there any evidence of likely benefit for the Chinese people, who by all evidence don't much care for the current stability and would like to be isolated from their government.

Reports out of China recently indicate that the government is aggressively re-regulating the economy under strict, central control, including the showcase agricultural sector. With students on trial, does the Scowcroft initiative mean that Mr. Bush is constrained from speaking out against kangaroo courts, as past Presidents did in denouncing similar Soviet abuses?

The simple fact is that no one "isolated" China; China has isolated itself. China's grim reversion is the saddest story of 1989. At a time when nations from East Germany to South Africa are opening up, China dropped an anvil on the very political ideas that would have sent the country toward full integration into the community of nations. Lech Walesa is extolling the people who espouse the ideas of an Adam Smith; in June, China shot them.

Norway, incidentally, went ahead Sunday and gave the Dalai Lama the Nobel Peace Prize. In March, the Chinese army smashed a "dissident" movement in Tibet, and the Chinese government threw a temper tantrum when the award was announced. It denounced the Norwegians for giving previous Nobels to "so-called dissidents," namely Lech Walesa and Andrei Sakharov. Exactly.

President Bush should not worry about isolating the Chinese people. He should worry about isolating the people of Poland, Hungary, East Germany, the Baltics and so on.

Mr. KERRY addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. SIMPSON. I yield 10 minutes to the Senator from Indiana.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. KERRY. Mr. President, may I ask the Senator for the same courtesy.

Mr. SIMPSON. We are going to get a vote at 2:30. That is going to squeeze everything. If the Senator can do it quickly, I will yield.

Mr. KERRY. I thank the distinguished Senator.

Mr. President, for 40 years the United States has been encouraging respect for human rights, and the fight for freedom in Eastern Europe and the Soviet Union. We are now witnessing extraordinary changes in that part of the world—more so than any of us would have expected a year ago. Yet in China the only changes we are witnessing are for the worse. President Bush's China policy is sending the wrong kind of message to the world about how America stands on human rights.

The administration's policy is based on the rationale that we must not take any actions to isolate China. This rationale has led us to send high-level envoys to toast their Chinese Government hosts at state dinners and discuss areas of vital concern to both nations. Conspicuously absent, however, is the concern over the type of signal such contact is sending to the students of China, to the American people, and to the rest of the world.

Only 6 months ago, the world watched with horror as the grisly events of Tiananmen Square unfolded before our eyes.

Who can forget the gunning down of student demonstrators in cold blood? Who can forget the Chinese army tanks that rolled over their own countrymen? Who can forget the summary execution of student leaders? Or the indelible impression of courage that the sight of one lone man, brave enough to stand before a line of tanks, made upon the world? The fact that this man, and others like him, have been executed by the Chinese Government for their demands for a more open society, is truly chilling and shakes our senses.

After Tiananmen Square, China expelled journalists, killed its students, shipped others off to re-education centers, and then informed the world in statements reminiscent of George Orwell's novel "1984," that "no one was killed in Tiananmen Square." The witch-hunt for demonstrators continues, as does the ban on foreign journalists, and the jamming of Voice of America broadcasts. Concessions allowing one VOA broadcaster to reenter the country are minor at best.

In this country, Chinese students have taken to the streets to protest the killing of their brothers in China, and to show their solidarity with the democracy movement. A replica of the Goddess of Democracy statue was rebuilt and placed in the square in front of the Chinese Embassy here in Washington, DC. Many of the Chinese students in this country have been outspoken in their condemnation of the repressive force used by the Chinese Government. If they are forced to return to China they will face certain repression, or even death. Many fear to apply for the deferred departure program because even this act identifies them as subversives in the eyes of the Chinese Embassy here.

Since Congress adjourned, the President has taken administrative action to implement the principles of the Chinese visa bill which passed both the House and Senate. I believe, however, that we need to pass a statute. The President's executive decree is not permanent enough. It may not withstand the challenge of the courts, and therefore provide the security to the Chinese students that they deserve. And more importantly, it does not send the proper message of what the American people think of governments that flagrantly abuse their citizens, and deny their people the inalienable rights of life and liberty.

Passage of this bill will show Eastern Europe, the Soviet Union, and the Chinese students who look to the United States for support of their yearning for freedom of expression and liberty, that American foreign policy is more than simple cold-hearted realpolitik. As one constituent of mine from Massachusetts wrote,

> Please, protect the Chinese students in the United States. Human lives, freedom, and American honor are at stake. The American electorate and the entire world will be watching.

This administration has already sent the wrong message to China and to the world with National Security Adviser Brent Scowcroft's secret mission to China. In his toast to Chinese officials, Scowcroft stated that,

> In both our societies, there are voices of those who seek to redirect or frustrate our cooperation. We both must take bold measures to overcome these negative forces.

Mr. President, I do not believe that the United States needs to encourage China to take "bold measures" to overcome voices crying for democracy. I believe that the Chinese have demonstrated that they are quite able to take bold actions whenever dissent breaks out in their country. On the very day that Scowcroft and other U.S. officials were meeting with Chinese leaders behind the walls of the Forbidden City, seven Chinese demonstrators were arrested and beaten for holding a banner in front of the Chinese Ministry of Radio, Film, and Television, which read, "Why is China so Poor?"

The administration's professed commitment to respect of human rights when dealing with the Soviet Union rings hollow and exposes the hypocrisy of our public rhetoric with regard to the administration's China policy. In order to protect the lives of the Chinese students in America, and to send a clear message to the world that the United States does not condone persecution and the crushing of democratic expression, we need to pass the bill that is before us.

This bill will protect human lives. Its effect will be directly felt. It is needed. A Chinese scholar recently wrote to me, asking that I support this bill so that he will not be sent back to China.

"All that I am seeking," he said, "is just a space in the United States big enough to put my desk in, so that I can write freely about the life experiences I have had in China in the past decades."

We have the moral obligation to stand up to protect the lives of the Chinese students and scholars in the United States. If we do not override this veto, this man and thousands like him, will be sent back to China to certain persecution or even death.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. LUGAR. Mr. President, every Member of the Senate wants to make certain that the Chinese students remain in this country as long as necessary for their safety and security. We all believe in that. The President of the United States believes in that.

Furthermore, he has promulgated orders that will make that possible; likewise, employment for the Chinese students. As has been pointed out by other colleagues, the President in his directives has gone beyond just the students, to take in other aliens who have been distressed by tyranny in China. That is not the issue.

I appreciate that Members may try to characterize a law as somehow different from orders of the President of the United States. The effect, in fact, is identical except for the fact that the President's order goes beyond the law that we are discussing today.

I make that point, Mr. President, because this is not a vote on compassion. It is not a vote on idealism. It is not a vote which gets to the heart of whether we have sympathy for the Chinese students. We all do, every one of us, the President even more than all of us, because he knows much more about the Chinese situation, its histories, customs, than most of us do.

Mr. President, I want to get to the heart of the matter in terms of the U.S. foreign policy, and that is that the President is in a very lonely position.

He is unique, speaking for our country. The symbolism has been given of the Chinese students standing in front of a tank defying that tank to roll. It is powerful symbolism. It moved the world.

Mr. President, I would like to suggest that the appropriate symbol for

this debate is President George Bush facing the world, a very tough job, a unique job for a man of great gifts and great talents. On this occasion he needs our support.

I make that point graphically because this is a situation in which the President of the United States has told me, has told Senators, has told the world, that, "I know China." And the President does know China. He has devoted an inordinate amount of his public service to the Chinese issue, to the relationship between our country and China.

If we were dealing with a President who had minimal experience, who it could be said is simply being briefed by advisers, who had not really taken a hands-on position on China, that would be one issue. Perhaps Members of the Senate would be bold enough to substitute their judgment for that of the President. Maybe Members of this body are prepared to do that anyway. Maybe each one of us is prepared to play the role of President, to say to President George Bush:

Although you purport to know a great deal about China and you are our President and you are the major leader in our foreign policy, we assert that we know more than you do about it. We think we can speak either individually or collectively to the Chinese or to the world in a more appropriate and moving way than you can.

Mr. President, I am not prepared to do that. I suggest most of us are not prepared to do that if we think about the question logically. The President has adopted a very bold and controversial policy with regard to China. The totality of it is not apparent to all of us. The controversies, at least, that have arisen are apparent at this point to many of us, to the point that some are persuaded to say to the President that "your policy is wrong, and we are going to make certain that you are curbed." But I would just suggest that to adopt such an attitude would not only truncate the effect of this President vis-a-vis China, but I think with regard to a whole gamut of other foreign policy issues.

The President of the United States knows a great deal about China. He is asserting that. He is furthermore asserting that he has an intermediate and long-term set of tactics and strategies that have evolved that he believes are in the beneficial interests of this country. He is not coy about it. He has said throughout 1989.

I know about China. I have a hands-on relationship with China. Give me latitude. Give me an opportunity. Do not continually pass pieces of legislation that may give vent to enthusiasm or frustration or emotion but clearly do not advance United States interests.

I think we have to take that seriously, Mr. President. Let me just say the President of the United States is the symbol of this debate. He is the lonely figure standing in front of emotions. At the time when we were in the last stages of 1989, all of us were concerned with the Chinese students. We all had met with the students. We all had affirmed our desire to keep them safe, to give them opportunities for employment so they could have staying power. We all believe that still. Legislation zipped through both Houses. It was not apparent to us precisely what the President would do by Executive order. The veto came while we were out of session, and we were not able to confer. We meet barely 2 days after return to have a debate of momentous significance for our foreign policy.

I just suggest, Mr. President, there has been time for the President to make this case, and some of us must make it as rapidly and as responsibly as possible. I wish as Members may, that the side by side accounting of what the Attorney General and the President have done in behalf of the Chinese students had been apparent a while back. That might have made the debate easier for many Members who did not go out on the huskings and make speeches that led them to some sort of an embarrassed position today. It would have been helpful I suspect if the intensity of the President's emotions on China had been known to every Member, as they were to some. But there is not ambiguity about that now.

The President has made clear that this is a very important issue for him, George Bush, and for our country and for our continuing relationships.

Mr. President, we can all play the game of what the Chinese will do if we do something, and what they will not do, and what the flow will be. And I do not know how that can ever be resolved, and only history will find a record on whether the President was on the right track. The President clearly ought to have latitude to formulate a policy for China.

The vote we are going to have today, having seen the debate thus far, is clearly going to be a general report card on the President and China. If we were debating the narrow issue of the bill itself, that is a pretty clear issue. The Chinese students are going to stay. They have protection. The Chinese students are going to have employment. They have that protection. The President has provided that. We do not have to override a veto to provide that.

Clearly, Mr. President, if Members are impelled to override the President's veto, it is for one purpose; that is, really to sock it to the President and say, "Mr. President, we do not have confidence in what you are doing in China. You can listen to 4½ hours of this and understand how little confidence we have. We are determined really to truncate your possibilities and to substitute our will, our emotions, to vent what is on our minds as a substitute for a foreign policy for this country." But that would be very shortsighted.

I just suggest, even at this late hour, we had best consider what we are about. Obviously, I will vote to support the President in his execution of our foreign policy with regard to China. I think it has great potential. It has great potential for difficulty down the trail. But let me just simply mention one recent case in Presidential history which was recounted not long ago as a part of this dialog.

At the time that Henry Kissinger went to China preceding president Nixon's famous entry into that relationship, the Chinese had just proceeded through the cultural revolution. Tens of thousands of people, and that may be understated, has been killed. The entire Chinese landscape in terms of human rights was strewn with blood, and persons and careers which had been ruined. The entire course of China was in disarray.

You could have made a point that sending the President of the United States or Kissinger or anybody else into that was a bad idea, that it rewarded the cultural revolution, that it somehow continued the butchery. How shortsighted we are. Most people believe historically that opening was important. We can debate whether it should have occurred that year or the month before, what have you. We think it is important; the relationship is important. Therefore, Mr. President, let us keep the opening. Let us remember history.

Let us recall that these policies do not happen within a time frame of 30 or 60 days for our approval. We are in the process almost of taking the War Powers Act psychology into American diplomacy and saying:

Mr. President, if it doesn't work in 30 days or 60 days or by January 23d, whatever the cutoff line is, if the number of actions—and the President cited seven distinct things the Chinese have done—are not such, then we will sock it to you. We will really cut it off and show who is in charge.

That would be very shortsighted. The American people really do not support that. As a matter of fact, the Chinese people will not support it historically either if our policy fails.

The PRESIDING OFFICER (Mr. DASCHLE). The Senator's time has expired. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I hope, indeed, that we heed the words of one of our most respected members on foreign policy in this Chamber, respected by those on both sides of the aisle, the senior Senator from Indiana, Senator LUGAR. He expresses issues of complexity with such clarity and such reason. I think all of us realize that he is absolutely unique in this body.

I have the deepest respect for him.

There are two or three items to express in my very short time remaining. I thought we had another Member, and that Member has not come to the floor. What is the time, Mr. President?

The PRESIDING OFFICER. The Senator has 10 minutes remaining.

Mr. SIMPSON. I yield myself 7 minutes.

Mr. President, a couple of things. There has been a good debate, an excellent debate.

Mr. President, let me at this time yield 3 minutes of my time to the Senator from New Mexico [Mr. DOMENICI].

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

Mr. DOMENICI. Mr. President, I will vote to sustain the President's veto of the Chinese student bill.

President Bush's overall conduct of foreign policy, and his general approach to China, deserve our support, and he has mine on this vote. In fact only a few months ago Congress passed a foreign relations authorization bill that commended the President for his response to repression in China. No one in this body wants to break relations with China, and the President convinced me that a Senate vote to override this veto might just do that.

I take seriously the concerns about the degree of protection we are providing for prodemocracy Chinese in this country.

I have spoken directly with the Attorney General, and he assures me that the President's actions, in his December 1 directive to the Attorney General, not only protects Chinese students studying in the United States, but it also applies to a broader group of Chinese citizens who are in the United States.

The goals of those who wrote this bill have already been met by the President.

It is no secret that this vote is a proxy vote for many on one element of our China policy—the two high-level missions to Beijing.

Those missions were part of President Bush's overall policy to make possible the renewal of the prodemocracy movement as soon as possible. His support of the eminent scientist Fang Li Zhe, and his support of Chinese students are only the visible part of what I believe is a complex policy toward the Chinese leadership, elements of which must remain private.

The President has a great personal knowledge and interest in China, and I agree with him that it is in our interest to avoid steps that could result in a homogeneous, hard-line government in China. No such government now exists.

Voices of moderation and hope exist quietly in Beijing. Enactment of this bill, I believe, would do nothing more than unleash the antiforeign sentiment that is always close to the surface in China. Enactment of this bill could give the hard-liners in Beijing the total control that has so far evaded them. The President does not want to take that chance. I do not want to take that chance.

Time will tell whether the President was well advised to dispatch General Scowcroft to China on two occasions. General Scowcroft made a serious mistake in the wording and timing of his public toast to the Chinese leadership. But in this Senator's view, one mistake should not be used as the excuse to abort the President's China policy. I do not know if any of us has a better one, and, in any event, none of us have yet been elected President.

The President knows that he does not have unlimited time to produce positive results from his China policy. But it is premature to make a final judgment at this time, and I am willing to give President Bush the benefit of the doubt.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. I yield 4 minutes to myself of my remaining time.

Two things in the debate need attention, I think. That is what a debate should be—response to points made by other Members. Senators COHEN and ARMSTRONG spoke about harassment and intimidation. I think we want to remember clearly that we all deplore the cruel threats to families in China and the harassment of students in this country. But let me state again that the Pelosi bill does not in any way address that problem. No way. It will do nothing to prevent harassment and repression, and I urge you to take a close look at the legislation that I will be presenting on that.

Then the other issues have been well debated, issues of changes in the People's Republic, the issues of the Chinese and their visa records in the United States. Those are of importance. It is important to note that Chinese visitors do not overstay and become illegal, rather they find a job or marry a United States citizen or whatever, and they find a way to adjust their status. I do not mean to say they remain illegally—but they remain.

The other point, I think, is so clear. No Chinese student will be returned if the conditions are not safe. That is so important. Do not let that escape us in the debate.

We talk about Tiananmen Square and the Statue of Liberty and democracy and freedom. Every one of us on this floor embrace those with the same intensity. Anyone who tends to distort that, they are certainly demagoging the issue, because no Chinese students will be returned to China, and these students will all have a safe status administratively.

Then finally—and I will lob one in, but it is important—to those who say there is no partisanship in this attempt to override the President, let me ask my friends on the other side of the aisle, how many Democrats will vote to sustain the veto? Are all the Democrats voting to override the veto just by a strange coincidence? And how many Democrats in the House voted to sustain the veto? None. Zero. Let us try to——

Mr. SARBANES. Will the Senator yield on that point?

Mr. SIMPSON. In a moment. Let us drop the facade of bipartisanship, or else let me hear how many Democrats will vote to sustain the veto. I yield 30 seconds.

Mr. SARBANES. The relevant concern is, of course, that we are staying consistent with the position that we previously took on this important issue. The change in position is happening on the Republican side of the aisle as a consequence of the pressure from the President and a political rallying cry.

The last time this issue was considered, it went through on a voice vote without any dissent. In the House of Representatives, where the administration did not apply the pressure it is applying on the vote in this body, the vote to override was 390 to 25. So it is not this side that is shifting its position. We are staying consistent with our position. The shift is coming on that side.

Mr. SIMPSON. Mr. President, that is an argument without foundation. We had this position before President Bush through administrative action gave all the benefits provided under H.R. 2712. We were not in session when he did that, but once he did it administratively, everything then switched to partisanship. It left here in a marvelous bipartisan way, and once the President did that act, it turned to partisanship.

I agree with former President Nixon's views on this so in summary, let me say with greatest respect to my colleagues in this body who are planning to vote to override the President's veto. Your vote will be interpreted around the world as a vote of no confidence in the dedicated and enormously popular leader of the free world, George Bush, at a time when continued confidence in his leadership is absolutely indispensable for the survival and extension of freedom around this world. In your efforts to punish a few despicable and brutal hardline leaders in China, you will be punishing over a billion people in China, who are counting on the United States of America to use its influence on behalf of a resumption of economic and political reform in that country. In making yourselves feel good, you will be making millions of Chinese feel worse.

I yield myself an additional 1 minute.

You will be able to boast to your constituents that you have cast a vote for human rights and freedom and democracy. In fact, you will be casting an unnecessary vote for students whose interests are already protected and against the human rights of millions of Chinese, who saw the door to the outside world and freedom nudged open and will now see it slammed shut by a very selfish and irresponsible action.

I reserve the remainder of my time and yield.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, as I understand, I have 2 minutes, 15 seconds left.

The PRESIDING OFFICER. The Senator has 2 minutes 15 seconds.

The Senator from Wyoming has 1 minute 18 seconds.

Mr. KENNEDY. Mr. President, as I understand, the Republican leader and the majority leader will wind up the debate. I will use my last 2 minutes now.

Mr. President, we are all very well aware what is happening in the Senate. This is turning out to be a very close vote, and it may go either way.

But I hope that as Senators come to the floor for the vote in a few moments, we can vote on the merits of this issue, and try to set aside the allegations of partisanship and politics that are being used as a smokescreen to obscure the issue in an effort to sustain the veto.

A statute is stronger than a regulation. We all know that. Democracy is better than dictatorship. We all know that too. The issue before us is no more complicated than that.

The House of Representatives understood those two simple fundamental principles. It voted 390 to 25 yesterday to override President Bush's veto and give the courageous Chinese students in this country the protection they deserve—the full protection of American law.

House Republicans understood that point, and they voted in overwhelming numbers to support it. One hundred forty-five House Republicans voted to override the veto, and only 25 voted to sustain it. If the same proportion holds in the Senate, only seven Republican Senators will vote to sustain this veto.

Mr. President, in a few moments I think the Senate will cast one of the most important votes this year. All of us in this body understand the difference between statutory laws and administrative regulations.

We understand the difference and the distinction. Most importantly, Mr. President, the Chinese leadership does. And the Chinese students do.

Whether we like it or not, this is basically a referendum—on the one hand, the Chinese Government, which embraces the the administrative ruling, or the freedom movement, the students, who understand the importance of the protection of the statute.

The fact is that the democracy movement in China today is in jail and many of its leaders have been killed. We cannot reach out and free them, but the democracy movement that is alive today is in the students who are here in the United States of America. They are the rightful heirs of that tradition. They care about their country and about their future. We have an opportunity this afternoon to send a message to those who are in jail who were a part of that whole movement and to those all over Eastern Europe and Central America and South America who are struggling and want to be a part of this whole movement—a movement that started in China. This is a referendum on fundamental questions of human rights.

I hope on this issue that the Senate of the United States will reflect the deep-seated commitment of the American people and override the veto.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, in my remaining 1 minute let me just say this one more time for the galleries, for the media, for those who are the soothsayers and doomsdayers, heartbeats and hangers on, political consultants and political types, demagogs and bleeding hearts, and others, who are trying to desperately distort and demagog this issue. It is this: No Chinese students will be returned to China if conditions there continue to be unsafe, period.

What else is there to debate?

Mr. CONRAD. Mr. President, over half a year ago, we witnessed in Tiananmen Square a bloody silencing of the voices urging movement toward a democratic system in China. Various reports put the total killed or wounded from indiscriminate gunfire or crushed by tanks in the thousands. Since then, the Chinese people have suffered a protracted period of harsh political repression, with continuing purges and arrests. At least 40 executions have been carried out since June.

China's leadership, despite the recent lifting of martial law in Beijing, remains intractable. To maintain their power, they continue their tactics of fear and repression. Concerned over the impact on China of the downfall of Communist regimes in Eastern Europe, the leadership has ordered officials to deal promptly with any unrest at workplaces and universities. Many Chinese, Mr. President, are not even aware of the democracy movements that have flowered throughout Eastern Europe because the Government controls the media. To further tighten their grip on the flow of information, the Chinese rulers have placed controls on the foreign press in an attempt to censure reporting out of China.

Mr. President, the Senate voted last session 97 to 0 in favor of H.R. 2712, which provides a safe haven to Chinese nationals residing in the United States. When word of a possible Presidential veto reached this body, 74 Senators wrote to the President to request that he sign the bill into law. I joined that bipartisan group in asking the President:

> Just as you have celebrated the courage of the peoples of Eastern Europe in their recent democratic successes, we ask only that you support the students of China in their continuing struggle.

Despite this broad showing of bipartisan support for the legislation, President Bush vetoed that bill, arguing that the same immigration relief would be provided administratively and that enactment of such a law would damage future educational and scientific exchange opportunities with China.

I met with a group of Chinese students in early December in California. These students, Mr. President, were taking a risk in meeting with a U.S. Senator. But it was important for them to express their concern that by vetoing the legislation, the President not only was putting them in some jeopardy but was also sending exactly the wrong signal to the Chinese Government. They also thought it was very demoralizing for the internal opposition in China, and only strengthened the hands of the hardliners. From their perspective, it appeared that the world's leading democracy was bowing to pressures from a repressive regime.

I do not believe, Mr. President, that any Member of this Chamber would want to seriously damage the relationship that has been carefully developed over the years with China. Beyond the exchange programs, there are serious political and security concerns that are of interest to the United States. Nevertheless, there comes a time when a government must take a principled stand based on the human rights of individuals, despite the risks it may carry. I believe that by overriding the President's veto on H.R. 2712, we in the Congress are taking that stand.

Mr. PELL. Mr. President, I support the overriding of the President's veto of H.R. 2712, the Emergency Chinese Immigration Relief Act, that passed unanimously last year.

H.R. 2712 assures Chinese students on J-1 exchange visitor programs that they can adjust their immigration status without the usual requirement that they return home for 2 years. The waiver contained in this bill gives them the option of either remaining

or returning without having their cases adjudicated on an individual basis. H.R. 2712 also provides a 4-year relief period in which they can apply for other types of visas or to seek status as permanent residents.

Despite the President's assurances provided in his veto message that his administrative actions obviate the need for H.R. 2712, it is clear that these measures are insufficient for three principal reasons.

First, as a recent memorandum on this issue from the American Law Division of the Library of Congress makes clear, and I quote:

> The Administration's measures to grant immigration relief to PRC nationals may raise serious legal issues to the degree that they are beyond authority in current statute and concomitant regulation.

Changing the law would resolve any doubt remaining in law concerning their status.

Second, the President's initiative has not provided the assurances needed by Chinese students resident in the United States. They are avoiding the President's program. As one Chinese student leader observed, "it requires us to make a declaration against our country, branding us as traitors and counterrevolutionaries." Students are also concerned that the President's administrative actions—because they are not codified in law—may be modified or retracted at any time, leaving them once again vulnerable.

Third, by voting to override this veto, the Congress will be sending an important political signal to China that we will not be intimidated by Beijing into compromising American values and interests.

Just because China has condemned this bill, claiming that it would "seriously jeopardize United States-Sino educational exchanges" and cause a further deterioration in our relations, is no reason for the President to veto it. Just because China threatens to terminate the Fulbright Scholarship Program, is no reason for Washington to kowtow to Beijing.

Current American immigration law is construed for ordinary circumstances. The law attempts to encourage individuals to return to their countries where they can contribute to their Nation's development. Clearly, however laudable this objective, it is not possible in China today where thousands remain under arrest, students are forced to attend reeducation classes, and liberal development policies have been abandoned.

As our former Ambassador to China, Winston Lord, observed in Senate testimony on January 23, "the passage of this legislation would make clear that Americans are not fooled by smoke and mirrors, that we are a serious people" and, I would add, serious about sending a message to China's leaders that after the massacre in Tiananmen Square that it cannot be business as usual between a dictatorship and a democracy.

Mr. LAUTENBERG. Mr. President, I rise in support of the override of the President's veto of the Emergency Chinese Immigration Relief Act of 1989.

The President should not have vetoed this important legislation, which was approved unanimously by both the House and Senate with virtually no opposition. We should override the President's veto and provide greatly needed legal protection to Chinese students in the United States who fear the very real threat of persecution if they return to China.

The brutal Tiananmen Square massacre was among the worst human tragedies the world has ever witnessed. Brave Chinese students were ruthlessly murdered under orders from the Chinese Government simply because they had the courage to speak out for democracy and freedom.

Since the massacre, Chinese students in China have continued to suffer for their participation in the democracy movement. Fang Li Zhi is still seeking refuge in the U.S. Embassy in Beijing. Human rights groups indicate that thousands have been imprisoned for speaking out on the side of democracy. Many who have been released from prison have been targets of persecution.

Chinese students in America justifiably fear returning to China. Many do not even feel safe in America. Some have been threatened by Chinese Embassy officials for participating in protests against the Tiananmen Square tragedy. In the current environment in China these and thousands of other Chinese students fear that they will be targets of persecution if they return to China.

We must not let that happen. We must provide concrete assurances to these students that they will not be forced to return to China. The President's directive does not provide those assurances. It can be withdrawn at any time and for any reason. That would leave the fate of Chinese students uncertain.

Overriding the President's veto will send a loud, clear signal to the Chinese Government and supporters of the prodemocracy movement in China that America is willing to protect—through the law—those brave individuals who dare to speak out on the side of democracy and against the brutal actions of the Chinese Government.

I urge my colleagues to support this override.

Mr. HEFLIN. Mr. President, it is clear that the intention not only of Congress but also of the President is to allow Chinese students who fear persecution for the prodemocracy movement in China to have a safe haven here in the United States. Both sides of Congress passed a bill which was deliberated, amended and deliberated again. At the end of the first session of the 101st Congress a sound compromise was made and H.R. 2712 was passed and ready for the President's approval. As we all know the President allowed a pocket veto. The President then proposed an administrative directive which does what the bill, passed by Congress, proposes. The question, I believe, is which measure insures greater protection to Chinese students in the United States.

We know that there is a possibility that the administrative directive could be subject to court challenges. The directive may also be subject to political pressures from China. These pressures could lead the administration to rescind its administrative directive.

The massacre at Tiananmen Square was a tragedy that saddened this country. It was an act which suppressed what we in the United States frequently enjoy—freedom of expression. Reports indicate that the repression of dissidents in China continues and there are accounts that Chinese students here in the United States are being monitored by China. The fate of these students, should they return to their country, could mean severe punishment. Unfortunately, that punishment or fear thereof, will prevent the democratic change strived for by these students.

If it is our ultimate goal to protect these prodemocracy Chinese students, then it is clear that a law should be created.

Mr. President, I will support this override.

Mr. EXON. Mr. President, this vote is about freedom. It is about democracy and it is about brave young students who dared to oppose a blood thirsty Communist dictatorship. It is a vote about the image of a brave young man standing in front of an advancing tank.

The actions of the Chinese dictatorship are to be condemned and America's support and protection should be extended to those young advocates of freedom and democracy.

Today's vote has taken on symbolic significance beyond the strict confines of American immigration law. It is a vote intended to send a loud and clear message to the Chinese Government and the American Government that the people of the United States are shocked by the brutality of Tiananmen Square.

To the Chinese Government it sends a signal that there are basic standards of human rights which must be respected to be a full member of the international community.

To the American Government, it reminds the administration that freedom, liberty, and democracy are the

principles which this Nation must embrace and should inspire.

Mr. President, the fact that the administration needs to be reminded is the saddest fact of all. So careful is the administration not to offend the power structure in Communist China that it has produced one of the most ironic immigration policies which I have come across in my years in the Senate.

It is easier today for a Chinese student fully sponsored by, and supportive of, the repressive regime to obtain from the State Department a student J-1 visa than it is for an independent Chinese student with his or her own earned tuition funds to obtain an F-1 student visa. This summer I took up the cause of a group of Chinese students stranded in Japan after the repressive actions of the Chinese Government. These students simply wanted to come to the United States to study, not emigrate. They gave the State Department every assurance legal and financial that they would comply with U.S. law and that they would leave the United States upon the completion of their studies. Fortunately, 22 of these students were granted visas and most are now studying at Dana College in Blair, NE. I had the honor of greeting these students when they arrived in Omaha where the students presented me with stalks of wheat to symbolize sowing the seeds of freedom and democracy.

Mr. President, the faces of these students, so full of hope and idealism, would have touched the heart of even the toughest of tough guys. Sadly, 180 of their friends and colleagues were left behind in Japan because the administration turned a deaf ear to their visa requests. Unfortunately, the bill before the Senate today will not help those 180 Chinese students stranded in Japan; unable to move forward to study in the United States and unable to move backward to China where they would face certain repression. Last year, the U.S. Senate passed legislation to assist these students, but unfortunately the administration said "no" to these students and "no" to the U.S. Senate. Although today's vote will not help those 180 Chinese students in Japan, it may set the stage for a more sane and more traditional American policy regarding China and regarding those Chinese who have embraced the principles of freedom and free enterprise.

Mr. President, yesterday, a young Chinese student paid a visit to my office and said his brother was in jail in Communist China and that his brother supports congressional efforts to grant legal status to Chinese students in America. I will vote to override the President's veto, in part, to give hope and send a message to that young man jailed by a repressive Communist regime that his plea for democracy is heard in the U.S. Senate.

I urge my colleagues to vote to override the President's veto and send a clear message that America stands with those who stand with freedom, liberty, and democracy.

Mr. BRADLEY. Mr. President, I am voting to override the President's veto of H.R. 2712, a bill to allow Chinese students to remain in the United States rather than be sent back to China to suffer intimidation and persecution by a repressive regime.

For me, this is not simply a vote on the Pelosi bill. This is a vote on a policy that is ineffective, and against the broader interests of the United States.

The President has based his China policy on the mistaken and dangerous assumption that the present leadership, President Yang Shangkun and Premier Li Peng, are proreform. They are not. They are antireform. And they are weak and unstable to boot. It is not in our interest to legitimize this regime any more than it is in the interests of the long-suffering Chinese people. The President apparently does not understand this. Instead, he sends virtually the highest ranking officials in the Government on a secret mission to Beijing. He vetoes the Pelosi bill. He creates an atmosphere where those with real claim to asylum are shunned. Where NED money for some modest, legitimate prodemocracy activities is blocked. And he signals to our allies that a resumption of military sales or "business as usual" is fine.

What has he received in return? A so-called lifting of martial law in Tiananmen. A visa for a new VOA correspondent. A promise to begin discussions on the resumption of the Fulbright Program. And, most recently, the announced release of 573 people who had been arrested since the events in June—of more than 10,000 thrown in jail. That is an average of 80 released each month—at which rate it would take more than 10 years to release all those now held. This, it seems to me, is a meager return for the blow the President has dealt to the legitimate aspirations of the Chinese people.

The President is backing the Beijing government, not the Chinese people. In doing so, he is backing the wrong horse. The demonstrations in Beijing last spring showed the regime's lack of legitimacy. And the unforgiveable use of force against those peaceful demonstrators showed that the regime knows this. When events in Eastern Europe resonate among the Chinese people, the Chinese Government cracks down harder, vowing that the fate of Ceausescu will not be the fate of China's military dictator and so-called president, Yang Shangkun. Party organizations have been revived in factories. Surveillance of students has intensified. Political indoctrination, forgotten for years, is back. The discontent of the people is palpable.

This ferment has affected even the leadership, which was never united about the proper response to the demonstrations, and which remains divided now.

But the internal instability and domestic woes of the Beijing government do not necessarily mean that its dictatorial rule will evaporate in days or months or years.

This awareness seem to be what motivates the President to ignore the events of the last year. "After all, the present leader may be in power for a long time. They are strategically important. We cannot afford to upset or isolate them."

This calculation is shortsighted. No government can last forever against the will of its people. Neither Noriega, nor Marcos, nor the Shah could remain in power, no matter how much money they poured into their security apparatus. And if, in the short term, we won friends in our fight against communism, we did so at a far deeper cost to our good will among the people—who always eventually got the reins of government back. The fall of Ceausescu should send a strong message to the White House; it surely did to the forbidden city.

For some—including perhaps the President, his National Security Adviser and the Deputy Secretary of State—this eventuality presents a problem. They do not know how to resolve the long-term issue, but know they need the short-term gain. So, they embrace the Marcoses, the Shahs, the Li Pengs, and the Den Xiaopings. And they scorn the naivete of the congressional leaders who question their realistic approach.

But, as the Chinese sage Lao Tse said, we need not leave our home to see the world. Our foreign policy can and should be guided by the principles we believe in most deeply—that a government should represent, not repress, its people. And our policy toward a country must reflect what is best for its people: representative political institutions, an environment that can nourish individual economic artist and basic social justice.

The repression of the prodemocracy demonstrators in Tiananmen Square was brutal and unforgiveable. If the President is right in saying that China is too important to isolate, he is wrong to legitimize the government by trying to please it. On the contrary, he should recognize that the present Chinese Government is acting out of weakness, not strength. That understanding should guide our response.

Clearly, our first and most appropriate response has been to freeze all military sales and cooperation, to suspend significant export licenses, and

perhaps to simply stop action on those licenses that fell between the strict controls on exports to the Soviets and the more liberal regime we have progressively created for the Chinese.

Then, the Chinese leadership must be shown that the reversal of their economic reforms would have a direct and immediate impact on their application to join the international trade regime in the GATT. If the economic impact of suspending consideration of the People's Republic of China's GATT application is minimal, its political and symbolic implications are significant.

But these commonsense economic actions are neither the only, nor the best, response to the political repression in the People's Republic of China's.

The decision of the authorities to use lethal force against their people also will clearly affect Hong Kong. The United States, which intentionally stayed on the sidelines both during the Sino-British negotiations on Hong Kong and afterward, can no longer do so.

The decision of this administration to try to mollify the Chinese leadership by vetoing this bill was wrong. The damage that veto did to the aspirations of the Chinese people for freedom was significant. In voting to override the veto, I hope Congress has been able to reignite the faith of the Chinese in the power of democratic institutions. And I hope we have been able to do the same for our President.

Mr. DURENBERGER. Mr. President, today I will vote to support the President's veto of H.R. 2712, dealing with the Chinese student visa issue. I believe that the Executive order will accomplish the same objectives as the legislation. At the same time, it will permit the President to lead United States foreign policy toward China, a country with which he has outstanding experience. Furthermore, I am convinced that the President will keep his word that he will not do anything to jeopardize the well-being of the Chinese students.

I recognize the intensity of emotion that envelopes this question as well as the concerns that many of the Chinese students living and studying in the United States have. Nowhere is this more true than in Minnesota, which is currently home to over 700 Chinese students on a number of our State's campuses. I have had the pleasure of meeting with several of those students in recent months and have heard by telephone and mail from hundreds more.

These Chinese students have many concerns, which our President has an obligation to address. Those concerns include the Chinese Government harassing them here in the United States as well as their families at home in China. They fear also that the President's veto may be interpreted as signaling China that it's okay to crack down on prodemocracy movements without any concern for sustained United States reprisals.

My vote today does not endorse any human rights policy—or lack of human rights policy—of the Chinese Government. Tiananmen Square is the most visible current abuse. But much more exists. For 30 years, China has suppressed an entire nation by its efforts to eradicate the people and the ancient culture of Tibet. In August, I visited with the Dalai Lama in Darmsala and learned first hand the pain of the Chinese oppression of Tibet.

But I vote today to endorse a new United States policy with a new United States President toward a China of the future, not of the past. I support the President's veto because that is the only course that achieves two important objectives: Protection of the Chinese students in the United States and allowing the President to lead United States foreign policy toward China, to affect the positive changes we all want to see in that country.

In addition, I believe that the President's course, not the Congress' best guarantees that Chinese students can come to the United States and that United States teachers and students can go to China. The President is in the best position, through the Fulbright and other exchange programs, to bring more Chinese students to the United States and send more United States students and teachers to China. As noted prevously, there are over 700 Chinese students at Minnesota's university campuses. Reportedly, the single largest concentration of Chinese students in the country is at the University of Minnesota. Congress should wholeheartedly support these efforts to continue and expand these exchange programs.

I am angered, like all Americans, by the repression in China. I share the outrage of all our people over the brutality of Tiananmen Square, and the repression that continues today; 1989 has taught us that the era of totalitarianism is waning. The tide of history is now running strongly against the current leadership of the PRC. What the United States most needs now is a consistent, deliberate policy that leads the way toward a new China.

It is essential to remember, however, that the President's Executive order accomplishes exactly the same objectives as the legislation the President vetoed. In fact, in a number of cases, the President's order actually exceeds H.R. 2712 in the protection it provides the Chinese students as well as certain other foreigners in the United States.

Mr. President, I have a great deal of respect and confidence in President Bush's experience and judgment in conducting United States policy vis-a-vis China. China is an extremely important country, regionally and globally. Understanding the cultural and historical complexities of China is a daunting intellectual and diplomatic challenge. It is imperative that we place the highest premium on experience and expertise in understanding China, even when that expertise may appear to contradict our common sense.

President Bush is indeed an expert on China affairs. Not one of the 535 Members of Congress has comparable expertise. We've only had only a handful of previous Ambassador-Presidents to guide and conduct U.S. foreign policy vis-a-vis the country to which he was posted. We would be unwise not to take advantage of this indispensable experience.

Let us not forget, however, that the first issue is protecting the Chinese students here in the United States. Let there be no doubt about it: I would not even consider voting to sustain the President's veto if I believed that there was any way in which the Chinese students would be forced against their will to return to China. The President's Executive order protects the students in exactly the same way as the legislation would. The President has promised that he will take no action that would jeopardize the security of the students. I see no reason to doubt his word.

Additionally, I believe that if there were to arise any ambiguities or legal problems in the implementation of his order, the President will be true to his word and act swiftly to ensure they are resolved, and that no students would at all be endangered. I am committed to following the status of the Chinese students closely to ensure that there is not even a remote threat that the Chinese students will be forced to return to China at risk against their will. This vote today is clearly not the end of the issue, and I have every intention to remain vigilant in continually monitoring and checking the effectiveness of United States policy toward China as well as that country's respect for human rights.

Mr. President, I don't believe that the Congress should always bow to the President on foreign policy questions. I strongly opposed President Reagan's Contra policy in Nicaragua. And I know the sad lessons of Congress' Tonkin Gulf resolution during the Vietnam war period.

But when the country we're dealing with is China, and the President is George Bush, I believe he deserves our support. United States-China relations are extraordinarily complex and important. We cannot bring about a new China from the floor of the House and Senate. If the United States is going to succeed in effecting positive change in

China, it is George Bush who can best make that policy succeed.

Mr. McCAIN. Mr. President, I believe the Senate should sustain the President's veto because the Chinese students are now guaranteed the same protection by Justice Department requirements as the bill, and because the raw, cynical political distortion being used in this attack on the President needs to be stopped.

First, and most foremost, I would not vote to sustain the veto if any Chinese student in the United States was being put at risk or if the administration had not changed its position since the bill passed the Senate before Christmas. At that time, the administration provided protection to the Chinese only until 1991. The legislation provided protection through 1994. Since then, the administration has provided administratively the same protection as the bill, and President Bush has personally assured me that no Chinese student will ever be compelled to return to China to face persecution for his or her beliefs. No Chinese student will be deported by sustaining the President's veto.

Second, honest argument about the President's veto of H.R. 2712 and the legitimate concerns of the Chinese students have been sacrificed in the naked pursuit of political advantage. When I returned to Washington I was gravely disappointed by the extreme partisanship that had come to characterize this debate. I would like to believe that the Chinese students freedom would not be corrupted for cynical political reasons. But the Democratic leadership is so anxious to create a chink in George Bush's 80 percent approval rating armor that they have distorted the issue.

As I have said, under no circumstances would I vote against legislation if that vote helped deprive Chinese students of the sanctuary this great country has offered them. The President has acted to provide legal protections for the students identical to those in the legislation. The override of the President's veto would result in a superfluous law that would have no impact on the safety of the students. Its only apparent purpose would be the embarrassment of the President. If the President's Executive order should be successfully challenged in court, I will immediately introduce new legislation guaranteeing that no one shall be returned to China against their will.

Moreover, I have the personal assurance of President Bush that no Chinese student will ever be compelled to return to China and face persecution. The President is a man of his word. Neither he nor I will ever abandon our commitment to the Chinese students. They shall be safe in this country.

I do not take lightly the apprehension of the thousands of Chinese students in this country who fear for their lives should they be returned to China. I have stated that I would never be a party to any effort that would threaten the security of these young men and women. I stand by that commitment today.

Mr. SPECTER. Mr. President, I am voting to oppose overriding President Bush's veto because I believe the President's executive action, rather than the proposed legislation, will better promote human rights in China and also the international interests of the United States.

Few chapters in world history can match the flagrant and violent abuses of human rights demonstrated by the Chinese Government in Tiananmen Square in June 1989. We in the United States should do everything within our power to change the oppressive tactics of the Chinese Government on such abuses. The issue is: what is the best approach to influence the Chinese Government? It is not an easy question to answer because of many complexities, including the reaction of the Chinese Government to outside criticism. No one likes to be criticized but the responses vary and there are strong indications that public flailing would be counterproductive and lead the Chinese Government to harsher tactics.

No one in Government today is more experienced or better equipped to deal with the complexities and subtleties of this issue than President Bush. For more than a year, from 1974 to 1975, he served as the United States Liaison Officer in China. This came shortly after President Nixon opened relations with China in 1972. President Bush has maintained his close connection with United States-China relations since that service including his work during the past decade as Vice President and now as President, I believe substantial deferrence is due to his judgment on this subject.

Since the bill was enacted, passing the Senate on July 11 and the House on July 31, 1989, followed by subsequent passage of the conference report by both Houses before the recess on November 22, 1989, the President has responded with a series of executive actions to carry out the substantive provisions of the legislation. The executive actions since November 30, 1989, present a very different picture than when the Congress acted before the Thanksgiving break.

On November 30, the President reemphasized his personal commitment to the humanitarian principles underlying H.R. 2712 at issue today. He indicated he would take administrative action that would offer all the protections embodies in the legislation, and the President directed the Attorney General "to take the steps necessary to extend administratively to all Chinese students in the United States the same benefits that H.R. 2712 would have extended."

By letter of December 1, 1989, to Immigration and Naturalization Service Commissioner McNary, Attorney General Thornburgh directed the INS to undertake a series of actions, and by letter of January 16, 1990, reported to the President the actions taken to afford "relief equivalent to, or greater than, the relief that would have been provided by H.R. 2712." These steps include:

First. Providing Chinese aliens, present in the United States as of December 1, 1989, an irrevocable waiver of the 2-year foreign residency requirement that may be exercised until January 1, 1994;

Second. Considering the status of Chinese aliens who were in lawful status as of June 5, 1989, as having maintained lawful status for the purposes of adjustment or change of nonimmigrant status;

Third. Granting all Chinese aliens who are present in the United States as of June 5, 1989, the necessary authorization for employment;

Fourth. Providing a nonadversarial notice of expiration of nonimmigrant status to any Chinese alien who is eligible for deferral of enforced departure and whose authorized period of stay has expired; and

Fifth. According "careful consideration" to all applicants for asylum, withholding of deportation, and refugee status expressing fear of persecution related to family planning policy of forced abortion or sterilization.

In sum, I believe it is preferable to support the President's actions at this time. Adverse reaction from the Government of China to the legislation would probably make the situation even worse for protecting human rights in that country.

On the aspect of United States international interests, it is vitally important to maintain as good a relationship with China as possible even though we must make our position clear on their human rights violations and do our utmost to change those policies. The warming of United States-Chinese relations initiated with President Nixon's visits has been of substantial assistance in strengthening the United States position vis-a-vis the Soviet Union. As China has emerged as a nuclear power, it has been vital to keep open lines of communication in an effort to discourage the sales of missiles and other armaments by China.

Most recently, for example, United States action discouraged the Chinese from selling M-9 medium-range missiles to Syria and possibly to Libya. On December 11, 1989, a news broadcast on Chinese television quoted the foreign ministry as stating: "except for Saudi Arabia, where a small number of midrange missiles were sold, China has

never sold, or is planning to sell, missiles to any Middle East country." That same day, President Bush noted, "that subject was raised by General Scowcroft, and in my view, it's a very sound development."

The administration is working hard to preserve vital United States influence with China. Regional issues which clearly illustrate this relationship include countering Soviet influence in Afghanistan and working towards a resolution, albeit through different approaches, of the conflict in Cambodia.

Since President Nixon's historic visit to China, there have been many other significant developments in United Sates-China relations. These include a continuing reduction in tensions in addressing issues related to Taiwan, military cooperation between China and the United States since normalization of relations in 1978, a liberalization of export policies toward China, the conclusion of a nuclear cooperation agreement during President Reagan's April 1984 visit to China, a strong increase in trade between the United States and China, and the negotiation of a new agreement to reduce the overall growth for Chinese textile imports.

Thus, in light of the many complexities of United States-China relations and the administration's executive actions in accomplishing the humanitarian goals of the legislation at issue today, I believe our national interests are best served by sustaining the President's veto.

Mr. LEVIN. Mr. President, this vote to override the President's veto is not a partisan issue. The overwhelming, virtually unanimous vote in both Houses of Congress when this legislation passed this past autumn is an indication and measure of the American people's support. Yesterday's overwhelming 390-to-25 vote in the House of Representatives is further measure of the widespread support for this among the American people.

Mr. President, I support this legislation to provide statutory protection to Chinese students residing in the United States for a number of reasons. There are serious questions whether the administrative actions are fully legal. The administrative directives will be challenged in court, adding further uncertainty to the lives of those Chinese students in the United States.

The people of Michigan and all of America support the Chinese people's struggle for freedom and democracy. They condemn the butchery of Tiananmen Square, and the brutality of the suppression of political thought and freedom. The American people support this legislation to adhere to our tradition of being a beacon for the world in the struggle to throw off tyranny, and to honor our history.

Mr. President, by overriding this veto, the Congress sends the clear and unmistakable signal that the American people are in solidarity with the democratic aspirations of the Chinese people, and join with them in the full knowledge that freedom and democracy in China will eventually rise, as the Phoenix, from the ashes of Tiananmen Square.

This legislation is intended to support the Chinese students in America that have opposed their Government, and are afraid of the consequences. This legislation is an attempt to end the intimidation Chinese students have been subjected to by their Government right here in this country, to end the harassment by representatives of the Chinese Government.

The President has an honest disagreement with the vast majority of the American people on this. And, in this case, the American people are right, and the President is wrong.

Ms. MIKULSKI. Mr. President, I strongly support this effort to override President Bush's wrongheaded veto of statutory protection for the Chinese students in this country.

I am very proud of the reputation our country has earned as a consistent promoter of human rights and self-determination for all, and I want to be sure that we live up to that reputation.

Many of my constituents have complained to me over the years that our foreign policy tends to drift from event to event. That they are not sure what we stand for.

Mr. President, we should stand for the right to think and speak freely, to choose one's own government, to provide for one's family, and to live in safety.

And we should not miss one opportunity to advance these principles.

The Chinese students who are in the United States today have not come simply to study computer science. They have come for a rare opportunity to experience our unique brand of participatory democracy.

And they have learned their lessons well, as we saw during the briefly glorious democratic movement last summer.

Unfortunately, the Chinese Government is well aware of the activities of the United States-based students, and it is clear that they would simply not be safe if they returned home now. In fact, I have received reports that even Chinese students now living in Maryland have been subject to threats and harrassment by the long arm of their Government.

These students represent China's best hope and our best hope for China. They deserve clear, unequivocal protection under our laws.

Mr. LIEBERMAN. Mr. President, over 40,000 Chinese students are living in the United States. These students came here to learn about a modern democracy in the belief that this knowledge would help them to transform China, but those hopes were crushed by the tanks last June in Tiananmen Square. We should not crush them a second time by refusing to pass legislation guaranteeing their safety in this country.

If they return to China, these students could face the same fate as the hundreds of Chinese activists who have been sentenced to prison, and those unfortunate leaders who have been executed. Chinese authorities in the United States have extensive intelligence files on Chinese students in this country. This evidence would be used against them if they were forced to return to China.

President Bush was wrong to veto H.R. 2712, which extends to the Chinese students the full protection of immigration law. The White House claims that the legislation is not necessary to ensure their safety. But Presidential administrative directives can be changed as easily as they are established. The President's directives could also be subject to court challenge because it is not clear that the President has the power to grant blanket waivers to all visa holders. We need a law which clearly expresses our support of these Chinese students.

A congressional bill will be a signal to Chinese reformers that their struggle is not forgotten. They will hear about the bill's passage over the Voice of America. They will know that America is standing by them. They will be encouraged, once more, to hope.

It is better to be safe than sorry. The best way to ensure the students' safety is to override the President's veto. The students don't just deserve our sympathy. They deserve a law protecting them from the threat that they would face if they were forced to return to China.

One day, repression will be eased in China, and the Chinese students now in America will not only be free to return, they will be anxious to go and work for the establishment of a true democracy. Meanwhile, we can show our solidarity with them by passing this bill. It will represent one step on the long road back to the return of the Goddess of Freedom to Tiananmen Square.

Mr. BAUCUS. Mr. President, today we are considering whether to override the President's veto of a bill granting immigration relief to about 40,000 Chinese students, here in our country, who face the danger of being forced to return to their homeland. This bill passed both sides of Congress last year by overwhelming margins.

The President tells us that we cannot afford to anger our ally in Beijing. China has told the United States that if the United States Congress publicly extends immigration relief to

the Chinese students, that there will be a price to pay.

In my State of Montana, Mr. President, we have over 100 Chinese students and scholars, and their families. These students and scholars make a great contribution to our lives in Montana, and we are more than happy to make room for them.

I couldn't agree more strongly with a letter from the president of the Chinese Students Association at Montana State University in Bozeman. The letter says:

> We are deeply concerned that the President's veto last year was taken by the Chinese Government as a signal of approval for their brutal suppression of young students. By overriding the veto, a strong signal will be sent to the hardline Beijing regime that the American Government and people support democracy and human rights in China.

I say to Chinese students in my State, no price, and no diplomatic mandate, makes it worth sending you back to the butchers of Beijing. No threat from your government could persuade me to send you back to the reeducation camps, and the prisons, and the guns of your government.

Today in the Senate we can vote our fears—by meekly toeing the line drawn in the sand by Beijing. Or we can vote our hopes—by helping those Chinese students among us who have a well-founded fear of prosecution. I ask my colleagues to vote their hopes, and not their fears.

Mr. BRYAN. Mr. President, the students of China have suffered grievously to win for themselves and their countrymen the very rights which we consider to be inalienable. Having long since denied them liberty, the Communist Chinese Government ruthlessly deprived the students in Tiananmen Square of their lives.

Today, we have the opportunity to reach out to our one true constituency—those who seek freedom. To see this, we need only look at the punishments given students still in China for the crime of building a tribute to our Statue of Liberty. Chinese students now in our country will only be greeted at home with like retribution.

To embrace the demands of the Chinese Communist leadership is not only inhumane, it is shortsighted. The future of China, like the future of Eastern Europe, is not with the aging despots of the past 40 years. It is with these very students who we seek to protect today; protect so that they can plant again the seed of democracy in Chinese soil. Our Nation's authority in the world is not based on the support of despotic regimes. It is based on the democratic principles that have made us the leader of the free world. When these young people come to govern China in their turn, and they will, it must not be said that the United States did nothing while the people of China fought to throw off the evils of tyranny.

The President states that he can better protect these students through an administrative directive. The students themselves, however, fear that administrative orders are subject to change. They seek firmer assurances that their interests will not be sacrificed for short-term strategic gain.

As the birthplace of modern democracy, it remains among our most important tasks to support those who seek freedom. With today's vote, we have the chance to do just that.

Mr. WILSON. Mr. President, it is never pleasant to vote to override the veto of any President who conscientiously asks and argues that you sustain his veto especially not one of your own party. And especially not one for whom you feel great personal respect and affection as I do for this President.

But we are sent here to exercise independent judgment—our own conscientious judgment.

And mine is that we ought not to sustain this veto.

We are told by the administration that we should for two reasons:

First, that we can be assured that legally the Chinese students will be afforded the same protection by the executive actions of the administration as by the bill the President vetoed.

We are assured we should be satisfied.

Second, that we can be assured that the Chinese Government will be offended by the bill and will retaliate, but that the Chinese Government will not be offended and therefore not retaliate—if executive action is taken even thought it will, the administration assures us, the very same protections so offensive to Beijing.

On the first point, there is a serious legal question, which has already been addressed in this debate.

As long as the legal question is in doubt, the United States cannot in conscience subject the Chinese students now here to a fate that is not in doubt. The vice chairman of the Judiciary Committee of the National People's Congress of China, recently announced that Chinese citizens who committed counterrevolutionary crime in foreign countries will be punished when they are returned to China upon expiration of their visas.

We should no more risk return of these students to the present Beijing regime than a child protective services agency should return an endangered child to a known child abuser.

On the second point, what will be the retaliation by Beijing? Will the Chinese Government make good upon its threatened cutoff of student exchanges between our nations?

China cannot long afford to do so. She needs the United States-educated scientists too much to do so.

I strongly support such student exchange programs because I am convinced that those who travel to our shores to study will take home ideas even more important than the high technology they acquire.

They will be exposed to freedom.

And having been exposed, they will become a force to bring freedom and democracy to their homeland—just as were the courageous students of Tiananmen Square.

Democracies rarely start wars because, in contrast to dictatorships, popular political approval is required for a democracy to resort to arms and sustain a military campaign after the failure of diplomacy.

Student exchanges do, I believe, give promise of transplanting democracy, and therefore of enhancing and accelerating a climate of international peace and freedom.

But the United States, as both the symbolic and real guardian ad litem of the freedom and human rights of these students and other refugees from political repression, cannot fail in this fiduciary duty or we will deservedly suffer the disillusionment and distrust of those whose hopes we must keep alive and nurture.

The reward for our constancy of purpose can be seen in Eastern Europe.

We will not hasten the coming of that some kind of change to China by sacrificing the human rights of Chinese students who fear to return home.

Freedom and democracy are not won or even advanced by the appeasement of governments hostile to them. The present regime in Beijing has made clear last summer that it is a government hostile to freedom and democracy.

Mr. MOYNIHAN. Mr. President, I rise today to support the override of the President's veto of H.R. 2712, the Emergency Chinese Students Immigration Relief Act. Totalitarianism is crumbling. It is crumbling in China. The events of the last few months, if nothing else, demonstrate that the type of power used to crush the democracy movement in Tiananmen Square can tumble practically overnight. China will not be able to resist forever the rising tide of human freedom now evident in Eastern Europe. All around the periphery of China totalitarianism is under attack: in Outer Mongolia where the Soviet Union has recently allowed rallies, in Tibet with the award of the Nobel Peace Prize to the Dalai Lama, and in Burma where another group of brave students is struggling for democracy.

At this dramatic moment in world history we must strengthen the hand of those who favor reform and freedom in China. We must give them the ability to say to their opponents, "You

were wrong to think that the world would not care if you crushed the democracy movement. You were wrong to believe that the United States would conduct 'business as usual' with China despite the murder of our students." Mr. President, to sustain the President's veto would send precisely the wrong message to Beijing. It would say that the United States values a totalitarian ally above its historic principles. Let us instead help to hasten the day when the Chinese stand with us as part of a worldwide alliance of democratic peoples.

Mr. JEFFORDS. Mr. President, the world has watched events in China over the last year with rapt attention. None of us can forget the poignant images of one brave student holding back a line of tanks with his own fearlessness, or of the Statue of Democracy that rose out of the energy and hope of Tiananmen Square in June. The courageous students struggling under Communist domination and their brave colleagues here in the United States earned all of our respect. I strongly believe that we now have an obligation to continue to press the Beijing government for reform and to provide safe haven for the 40,000 students in the United States. And I doubt that any of my colleagues would disagree with me on this.

Yet, we have heard a lot of talk about the many issues that are supposedly in question here. I believe there is a considerable degree of confusion as to the nature of today's vote. This is a vote on whether or not to supersede the Presidential directive, which allows the Chinese students to stay in the United States, with legislation to accomplish the same thing. That is the question.

With the exception of some charges that a few minor aspects of the Attorney General's findings might be subject to challenge, no one is claiming that there are any major substantive differences between H.R. 2712 and the provisions the President has already put in place. No student will be forced to go back to China if this veto is sustained. Nor will any Chinese student who chooses to remain here lose any personal or political protections. In fact, in a few areas, the administration's directive provides broader protections, such as allowing all Chinese aliens to work legally in the United States.

Because there are no substantive differences between the result of these two methods, I think the President should have signed H.R. 2712 into law. However, he chose not to, and therefore the heart of this debate should be which branch of government has the prerogative of leadership in such matters. This debate is not and should not be a referendum on the President's policy toward China. If Congress disagrees with how the President is conducting that policy, then it should bring that issue up separately.

This issue here is not whether to protect Chinese students—we all agree that they deserve our support. But rather, the issue is which branch of government should take the lead in implementing these protections.

Mr. GRASSLEY. Mr. President, through all of the debate, through all the politics, my utmost and only concern is the protection of the Chinese students. Because I believe that the President's Executive order not only extends protections equal to but also greater than H.R. 2712, I am in support of sustaining the President's veto: President Bush's Executive order extends protection not only to Chinese students currently in the United States, but to all Chinese nationals.

The President gave personal assurances to me that no student or national will be returned to China if they would face retribution. I trust that this President will protect these freedom fighters.

The very fact that this President took the initiative to issue the Executive order thereby extending the same protections as H.R. 2712, indicates that this President cares about these students, and all Chinese nationals currently in this country, and will take whatever actions are necessary to provide for their protection.

I am proud that this President has affirmatively acted to protect the students and all other Chinese nationals and I trust that he will continue to do so for as long as he is President. Furthermore, this President's unique perspective on China and United States-China relations is a significant factor for my consideration.

I do not take lightly votes to override a Presidential veto. I must look to the substance of the issue and then vote accordingly. The substance I am concerned with is protection. Unfortunately; attempts were made to taint this issue with partisan politics. I resent the fact that an issue of great importance such as human rights is parlayed as a partisan issue.

Human rights are too important to me to be swayed by partisanship. Protection is my sole concern and because the Executive order extends this protection and more, I support the President's order.

The PRESIDING OFFICER. The Republican leader.

Mr. DOLE. Mr. President, I understand the two leaders now each have 10 minutes and then the vote will follow.

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. Mr. President, first I want to thank my colleageus on both sides. I have listened to the debate and most of the debate. It is an important debate. We do have an important responsibility to Chinese students. We do remember what happened in Tiananmen Square last June. We were all riveted at the TV sets and we saw these brave young men and women.

But I would suggest the debate is not about our China policy. It may be not even about the Chinese students.

Yesterday I put in the RECORD a report from the Justice Department affirming once again that the President's Executive order on Chinese students will do everything the Pelosi bill does—and more.

Others have also made a part of the RECORD an analysis done by the White House; another done earlier by the Justice Department; correspondence involving the President, the Attorney General, and Members of the Senate; and an INS study in effect rebutting the CRS study that was passed around by some, all asserting, and proving, the same basic point: that the Executive order does everything the Pelosi bill does—and more.

The evidence, the facts—apparently they are not enough. At least, not enough for some people.

So, yesterday, the President added something important to the proof. He added his word.

The President wrote me a letter, which I would ask to include in the RECORD. I want to read the letter in its entirety. It is brief. It is to the point.

He says:

Dear Bob: you have asked how Chinese students in this country will be affected if Congressman Pelosi's bill never becomes law. I am writing to give you my personal assurance that no Chinese student will be disadvantaged in any way.

At my direction, the Attorney General has implemented a program that extends—and extends irrevocably—

Let me underscore "irrevocably," as the Senator from Wyoming has done all day—

The same rights and benefits that Chinese students would receive under the proposed legislation. Indeed, we have gone beyond the legislation by providing work authorization for all Chiense aliens in this country, not just Chinese students, and asylum protection for all aliens under the threat of coercive family planning programs, not just Chinese aliens.

Beyond that, you can rest assured that I will never—

And again let me underscore "never"—

Never allow any action that would force the return of Chinese students whose lives or liberty are at risk.

I hope this commitment provides the assurances some of your Senate colleagues were seeking.

Sincerely,

GEORGE BUSH.

Mr. President, President Bush has given his word. I believe him. If there are any who do not, perhaps they should just stand up and say so.

So, Mr. President, the issue here is not providing protection for Chinese students: That's a strawman. The Chi-

nese students in this country already enjoy every protection—with every "I" dotted, and every "T" crossed—that the Pelosi bill would provide, should we override the President's veto.

They ought to stand up and say so. If you do not believe the President of the United States stand up and say so. So, Mr. President, the issue here is not promising greater protection for Chinese students. That is a strawman. The Chinese students in this country already enjoy every protection, with every "I" dotted and every "T" crossed that the Pelosi bill provides should we override the President's veto.

The issue is not Chinese students.

And, in fact, the issue is not our China policy, in its broader terms. Many Senators have doubts about some aspects of that policy. Many Americans do, too. That is a fact.

Many persons do not know the fact that last year I cosponsored some legislation, and voted for other legislation, that—frankly—was intended to send a message not only to China, but to the administration as well, that it was time to toughen up our policy.

Some of the question marks that existed then may still exist now. Some may believe the Scowcroft-Eagleburger trips to China were not the greatest idea in the world. Some may think we need more economic sanctions. Some may think we ought to try to isolate China.

I happen not to agree with that last point—and many Senators were with me at recent meetings with former President Nixon, and earlier with Henry Kissinger, Cyrus Vance, Leonard Woodcock, and others; and those Senators heard, along with me, that every one of those distinguished Americans strongly oppose a policy of trying to isolate China.

But—whether you agree or disagree with that policy, or with the policy that President Bush is following—there are plenty of ways, and there will be plenty of opportunities, to express your view.

That is what this body, this system, is all about. To put the issues on the table, and then vote on them.

That is not what we're about today. This is not a referendum on George Bush's China policy. Or at least it should not be. It is a vote on a bill to provide some relief to certain categories of aliens in this country. And, again, it is a vote on whether we really need to put that relief into effect through legislation, when it is already operative through an Executive order.

So, truly, this ought to be a rather narrowly focused vote, on a rather specific issue—not a public trial of President Bush's China policy. If we want to vote on that, we at least ought to spend a bit more than a few hours time debating it.

So, really, this is not a vote on Chinese students, or China policy.

Several times in the past week, I have suggested maybe we ought to postpone this vote. What is the rush; why do we have to vote the first week we are back? Maybe there will be other policies taken by the Government of the People's Republic of China, more moderate steps taken through sensible even engagement rather than isolation. And maybe there might be more evidence to come. If we want to make this into a policy vote let us see if the policy is working before we cast final judgment.

The majority leader decided we had to have this vote today. He has that right, fair and square. So we are having this vote today.

But I do recall that, when I first raised this point with him on a television talk show, he responded with his usual good humor—but in a telling way. I said: "why don't we just postpone the vote?" And he responded: "that means Dole doesn't have the votes."

In a few minutes we will see. But the point I would make here is: the vote is being scheduled not because it is the right time, in terms of a "rational evaluation" of our policy, because it is a time when the majority leader thinks he has the best chance of having a vote, because it is the first week of the new session, because it is before the President addresses a joint session of Congress in the State of the Union address, because this vote may help set the tone for the rest of the session.

As on most issues, different considerations will be compelling for different Senators. This is a tough, tough vote for Republicans. Some already made commitments. As I said, we all were sickened by what the Chinese did in Tiananmen, and we all want to be certain that no Chinese student is sent back to China against his will, putting his, or her, life at risk. But most of us want to support the President, especially on national security issues.

What is wrong with that?

But let us face it: Many will not vote on the basis of the issues of Chinese students, or China policy. For many Democrats, it's a good chance to bash George Bush. It's as simple as that.

Take a look at the calendar—1990 is one of those numbers that you can divide by 2. That makes it an election year.

Today we are kind of throwing out the first ball on the opening day of the 1990 election season: Some Democrats want it to be a bean ball for George Bush. That is what this vote is really all about.

Bash George Bush. Embarrass him. Set up some Republicans for a tough political vote. Scrape up some raw material for some 30-second ads.

I have a feeling that, around the country, there are a lot more political consultants watching this vote than China specialists. And I predict that, whatever way the vote turns out, most of the media commentary is going to be focused on whether George Bush won, or lost, a political battle—and not on how the tea leaves are going to be read in Beijing.

Mr. President, let us at least be above board, and admit what we're doing here today.

It is not China policy—it is American politics.

It is not freedom, or morality, or human rights—it is bash Bush.

Fifty-five Democrats are going to make the try. I hope that at least 34 Republicans will just say no.

The VICE PRESIDENT. The majority leader.

Mr. MITCHELL. Mr. President, let me first welcome the distinguished Vice President and Presiding Officer to the Senate. It is a pleasure to see him here.

Mr. President, President Bush has urged the Congress not to override his veto of H.R. 2712 on the grounds that it sends the wrong signal to the Chinese Government and will cause it to retaliate by cancelling the remaining Student Exchange Program. I strongly disagree, I believe the President's veto is a grave mistake and sends precisely the wrong message. It is inconsistent with our longstanding profession of support for the human rights of people throughout the world. I believe we should stand up for the historic American ideal of the right of all men and women to seek democratic self-determination without fear of persecution.

The bill provided a definitive resolution of the question of residence status for nearly 40,000 Chinese students who courageously supported the prodemocracy movement in China. The veto of the bill has made it more likely that the Chinese Government will succeed in its campaign of intimidation and harassment to silence the students' cry for democracy in China. President Bush has voiced his support for the efforts of the people of Eastern Europe to throw off the yoke of communism and achieve democratic reform in their countries. But his veto of this bill sends a contrary message to the millions of students and workers in China who are struggling for democracy in their country.

This legislation would have protected the students from further intimidation by giving them 4 more years to apply for new visas or permanent residency and waiving the requirement that they first return to China for 2 years. The bill passed the House by a vote of 403 to 0 and the Senate by voice vote after similar language offered by Senator DOLE and myself in July had passed by a vote of 97 to 0. But more importantly, it was an affirmation of the dedication of our Nation to the principle of human rights and

the right of people everywhere to seek freedom and democracy. The Chinese Government threatened to stop the Student Exchange Program if the bill became law. So the President vetoed the bill, denying Chinese students in our country statutory legal protection against deportation and possible persecution.

H.R. 2712 provides the Chinese students with assurance of continued lawful immigration status and waives the 2-year home country residence requirement for Chinese nationals in the United States provided that within 4 years they file for change of status. After vetoing the legislation the President contended that it was not needed because on November 30 he issued a memorandum of disapproval which he contends does the same thing as the legislation. But the President's memorandum of disapproval is only an administrative action. It provides no statutory legal protection for the Chinese students and can be revoked by the President or the Attorney General at any time at their discretion. Such an administrative action may also be open to a court challenge. Several of the President's administrative actions may be inconsistent with current immigration statutes. Only legislative changes in current law would unquestionably exempt Chinese students from existing statutes.

The administration has dispatched two high level secret missions to China and contends that the same Chinese leaders who ordered the Tiananmen Square massacre are responding in a positive manner as a result of those covert visits. It cites the recent Chinese decision to end 7 months of martial law as a dividend from the administration's policy. However, it appears that martial law in practice still exists since students are still being arrested and workers are still being executed in China.

Barely a month after the brutal killings in Tiananmen Square, President Bush sent Mr. Scowcroft on the first secret midnight mission to meet with the Chinese leaders, the very leaders who ordered the murders. Ostensibly, Mr. Scrowcroft was there to convince those leaders to stop executing, torturing, and imprisoning the students and workers who demonstrated for a modest opening toward democracy. What was the result of that first covert visit? Since then, the Chinese Government has detained or arrested more than 10,000 people and harshly imprisoned more than 800 persons for counterrevolutionary crimes; some have been thrown in jail for 10 years or more simply for putting up posters calling for political reform.

According to some reports, more than 1,400 students and workers have been killed since Mr. Scowcroft's visit and countless hundreds of others have fled into hiding or exile.

The administration's policy has produced no substantive results in lessening the repression and violation of the human rights of the Chinese people. On the contrary, it has made a mockery of our profession of concern for human rights and is inconsistent with our stated ideals. I urge the administration to distinguish between the Chinese Government and the Chinese people. The United States must stand strongly in support of the right of all men and women to seek democratic self-determination.

Yesterday the House voted overwhelmingly to override the veto; 145 Republicans voted to override the veto. Were they primed to embarrass the President? Were their motives political? It is an insult to those Republicans. That vote in the House is clear indication of the lack of support across the country for the administration's China policy.

By overriding the veto today, the Senate can join the House in sending a strong and clear signal to the Chinese Government that the people of the United States believe in human rights and the right of men and women everywhere to freely seek democratic self-determination without fear of persecution, imprisonment, or execution. I urge my colleagues to vote to override the veto and thereby send a message to the Chinese leaders that if they want a cooperative relationship with the United States, they must end their repression of the Chinese people.

Mr. President, I ask unanimous consent that an editorial which appeared in the Portland Press Herald and one which appeared in the Bangor Daily News in Maine urging support for the override be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Portland Press Herald, Jan. 23, 1990]

CHINA/LOOK TO THE FUTURE, NOT THE PAST

Members of Congress, eager to praise emerging democracies in Eastern Europe, will look farther east on Wednesday at the continued repression of students and others who demonstrated seven months ago for reform in China.

What they see should convince them to override President Bush's veto of a bill designed to assure the safety of thousands of young Chinese sympathizers now studying here.

China's aging communist leaders acted unequivocally and with brutal force when they set tanks and soldiers on unarmed students in Beijing's Tiananmen Square last June. Human rights were massacred as well as young people.

Chinese leaders have acted just as unequivocally and brutally in the months since then. They have executed many student leaders and imprisoned others; as many as 10,000 are now reported to be in jail. Government officials who supported reform have been purged and oppressive laws reinstated.

That litany cries out for congressional action. And the best action Congress can take is to vote overwhelmingly in both the House and Senate to give Chinese students studying in the United States four years of guaranteed sanctuary here.

Congress has already done so once, unanimously approving such legislation last year. Bush, however, chose a different route. Concerned at isolating China politically, he vetoed the measure, signing instead a presidential directive authorizing limited sanctuary. That directive, unfortunately, can be readily revoked.

Chinese students—among whom may well be that nation's future leaders—deserve better. So does our nation's historic commitment to human rights.

House and Senate votes to override should open the 1990 session this week.

[From the Bangor Daily News, Jan. 24, 1990]

A DEBT TO DEMOCRACY

The U.S. House of Representatives can begin the new decade on a bright note Thursday when it considers the fate of Chinese students in the United States. Last year, Congress passed a bill that would extend the students' visas, allowing them to remain in the country until they felt they could return to China without fear of reprisal. Shortly after Congress adjourned in December, President Bush vetoed that bill.

Congress, it appears, has not forgotten that veto. Despite events in Eastern Europe, despite the trouble in Azerbaijan, despite domestic politics and a long winter's recess, Congress has not forgotten Tiananmen Square. The United States has watched as Chinese hard-liners systematically purge a whole generation of democratic activists; now, to appease those hard-liners, Bush wants to pretend that it is business as usual—in the process, he would deliver to the hardliners students who have enjoyed American protection through the crackdown.

By all reports, Congress will not let that happen. Representatives and senators from both sides of the aisle have promised they will override that veto, and allow the students to stay—virtually nobody has lined up behind the president. Congress deserves gratitude for working to correct this excess in the administration's foreign policy; Sen. George Mitchell, among others, is leading the fight.

In the euphoria over the world's sudden interest in democracy, we should not forget that the Chinese movement helped set the tone for all that has followed. Nor should we forget that the Chinese students, more than any of the East European activists, embraced the United States as their model. While other movements seek economic benefits, the Chinese students focused on the very heart of democracy—freedom of speech and thought.

It is in the United States' best interests to support democracy around the world. Beyond that, however, Americans owe a special allegiance to the Chinese movement, to the people who rallied around a miniature Statue of Liberty. The administration has lost its chance to fight for Chinese students crushed under tanks, for those who were executed, and for those who have been condemned to prison. Congress must now fight for up to 40,000 who supported the movement while studying in the United States.

Ironically, a congressional override will allow President Bush to have it both ways. His personal relationship with Chinese leaders—a bond he has put above the interests

of the students—will benefit from the veto, which bolstered his see-no-evil policy. The override, however, will prevent him from having to send 40,000 students to a future that is uncertain at best, and deadly at worst.

Mr. MITCHELL. Mr. President, several Senators have inquired regarding the schedule for the remainder of the day and early next week. If the distinguished Republican leader is on the floor, I would like the opportunity to merely make that announcement.

Mr. President, do I have any time left?

The VICE PRESIDENT. The Senator has 2 minutes and 20 seconds remaining.

SCHEDULE

Mr. MITCHELL. Mr. President, there will be no rollcall votes today after this vote. We will return to consideration of the Clean Air Act. The Senate will not be in session tomorrow. There will be no votes on Monday. We do expect votes on Tuesday on clean air or possibly other legislation. So Senators should be on notice that votes are expected to occur on Tuesday; that there will be no votes between this one and then.

Mr. President, I want to close by commending the President, the Secretary of State, and the Republican leaders in the Senate for a very vigorous effort in this matter and, whatever the outcome, we hope that we can continue to work together to advance American interests with respect to China and the rest of the world.

I look forward to what I hope will be an override but, in any event, I look forward to a continuing positive and constructive relationship with our colleagues.

The VICE PRESIDENT. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, on behalf of the minority leader let me extend that same spirit of cooperation. This has been a tough one, a tough one for us. I think it was conducted with great vigor.

We do need to do things for the American public, and there is a way to do that if we purge away partisanship for partisanship's sake. It is a feckless exercise when it is just done for that purpose.

There is much to do. I do know the Senator from Maine. I respect him greatly. But we have a lot to do, and I pledge to him that from the assistant minority leader post I will try to do everything I can.

We have a heavy, heavy obligation under the clean air legislation and he and I have worked together long and hard on that.

So, after this one is over I am ready to get to work with him on that.

Mr. MITCHELL. Mr. President, I yield back the remainder of my time.

The VICE PRESIDENT. The Senator yields back the remainder of his time. Does the Senator from Wyoming yield back the remainder of his time?

Mr. DOLE. I yield back any time we have.

The VICE PRESIDENT. All time is yielded back.

Under the previous order, the hour of 2:30 p.m. having arrived, the question is: Shall the bill pass, the objections of the President of the United States to the contrary notwithstanding? The yeas and nays are required.

The clerk shall call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Louisiana [Mr. BREAUX] is absent because of death in the family.

The VICE PRESIDENT. Are there any other Senators in the Chamber who desire to vote?

The yeas and nays resulted—yeas 62, nays 37, as follows:

[Rollcall Vote No. 1]

YEAS—62

Adams	Ford	Matsunaga
Armstrong	Fowler	Metzenbaum
Baucus	Glenn	Mikulski
Bentsen	Gore	Mitchell
Biden	Gorton	Moynihan
Bingaman	Graham	Nunn
Boren	Harkin	Pell
Boschwitz	Heflin	Pressler
Bradley	Helms	Pryor
Bryan	Hollings	Reid
Bumpers	Inouye	Riegle
Burdick	Johnston	Robb
Byrd	Kasten	Rockefeller
Cohen	Kennedy	Sanford
Conrad	Kerrey	Sarbanes
Cranston	Kerry	Sasser
Daschle	Kohl	Shelby
DeConcini	Lautenberg	Simon
Dixon	Leahy	Wilson
Dodd	Levin	Wirth
Exon	Lieberman	

NAYS—37

Bond	Hatch	Nickles
Burns	Hatfield	Packwood
Chafee	Heinz	Roth
Coats	Humphrey	Rudman
Cochran	Jeffords	Simpson
D'Amato	Kassebaum	Specter
Danforth	Lott	Stevens
Dole	Lugar	Symms
Domenici	Mack	Thurmond
Durenberger	McCain	Wallop
Garn	McClure	Warner
Gramm	McConnell	
Grassley	Murkowski	

NOT VOTING—1

Breaux

The VICE PRESIDENT. On this vote, the yeas are 62, the nays are 37. Two-thirds of the Senators present and voting not having voted in the affirmative, the bill, on reconsideration, fails of passage.

Mr. MITCHELL addressed the Chair.

The VICE PRESIDENT. The majority leader is recognized.

Mr. MITCHELL addressed the Chair.

The VICE PRESIDENT. Those engaging in conversation will please retire to the Cloakroom. The majority leader.

Mr. MITCHELL. Mr. President, I commend the President, the Vice President, the Secretary of State, the distinguished Republican leader, and the assistant Republican leader for their very vigorous and successful effort to sustain the President's veto.

I also commend the Senators for their presence here today. Senators will note that 99 of the 100 Senators were present. The only absence was Senator BREAUX. Unfortunately, Senator BREAUX's mother passed away late last night. The wake is today. He could not, therefore, be present. I know that all Senators wish to convey their sympathy to him. I also note, in any event, of course, that his presence would not have changed the outcome of the vote.

ORDER OF PROCEDURE

Mr. MITCHELL. Mr. President, as I announced earlier, there will be no further rollcall votes until Tuesday. I am shortly going to ask consent that we have a period for morning business and then return to the Clean Air Act later this afternoon for further discussion and debate as well as on Monday.

I anticipate that there will be votes on Tuesday. Senators should be prepared for that.

Mr. President, I now ask unanimous consent that following the remarks by the distinguished Republican leader, there be a period for morning business until 3:30 p.m., and that at 3:30 p.m.——

The VICE PRESIDENT. If the Senator will suspend, let me obtain order. Will the Senate please come to order?

Mr. MITCHELL. Mr. President, I withdraw my request and will yield now to the distinguished Republican leader. I will renew the request after his remarks.

The VICE PRESIDENT. The Republican leader.

Mr. DOLE. Mr. President, let me extend my sympathy to Senator BREAUX and his family.

I also want to commend my colleagues on both sides of the aisle for a very, very good debate.

Let me extend my congratulations to the President. Let me assure people that after the vote as well as before the vote the President meant what he said. His word is good. The Chinese students will be protected.

Let me particularly thank the distinguished minority whip, Senator SIMPSON, members of his staff and my staff, and others who have been on the floor debating—Senator COCHRAN, Senator LUGAR, Senator HEINZ, everyone on this side. I thank them for their support—their support for what I think was the right position, and also thank the majority leader for his many courtesies during the debate.

Mr. JOHNSTON addressed the Chair.

The VICE PRESIDENT. The Senator from Louisiana.

KATHERINE BURLINGER BREAUX

Mr. JOHNSTON. Mr. President, I was deeply saddened to learn of the death last night of Mrs. Katherine Burlinger Breaux, the mother of our friend and colleague, JOHN BREAUX.

Katherine Breaux was a lifelong resident of Crowley, LA, whose father had been active in politics and whose grandfather has served as mayor of Crowley.

She no doubt gained from them a very deep appreciation for public service, and I am sure each of us can imagine how proud she must have been to see that tradition carried on by her son.

I know too, how proud John is of the lifetime of love and support she gave him and of the many blessings she brought to his life and to the lives of all those who knew her.

John had been at his mother's side in Lafayette for several weeks during her grave illness and will, of course, remain in Louisiana for funeral services which will be held tomorrow.

I am certain that I speak for all my colleagues in saying that our thoughts and prayers will be with JOHN and Lois and their children and with JOHN's father, Ezra, as they mourn the loss of their loved one.

Several Senators addressed the Chair.

The VICE PRESIDENT. The majority leader.

MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent that there now be a period for morning business until 3:30 p.m. with Senators permitted to speak therein for up to 5 minutes each and that at 3:30 p.m. the Senate resume consideration of S. 1630, the Clean Air Act.

The VICE PRESIDENT. Without objection, it is so ordered.

Several Senators addressed the Chair.

The VICE PRESIDENT. The Senator from Idaho.

THE TOP PRIORITY FOR THIS CONGRESS SHOULD BE TO INCREASE THE NATIONAL PRIVATE SAVINGS RATE

Mr. SYMMS. Mr. President, throughout the world, nations with the highest national private savings rates such as Japan and Germany are increasingly dominant in the world economy. Many economists have told me that the United States is losing its stature as a world financial power because our national private savings rate is so low.

The low national savings rate in the United States has been the focus of concern in our budget deficit debates. There are proposals in Congress to restore Individual Retirement Account incentives for all Americans. The distinguished chairman of the Senate Finance Committee [Mr. BENTSEN] is strongly supporting such a proposal to increase our national savings rate. I am an eager supporter of these proposals to increase our national private savings rate.

There was a spirited debate last session about whether it would be more wise to increase the incentives for savings and investment with a capital gains tax rate, or whether Congress should put the emphasis on individual retirement accounts. The Senator from Delaware [Mr. ROTH] proposed an innovative plan for creating a savings vehicle that would focus any tax benefits on the future years, when savings had grown through compound interest and capital appreciation, rather than offering tax credits in the current year. One advantage of that proposal is that it would solve a problem in the Federal budget. If tax incentives for savings are provided up front, the benefits from increased private savings would, unfortunately, be partially offset by an adverse impact on the Federal budget deficit.

The President has made increasing the national savings rate a top priority, as well as it should be, by offering a proposal to create family savings accounts in his 1991 budget. The time is now to focus on this national priority of increasing our national private savings rate.

Mr. President, I would like to cite some interesting statistics concerning national savings. The net household savings as a percentage of disposable household income for Japan is 15.2 percent. In Germany it is 12.6 percent, and other countries of Europe such as Italy and Portugal have savings rates of 22.8 and 24 percent respectively. The United States household savings rate is 4.4 percent, which starkly illustrates why the major nations of the world economic system are so worried about the future of the United States. This is why I say that ideas to increase the national private savings rate are so essential for this Congress to focus on.

Our economy is increasingly dependent upon foreign capital investment. I do not believe this is something that should worry any American. Foreign investment has always been a vital source of our economic growth, and it is an indicator of the strength and stability of our free market system. But many Americans do worry about foreign investment. They would be most happy if American families were the only source of new savings and investment—but for this wish to come true, Americans would have to increase dramatically the savings rate.

In the eyes of foreign investors, moreover, our savings rate is a direct indicator of our long-run financial stability. In banking, Foreign banks account for a growing share of the U.S. market. Nine of the 10 largest world banks are Japanese and Citicorp is the only U.S. bank in the top 20.

This ranking of financial institutions is partially a consequence of foreign exchange valuations, as the Japanese yen has appreciated in the 1980's, but I believe it is still an indicator that we need to increase our national private savings rate. Japanese financial institutions would never have been able to achieve the status they have today without the strong commitment on the part of Japanese families to save for the future.

Some economists and even Members of Congress are concerned about the Federal budget deficit and have suggested that a tax increase would be the most appropriate way to reduce the deficit and thereby increase the public sector savings in our economy. This is a fallacy, Mr. President. It has been shown again and again by economic researchers that tax increases do not reduce consumption by the taxpayers anywhere to the degree that they reduce savings by households. People attempt to maintain their standards of living, and tax increases reduce the standard of living. Households tend to pay increased taxes out of the funds they would otherwise save. Thus there is much less than a dollar-for-dollar increase in national aggregate savings from taxes than from other incentives to increase private savings.

Indeed, I want to make one point very clear, Mr. President: Nothing we do here to increase so-called public savings will make any lasting impact on the national savings rate. The reason why, Mr. President, is because Congress has an insatiable appetite for spending. Anything the Congress can possibly do to avoid spending cuts will end up decreasing the national savings rate. The savings rate will decrease because public sector consumption tends to become permanent. It tends to grow. It feeds upon itself, as bureaucracies and interest groups form around government programs and lobby for expansions and increases in spending.

In the next few weeks we will be debating the budget resolution for fiscal year 1991 in Congress, and we will also be debating a proposal that has been offered by the Senator from New York to cut the Social Security tax and return to a pay as we go system for Social Security benefits. I want to support the idea of the Senator from New York [Mr. MOYNIHAN], and I will be introducing my own proposal in the next few days to link the concept of a pay as we go Social Security tax to an increase in the national private savings rate.

Last night I appeared on the Cable News Network's debate program, "Crossfire," with the distinguished

Senator from South Carolina [Mr. HOLLINGS], who also supports the proposal of the Senator from New York, but Senator HOLLINGS says we must pay for the proposal to cut Social Security taxes by imposing that most harsh engine of extraction, the value added tax, on the shoulders of the American economy.

I think the proposal of the Senator from South Carolina would be the most unwise action we could possibly do to accompany the idea of cutting the Social Security tax. In this age of international competitiveness, a value added tax to increase the ability of Congress to spend and spend on public sector consumption would weaken our ability to grow and save for the future.

Mr. President, I would like to insert in the RECORD following my remarks today an article by economics columnist Warren Brookes, entitled "In Defense of Deficits," which appeared in newspapers around the country on January 15. Warren Brookes reports about a new study by two professors at the University of Mississippi, Richard McKenzie and Bill Shugart II, entitled "In Defense of Deficit Spending."

The central argument of McKenzie and Shugart is that public sector deficits, financed by private savings, are much more healthful for the economy than raising taxes: When government spending is financed by borrowing, revenue is raised from willing lenders both at home and abroad rather than from unwilling taxpayers. The cost of raising $1 in the capital market is lower than the cost of raising $1 in taxes.

Based on this analysis, Mr. President, it would clearly be to our advantage to cut taxes by one dollar, if we could assure ourselves that private savings would increase by one dollar. In other words, the common practice of economists to view the public savings and private savings as a dollar-for-dollar substitute in the aggregate national savings pool is not a correct model.

I want my colleagues to see this argument, Mr. President, not because I am in favor of increasing the Federal deficit, but because I think it points to the overriding importance of keeping taxes down—even if we take longer than we originally intended to reach a balanced budget.

Indeed, the proposal by the Senator from New York to cut the Social Security tax would be a great improvement in the position of the American worker in today's competitive international economy. Indeed, the only criticism I have heard against the proposal by the Senator from New York is that it would increase our Federal budget deficit.

Mr. President, the criticism that it would increase the budget deficit is not a criticism that I feel detracts from the very strong merits of the proposal to cut the Social Security tax rate. Indeed, it would increase the Federal budget deficit on paper, but at the same time the money would be released by the tax reduction to purchase the financial assets to finance that deficit. If all of the money released by the tax reduction were saved—were added to our national private savings—the proposal by the Senator from New York would be entirely meritorious.

Mr. President, I ask unanimous consent that the article by columnist Warren Brookes, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

IN DEFENSE OF DEFICITS

(By Warren Brookes)

Liberal spenders are rubbing their hands at the prospect that detente in Eastern Europe will bring a "peace dividend" on the Potomac. Fiscal conservatives on the other hand are pushing to convert that "dividend" into deficit reduction and meeting Gramm-Rudman-Hollings (GRH) deficit targets.

Bear Sterns economist Larry Kudlow renamed it "Gramm-Rudman-Gorbachev" (GRG) and predicts "GRG" will now produce a budget surplus by 1994, and "there really will be a 'peace dividend,' at least for the next four or five years." This "will also increase national savings, while at the same time it will reduce the government claim on the national resources."

That will be the administration budget theme: Cutting the deficit to $60 billion or so without new taxes. But Mr. Kudlow and the administration are up against history and congressional psychology: The lower the deficits, the faster spending rises.

The Vietnam War wind-down offers a preview: In 1970, the United States ran a budget deficit of 2.8 percent of gross national product, slightly lower than 3.2 percent of fiscal 1989, but total spending was only 19.8 percent of GNP in spite of a massive 8.3 percent going to defense. (Table)

By 1977, defense fell to 5 percent of GNP. That was, indeed, a huge 3.3 percent "peace dividend." But it was more than gobbled up in higher total domestic spending and taxes, as entitlements and other mandatory outlays soared from 6.7 percent to 10.2 percent.

Total non-defense spending rose from 11.6 percent of GNP in 1970 to 16.2 percent in 1977 and 17.4 percent by 1981, a massive 50 percent rise in economic share, while deficits stayed the same.

Total spending was not really slowed until 1985 when under the growing fear of budget deficits (then over 5 percent of GNP), all aspects of government got trimmed. Result? Total spending has come down in fiscal 1989 and fiscal 1990 to its lowest level since fiscal 1977.

Indeed, the superb, deficit-defying performance of the U.S. economy since 1981 proves Nobelist Milton Friedman's thesis that what really matters is not deficits but total government spending.

Instead of inflation soaring (as predicted from 1981 to 1983), it fell by 70 percent. Instead of the recovery aborting, it is now in an unprecedented eighth year. Instead of investment "crowded out," our present investment level is one of the highest in U.S. history, and our share of world GNP, after falling badly in the 1970s to 33 percent, has stabilized and recovered somewhat.

All this has caused two otherwise conservative economists, Richard McKenzie and Bill Shugart II at the University of Mississippi, to suggest our deficit fears have been misguided.

In a paper titled "In Defense of Deficit Spending," they argue that "given the political circumstances of the early 1980s, an increase in taxes might have had greater detrimental effects than the deficits did because the greater tax revenue might have gone up in the fiscal smoke of higher government spending."

They conclude that by running up the debt, "President Reagan might well have been orchestrating a policy of 'least destruction' . . . because the annual deficits tied the hands of Congress, impaired their ability to expand expenditures, and thereby increased the pool of national resources for the private sector."

They say the important question is "not that both taxes and deficits are tough on the economy, but which has the greatest detrimental effect." They ask, "Cannot taxes be lowered and deficits increased within bounds with a net improvement in economic efficiency and growth of the economy?"

One possible reason is what economists call "the deadweight loss" of taxation: "When government spending is financed by borrowing, revenue is raised from willing lenders both at home and abroad rather than from unwilling taxpayers. The cost of raising $1 in the capital market is lower than the cost of raising $1 in taxes."

But what about the doubling of interest payments as a share of the federal budget? Messrs. McKenzie and Shugart argue that because interest payments displace and limit the growth of more economically distorting federal expenditures, "they can reduce the net drag of the federal budget on the economy, thus spurring greater economic growth than would otherwise exist."

Japan, for example, made its greatest economic progress in international trade, competitiveness, growth and disinflation in the 1970s when it ran average annual deficits of 5.6 percent of GNP and pushed its federal debt from 8 percent of GNP to 44 percent. It never had a recession and distributed all its revenue growth not to deficit reduction but in the form of regular tax cuts.

This suggests the administration's apparent tactic of floating a number of possible tax-cut incentives for saving and capital formation (such as ending double taxation of dividends and 10-year tax-exempt savers' accounts) is the right strategy to "save the peace dividend" for the economy and from the spenders.

The VICE PRESIDENT. The Senator from Pennsylvania is recognized.

Mr. HEINZ. I thank the Chair.

(The remarks of Mr. HEINZ pertaining to the introduction of S. 2025 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. LIEBERMAN addressed the Chair.

The VICE PRESIDENT. The Senator from Connecticut.

FUNDING FOR LIHEAP

Mr LIEBERMAN. Thank you, Mr. President. Today's Washington Post reported that in the administration's fiscal year 1991 budget, President Bush may well seek to decrease funding for the Low-Income Home Energy Assistance Program by almost 25 percent. I rise now to say that I hope that that story is not true, for news of a $350 million cut in fuel assistance will send a literal shiver of fear through many people who have just come through one of the coldest Decembers in our history.

The Federal Government's Heating Assistance Program is a lifeline for hundreds of thousands of families in Connecticut, and throughout the Northeast and Midwest, for whom home heating bills take up a huge percentage of there monthly income. What is particularly disturbing about this enormous cut is that this LIHEAP Program works. The oil companies know it, market analysts know it, State agencies who administer it know it, and most important of all, the folks who receive this benefit and heat their homes with it know it.

Certainly, we need fiscal responsibility in the Federal budget and we need cuts, but we do not need to cripple a program that is efficiently run and so effective in preventing human suffering. More than 60 percent of the families receiving fuel assistance have an annual income of only $6,000. In my State of Connecticut, close to half of the recipients are either disabled or elderly. According to a Federal study, these families spend four times as much as average families do for heat, as a percentage of their income.

This program has already suffered massive cuts in recent years. In fact, in 1984–85 fiscal year, Connecticut received more than $43 million in LIHEAP funds; it is only receiving $29.2 million this year. To cut an additional 25 percent would be a cruel disservice to all who need fuel aid to survive.

Not only do we need to preserve LIHEAP funding in the next fiscal year, I believe we need a supplemental appropriation of funds for this year. December was one of the coldest months on record in much of the country, and heating oil prices went up as much as 50 percent. That combination of lower temperatures and higher prices has put many State fuel aid programs in a real bind.

In hearings I had the privilege of chairing last week on the home heating oil crisis, we heard testimony that some State programs will have to close down in a few weeks if more aid is not forthcoming. Mr. President, it may be in the 50's outside today, but there are 55 days left in this winter. I have little doubt that the temperature is going to dip again. Even if we have a normal, cold February, we need more money to help the elderly, disabled, and the poor survive.

I have written to the distinguished chairman of the Appropriations Committee and chairman of the Labor-HHS Appropriations Subcommittee asking them to consider putting forward supplemental appropriations for this LIHEAP Program. When the cold weather comes, I do not want any of our constituents running out of heating fuel. I do not want them turning on gas stoves or space heaters to heat cold apartments. I do not want elderly residents having to make a choice between heating and eating. We clearly do not want anyone to freeze to death.

Mr. President, unless we act, that indeed may be the fate that awaits some of our fellow Americans. Thank you, Mr. President. I yield the floor.

Mr. BINGAMAN addressed the Chair.

The VICE PRESIDENT. The Senator from New Mexcio.

Mr. BINGAMAN. I thank the Chair.

(The remarks of Mr. BINGAMAN pertaining to the introduction of Senate Joint Resolution 240 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The VICE PRESIDENT. The Senator from Nevada.

WAR ON DRUGS

Mr. REID. Mr. President, today, President Bush is unveiling the next segment of his war on drugs. By the invasion of Panama, and the subsequent capture of drug thug Manuel Noriega, he has backed his words with action.

But the victory in Panama and today's speech by the President do not tell the full story.

Today especially, President Bush needs to know what his drug czar, William Bennett, is not doing.

On December 7, and again on January 5, I wrote to Mr. Bennett. He has responded to neither letter.

The subject of these letters was the fact that Exxon sells methyl ethyl ketone [MEK] to Colombian companies associated with the drug cartel.

MEK is used by cocaine labs in Colombia to produce cocaine from raw coca leaves. This cocaine is smuggled into the United States and sold on the street at more than $100 a gram.

According to published reports, 13 million tons of MEK was reported to Colombia last year. U.S. investigators in Bogota estimate that over 90 percent of this MEK is used to manufacture cocaine. American intelligence reports indicate that the MEK exported to Colombia cannot possibly be used for legitimate purposes.

If these reports are true, Exxon is making a buck off of the drug epidemic.

After 7 weeks, two letters and several phone calls, the drug czar is uncharacteristically silent.

Just yesterday, Mr. Bennett was in my home State of Nevada to address the annual Executive Forum on Narcotics Control and Drug Abuse. Mr. Bennett takes the time to give forceful sounding speeches, but will not take the time to answer a serious inquiry. He takes the time to travel to the State of Nevada, but he doesn't have the time to respond to the State's representative in the U.S. Senate.

That is an affront to the State of Nevada and to this institution.

Mr. President, we need a policeman, not a politician in the drug czar's office.

In not investigating this matter, Mr. Bennett is taking his title of "czar" a little too seriously—a little too arrogantly.

The American people demand an answer. And I hope President Bush demands an answer from his drug czar, especially today, when the next segment of the war on drugs is being revealed.

Mr. President, I ask unanimous consent to print as part of the RECORD the following news articles and letters to drug czar Bennett.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

JANUARY 5, 1989.

Hon. WILLIAM J. BENNETT,
Director of National Drug Control Policy, Executive Office of the President, Washington, DC.

DEAR MR. BENNETT: A month ago, I sent you a letter regarding the exportation of methyl ethyl keton (MEK) to Columbia by American companies. This chemical is one of the substitutes for acetone in the production of cocaine.

In light of the indictment against Manuel Noriega for arranging the shipment of cocaine-processing chemicals, an immediate response to my letter is essential. I have enclosed a copy of my original letter for your convenience.

I hope to hear from you within the week.

Sincerely,

HARRY REID,
U.S. Senator.

U.S. SENATE,
Washington, DC, December 7, 1989.

Hon. WILLIAM J. BENNETT,
Director of National Drug Control Policy, Executive Office of the President, Washington, DC.

DEAR MR. BENNETT: Your office has the responsibility for coordinating the war against drugs, which a majority of Americans consider to be the most serious threat to our country. The drug epidemic affects crime and health in the United States, our economy and the stability of our foreign relations.

That is why I am calling on your office to investigate the disturbing reports that American companies are linked to Colombian businesses that work hand-in-hand with the Colombian drug cartel to produce cocaine from raw coca leaves.

On Tuesday, December 5, 1989, the Los Angeles Times reported that American companies make most of the solvents used in Colombian cocaine labs. Specifically, Exxon sells millions of pounds of methyl ethyl keton (MEK) to Colombian companies closely linked to the drug cartel. MEK is used legally to make rubber cement. It is also used illegally with kerosene, sulfuric acid and other ingredients to produce the cocaine sold in this country.

Colombia doesn't make any rubber cement. According to the LA Times, "The Central Intelligence Agency warned in a classified report several years ago that normal economic activity in Latin America could not possibly absorb the solvents off loaded at its ports each year."

If these reports are true, major American companies are making a buck off of the drug epidemic. As Drug Czar, you must investigate this abhorrent possibility. You must also take immediate action to stop this murderous and unlawful activity if these reports are found to be true.

Thank you for your cooperation.

Yours very truly,

HARRY REID,
U.S. Senator.

P.S.—I'm available to assist you in anyway you think I can be of assistance.

EXXON DRUG TIES MUST BE PROBED

(By Harry Reid)

Is Exxon, the company that brought us the Alaska oil spill, also partially responsible for the American drug epidemic?

It sounds incredible, but the evidence is disturbing.

Exxon produces methyl ethyl ketone (MEK). Exxon sells millions of pounds of MEK to Columbia. There, MEK is used with other ingredients to produce cocaine from raw coca leaves. This cocaine is smuggled in to the United States and sold on the street at $100 a gram.

According to published reports, 13 million tons of MEK was exported to Colombia last year. U.S. investigators in Bogota, Colombia estimate that 90 percent of this MEK is used to manufacture cocaine. American intelligence reports have also warned that the MEK exported to Colombia cannot possibly be used for legitimate purposes.

Other countries that might be using American-made MEK for cocaine production are Equador and Venezuela.

If these reports are true, Exxon and other MEK exporters are making a buck off of the drug epidemic.

Every time a cop gets killed in a drug bust or rival gangs shoot an innocent bystander, it's because there are people in the United States who use drugs or look the other way when their friends use drugs.

We'll never put the drug dealers or the drug cartel out of business as long as people in this country pass the buck and dodge responsibility for their own involvement in the drug problem.

Companies like Exxon have a responsibility for how their products are used once they sell them. Pretending otherwise is a little like Pilate washing his hands.

When President Bush declared the most recent war on drugs, he called for tight controls on the export of chemicals used in the manufacture of illegal narcotics overseas. That is why I have asked National Drug Czar William Bennett to investigate the link between MEK exports and the cocaine labs in Colombia.

Exxon's response so far has been an extreme disappointment. Instead of responding seriously, they have issued letters and news releases filled with a lot of legal sounding mumbo jumbo.

This is exactly the same response Exxon made during the Alaska oil spill.

They should have learned from the Valdez disaster that stonewalling is bad public relations and bad policy.

MEK is not listed as a controlled essential chemical under the Chemical Diversion and Trafficking Act of 1988—but it should be.

Exxon has said it "worked closely" with the Drug Enforcement Administration (DEA) on the draft legislation that led to this act.

Exxon's defense raises more questions than it answers.

Did Exxon seek to prevent MEK from being listed as a controlled essential chemical?

Since MEK is currently used in the production of cocaine in Colombia, do they favor or oppose changing the 1988 law in order to include MEK?

Do they intend to continue exporting MEK to Colombia?

Will Exxon stop selling MEK to foreign companies that serve as the essential link with the cocaine labs?

So far, Exxon has failed to answer a single one of these questions.

It is not enough to follow the letter of the law, as Exxon claims to have done.

To win the war against drugs, we must follow the spirit of anti-drug laws.

I have introduced legislation to use closed military bases as prisons for convicted drug dealers. Drug Czar Bennett and President Bush recognize that war against drugs must be waged everywhere.

Our efforts are not helped by American companies that export MEK and other ingredients to businesses linked to foreign drug dealers.

Cocaine use in the United States doubled between 1985 and 1988. Much of this increase was due to crack cocaine. Drug abuse is no longer a stranger to Nevada. We are also victims of gangs and drug-related crime. And like the rest of the country, we are tired of excuses.

It's time for companies like Exxon to tell the truth about MEK and the cocaine labs that use this product.

It's also time for the Bush Administration to investigate this abhorrent possibility.

If these reports are found to be true, Drug Czar Bennett must take immediate action to stop this murderous and unlawful activity.

[From the Los Angeles Times, Dec. 5, 1989]

COCAINE HAS A MADE IN U.S.A. LABEL

CARTAGENA, COLOMBIA—For the tanker Catalina, this weeklong journey is to be routine: south from Houston across the Gulf of Mexico, a squeeze through the Yucatan Channel then a dash for home across the Caribbean to this steamy Colombian port.

Nothing unusual about the cargo, either. Among the shipments sloshing in her holds will be close to a million pounds of methyl ethyl ketone, direct from Exxon Chemical.

It is an ordinary solvent, best-suited for producing rubber cement. Colombian customers bought up thousands of tons of the chemical last year—about 12% of U.S. exports.

The trouble is that Colombia doesn't make any rubber cement. Nor does it make nearly enough smokeless powder, varnish or other products to account for the mounting deliveries of MEK and other solvents to its shore.

Instead, authorities believe, its voracious appetite for shipments like the Catalina's is fueled primarily by the needs of a better-known Colombian industry, cocaine.

Solvents like MEK are vital ingredients in the alchemy that transforms cheap coca leaves into cocaine hydrochloride worth $100 a gram. And while the United States is not the only supplier, it is clear that the vast majority of cocaine chemicals are American-made.

Nine gallons in 10 of MEK dispatched by the United States to Colombia are diverted for use in cocaine production, according to U.S. investigators in Bogota. While other solvents are more often used legitimately, they pose similar problems. Perhaps 20% of what the United States exports to Latin America as a whole winds up in the cocaine laboratories, officials fear.

There is no evidence that U.S. manufacturers knowingly abet this process. Not until the chemicals arrive legally in Latin America do they find their way "out the back door" into the hands of cocaine enterprises, investigators believe.

Thus the U.S. Drug Enforcement Administration has found no reason to halt the Catalina, which is due to embark on Wednesday, even though a new law empowers the DEA to block suspicious chemical shipments.

Some U.S. officials hope they can use that law to disrupt the chemical trail, which they regard as more vulnerable than the return flow of user-ready drugs along secretive smuggling routes.

"It's a heck of a lot easier to intercept a tanker-truck of acetone than a few dozen kilos of cocaine," a senior U.S. diplomat said.

The U.S. assault, known as Operation Tourniquet, aims to staunch the flow of "cocaine chemicals" along arteries that stretch from the behemoth petrochemical plants of Texas and Louisiana to tiny jungle processing laboratories along Colombia's Magdalena River.

Those arteries span thousands of miles of pipeline and highway, tanker route and river channel. And the suspects in the stream seem infinite millions of tons of chemicals, countless vehicles and lists of chemical companies that fill five daunting pages in the Bogota telephone book alone.

Critics argue that the knot is simply too big to tighten. In particular, chemical industry officials have warned of the difficulties of squeezing worldwide sources of supply and voiced doubts that such a tourniquet could significantly inhibit the cocaine trade.

But an effort by The Times to chart the chemical trail—based on Commerce Department data, industry documents and interviews with U.S. and Colombian officials in Washington, Houston, Cartagena and Bogota—provided a map of surprising clarity.

Its principal route runs through the single U.S. port of Houston and links only a few dozen U.S. exporters and 270 principal Latin American customers. Compared with the quantity of buyers and sellers that investigators had once feared, "all the big numbers disappeared," said Gene Haislip, deputy assistant administrator of the DEA.

Among the lengthy investigation's most important findings:

The cocaine industry's need for chemicals is enormous. To produce a package of cocaine the size of a two-pound bag of sugar, chemists need 15 liters of a solvent like MEK and a host of other chemicals. The

annual demand for the solvent alone fills hundreds of full-size tanker trucks.

Most of these chemicals come from the United States. In Colombia, where the vast majority of processing laboratories are located, officials believe as much as 80% of the solvents used in cocaine production enter via direct shipments from the United States.

The main trail begins in Houston, where 70% of shipments carrying cocaine chemicals depart. In Colombia, most shipments arrive at the Caribbean ports of Barranquilla and Cartagena.

Many Latin American companies that regularly import American-made chemicals are suspected of aiding their transfer to cocaine enterprises. In letters dispatched last week, the DEA denied "regular customer" status to 41 of those 270 firms—a major step toward cutting them off permanently from the U.S. supply.

The most worrisome U.S. export used in the cocaine trade is methyl ethyl ketone. About 90% of the 13 million tons of American-made MEK imported by Colombia last year was believed diverted to cocaine laboratories.

A small number of companies account for the vast majority of MEK exports and go to considerable lengths to disguise their role. Of five MEK shipments in August and September, three accounted for 99% of the total of 2.06 million gallons. In all three cases, the exporters demanded of the Commerce Department that their identities not be made public.

The Central Intelligence Agency warned in a classified report several years ago that normal economic activity in Latin America could not possibly absorb the solvents offloaded at its ports each year.

In cocaine processing, American-made ether was then the "chemical of choice," a cheap and caustic liquid capable of extracting the valuable alkaloid from a leafy coca paste. Its notoriety—and a resulting crackdown by South American authorities—has helped reduce ether's role.

But that change has done nothing to reduce the American role. The lesser-known new favorites, MEK and acetone, also come almost entirely from the United States.

So far the agency has blocked two shipments: a load of acetone to Mexico, a sometime transshipment point for chemicals bound further south; and a cargo bound for Taiwan of a chemical sometimes used in heroin processing.

The new law required exporters that had formerly dispatched their solvents without warning to obtain the DEA's approval. While it applies worldwide, officials say they are most concerned about shipments to Colombia, where vast quantities of chemicals have been seized in jungle laboratories.

Among other ports of concern are those in Ecuador and Venezuela, where chemical imports have increased sharply. Between 20% and 40% of cocaine chemicals are believed smuggled into Colombia along roads and rivers from those two neighbors.

But more nearly typical of the chemical trail is the Catalina, a 375-foot Colombian-flag tanker that regularly shuttles between her home country and the Gulf of Mexico ports of Texas and Louisiana.

Her scheduled 137,000-gallon shipment of MEK now waiting pickup in Houston was manufactured more than 100 miles away in Baton Rouge, at an Exxon Chemicals plant that is one of the nation's two principal sources of the chemical.

According to documents submitted to the government by Exxon and obtained by The Times, it is headed via Cartagena for Colombia's biggest petroleum company—Empresa Colombiana de Petroleos, or ECOPETROL. The DEA granted approval for the shipment on Nov. 20.

Karel Coors, the Catalina's U.S. agent, said MEK was merely one of many kinds of chemicals the 12-year-old ship frequently carried between the United States and Colombia.

Exxon Chemicals Americas, in response to submitted questions, expressed disappointment that the confidentiality of its scheduled shipment aboard the Catalina had been "breached." Asked whether it was "confident" that the shipment of MEK would be used in legitimate industry, the company did not answer directly.

"Certainly shipments, including all Exxon Chemical shipments, receiving DEA approval have undergone the required reviews to establish they are for legitimate purposes," it said.

U.S. officials involved in the anti-drug effort acknowledged that there was no guarantee that such a shipment—particularly of MEK—would not end up in a jungle laboratory. Once such vast quantities of chemicals reach port in Colombia, they said, they are ever vulnerable to schemes designed to put them in the hands of cocaine enterprises.

Some truckloads disappear soon after they arrive, "pumped at midnight" from storage tanks near the ports to 10,000-gallon capacity vehicles while corrupt Colombia customs inspectors look the other way, according to U.S. officials in Bogota.

For others, the exchange comes a few miles inland, where trucks dispatched to a legitimate delivery point stop off instead at a roadside rendezvous. There they exchange their chemical cargo for a load of a watery substitute and a fistful of cash.

And for still further shipments, the leakage comes somewhere down the chain, as large importers sell solvents to smaller firms, and they to others. In Colombia, authorities say, such transfers are almost bound to end up in drug producers' hands.

Among the enterprises discovered to be stockpiling such goods were a paint company "wholly owned" by the Medellin cartel, U.S. officials said. It simply slowed paint production and shipped the extra acrylic to jungle laboratories. A similar scheme uncovered this summer involved Quimica Esteres, a Bogota firm.

Already this year, in raids on those laboratories and on suspicious front companies, Colombian authorities have seized more than 2 million gallons of chemicals believed likely to be used in cocaine production—enough to process more than 500 tons of cocaine.

That enormous volume is testimony to a problem that, the companies' protests notwithstanding, investigators in Colombia say stems from "laxity on the part of importers." A related weakness came from Colombian police, who "have not been knocking on the door and saying: 'I want to check the records for the 300,000 kilo shipment.' "

Some are optimistic that the new U.S. law might halt some of the leakage. "What we've done now," a senior anti-drug official said, "is to send notice that the eyes of Texas were upon them."

U.S. authorities are careful publicly not to affix blame on the American manufacturers, which cooperated extensively in drafting the new regulations. But privately, some officials evince exasperation at each company's insistence that it is not at fault.

"It's always the other guy," complained one federal agent in Houston who has interviewed chemical industry executives. Added another official: "Colombia is flooded with this stuff, and these guys know it. They've got to know that a good chunk of it is going to the bad guys."

The chemical manufacturers cite competitive reasons for their refusal to publicly reveal the magnitude of their solvent exports, particularly of MEK. On a private database that otherwise provides detailed breakdown of the sources of chemical shipments, major exporters all demanded anonymity.

However, knowledgeable sources said Exxon was the exporter last August of an enormous 150,000-gallon shipment of MEK—more than 10 times the quantity the company plans to ship this week—that also went to Cartagena aboard the Catalina. (The company confirmed only that it was the source of one of two large MEK shipments sent to Colombia that month.) And law enforcement sources reported that the major exporters of the chemical were also its principal manufacturers.

According to industry profiles, the two largest are Exxon and Shell, whose Louisiana plants each have annual capacities of 230 million gallons. Each of the other two producers—a Celanese Corp. plant and an Arco Corp. facility, both near Houston—produces less than 100 million gallons a year.

Insinuations that the U.S. chemical industry might not be doing enough to solve the problem that have produced angry reaction in the past. When President Bush last spring told an audience in Miami that "industry has to do more," Chemical Manufacturers Assn. President Robert Roland shot back that Bush was "misinformed."

Near the port of Barranquilla, flatbed trucks share muddy streets with horse-drawn carts. One truck carries dozens of 55-gallon drums of MEK, painted a vivid blue. Its driver, who says he bought the load from a nearby paint factory, reports that it is headed "to a customer in the interior."

Outside Barranquilla's customs zone, 10,000-gallon tankers line up in hopes of winning bulk loads. Asked whether he knows his expected load of acetone can be used to make cocaine, one driver winks broadly.

"It makes no difference to me," he says.

And in Cartagena, whose majestic harbor has been guarded for centuries by the Castillo de San Felipe and ranks of cannon, Western authorities say there is little effort to guard against the chemical invasion.

The Navy has steadfastly insisted that smuggling poses no problem, a diplomat noted. Customs authorities are generally regarded as Colombia's most corrupt. And once shipments arrive in Cartagena, they are rarely scrutinized by the national police.

[From the Las Vegas Review-Journal, Dec. 6, 1989]

DEA, EXXON FORGET THERE'S A WAR ON

The Los Angeles Times published a helpful chart this week, delineating the chemical process for manufacturing cocaine from raw coca leaves.

Key ingredients, according to the recipe in the Times, are kerosene, sulfuric acid, methyl ethyl ketone (MEK) or acetone, plus a few other items.

Some of these chemical compounds, such as kerosene and sulfuric acid, are commonly available the world over. But few nations manufacture MEK.

Colombian firms do not make MEK, yet Colombia is the cocaine manufacturing capital of the world.

As you know if you have been following the news, the Colombian cocaine kingfish reap fabulous wealth and power by sending thousands of tons of coke each year to feed bad habits in the United States, where a "war on drugs" is rumored to be in progress.

War or no war, the fact is that the United States, in a very real sense, is in league with the cocaine lords.

American companies—apparently with the blessing of the U.S. Drug Enforcement Administration—supply MEK and other chemicals to Colombia, where they are used to convert leaves into lines of cocaine hydrochloride.

The L.A. Times story Tuesday pointed out that Colombian customers continue to purchase thousands of tons yearly of U.S.-made MEK and other chemicals essential to the processing of cocaine.

MEK is a solvent used in the manufacture of rubber cement. But Colombia makes no rubber cement. Nor does it manufacture nearly enough varnish or other products to account for the massive deliveries of MEK.

Colombia is, however, the world's leading producer of cocaine, and, according to the Times, the illicit manufacture of the drug consumes 90 percent of the MEK exported to Colombia by U.S. companies, notably Exxon.

Making 2 pounds of cocaine from coca leaves requires about 15 liters of solvent such as MEK, the Times reported, and this process accounts for most of the 12.9 million pounds of American-made MEK exported to Colombia this year.

U.S. firms do not knowingly sell these chemicals to drug lords, but rather to Colombian companies that U.S. authorities believe are set up with elaborate care to disguise their connections to the drug cartels.

Nonetheless, on the face of it, U.S. authorities must know that Colombia has no legitimate use for nearly 13 million pounds of MEK a year.

When queried on this point by a Times reporter, an Exxon spokesman declared, rather cryptically: "Certainly shipments, including all Exxon chemical shipments, receiving DEA approval have undergone the required reviews to establish they are for legitimate purposes."

The DEA does, by the way, have the power under a new law to block suspicious chemical shipments. If the DEA doesn't find Colombia's odd appetite for millions of pounds of MEK questionable, just what does it take to arouse the agency's suspicion?

As for Exxon, does this company have no shame? Is it devoid of a sense of civic responsibility? Hey, Exxon: There's supposed to be a war on.

[From the Los Angeles Times, Dec. 8, 1989]

INQUIRY URGED ON CHEMICALS USED BY TRAFFICKERS

WASHINGTON.—A senator Thursday called on the Bush Administration to investigate whether chemicals exported by U.S. manufacturers are being used by drug traffickers in Latin America as an ingredient to produce cocaine.

Sen. Harry Reid (D-Nev.) said in a letter to Drug Control Policy Director William J. Bennett that his concern was prompted by a Dec. 5 report in The Times that the vast majority of the chemicals used in cocaine production originate in the United States.

"If these reports are true, major American companies are making a buck off of the drug epidemic," Reid wrote to Bennett.

"As drug czar, you must investigate this abhorrent possibility," he said. "You must also take immediate action to stop this murderous and unlawful activity if these reports are . . . true."

The senator raised particular questions about the role played by the Exxon Corp., a principal exporter to Colombia of a solvent known as methyl ethyl ketone. The Times reported that 90% of the MEK imported by Colombia is believed to be diverted for cocaine production.

Bennett was traveling with President Bush on Thursday and had not yet seen the letter, his spokesman said.

The anti-drug strategy that Bennett drafted this year calls for stringent controls on the export of MEK, acetone and other "essential chemicals."

[From the Associated Press, Dec. 7, 1989]

COCAINE

WASHINGTON.—Sen. Harry Reid has asked federal drug czar William Bennett to investigate whether American companies are selling the chemical solvent methyl ethyl ketone (MEK) to Colombian companies associated with the cocaine trade.

"I am calling on your office to investigate the disturbing reports that American companies are linked to Colombian businesses that work hand-in-hand with the Colombian drug cartel," Reid wrote Bennett on Thursday.

Colombian drug laboratories use MEK, sulfuric acid and other chemicals to produce cocaine from coca leaves.

Reid, D-Nev., specifically said Exxon Chemicals U.S.A. sells millions of pounds of MEK to Colombian companies.

Exxon has replied that all of its shipments have undergone the required reviews to assure they are for legitimate purposes.

[From the Reno (NV) Gazette Journal, Dec. 8, 1989]

REID ASKS EXXON CHEMICAL PROBE

WASHINGTON.—Sen. Harry Reid, D-Nev., called on federal drug czar William Bennett Thursday to investigate charges that Exxon Corp. and other domestic oil companies are selling chemicals to Colombian companies for the manufacture of cocaine.

"If these reports are true, major American companies are making a buck off of the drug epidemic," said Reid, citing published newspaper reports. "As drug czar you must investigate this abhorrent possibility. You must also take immediate action to stop this murderous and unlawful activity if these reports are found to be true."

An article published in the Dec. 5 edition of the Los Angeles Times charged that American companies are shipping the chemical methyl ethyl ketone—commonly known as acetone—to Colombia. The chemical is a vital ingredient used in making powdered cocaine from coca leaves.

In his letter to Bennett demanding the probe, Reid singled out Exxon as a company that sells millions of pounds of acetone to Colombian companies he said are "closely linked to the drug cartel."

The Times article also mentioned Exxon Chemical, a division of Exxon Corp., as a source of the chemicals.

Exxon officials could not be reached to comment on Reid's letter, but in a press release reacting to the news story, the Houston-based oil firm said: "Certainly shipments, including all Exxon Chemical shipments, receiving (Drug Enforcement Administration) approval have undergone the required reviews to establish they are for legitimate reasons."

Bennett, traveling with President Bush, was not available for comment.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BURDICK). The clerk will call the roll.

Mr. KOHL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KOHL. Mr. President, I ask unanimouis consent to proceed for 10 minutes.

The PRESIDING OFFICER. Without objection, the Senator may proceed for 10 minutes.

Mr. KOHL. Mr. President, I am very pleased to join a number of my colleagues in support of S. 1630, legislation to amend the 1970 Clean Air Act. I believe that this legislation is one of the most critical measures which will be debated in the 101st Congress. After 13 years of inaction, this Congress is ready to make a real and meaningful contribution to cleaner air for all Americans.

There is little debate in this country about whether or not the Clean Air Act needs to be updated. There is almost unanimous agreement among the general public, environmental groups, and industry that the current law is inadequate. It does not protect our health, our natural resources, or our wildlife.

Nevertheless, there is considerable debate about the degree to which we need to protect the public health and the environment, the degree to which we need to reduce hazardous air emissions, and the degree to which we need to impose new costs on consumers, industry, and the overall economy. These are all important matters and they deserve a thorough and fair discussion.

They also deserve an honest discussion. I believe that we heard some honest talk on Tuesday when my colleague from Rhode Island, the ranking minority member of the Environment Committee, said, "This bill is going to cost some money. We might as well recognize that. We do not get clean air for nothing."

I might also point out, as many others have already noted, that the costs of inaction will be staggering. Measured in both dollars and human values, the Nation stands to suffer tremendously if we do not act responsibly.

The economic costs of inaction will affect all sectors of our society. We have heard a lot about the health care costs associated with respiratory and other illnesses—and those costs are certainly significant. But I think there

will be other costs, as well. Our farmers will face increasing losses due to pollution-related crop damage. Our commercial and recreational fishing industries will suffer if we allow acid rain to kill fish in our lakes and streams, and if we allow airborne toxic deposition to poison the fish. Our forest products and paper products industries will suffer if we continue to let acid rain damage and destroy our forest resources.

But even more important than these economic costs are the costs which cannot be quantified, the costs that all Americans will pay in terms of quality of life. Are we willing to sit back and do nothing while millions of children suffer irreversible respiratory and lung damage each year because of increasing levels of air pollution? Even if the health care costs for treating these illnesses were zero, we ought not be willing to ask our children to pay the price of pain and suffering.

Are we willing to sacrifice the enjoyment of fishing in the Great Lakes, and eating our catch at the Friday night fish-fry, because the fish are so contaminated that they have been declared unsafe for human consumption? Are we willing to sit back and do nothing while bald eagle populations decline, due to their diets of PCB-laden fish? Are we willing to give up the enjoyment we experience in a beautiful forest in Wisconsin or in New England? Will we sacrifice our sacred national parks, which are losing much of their beauty and their natural resources because of pollution? I think not. These are things which have great value to all Americans, even though we cannot put a price tag on them. These are some of the few things that are still free in life, that are available to all Americans.

Still some people say that this bill costs too much. So will a weaker bill. If we are telling Americans that we want to do the job, then lets go about the business of doing it, and doing it right. We have a chance with this legislation to make a significant improvement in the quality of life for all Americans.

But doing it right does not mean we have to sacrifice economic growth and jobs. I believe that careful deliberation will result in a bill that protects the public health, the environment, and our Nation's economy. I have enough confidence in American ingenuity, in American industry, and in our Nation's work force to believe that the challenge of cleaner air can be met without undermining our economy.

I am proud that my State of Wisconsin has acted on its own, ahead of the Federal Government, to enact its own laws on acid rain and air toxics. Wisconsin has a great reputation for its progressive environmentalism. But no State can do it alone. Wisconsin cannot put up fences around its border to keep out toxics and other pollutants coming from other States. Pollution recognizes no boundaries, so we must enact strong Federal laws to protect the Nation's air quality.

But while I support the enactment of a strong Federal clean air law, I hope that the steps already taken in Wisconsin to reduce air pollution will be given due recognition. Wisconsin's industry and utilities will have to make significant investments in order to comply with Wisconsin's State pollution laws. Our businesses should not be put at a competitive disadvantage relative to competitors in other States by being required to make reductions twice, in effect. Wisconsin residents should not have to watch their jobs go elsewhere because of Federal laws which do not recognize our State's advance efforts to improve the environment.

For example, Wisconsin's acid rain law, enacted in 1985, requires a 50-percent reduction in sulfur dioxide emissions from 1980 levels by 1993, bringing our utilities down to an emissions rate of 1.2 pounds per million Btu—7 years ahead of the Federal requirement imposed by S. 1630. Our utilities and ratepayers should get credit for these early reductions, and should not be required to help other States pay for their cleanup.

Similarly, Wisconsin has enacted a progressive air toxics law which will result in significant air toxics reductions in advance of the deadlines mandated under this bill. If reductions made pursuant to Wisconsin's State law are not recognized by S. 1630, our industries will be put at a competitive disadvantage. Again, they will have to comply first with the State law, and potentially a second time with the Federal law.

This is quite simply unfair. I do not believe that our Federal environmental laws should penalize States that take the initiative to control pollution, but instead should reward those States which have moved ahead on their own.

I am also concerned that southeastern Wisconsin—the metropolitan area which includes Milwaukee, Racine, and Kenosha—will be unfairly penalized by the ozone nonattainment section. The Milwaukee area would be locked into a new attainment schedule and may face overly severe control measures and sanctions on the—prior to the completion of a study which may show that our biggest source of pollution is Chicago, not Wisconsin industries. Even worse, Chicago may have 5 additional years to meet the attainment deadlines, continuing to send dirty air to Wisconsin long after our deadline has come and gone.

At this very time, the Federal and State governments in the lower Lake Michigan region are investing in a $10 million computer modeling system which will accurately pinpoint the sources and movement of pollutants in the region. This urban airshed modeling system is being developed pursuant to a settlement approved by a Federal district court to resolve a lawsuit involving the U.S. EPA and the States of Wisconsin and Illinois.

Until we have the results of this court-ordered study, due out in 3 years, it would be entirely unfair to impose severe restrictions on business and industry in southeastern Wisconsin, who have already done a great deal to reduce emissions, and will continue to do everything reasonably possible to reduce emissions.

I have just outlined several of the concerns which I have with S. 1630, which I intend to address with amendments that I will offer, along with my distinguished colleague and senior Senator from my State, Senator KASTEN. Senator KASTEN will insert the specific language of these amendments in the RECORD with his statement, so I will not bother to repeat that here.

I have several other minor concerns with this bill as it relates to Wisconsin, including provisions related to the volatility of ethanol-blend fuels in ozone nonattainment areas, and several technical provision in the acid rain provision which pose problems for one of Wisconsin's utility's, dairyland power. Senator KASTEN and I have also prepared amendments to address these matters. Furthermore, I will continue to review the acid rain section generally to insure that all of Wisconsin's utilities are receiving due credit for advance reductions made in SO_2 emissions, and Senator KASTEN and I may propose other amendments in this regard.

I would just like to close by noting that all in all, I believe that S. 1630 represents a sound course of action for this Nation, and that enactment of this bill will result in a cleaner, safer, healthier, and more pristine America. The time has come to take action, and I congratulate the Environment Committee for the hard work and diligence that has gone into this bill.

In particular, I am very appreciative of the committee's willingness to include a special Great Lakes section in the air toxics title of the bill, to insure that this great resource will get the protection it needs. Finally, I appreciate the committee's willingness to consider modifications to address Wisconsin's concerns, and I look forward to working with my colleagues in the weeks ahead.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GORE). Without objection, it is so ordered.

TRIBUTE TO JOSE MARTI, CELEBRATED CUBAN PATRIOT

Mr. GRAHAM. Mr. President, this Sunday, January 28, Cuban Americans and friends of freedom in Florida and throughout the world will celebrate the birth of Jose Marti, the martyred Cuban poet and patriot who was born in Havana in 1853.

Like many Cubans today, Jose Marti spent most of his life in exile. He lived many years in New York where he organized Cuba's struggle for independence. At the turn of the 19th century, as today, the Cuban communities in Florida lent their voices to the people in Cuba who were suffering under a tyrannical regime.

In recent months, we have witnessed an incredible display of people power as citizens have swept from power the tyrants of Eastern Europe. The democratic tide has broken over our own hemisphere as well. Throughout the region, freedom-loving people are working hard to consolidate their gains.

If Jose Marti was alive today, he would share our deep disappointment that Cuba remains a glaring exception. But undaunted, he no doubt would be joining Cubans who are continuing to fight for their freedom, to fight for the simple right to choose their government.

Of freedom, Marti said:

> Like bones to the human body, the axle to the wheel, the wing to the bird, and the air to the wing, so is liberty the essence of life. Whatever is done without it is imperfect.

So is life imperfect in Cuba under the authoritarian rule of Fidel Castro—the very antithesis of Jose Marti and all he stands for.

Castro continues to turn a deaf ear. But, Mr. President, if we have learned anything from our experiences in Eastern Europe, it is that freedom-loving people will not be denied.

Jose Marti's cry for freedom is a message for all ages. His ideals and love of freedom inspire all Cubans, and it is that inspiration that keeps alive the hope that Cuba will soon be free.

Marti's words stand as the ultimate challenge to Castro's dictatorship. The following excerpts from Jose Marti's writings are taken from "Jose Marti: Thoughts," an anthology by Prof. Carlos Ripoll, Queens College, NY. I ask unanimous consent that they be printed in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

> He who lives under an autocratic creed is like an oyster in its shell that sees only the prison that confines it and believes, in the darkness, that it is the world. Freedom gives the oyster wings, and the portentous battle heard inside the shell turns out, in the light of day, to be the natural motion of life-blood in the world's vigorous pulse.

> The continuous, frank, and almost brutal debate of open political life strengthens in man the habit of expressing his opinion and listening to that of others. There is great benefit in living in a country where the active coexistence of diverse beliefs prevents that timorous and indecisive state to which reason descends where a single and unquestionable dogma prevails.

LONG BEACH NAVAL SHIPYARD

Mr. CRANSTON. Mr. President, last night, there were reliable reports on the news that Secretary of Defense Cheney has put together a new base closure list. Rumored to be on that list are bases in my State of California, including Long Beach Naval Shipyard.

I am surprised that the Defense Department would consider closing the naval shipyard—the primary facility for repair and overhaul of nonnuclear surface vessels and the facility closest to the homeport of the Pacific Surface Fleet. The facilities at our public shipyards are crucial for our mobilization base—once you close a base like this you lose these facilities and the skills base.

Now, I have supported cuts in our defense spending, and I have supported cuts that will affect my State—only 2 days ago, I was on the floor calling for the end of the B-2 bomber which is produced in California. And, I suported the base closure process we just went through to close 86 bases in which California lost more bases than any other State.

I must question, however, the way in which Secretary Cheney is going about issuing this base closure list. I didn't see the news report myself, but I understand that even Secretary Cheney said that he doesn't believe that these base closings will happen. What's the point then of issuing such a list? After a difficult year in which the shipyard significantly reduced its overhead, Long Beach has emerged even more efficient and competitive than before. What sort of message is Secretary Cheney sending the fine men and women at these facilities? If he really wants to close bases, I recommend that Secretary Cheney work with Congress to establish a process like we did before.

TRIBUTE TO COMDR. JOHN F. WANAMAKER OF THE RETIRED OFFICERS ASSOCIATION

Mr. MATSUNAGA. Mr. President, I wish to offer a tribute to Comdr. John F. Wanamaker, USN-retired, upon his retirement as the deputy director of legislative affairs for the Retired Officers Association [TROA]. This is not the first time Commander Wanamaker has retired. In 1977 his active duty with the Navy ended after an illustrious and highly decorated career of 32 years and service in three wars.

Later the same year, Commander Wanamaker undertook a new assignment for his country as the deputy director of legislative affairs for TROA, a position he has held for some 13 years. During these years, Commander Wanamaker has testified many times before the various committees of jurisdiction in support of military personnel, compensation, and related issues. He has had a great influence on those he has advised because of his professional credibility and depth of knowledge.

Commander Wanamaker should be recognized for his singular effort to prevent the imposition of a user fee which would have been required each time an outpatient visit was made to a military medical facility. In addition, he repeatedly led the charge to block annual attempts to eliminate, cap, or delay cost-of-living adjustments to military pay.

Commander Wanamaker also played a major role in increasing the SGLI-VGLI insurance coverage from a maximum of $35,000 to $50,000 for active duty and reserve military personnel. He was the catalyst who prompted Congress to cap the premiums for our elderly members who still carry the 5-year level term NSLI insurance. Moreover, he contributed greatly to the enactment and modification of the Montgomery G.I. bill which ensures that many young Americans will be able to attend college because of the availability of educational benefits it provides.

Among his friends, admirers, and contemporaries, Commander Wanamaker is affectionately known as "Mr.

Veterans Affairs" for his lasting contributions to the Nation's veterans and their families.

Mr. President, after 47 years of leadership and service to his country, Comdr. John F. Wanamaker will again retire. We shall be forever grateful for his dedicated contributions; he wil be missed. We wish him well.

TRIBUTE TO JUDGE CLEMENT HAYNSWORTH, JR.

Mr. THURMOND. Mr. President, I was deeply saddened last November to learn of the death of one of South Carolina's, and indeed one of the Nation's most distinguished jurists, Judge Clement Haynsworth, Jr., of Greenville, SC.

Born in Greenville, Judge Haynsworth graduated Summa Cum Laude from Furman University in 1933 and from Harvard Law School in 1936. In 1957, President Eisenhower named him to the Fourth U.S. District Court of Appeals. Judge Haynsworth was the first South Carolinian to be named to that court since 1923. He served as chief judge on the court for more than 17 years and wrote more than 500 majority opinions during that time.

President Nixon nominated Judge Haynsworth to be on the Supreme Court in 1969. Unfortunately, the nomination did not pass the Senate, but Judge Haynsworth continued his work on the appellate bench with honor and dedication for years to come.

His contributions to our State and to the fourth circuit are innumerable, and we will be forever indebted to him for the judicial legacy that he leaves behind for future generations to study and to emulate.

Judge Haynsworth was an outstanding judge, a true patriot, and a fine American. We are truly fortunate to have had the opportunity to benefit from his outstanding legal mind, and to have known him as a friend. We will miss him sorely, but the memory of his strength of character and his moral fortitude will never leave us.

My wife Nancy joins me in extending our deepest sympathy to Judge Haynsworth's wife, Dorothy Merry Haynsworth; his stepson, Rufus C. Barkley, Jr.; his sister, Mrs. Walter B. Taylor; his brother, Harry J. Haynsworth III; and his three grandchildren.

Mr. President, I ask unanimous consent that the following articles regarding Judge Haynsworth be included in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the State, Nov. 28, 1989]

CLEMENT HAYNSWORTH

When Clement F. Haynsworth Jr. died the other day in his hometown of Greenville at the age of 77, the federal bench lost a distinguished jurist whose defeat for a seat on the U.S. Supreme Court 20 years ago was a cruelly politicized miscarriage of justice.

He became a federal judge in 1957 when President Dwight Eisenhower named him to the 4th U.S. Circuit Court of Appeals headquarted in Richmond, VA. In 1969, President Richard Nixon nominated Judge Haynsworth to fill the seat left vacant by the resignation of Abe Fortas, whom President Lyndon Johnson had chosen to be chief justice a year earlier.

Judge Fortas' nomination was attacked by Senate Republicans, and his name was eventually withdrawn. By consensus, the ensuing attacks of Judge Haynsworth's nomination were viewed as acts of reprisal by liberal Democrats in the Senate.

Conflict-of-interest charges focused on Judge Haynsworth's ownership of about one-seventh of the stock in a vending machine company at a time when he ruled in favor of a textile firm that did business with the company. The ruling was anathema to the AFL-CIO, which maintained a steady drumbeat of criticism of the nominee during Senate confirmation hearings and debate.

Modest and unassuming, Judge Haynsworth characteristically displayed no discernible bitterness when his ordeal ended and his nomination was rejected, 55-45. Instead, he returned to the appellate bench, where he continued to serve as chief judge with fairness, dignity and keen legal intelligence. Clement Haynsworth's legacy of public service is a lasting and honorable one.

[From the Post & Courier, Nov. 23, 1989]

CLEMENT F. HAYNSWORTH, JR., DIES

GREENVILLE.—Clement F. Haynsworth Jr., whose nomination by President Nixon to the Supreme Court was rejected by the Senate because of judicial ethics and his views on minorities, died Wednesday. He has 77.

Haynsworth died at home after suffering a heart attack, said his wife, Dorthy.

President Eisenhower named Haynsworth in 1957 to the 4th U.S. Circuit Court of Appeals in Richmond, Va., the first South Carolinian to be named to that court since 1923. He spent 17 years as chief justice on the court, writing more than 500 majority opinions, before be retired as a full-time jurist in 1981.

He continued hearing cases on a part-time basis for the court out of Greenville, most recently taking a case last month, his secretary said.

In 1969, Nixon nominated Haynsworth to the Supreme Court to fill seat left vacant by Justice Abe Fortas' resignation. The Senate Judiciary Committee voted 10-7 in favor of the nomination, but reports questioning his judicial ethics arose.

The most damaging reports centered on Haynsworth's participation in a case involving a company that did extensive business with a company in which he owned a one-seventh interest.

In addition, civil rights groups and organized labor opposed Haynsworth's nomination, portraying the longtime judge as insensitive to racial minorities and working people.

In the end, on Nov. 21, 1969, the Senate defeated his nomination by a 55-45 vote.

Haynsworth later said the criticisms of his stance on racial issues were "unfair."

"What happened was we had a terrible practical problem," the judge explained in 1977. "You couldn't jump from complete segregation to complete integration in a moment. The critics felt I didn't press forward as rapidly as they might have hoped."

Friends and colleagues said they were shocked to hear of Haynsworth's death. The judge had had heart problems for the last year, his wife said, but he had continued to work.

Former Chief Justice Warren Burger said, "Clement Haynsworth was one of the outstanding judges in this country. It was a great loss when he was not confirmed to the Supreme Court. Remaining on the court of appeals, he continued to contribute his talents to the public."

Fourth Circuit Chief Judge Sam J. Ervine, who served with Haynsworth in Richmond, said, "I don't have any doubt but that he was one of the really great judges who has served on the 4th Circuit, and I think he was one of the great judges of his era in the country."

Said U.S. Sen. Ernest Hollings, D-S.C., "I'll miss him; he was a special friend and one of the nation's finest jurists. I only regret that the American people were denied his exceptional talents on the nation's highest court."

"Judge Haynsworth was an able lawyer, distinguished judge, true patriot and exemplary citizen," said U.S. Sen. Strom Thurmond, R.S.C. "His decisions on the Circuit Court of Appeals were sound and adhered to the principles for which America stands. He was a tower of strength on that court and his death is a great loss to our state and nation."

"This is a great loss to South Carolina and the nation, for we have lost, not only a selfless public servant, but also one of our most talented jurists," Gov. Carroll A. Campbell Jr., said in a statement.

After becoming senior judge in 1981, Haynsworth continued to maintain his office in the building that now bears his name. He said then he wanted to step down in order to give up "the business of housekeeping" to have time to do "the business of a judge."

When the Clement F. Haynsworth Jr. Federal Building in Greenville was renamed in the judge's honor in May 1983, speakers at a renaming ceremony suggested the gesture was in some small way an apology for the Senate's refusal to confirm the jurist's high court appointment.

At that ceremony, Supreme Court Justice Lewis F. Powell Jr. said the Senate's rejection of Haynsworth was "purely political," and that "injustice was done" by the Senate vote.

Haynsworth spoke briefly at the unveiling of his name on the front of the 47-year-old building and called the renaming "a touching footnote to the history of 1969."

Haynsworth was the wealthiest of 13 federal judges in South Carolina, with investments valued from $2.8 million to $4.6 million, according to a study complied by The Associated Press based on financial disclosure forms for 1987, the latest year such records were available. The figure did not include his annual salary of $95,000.

The funeral will be at 4 p.m. Friday in Christ Church, Episcopal. Burial, directed by Mackey Mortuary, will be in the church cemetery.

He was born Oct. 30, 1911, in Greenville, a son of Clement F. Haynsworth and Elsie Hall Haynsworth. He attended Greenville schools and was a cum laude graduate of the Darlington School, Rome, GA. Haynsworth graduated from Furman University summa cum laude in 1933 and from Harvard Law

School in 1936. He was admitted to the bar in 1936 and joined his family's law firm.

Between 1942 and 1946, Haynsworth was on active duty with the Naval Reserve, attached to the District Intelligence Office of the 6th Naval District in Charleston and then to the Pacific Fleet Amphibious Forces.

He was a member of the St. Andrew Society, Royal Order of the Magna Carter, First Families of Virginia, the Centurian Society, Phi Beta Kappa and the Order of the Coif.

He was on the board of directors of the Greenville Historical Society and was a member of the S.C. Historical Society. He was president elect of the S.C. Chamber of Commerce in 1957 and was a former member of the board of directors of Multimedia, Liberty Life, Southern Weaving, S.C. National Bank and the Greenville Hotel Corp.

In 1970, he was voted Man of the Year by the Greenville Chapter of the Society for the Advancement of Management. He was a member and past president of the Cotillion Club. He was a communicant of Christ Church, Episcopal.

Surviving are his wife, Dorothy Merry Haynsworth; a stepson, Rufus C. Barkley Jr. of Charleston; a sister, Mrs. B. Walter Taylor of Columbia; a brother, Harry J. Haynsworth III of Greenville; and three grandchildren.

TRIBUTE TO MRS. JUNE RAINSFORD HENDERSON

Mr. THURMOND. Mr. President, I rise today to mark the achievements of a noted South Carolinian, Mrs. June Rainsford Henderson who was recently honored with the endowment of a chair in southern and local history at the University of South Carolina at Aiken. I would like to take this opportunity to share with my distinguished colleagues the highlights of her outstanding biography.

June Nicholas Henderson was born on November 30, 1895, at Evergreen, the plantation of her parents, Thomas Hobbs Rainsford and Martha Nicholson Rainsford. Evergreen is located 5 miles south of my hometown, Edgefield, SC.

After moving from the plantation into Edgefield, June and her siblings attended the grade school at that town. She later attended the South Carolina Co-Educational Institute and the College for Women in Columbia, SC. In 1915, June completed her studies at the college and was awarded an A.B. degree.

In 1917, pursuing her interest in books, June enrolled at Columbia University in New York City to study library science. The illness of her mother necessitated her early return to Holmewood, her parents' home in Edgefield, where she taught college preparatory classes for high school students.

June returned to Columbia University in 1920 to work in the catalog department of the library where she remained through 1923. From 1924 to 1926, she served as librarian at Hollins College. She remembers this as one of the happiest times of her life. Then, in 1926, she was called to organize the first library for the new junior college on the campus of Richmond Academy in Augusta, GA. When a new library/media center was built more than half a century later, the history section was dedicated to June, with a portrait and plaque hung in her honor.

While at Richmond Academy, June also began her career as an author. Her first published article of note appeared in 1929 in the Mentor, a prestigious magazine of the day. During this time, June attracted the attention of her future husband, Maj. George Phineas Butler, principal of the academy and founder of the junior college. They married in 1929, and after a honeymoon trip abroad, returned to settle in Chapel Hill, NC.

June earned her second A.B. degree in history and sociology at the University of North Carolina in 1933. Sadly, her beloved husband died of a heart attack later that year. She returned to Chapel Hill and submerged herself in her studies, and in 1934 she was awarded a M.A. degree in history and sociology.

A special ambition of June's had been to work in the Library of Congress. In the spring of 1935, she moved to Washington, DC to work as a special independent assignment researcher. From 1935 to 1938 June studied and organized her material using the vast resources at her command at the Library of Congress. Her work culminated in 1938 in the publication of "Floralia: Garden Paths and By-Paths of the Eighteenth Century". The book met instant acclaim and June became a popular lecturer and literary guest across the Nation.

June returned to Edgefield once again during World War II. She became active in local garden clubs to promote the growing of vegetable gardens to help in the war effort, and also managed to retain her contacts in Washington with frequent trips to the Nation's Capital. On one such trip, she met an Aiken lawyer named Finley Henderson who she married in 1945 and then moved to his hometown.

June's joy in Aiken was the beautiful garden which she created around her new house. She continued to be in demand as a speaker for civic and garden club groups and she also actively worked at propagating shrubbery typical of southern gardens. She was especially interested in developing new varieties. A major success in this area was a holly seedling, which she named "Floralia," for her book. This seedling won her special recognition from the Holly Society of America which both recognized and registered "Ilex Floralia."

It was also during this period in Aiken in the 1950's and 1960's that June became a regular contributor to the garden pages of the New York Times. In recognition of this as well as her collective work, June was presented the Woman of the Year Award by the business and professional women of Aiken in 1960. During this period she also received awards from the National Council of State Garden Clubs and from the Holly Society of America. Tragically, Finley Henderson died in 1968. Following his death, June returned to Edgefield.

Back in her hometown, June resumed her career as a writer and wrote a history of the Edgefield Presbyterian Church. A special project of hers during this period was the restoration of the rectory of Trinity Episcopal Church. Originally built in the 1830's, the structure was in disrepair and in danger of being torn down. June negotiated a lifetime lease with the church and spent several years on its restoration. She made it available for community use and it is still widely enjoyed today due to her dedication.

South Carolina Circuit Court Judge Marvin M. Mann, one of June's most eloquent admirers, once said, "where she is personally known, her literary attainment, her personal charm and her stately beauty all seem deliberately designed to have been blended into one, just to show what her creator really could do."

Mr. President, June Rainsford Henderson is a talented women whose contributions to her friends, family, and community are invaluable. The establishment of the June Rainsford Henderson chair of southern and local history at the University of South Carolina at Aiken is an appropriate and well-deserved tribute, and I am proud to have had the opportunity to speak at the dedication ceremonies and take part in this important event.

TRIBUTE TO SENATOR MARGARET CHASE SMITH ON HER 92D BIRTHDAY

Mr. THURMOND. Mr. President, during the recess between the 1st and 2d session of this 101st Congress, one of the most lively, interesting, and historically significant Members of Congress in recent memory celebrated a birthday. I would like to take this opportunity to briefly pay tribute to this remarkable lady, Senator Margaret Chase Smith of Maine, who marked her 92d birthday on December 14, 1989.

Senator Smith was the first woman in the history of the United States to be elected to both Houses of Congress. She served in the U.S. House of Representatives for over 8 years before moving to the U.S. Senate, where she served for 24 years. I worked with her as a member of the Armed Services Committee, where she championed the cause of the National Guard and Reserves and exhibited a tremendous

sense of dedication and commitment to defense in general.

I recently read that Senator Smith was last seen snowmobiling in Maine. Evidently, she is enjoying life to the fullest, and I send her my best wishes for continued health and happiness.

TRIBUTE TO THE CLEMSON UNIVERSITY FOOTBALL TEAM GATOR BOWL PERFORMANCE

Mr. THURMOND. Mr. President, I rise today to pay tribute to Clemson University for their fine performance at the Gator Bowl in Jacksonville, FL, on January 1, 1990. With hard work and determination, Clemson has brought home a bowl trophy for 4 consecutive years. The entire team and coaching staff deserve to be heartily commended for yet another outstanding performance. In addition, the able president of Clemson, Dr. Max Lennon, should be congratulated; and on the date this game was played the skillful coach was Danny Ford.

I would also like to congratulate both Clemson and their Gator Bowl opponent, West Virginia, on the high level of sportsmanship and athletic prowess that was exhibited during the game. The spirit of football, one of our greatest native American sports, was upheld honorably by all participants.

Again, I extend my congratulations to the players and coaching staff at Clemson for a game well played. We are very proud of you in South Carolina, and we wish you all the best for the upcoming season.

HURD WINDOW OF HOPE

Mr. KASTEN. Mr. President, a hero is someone who points the way for the rest of society, providing an example to help the rest of us decide how to deal with important problems. I'd like to call the Senate's attention today to some heroes we have in my home State—the men and women of the Hurd Millwork Co. in Medford, WI.

The Hurd Millwork Co. has taken action to help address one of the most serious social problems confronting the American community—the problem of homelessness. In a land of plenty, we see these homeless individuals roaming the streets, many of them sick, addicted, and unable to find shelter.

The Hurd Co.—a manufacturer of high performance wood windows and patio doors, has tackled this issue. The company has pledged to contribute 50 cents to a homeless shelter program for every window specified by its architect clients in their building plans.

The Hurd "Window of Hope" pledge program will support the Search for Shelter Fund in Washington—and be used for direct assistance to shelters all over America.

Mr. President, this is not just a window of hope for some homeless people. It is a window of opportunity for all Americans, because it demonstrates the depth of caring and community spirit of which our citizens are capable. The Hurd Millwork Co. deserves a hearty salute for this important initiative.

REPUBLICAN LEADER APPOINTMENTS TO THE CONGRESSIONAL AWARD BOARD

Mr. DOLE. Mr. President, pursuant to Public Law 96-114, as amended by Public Laws 98-33, 99-161, and 100-674, I hereby appoint the following individuals as members of the Congressional Award Board:

William Russell King, of Virginia; and

Michael L. Lunceford, of Texas.

TRIBUTE TO MAJ. GEN. REGINALD C. HARMON, USAF (RETIRED)

Mr. DIXON. Mr. President, I rise today to honor Maj. Gen. Reginald C. Harmon, USAF (ret.), the first judge advocate general of the Air Force. February 5, 1990, will be his 90th birthday.

I am especially proud of General Harmon's strong roots in my State of Illinois. General Harmon was born February 5, 1900, on a farm near Olney, IL. He received his J.D. from the University of Illinois, and practiced law in Illinois from 1927 to 1940. From 1929 to 1933, he served two terms as mayor of Urbana. IL.

In 1940, General Harmon entered active duty, and during World War II represented the Army Air Corps in its industrial expansion program. In 1948, he became the first judge advocate general of the Air Force, and served in that position until he retired in 1960. He is one of those responsible for making the Office of the Judge Advocate General of the Air Force the outstanding legal organization that it is today. He also received numerous military decorations during his military career, including the Legion of Merit and the Distinguished Service Medal.

After his military retirement, General harmon continued his public service. He served 12 years as executive director of the Air Force Aid Society, and helped build it into a multimillion dollar charitable organization for emergency relief and educational assistance for Air Force personnel. In addition, he was president of the board of trustees of the National Presbyterian Church.

We wish General Harmon "Happy Birthday," and salute him for his service to his country.

PERSONAL HEALTH CARE

Mr. BURDICK. Mr. President, in these times of high-technology, highly specialized health care, it has become increasingly difficult for health care providers to establish close, personal relationships with their patients. However, taking the time to cultivate such a relationship can mean a lot to the patient and can also be a valuable experience for the provider. In the December 8, 1989, issue of the Journal of the American Medical Association, Dr. Edwin C. James, dean of the University of North Dakota Medical School, describes such a relationship he had with one of his patients. On behalf of Senator CONRAD and myself, I ask unanimous consent that a copy of Dr. James' article be inserted in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Journal of the American Medical Association, Dec. 8, 1989]

SACKS OF POTATOES

Chris was a 71-year-old farmer from Hoople, North Dakota, in the heart of the Red River Valley farm country. A sign at the edge of town proclaimed it "The Potato Capital of the World." We first met at 4 o'clock on a frigid February morning after his transfer from a small rural hospital.

He underwent emergency surgery to repair a stomach rupture leaking into his chest. His incision extended from his back around the left side of his chest to an area below the nipple. Chris recovered, but later required resection of his left costal margin because of infection. This second incision extended from his xiphoid process, paralleling the costal margin to connect with his initial incision below the nipple. A final scar in the outline of a hockey stick was thus created. Indeed, in a state where the sport of hockey reigns supreme, Chris and I often referred to his two wounds as reflecting the hockey-stick approach to chest surgery.

Eventually Chris returned to his family and the small farming community where he lived and worked. Frequently he would call on the pretext of needing a checkup: "Doctor Ed, I think I'd better see you. I'm having just a little touch of soreness right there in the incision and a bit of discomfort when I lie on my side." He would then painstakingly point out how things were going with his eating and swallowing, his incisions, and his weight. Sometimes he'd add, "I don't think I have a fever, but I'd better come and get an examination anyway, just to be on the safe side."

Chris would be examined while we talked with students and residents about his unique problems. He enjoyed having them probe and study his incisions, listen to his heart, and ask him questions: he reveled in the importance of his role as patient and his small contribution to their education. He volunteered to attend physical diagnosis classes, so sophomores could easily palpate his beating heart because of the absence of his rib margin.

Mostly, though, I think Chris came to see me. A close bond had formed between us during his illness and long recovery process, a bond his wife Evie also shared. "Doctor Ed, when are you coming up to the farm?

Planting [or harvesting, depending on the time of year] will begin, let's see, in about 2 or 3 weeks." Then, we'd work out a time, usually in the morning, for me to drive to Hoople as a guest of his family. One occasion was Chris and Evie's golden wedding anniversary, celebrated country style, with cut garden flowers in mason jar vases on the tables.

Always, we'd have marvelous lunches of homemade breads and pickles, hot turkey salad or ham, and pots of hot coffee. I can never forget one scrumptious dessert: white cake with crushed fresh pineapple and Cool Whip. Afterward, Chris and I would tour the farm, check the warehouses (usually filled to the brim with potatoes), even test the farm equipment, if he thought I needed more insight. He was most patient with my ignorance of farming. I met his brothers and most of his nephews, and was even taken to the nearby home of one of his friends, a former patient, who didn't recognize me in my farmer's jacket.

In loaned overalls I rode a harvester and drove a large tractor, with one brother helping me to cruise a decidedly zigzag course across an open field. My surgical incisions are much straighter than the line I plowed that day, much to Chris' amusement. We explored the original homestead site, reminiscing about earlier harsh North Dakota winters, when merely surviving was so difficult. Then, when I was ready to leave, Chris would produce a large sack of potatoes that he insisted I take. Often he brought sacks of potatoes along on clinic visits, requiring that I accompany him to my car for the transfer from his truck.

Chris died suddenly years later. I often think of him and, invariably, my thoughts wander to those green potato fields, recalling those sacks of potatoes that somehow act to reinforce the memories of our visits. I was out of town when he died and couldn't return for the funeral. His 10 pallbearers were his nephews, all but 2 bearing his name. He is buried in the small cemetery adjacent to his church, across from his white farmhouse with the horse chestnut tree out front.

Sometimes, surgeons are thought of as not being "real doctors" because they don't develop close ties with patients and their families. Of course we're real doctors, but there's some basis for the misperception. In a modern medical age loaded with high tech, there's decreased focus on primary care and increased emphasis on development of regional medical centers and ultraspecialization. It may be that we don't take the time to become more involved in closer patient relationships. All too often, when these do occur, they are later remembered as unique memories, triggered by the recollection of a name, a close personal bond, a special experience, or, as in the case of Chris, a sack of potatoes.

ETHICS REFORM AND CAMPAIGN CONTRIBUTION LIMITS

Mr. PRESSLER. Mr. President, I rise today in support of the concept of the campaign finance reform bill Senator MCCONNELL is circulating, and expect to cosponsor it. The time for tougher campaign spending and ethics legislation is long overdue.

The U.S. Congress is in the midst of a campaign finance crisis. Republicans have Republican bills and Democrats have Democratic bills. I hope we can find a middle ground this year so we can enact meaningful bipartisan reform legislation. I urge all my colleagues to take action to eliminate abusive campaign contribution practices.

The McConnell bill address major abuses that are still occurring with campaign finance contributions. It denies tax-exempt status to any organization that receives donations solicited by a candidate or public official. Also, it imposes limits and disclosure on contributions to any State or Federal political action committee [PAC] and other political organizations. I hope this can be developed into a truly bipartisan effort. If not, then let's find out what can be, but let's get going.

In recent years a number of campaign finance and ethics reform packages have been proposed, but each has failed to secure bipartisan support. I supported the ethics reforms in the ethics/pay raise package last year, but was forced to vote against the overall package because of my strong opposition to a pay raise for Members of Congress. The legislative appropriations bill last year included provisions to ban mass mailings. That legislation could have corrected the abuse of the Government subsidizing incumbent candidates' for campaign mailings, but it did not survive in conference committee. The Senate did enact meaningful reform later, but unfortunately the House failed to follow suit. In addition, I support a ban on honoraria. That issue should be decided soon, as well.

The time has come to break the pattern and go forward with effective, meaningful, bipartisan campaign finance reform. Let's take positive steps this year toward cleaning up Congress.

LIMITATION ON THE USE OF B-2 BOMBER FUNDS

Mr. CRANSTON. Mr. President, today marks the beginning of the end for the B-2 bomber, a billion dollar bomber we cannot afford and do not need.

Today, with my distinguished colleague from Vermont, Senator PATRICK LEAHY, I am introducing the B-2 termination bill.

I would like to send to the desk a copy of that bill, and Senator LEAHY's statement, and ask that it appear in the RECORD after my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. This legislation is designed to stop funding for any new production starts for the B-2. This legislation is designed to terminate what will prove—if it is built—to be the most expensive weapons system ever bought by mankind.

The Senate is on notice. The B-2 termination bill marks the launching of a sustained campaign to end this irresponsible B-2 weapon buying spree. We will be back again and again debating the merits of the B-2, obtaining rollcall votes, and rallying grassroot support until we prevail. I will continue to expend every reasonable effort to achieve a majority in Congress to terminate the B-2. It is clear to me that the time to terminate the B-2 is now.

For too long the details of the B-2 have been shrouded in secrecy, precluding public debate and effective congressional scrutiny. Last fall we began to develop the public record on the merits of the B-2 bomber. Even then, the debate during consideration of the Defense appropriation bill did not occur until the early hours of the morning, when many did not hear in the Senate and outside of the Senate. Let us consider this program in broad daylight and in the glare of the public eye. Let us debate the merits of this program until the many speeches made in its defense are finally revealed.

I have no illusions. This will be a long, uphill journey. We begin today with 32 votes in hand from last fall's rollcall votes. And in the short time since I came to this Chamber last fall to declare my opposition to this program, a number of key members of the defense community have joined us in questioning the merits of proceeding with new production on the B-2. It seems that the tide is beginning to turn.

The Air Force is determined to win this battle. Anticipating our efforts to end this unnecessary program, the Air Force has gone on the offensive—holding a strategy retreat and even stooping to promotional gimmickry during the recent invasion of Panama. The Air Force decision to send the F-117A, the Stealth fighter, to bomb an airfield in Panama, despite the lack of significant Panamanian air defenses, was a charade. It was a publicity stunt in the middle of a military operation. The only rationale for sending the F-117 was to shape the debate on the future of Stealth technology. The point was certainly made—sending strategic aircraft on conventional missions highlights the fact that we do not need these high-priced toys. We could have accomplished the same mission at less risk with other aircraft.

I am keenly aware that the debate will not be about the B-2 bomber alone. During consideration of the budget resolution in the coming months, we can expect a guns versus butter debate of historic proportion. Our goal is to save the more than $100 billion that the B-2 would cost, thereby, beginning to realize a substantial peace dividend, spending some of these savings on crucial environmental, education, housing, health, antidrug, anticrime, and industrial com-

petitiveness programs, not to mention deficit reduction. Although there are sound defense rationales for ending production of the B-2, the obscene costs of the B-2 bomber will surely be at the center of our budget debate.

Nobody—not even the Pentagon—would claim that the B-2 Stealth bomber is "worth its weight in gold." The sad and horrifying fact is that the B-2, the world's first $1 billion bomber, costs its weight in gold.

Figure it out for yourself. Based on our experience with the B-1, which ended up costing twice as much as original estimates, the life cycle cost of the B-2 is $1 billion apiece, and a bit more. Today's price of gold is $406.10 an ounce, or $6,544 a pound. The B-2 weighs 174,000 pounds.

That comes to something over $1.1 billion in simple math, simple math but crazy logic. Imagine building an airplane that literally costs its weight in gold.

Here I have a gold version of the B-2; a ridiculous concept to build a plane worth more than its weight in gold.

Even Midas, who could turn everything into gold just by touching it, would never have been that wasteful.

I believe we can help avoid a tax increase, or at least cut back on the tax increase that may become necessary at some point, by saving money on costly, unnecessary programs like the B-2.

Last fall I proposed that if we keep throwing dollars at this aircraft we might as well adopt a new B-2 budget accounting system.

Let me demonstrate just one moment on the chart I have available here for my colleagues, and others watching, precisely what it is here that we are talking about.

At a total 30-year lifecycle cost per plane of at least $1 billion a pop, we could more than double annual federal spending on AIDS research and prevention programs—$1.6 billion—if we cancelled just 1½ of these B-2 bombers.

Or here we have the total 3-year budget for the Simon-Cranston bill providing aid to Poland and Hungary—some one billion dollars. Now, there are those who have called for a reallocation of foreign aid to meet this growing need. Well, we could double the aid we send—double it, without cutting out the aid we send to Egypt and Israel, and really put the heat on communism in Eastern Europe for the life cycle cost of just one B-2 bomber, a great investment in democracy. We spend billions and trillions to prepare to defend against communism. Now we have communism receding, collapsing in Eastern Europe. We should be able to invest some money in democracy there. That has been our goal all along.

Or let us bring this spending priorities question closer to home. We have all but eliminated Federal aid to cities. But if we were of a mind to, the Federal Government could pay the city of San Jose's budget—and have change left over—with the 30-year costs of just one B-2 bomber.

Obviously this holds true for other cities. They no longer have revenue sharing. They have difficulties. This is one way to help.

Here we have annual spending on Headstart, one of the best programs ever devised to help kids to get a start in life, disadvantaged children, annual spending, which provides only for 20 percent of students eligible for this valuable program. Under present budgeting for the cost of only four B-2's we could have all eligible children enrolled in the Head Start Program, a great advance for our society.

What about the war on drugs? Do you really imagine that we will be sending B-2's to Colombia for the war on drugs? Of course not. We can match the amount of money the Federal Government provides each year for treatment of Americans trying to overcome their drug dependencies with the funds saved from canceling just 1.2 planes. For an additional cost of just one-half of one B-2 per year, we could pay for all Americans seeking help to break their drug dependency, and thus strike a real blow to win the war on drugs.

You want to house the homeless? For the cost of one-tenth of one plane, barely visible on the chart here, we could finance the entire McKinney Act, our landmark Federal program to aid homeless Americans.

As the chart demonstrates, finally we could match all EPA spending on the environment by canceling just 5½ planes and do more than we are now doing to protect the environment.

The budget numbers for fiscal year 1991 have not been released yet, but it is very clear that the United States will never build the 132 B-2 bombers the Air Force wants. I suspect even the most ardent backers of the B-2 here in Congress realize this fact. I am strongly opposed to accepting any stretchout compromises to build a few less B-2's over a few more years. Such efforts to evade a final decision would simply drive up the unit costs we will waste on what is already a demonstrably unnecessary program. Indeed, in the past, Secretary Cheney has pleaded with Congress either to fully fund the B-2 or to kill it outright, arguing that we should not "nickel and dime" it. And when the House slowed down production modestly in September, the Air Force claimed this action would add another $3.3 billion to program costs.

We should not squander our resources pursuing a defense plan for the 1990's which has been written using a road map from the 1950's. The B-2 adds nothing to our ability to deter attacks from the Soviet Union or retaliate in the event of all-our war. We need to abandon the cold war mentality which suggests we have to have this plane just because the technology is available. If the Pentagon were to come up with a proposal to reduce the number of B-2's we require, the reduction, I suspect, would be driven by budgetary realities alone and not based on an assessment of our real defense needs.

When we consider the fiscal 1991 defense authorization bill, we can expect a heated debate on strategic priorities for the 1990's and beyond in light of the dramatic changes taking place in Eastern Europe and the Soviet Union. Although the Iron Curtain is melting, the Bush administration is proceeding blindly on automatic pilot. The swift erosion of Warsaw Pact cohesion and rapid improvement in United States-Soviet relations reduce the need for yet another modern strategic bomber. We are safe militarily. We can afford to be safe fiscally.

There are several key points to consider during the coming debate:

First, the B-2 bomber is not required to enhance our nuclear triad.

Deterrence central to our national security has long relied on the notice of having a triad of land-, sea- and air-based means of delivering strategic weapons to targets. The United States has spent more than $27 billion to modernize its bomber leg, buying 100 fully capable B-1 bombers. It is downright irresponsible to argue that we must now immediately set forth to build an entirely new bomber force at a total lifecycle cost of some $1 billion per plane. The B-2 proponents insist that these whopping new expenditures are required to ensure an ability to penetrate Soviet air defenses. But air-lauched cruise missiles [ALCM's]—themselves a stealthy radar and anti-aircraft evading system—can readily penetrate and reach thousands of targets in the Soviet Union in the unlikely event of an all-out nuclear war. Thus, we clearly do not need the B-2 in order to maintain a modern triad deterrent.

Second, the B-2 bomber is not required to enhance the U.S. bargaining position in START talks.

The B-2 never has been and never should be a bargaining chip at issue in Geneva. The key outstanding issues at the START talks are curbs on mobile land-based systems, cuts in land-based ICBM inventories, limits on sea-based missiles, and verification requirements. True, the emerging START pact might place a high value on air delivery systems. If it proves essential to increase our nuclear delivery capabilities as a result of a START accord, then we could move at considerably less cost to deploy ALCMs on our existing B-1's. But Congress should utterly reject any Pentagon strategem to

pressure us into funding the B-2 as a condition for Air Force backing of START. Let's end this practice of giving the military new weapons systems in exchange for accepting new arms control agreements. The fact is that the B-2 is not needed to pursue and complete START.

Third, the B-2 bomber is a plane without a mission.

We have spent more than $22 billion in research, development and initial procurement to find out what Stealth technology might offer us. Although certain U.S military officials sought to hide costs and limit public debate, their express justification for funding the B-2 was clearly on the record. The B-2 program's mission was to produce an air-based system capable of delivering strategic weapons onto Soviet targets and to assault mobile Soviet strategic systems in the event of a protracted nuclear war.

But it is now clear that the B-2 offers no cost-effective improvements in performing these missions. On the first point: It is clear that our brand new B-1 fleet—together with upgraded B-52's—can already provide an air-based capability to penetrate Soviet air space using cruise missiles. On the latter point: Despite years of on-the-record Pentagon promises that B-2 aircraft would provide an ability to hit Soviet mobile targets, the Air Force has admitted that B-2 can't do the job. In September, Air Force officials conceded to Congress that "attacking highly mobile targets is neither the reason for the B-2 nor is it likely to be accomplished with great efficiency" by the plane.

Some B-2 advocates maintain that the B-2 will force the Soviets to dedicate substantial resources to develop countermeasures. In fact, Soviet spending on air defense has remained relatively constant for more than two decades—despite United States development of cruise missiles and B-1's which can compromise Soviet defenses. In light of the current economic crisis in the Soviet Union, it is unrealistic and misleading to argue that the Soviets would squander billions to deter the B-2.

The $22 billion we have already spent on the B-2 has also established that while some of the Stealth radar-evading technology is impressive, it is not guaranteed to work. Significant advances have been publicly reported in developing technology which could detect air turbulence caused by B-2 type aircraft. The B-2 bomber might well be detected and compromised—at considerably less cost than it will take to deploy it—by long wave radar, by radar projected from above, and by multistatic radar. Thus, the B-2 is not likely to fulfill any of its original goals.

Before I close, I want to make a final observation regarding the impact of this program on my home State.

If we are to change our way of operating in Washington, and stop treating the cold war and the defense budget as a jobs program to be funded by borrowing money from future generations, we are all going to have to propose sacrifices, beginning at home.

The vast majority of funds for the B-2 would be spent in my home State and could provide thousands of jobs. I deeply respect the individuals involved and the wondrous technology they have labored to produce. When the B-2 is finally halted, as I am confident it will be ultimately, I pledge to work very hard to provide alternative opportunities for the talented men and women of my home State who have applied their skills to this effort. I will work to provide jobs that can lead to substantial improvements in our quality of life while expanding our GNP. The space station, mass transit, and highway improvements are among the many areas where aerospace and engineering and high-technology skills can be reapplied to programs promising greater benefits to Californians and other citizens of this country than the B-2 offers.

But leadership on cutting the budget deficit and reordering our priorities has to begin at home.

I invite my colleagues to join me in this effort. I urge my colleagues to cosponsor the B-2 termination bill, and I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2009

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. LIMITATION ON USE OF APPROPRIATED FUNDS FOR PRODUCTION OF THE B-2 AIRCRAFT

Notwithstanding any other provision of law—

(1) amounts appropriated for the Department of Defense may not be obligated or expended to commence production of any B-2 aircraft; and

(2) amounts appropriated for the Department of Defense for the B-2 aircraft program may be expended only for—

(A) the completion of B-2 aircraft the production of which was commenced with funds appropriated before the date of the enactment of this Act;

(B) research and development in connection with the B-2 aircraft program; and

(C) flight testing of B-2 aircraft.

THE PRESIDENT'S SECOND NATIONAL DRUG CONTROL STRATEGY

Mr. MOYNIHAN. Mr. President, in June 1989 I introduced legislation, S. 1193, to provide drug treatment in Federal prisons. This bill recognized that over 43 percent of persons entering Federal prisons are self-described substance abusers. I am pleased to see that the President has in large part incorporated S. 1193 in his second Drug Strategy Report to Congress. In addition, I commend the President for including in his plan a proposal to provide extra funds for five high intensity drug trafficking areas, including the New York metropolitan area. Nowhere are drug treatment, education, and law enforcement needs greater than in New York City.

I regret, however, that the proposal released today fails to follow our intent in the Anti-Drug Abuse Act of 1988. The act created Secretary Bennett's office and called for a balance between efforts to reduce the demand for drugs and efforts to reduce supply.

On December 12, 1989, I stated at a Senate Judiciary Committee hearing that we have an epidemic—the term being used in the strict medical sense. Drug abuse in this country is as surely an epidemic as were the influenza and polio scourges earlier this century. Drug addiction is a disease of the brain—a disease, Mr. President. And as such we must respond to it as we would respond do any health crisis. On that day last December, I called on Secretary Bennett to support the Drug Abuse Treatment Act which I introduced in September to provide treatment on request to cocaine addicted pregnant women and children through the Medicaid Health Insurance Program.

I also reminded him of his duty to abide by the law. Namely, the Anti-Drug Abuse Act of 1988 in which Congress explicitly called for treatment on request.

Last September 5, President Bush sent us his first strategy report. In it, less than 30 percent of funding was earmarked for demand reduction—to wit, treatment, education and prevention efforts; and over 70 percent for supply reduction—interdiction and law enforcement. The Congress recognized that the spending priorities of the President were flawed and a bipartisan majority in the Congress dramatically increased the funds available for treatment—an $800 million increase over the President's request. The President's second strategy repudiates this bipartisan consensus and again ignores the mandate of the Anti-Drug Abuse Act of 1988. Once again the President proposes a budget that devotes 71 percent of funding to supply reduction and a meager 29 percent to demand reduction.

The President's strategy argues that "many demand reduction activities rely less on capital outlays and more on community involvement and individual commitment." I submit, Mr. President, that all the individual commitment in the world will help little if there are no drug treatment programs

available. Those who wish to free themselves of addiction must wait months to enter treatment programs for help.

Simply put, the paper issued today does not even mention, much less attempt to fulfill the mandate we wrote into the law—treatment on request. Mr. President, I call upon the administration to obey the law and begin to fund treatment at the same level as law enforcement. It is regrettable that so far the President has declined to do so.

AIDS UPDATE

Mr. CRANSTON. Mr. President, according to the Centers for Disease Control, as of December 31, 1989, 117,771 Americans have been diagnosed with AIDS; 70,313 Americans have died from AIDS; and 47,458 Americans are currently living with AIDS.

Mr. President, 5,530 more Americans have developed AIDS and 3,820 more Americans have died from this horrible disease since I noted these statistics prior to adjournment last November.

Mr. President, today and tomorrow, the National Commission on AIDS will be conducting hearings and site visits in Los Angeles. These will be very important hearings. With the second highest number of cases in the entire country, Los Angeles in many ways represents a microcosm of the epidemic. The gay community in Los Angeles has been devastated by AIDS. At the same time, AIDS is increasingly impacting various ethnic communities in Los Angeles and is spreading among different population groups—substance abusers, women and children, and young people. How we meet the health care needs, as well as the education and prevention needs, of culturally, geographically, and economically diverse populations is the challenge of AIDS in the 1990's.

This year, the Congress will be considering an omnibus AIDS care initiative. It will include the major provisions of legislation I introduced earlier—S. 14—as well as other components to help communities respond compassionately and cost-effectively to the AIDS epidemic. The public health systems in New York, San Francisco, and elsewhere are under tremendous strain as the epidemic worsens. We must act decisively and soon for the benefit of the individuals who are suffering with this disease and for the benefit of the communities which must provide their care.

Mr. President, I would like to share with my colleagues an article from the Washington Post health section, December 12, 1989. Entitled "Life and Death on Ward 5-A," it describes the challenges of working in the Nation's oldest dedicated AIDS unit at San Francisco General Hospital. It's a moving tribute to the dedication of San Francisco's health care professionals and demonstrates what can be done to ease the pain of people with AIDS when a communtiy cares.

I ask unanimous consent that the article be printed in the RECORD at this time.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LIFE AND DEATH ON WARD 5-A

(By Jane Meredith Adams)

SAN FRANCISCO.—At age 30, Susanna Kiely has seen enough despair and death for a lifetime, but that is not what concerns her now. This morning she strides into Anthony Ragusa's hospital room with fresh sheets and towels. She has promised him a bath.

"Do you want some bath oil?" she asks.

"Oh yeah," he says.

Ragusa, 43, leans on a cane. Kiely is by his side, wheeling a portable oxygen tank that connects to his nose. Together they move down the hall to the bathtub room.

The AIDS ward at San Francisco General Hospital, where Kiely works, is the oldest inpatient AIDS ward in the nation. Since 1983, the grief of this city has passed through its doors; of the 4,609 San Franciscans who have died so far because of AIDS, more than a quarter were cared for by the nurses here.

For these nurses, as for the thousands of AIDS caregivers across the country, the vastness of the epidemic translates into the particular: helping a bed-ridden patient into his first bath in three weeks, listening to a woman who is afraid to tell her children she is going to die, changing the sheets six times a day for a man with chronic diarrhea—and joking with him about it.

"There's nothing I can do about the AIDS virus, but there is something I can do in the work I do," says Kiely. "When I'm with a patient, I think 'What are we doing now?' Not, 'Are you going to die? Are you never going to go home again?'

"I have my moments," she says simply. "I wonder, 'Where did AIDS come from? Why him? Why now? Why, why, why?' All those why questions. I deal with it. It's part of my job. I have a profession that is applicable, that takes away the helpless feeling. I'm doing something."

On the ward, Kiely and Ragusa walk back down the hall to his room. "I feel brand-new when I get a bath," says Ragusa, climbing into bed, his dark hair and mustache neatly combed.

He is the most well of her three patients today, recovering from pneumocystis carinii pneumonia, a once-rare form of pneumonia that is a leading cause of death for people with AIDS. After losing 30 pounds in three weeks, he is maintaining his weight.

"When I first came in," he says, leaning back on a pillow, "I was depressed, and a nurse came in and hugged me and consoled me and let me cry. When I get better and out of here, I want to come back and be a volunteer."

Kiely moves next door to see Vern, whose family asked that his last name not be disclosed. He is fighting pneumocystis carinii, diarrhea, wasting syndrome and cytomegalovirus retinitus, which can cause blindness. He is 43. Three weeks from this day in the hospital he will be dead.

As Kiely comes in, he waves his arms in front of him, trying to grasp something in the air. "It's claustrophobic," Kiely says of the oxygen mask that keeps him alive. The machines in the room make a noise like the filter on a swimming pool. Vern coughs painfully, as if he is literally coughing his guts out.

"Want me to clean some of that out of your mouth?" Kiely asks. He says something; from behind the oxygen mask, his voice sounds like it is under water. She pauses a moment and strokes his forehead with her hand. "Okay, sweetheart," she says.

She moves efficiently around the bed. As she walks, she smooths his sheet. She pulls a tube from the wall and suctions mucus from the back of his mouth that he is too weak to cough up. The day before, because his swallowing reflex was weak, she put a tube into his nose to connect with his stomach.

"I talked with his lover about it," says Kiely. "He said it was okay for supplements and medication but not for it to be life-sustaining."

When she turns away, Vern swings his legs up to the bedside railing. They hang there, stick-thin, bare except for his black socks; he is too weak to pull them over.

"Vern, you can't get out of bed," Kiely says. "I know you feel like you need to but you can't." When he was on another ward waiting to be transferred to Ward 5A, he got out of bed, fell and cut his head.

She steps into the hall and picks up a telephone to call for medicine for Vern. While she is on hold, she files her nails and leans over to look into the room, to see that he's all right. She puts the medical order in, hangs up and goes in to change all his tubing. When she is through, she ties restraints from his wrists to the metal railings on the bed. "I hate doing this," she says.

She moves next door to sponge the back and shoulders of Robert Jones while he sits on a chair commode. She scrubs his hairy chest and fluffs it dry with a towel. AIDS dementia has made him disoriented. Kiely writes information on a board across from his bed to help him. She writes, "Hi Bob! You are in Room 5A3 at San Francisco General Hospital. Your nurse is Sue." She writes the date in big letters. Underneath a friend of Jones has written, "I Love You!" and signed his name, Richard.

Jones is too weak to stand up. When he wants to go back to bed, David Denmark, another nurse, comes to help lift him. He tells Jones to lean forward and grab hold of him.

"Give me a hug," says Denmark. Jones reaches up.

"I usually charge for these," says Denmark.

"Oh, really?" says Jones.

Kiely lifts Jones' legs, and they swing him into bed "Aren't we butch," says Denmark.

"Ever so," says Jones. Within six weeks, he is dead.

It is 11 a.m. and Kiely is four hours into what will be nearly a 13-hour shift. When she gets home at 7:45 p.m. or so, she will follow her usual routine. Her four cats—Sarah Mae, Anastasia, Sputnik and Titty—will meet her in the yard and walk her to the front door. Going down the hallway, she'll kick off her sneakers and hit the play button on her answering machine. She'll sit down in the living room and read the mail. She will think about taking a long, hot bath.

This is the last day of her three-day work week. On her four days off, she likes to make hand-built ceramic plates and objects

and visit friends. "It's really important to focus on life," she says.

SETTING A WORLD STANDARD

"From the very beginning, it was the best place I had ever worked," says Stephen Keith. He was part of the original staff of 12 nurses when the AIDS ward opened on July 25, 1983, on the fifth floor of San Francisco General, a county hospital mandated to provide care for the poor. "We were setting the standard for the world."

Keith, like all of the nurses, dresses casually: maroon jersey, white pants, sneakers. "I like it here," he says, "except for days like today." He leans forward and puts his head in his hands. "Bob's in the L.C.U." Robert Adrian, who has been a nurse on the ward since it opened, is in the intensive care unit at another hospital with disseminated tuberculosis, a condition caused by AIDS.

"Two of the original 12 nurses are dead," says Keith. One, a woman in her fifties, died of breast cancer; another, a man of 40, died of AIDS. Two weeks later, Robert Adrian, 33, also will be dead.

When Keith began to work on the ward, he recalls, "We thought that in five years we were going to know what this is and have drugs to cure it and be out of a job." Now, he says, "it's been so long since I've gotten my hopes up."

When the ward opened, the nurses wanted to keep a record of what was happening. On the pages of a red scrapbook, they wrote the names of patients who died and beside the names, a memory:

Elizabeth, found (dead) in front of her apartment building, Mom of 3.

Bill, sober and clean 6 years.

Alfonso, saw the Pope, wanted to see family once more.

Lee, met Liz Taylor, high point of life.

Wayne, drank Drano, threw himself thru window, survived to comment, "I just had a bad day."

Now there are 1,062 names and counting. Keith still writes in the book, but there are so many patients and deaths, it's hard to keep track.

Keith began working with AIDS patients before the AIDS ward was established, at a time when the acronym AIDS, for acquired immune deficiency syndrome, was just coming into use; the disease had been known as Gay-Related Immune Deficiency, or GRID. The human immunodeficiency virus (HIV), believed to cause AIDS, had not yet been identified.

Some food servers were afraid to enter the rooms of AIDS patients and left food trays for them in the hall, he remembers. Some doctors and nurses suited up in masks and gowns before going near a person with AIDS. Patients (in San Francisco, the majority were gay men) fell ill with horrendous combinations of infections, for which the medical profession had few treatments to offer.

"People really didn't want to come onto our ward," Keith recalls. Like all of the staff on the ward, he volunteered to work there.

The inpatient AIDS ward at San Francisco General was the first to group AIDS patients together, to consolidate the medical expertise they required. "I was against it," recalls Donald Abrams, assistant director of AIDS activities at the hospital. "My initial concern was that it would be like a sanitarium or leper colony.

"Most people will agree now it's one of the more pleasant places to visit as a visitor, patient or health care provider," he says. "It's a center for patients to be comfortable in and call their own."

The nurses are the constant figures on the ward; doctors affiliated with the medical school at the University of California at San Francisco rotate through every month. As a result, says Abrams, "the nurses provide a lot of teaching about AIDS and AIDS patient management to student doctors and doctors at higher levels."

Cliff Morrison, a nurse and clinical AIDS coordinator at the hospital at the time, rejected the hierarchical "medical model" of patient care and structured the ward so that nurses could be more autonomous. In selecting the staff, he looked for nurses "who weren't satisfied with the way patient care was being delivered, who wanted professionally to make more decisions." He also wanted nurses who were comfortable around gay men and who were willing to examine and express their feelings about their own mortality.

As part of an intense, one-week training, the nurses imagined their own deaths and talked about why they wanted to work on the ward. Of the 15 staff members—12 nurses, one head nurse and two ward clerks—about half were gay. In the first two years, none of the nurses left the ward, a phenomenon "unheard of at San Francisco General," says Morrison.

The unit no longer boasts the lowest attrition rate in the hospital, acknowledges Alison Moed, head nurse on the unit. "There is only a certain period of time you can do this work." Four beds out of 20 on the ward are empty because there aren't enough nurses to care for patients, she says. Nurses earn $35,000 to $40,000 a year at the hospital. The shortage on the ward reflects the nationwide nursing shortage, she says, as well as turnover of long-term staff.

For some nurses, there also is fear of accidental blood-to-blood contact with the AIDS virus. One nurse at San Francisco General accidentally stuck herself with a needle she had used with an AIDS patient; her blood "converted" and tested positive for antibodies to HIV, meaning that she has a good chance of coming down with the disease herself. When that happened, says Keith, "people left the ward." That nurse has left her job.

The patient population also has changed on Ward 5A; where it was once dominated by gay men, now 20 to 25 percent of patients are intravenous drug users. All of the patients, whether middle-class gay men or poor intravenous drug users, are "very acutely ill" when admitted. Moed says, because patients who are not as ill have access to outpatient and other forms of care that didn't exist in 1983. The result is an increasingly stressful environment for nurses.

"A real focus for us in setting up the ward was, how do you plan to take care of yourself to be able to do the work," recalls Morrison. A support group for staff formed, and exercise, art work, therapy and vacations were encouraged, he says.

The nurses voted on the schedule they would work: an unconventional 12-hour shift, three days a week, with four days off. Most important, in 1983, when information on how the virus is transmitted was still incomplete, the nurses made a decision to walk through their fears. They believed what early medical studies showed—that the disease was transmitted through blood and not through casual contact. Later the medical theory would be confirmed that the virus was also transmitted sexually. The nurses were instructed to wear gloves when handling bodily fluids.

From the beginning, they decided they would touch their patients, hold them and cry with them. "I don't think by showing emotion we're unprofessional," says Morrison. "The question is how to be human without going too far. If you cut off the flow of emotion, you won't last long."

"We were really feeling the appreciation of the patients and their families," says Keith. "In the early days, they were getting so much rejection outside the hospital. We were supporting them. We were like family to them."

Gay relationships were honored, and patients were given the power to name a "significant other" who would be involved in medical decisions. Visiting hours were abolished; friends and family were welcome 24 hours a day.

Visitors from around the world came to see the ward, including then surgeon general C. Everett Koop; Elizabeth Kubler-Ross, author of "On Death and Dying;" and Elizabeth Taylor, actress and AIDS fundraiser. Many of the roughly 50 specialized AIDS units now in place at hospitals around the country, including the B. Frank Polk AIDS inpatient unit at Johns Hopkins Hospital in Baltimore, are modeled on Ward 5A.

"The way I know I'm not burned out is that people still get to me," says Keith. A few months ago, the lover of a patient was telephoned and told to come in quickly, the patient was close to death. When the lover arrived, he walked into the hospital room and found the man dead.

"He came out into the hall and grabbed me and said, 'Something is very wrong,' " recalls Keith. "I wasn't even the patient's nurse. As soon as I walked into the room, I knew he was gone." The lover stayed by the bedside and sobbed. The next day, he came back to attend a family support group and brought the nurse a box of chocolates. He sought Keith again.

"He told me he had things he still wanted to say to his lover that he was never going to be able to say because he was dead when he got there," says Keith. "I broke down crying in the hall."

Before Keith started to work in the AIDS ward, he had never had a patient die on his shift. "I haven't known a lot of people who have died of AIDS in my personal life," Keith says. He is a gay man and his own health is good, he says; he has tested negative for antibodies to HIV.

"I don't have any control over whether people live or die," he says. "I do have control over how comfortable people are. I can bring a glass of juice to someone whose lips are cracking and dry. That patient will come back and say, 'I remember that day you came and got me something to drink.'

"When we die and go to wherever we go," says Keith, "we're sure going to have a lot of wonderful people there."

A CERTAIN DETACHMENT

"In the beginning, it's very overwhelming," says nurse Diane Jones, who spends her offduty hours doing political work involving women's issues. She was one of the original staff on the ward and worked there for six years before transferring to pediatrics.

"You die with every patient who touches you as a person. Then, at the six-month point, you kind of bottom out around it," she says. "You get angry and depressed and you leave or stay. If you stay, then you stop dying with every patient because you can't be an effective provider. You get a certain

kind of detachment that allows you to go on."

This detachment, she says, "is not equal to being uncaring, uninvolved or withdrawn." It is accepting the reality of the epidemic. "As soon as a body is taken away there is another patient in that bed."

The emotional charge of the work challenged her. Jones remembers one young man on the ward who had been an actor and a model. His face had become severely disfigured by Kaposi's sarcoma. A purple lesion covered his nose, and his cheeks were so swollen with lesions that he could hardly open his eyes. His family had come to be with him.

"He was taking a very, very long time to die," remembers Jones. "After a while, it starts wearing on people's nerves." As she helped him bathe one morning, he turned to her and said, "I feel like I'm letting everybody down." They shared a laugh about it.

Then he grabbed her arm. "But you know, Diane, I have a commitment to life," he said.

"I thought, my God, even in the state that he's in, death is not an escape to him." She remembered her own periods of depression and moments of suicidal thinking. "It was very stunning to me," she says. "It got me in touch with how shallow my commitment to life was, and how precarious."

"Ward 5A is a very intense work experience," says Jones. "People who end up there are drawn to that quality. My own mortality—it made me deal with it. I may not have the answers, but the questions are right in my face."

Jones volunteered to work on the ward after working with AIDS patients on other floors at San Francisco General, before the AIDS ward was established. "As a lesbian, I was appalled by the homophobia," she recalls. "I heard a surgeon say, 'I have to go stick a tube down the throat of a faggot in room 15,'"

She reported people who made homophobic remarks to their supervisors. "I don't think it was maliciousness on their part," she recalls. "For most people it was ignorance. You had to give people information to overcome their fears."

Jones' 9-year-old daughter Annie has grown up with her mother working on the ward. She has visited and become friendly with AIDS patients. "She talks about death a lot more freely," says Jones. "She has shocked adults by talking about her death and my death."

"I remember a lot of different patients," says Marcy Fraser, a nurse who worked on the ward from the fall of 1984 to March 1987. "I remember one guy stopping at the outpatient clinic on his way to work. He had his briefcase and his suit on. He thought he might have the flu. The outpatient clinic diagnosed him with AIDS-related pneumonia and admitted him. He was just crying and crying and crying.

"I cried a lot on that job," she says. "I thought, gee, I'm not the one who's supposed to be crying here, but patients liked [knowing] that people could share what they're feeling. They were so dependent on us," she says. "They felt we belonged to them."

The ward was—and remains—no ordinary place to work. At one end is "The Elizabeth Taylor Room." a lounge that got its name after the actress visited the ward and talked to staff and patients. One patient donated a poster of "Cat on a Hot Tin Roof," featuring Taylor in a black slip; an autographed photo of the actress, wearing a striking necklace of pearls and diamonds, is also on the wall.

The gay community and their friends have adopted the ward. Volunteers spend time visiting patients. A donation keeps the freezer stocked with pints of ice cream. Rita Rockett, a community activist who had a friend die on the ward, caters a brunch for patients, staff and families every other Sunday. Sharon McNight, a popular singer in gay cabaret clubs in San Francisco, comes in on occasion waving her boa and singing Patsy Cline songs. On one visit, two of McNight's friends served as cocktail waiters, distributing glasses of champagne and freshly squeezed orange juice.

"I loved that job," recalls Fraser. "I used to jump out of bed. I couldn't wait to go to work in the morning. I feel like we took really good care of people."

For a time, she says, she ran into patients and their families everywhere she went on her days off. "I remember eating dinner out with a friend, and a guy came up to our table and just started sobbing and sobbing. He was the brother of one of our patients who had died."

When her first female patients appeared on the ward, she says it became more difficult to distance herself from the disease. "I really got used to men getting sick," she says. "When I started having more women patients, I realized it was spreading.

"The undoing for me was George," says Fraser. George Jalbert was a close friend of hers from nursing school. He worked on the ward from the day it opened, and he suggested that she come to work there, but Jalbert had AIDS-related complex, and he began to feel worse.

"He started getting really tired and taking a nap on his lunch break," says Fraser. "He began losing weight and started looking terrible." On the Sunday of Labor Day weekend in 1986, Jalbert called Fraser and asked her to take him to the hospital.

He wanted to go to San Francisco General, she recalls, but she balked. "I 'Come on, George.' " It would have been too much, she says. She took him to the hospital where he was diagnosed with ptococcal meningitis and AIDS. He came back to work. "It was the first time he was one of us," she remembers.

On her days off, Fraser spent time Jalbert, but the stress of dealing with A on her job and in her personal life became too difficult. "I was so choked up with low love and with grieving and dying," she says she needed to step back from the bedside. Pain was getting to be too much."

She left the ward and now works as attendant care supervisor at Visiting Nurse and Hospice of San Francisco. But after a half years away from the bedside, has started to miss it. She says she will be back soon to direct patient care.

"It's what I am, an AIDS nurse."

ENGINEERING EXTENSION SERVICE ACT OF 1989

Mr. DOMENICI. Mr. President, I am pleased to report that a bill that I have been particularly interested in and active on, was essentially incorporated into S. 247, the State Energy Efficiency Programs Improvement Act of 1989, has passed the Senate. This is a program that I believe offers an important contribution to assist small and struggling businesses to make it in the world marketplace.

I introduced S. 1031, the National Engineering Extension Service Amendments Act of 1989 on May 17, 1989, which would create a national engineering outreach service, one that would work rather like the exceedingly successful Agricultural Extension Service. By comparison, S. 247 establishes an Energy Technology and Engineering Services Program.

This legislation would authorize at engineering schools in each State—or a similar organization—an engineering extension service to help small, incubator companies with the advice they need to convert good ideas into successful product lines. Establishment of the centers would be at the discretion of each State.

I believe every Member of this body knows how very difficult it is for many small, struggling companies to take their high technology ideas and inventions and move those from development onto the production line.

Yet America's survival in this great and competitive industrial world we have created will depend to a great extent on the ability of small, innovative companies to make that transition, to take the gleam in the eye of a savvy inventor and turn that gleam into a usable product.

Dr. L.H. Lattman, president of New Mexico Institute of Mining and Technology, is a strong believer in the concept I have included the Energy Technology and Engineering Services Program. And I believe that he stated the case for this legislation very accurately in a recent paper:

> While the Engineering Extension Service concept certainly will not solve all problems, I believe it will contribute very significantly to economic development * * * in the area of manufacturing and most especially in manufacturing based on frontier technology.

This program can serve as the Federal Government's link with engineering extension service offices that would be established in each State.

Those State offices, which could be created by each Governor within an entity in the State, probably a university with an engineering school, could maintain a list of available experts within the State to assist fledgling businesses. Some of these experts might be on the university faculty. Others might be retired engineers. Still others might be existing engineering firms that wish to participate, or work at our system of national laboratories.

These experts would be available, at a fee—an affordable fee—to small businesses in the State.

Mr. President, early in 1989, I participated in an economic development tour of three States with the Governor of New Mexico and a number of members of the New Mexico Legislature.

One of the most exciting things that we saw was the work of the Engineering Extension Service operated by North Carolina State University, a service that in its most recent year aided 14,000 firms and individuals in North Carolina. North Carolina is way ahead of most of us. It initiated such a system as long ago as 1955, and now offers to "help industry and engineers to move aggressively and beneficially utilize new technologies."

I am convinced that the program North Carolina has developed needs to be encouraged in all States; that is what this bill, S. 247, enables each State to accomplish.

Mr. President, this is a sound concept, one that will help our small businesses become more competitive in America and in the world. I am pleased that my colleagues decided to support it. This is a bill that is good for America.

I thank you for the time to address this Chamber, and I thank my colleagues for their support.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

The clerk will report the pending business.

CLEAN AIR ACT AMENDMENTS OF 1989

The legislative clerk read as follows:

A bill (S. 1630) to amend the Clean Air Act to provide for attainment and maintenance of health protective national ambient air quality standards, and for other purposes.

The Senate resumed consideration of the bill.

Mr. RUDMAN. Mr. President, for a number of years many of us have worked tirelessly to bring clean air and acid rain legislation to the floor of the Senate. And, for years our efforts were foiled for many different reasons, not the least of which being the opposition of strong utility and industry interests and competing regional interests. But now, after a 12-year hiatus, we begin deliberations on one of the most important environmental issues facing our Nation: Chronic air pollution.

Mr. President, I rise today to speak in support of S. 1630, the Clean Air Act Amendments of 1989, which is now pending before the Senate. I want to take this opportunity to praise the members of the Senate Environment Committee for drafting and reporting out legislation that I am hopeful will bring about an end to the 12-year stalemate on this issue. I also want to commend President Bush, whose leadership on this issue has broken the political logjam.

There are a number of areas that will be addressed during Senate debate on S. 1630, including ozone nonattainment, air toxics, ozone depletion and the greenhouse effect. However, one issue that I and many of my constituents have taken a particular interest in is the problem of acid rain.

As my colleagues know, acid rain is a major problem in many areas of the country, but especially in the Northeast. This problem has led to the degradation of our forests, lakes, and historical buildings as well as the deterioration of visibility in such natural areas as the White Mountain National Forest in my home State of New Hampshire. More importantly, a number of studies point to the precursors of acid rain as causing adverse health effects. The population most at risk are infants and children, the elderly, pregnant women and those with heart diseases, asthma, emphysema, and bronchitis. Clearly, immediate action to curb this problem is needed.

I strongly support the aggressive provisions contained in title IV of S. 1630 which are designed to drastically reduce sulphur dioxide and nitrogen oxide emissions from utility power plants and other sources. Under the bill annual emissions of sulphur dioxide (SO_2) and nitrogen oxide (NO_x) would be reduced by 10 million and 2.7 million tons respectively. A cap is placed on utility emissions after the 2000, assuring Northeastern States like New Hampshire that utility emissions will not grow beyond the levels prescribed in this bill.

Finally, the measure initiates a new program of marketable allowances. Under this program, utilities are assigned annual allowances equal to the amount of SO_2 and NO_x they may emit. These allowances may be traded with other utilities so that a national emissions standard can be met while giving utilities the greatest amount of flexibility at the lowest cost.

Mr. President, I support the sense of the Congress resolution contained in S. 1630 which labels cost sharing as undesirable. I firmly believe that the polluter should pay in this case. Under S. 1630, utilities in nine States, which are responsible for more than 50 percent of all U.S. emissions of acid rain precursors, would bear about 50 percent of the costs to the comply with the acid rain provisions. Moreover, in many instances the electric rates in these States are below the national average, partly because of the unwillingness of utilities in these States to control their emissions. For these reasons, I believe the utilities should bear the full cost of compliance with this measure. Frankly, it is unconscionable to think that ratepayers in my State, who have been the recipients of acid rain pollution, would have to pay an electricity or other fee in order to assist utilities in these nine States to pay to clean up their plants. I am hopeful that the Senate will not amend title IV of this bill to include a cost sharing provision.

Once again, let me praise the work of the Environment Committee as well as President Bush. I am heartened that the Senate will debate and take action on this very important piece of legislation and I look forward to the debate on this and other issues during floor consideration of S. 1630.

Mr. BINGAMAN. Mr. President, yesterday, we began consideration of legislation to reauthorize the Clean Air Act. There are few issues Congress has considered this decade more important to all Americans than legislation to improve our air quality.

Today, we are more aware and better informed of the important environmental challenges that face our Nation and planet. We are more familiar with terms such as global warming, ozone depletion, acid rain, and carbon monoxide. With this familiarity comes responsibility. Responsibility to take the necessary action to reduce threats to our air resources and to begin to clean up the mess we have made. Today, we take that action.

I congratulate the majority leader, the chairman of the Environment and Public Works Committee and the floor managers of this bill for their efforts to bring clean air legislation to the Senate's attention. This action is long overdue.

NEW MEXICO

Clean air is a particularly important issue to the citizens of New Mexico. I am proud of the efforts we have made in my State. We are blessed with clear skies and scenic vistas. We hope to keep it that way. Our utilities and copper smelters have made the expensive capital improvements necessary to reduce harmful SO_2 emissions. Our largest city has embarked on an ambitious course of action to attack both the CO and ozone problems. New Mexicans are willing to make the sacrifice necessary to preserve air quality.

IMPROVING THE BILL

Mr. President, I support clean air legislation. S. 1630 gives us a comprehensive approach to address clean air issues. However, there are provisions of this bill that must be improved. Let me review a few of these areas.

ACID DEPOSITION

I strongly support the provision in title IV of the bill which requires 107 utility plants to reduce their SO_2 emissions by January 1, 1995. In earlier versions of S. 1630, only 20 plants—involving 70 boilers—were covered. If the 20-plant option had been adopted, the resulting emissions requirements would have meant that the 20 plants could only use scrubbers. No other technology would have been able to meet the emissions targets. With 107 plants and a more equitable emissions

requirement, the plants—252 boilers—will have the time to investigate alternative technologies, including cofiring, to meet the necessary reductions.

The 107 plant approach is more cost effective for controlling 107 plants at 2.5 lbs./106 BTU, significantly lowers capital cost expenditures, and gives greater flexibility for utilities. For these reasons, I strongly encourage the managers of the bill to resist any effort to lower the number of affected plants. Such action would erode confidence in our sincerity to seek a comprehensive solution to the acid rain problem and be seen as a thinly cost sharing mechanism.

EMISSIONS CAP

I want to work with the managers to find an effective mechanism to deal with the concerns regarding the emissions cap provision of title IV. This provision will prevent clean burning utilities in the West from expanding their electric generating capacity in order to meet future needs. Plants emitting less than 1.2 lbs./MMBTU of emissions will be limited to their 1985 emissions rate and 120 percent of their baseline. The proposed tonnage cap results in the imposition of unreasonably harsh and unnecessarily expensive burdens being imposed on the owners of plants which already have taken major steps, whether through the installation of expensive pollution control technologies or the purchase of low-sulfur coal, to reduce their emissions. Additionally, new power plants must hold allowances equal to the unit's annual SO_2 emissions. New utility units are not eligible for allocation of allowances. This prohibition could prohibit the construction of new power plants in many growth areas, especially in the West. Because of low emissions in the Western areas of the United States, generation of allowances for new source offsets may not be possible. The only alternative may be to purchase the allowances from the high-sulfur areas of the Midwest. This will, in effect, serve as a subsidy to the Midwestern utilities that have not shown the same commitment to clean air as have Western utilities that have invested enormous capitol toward clearing up their operations.

I remain firmly opposed to any cost sharing in this legislation and I hope the managers of the bill will take action to correct this problem consistent with the committee report. I do not think it was the intent of the sponsors to prevent future electric generation capacity. I am hopeful we are able to allay the fears of those in the West who strongly support clean air and have demonstrated that commitment over the past decade.

COFIRING

Cofiring refers to burning natural gas and coal together in the primary combustion zone of the same boiler. In the context of the acid rain legislation, basic cofiring can be an important bridge technology, because it offers a cost-effective means for electric utilities with older coal-fired boilers to achieve emissions reductions prior to the commerical availability of emerging emissions control technologies.

Cofiring technologies also could minimize any potential economic dislocation. These technologies might actually help preserve coal mining jobs by making it possible for electric utilities to continue burning high-sulfur coal. In many instances, the installation of scrubbers on older powerplants may be impractical due to economics or due to site-specific physical constraints. Cofiring will make it possible for electric utilities to continue to use their existing coal supplies when a powerplant would otherwise be forced to switch to lower-sulfur coal, reduce output, or even close.

S. 1630 contains a 3-year extension of the phase 2 deadlines for electric utilities to install clean coal technologies. Only repowering technologies are expressly mentioned in the legislation. It is ambiguous as to whether other technologies, such as cofiring, would be eligible for the extension.

Advanced natural gas cofiring technologies, known as reburn technologies, promise to achieve significant emissions reductions at low capital cost. Tests indicate that reburn technologies can reduce nitrogen oxide emissions by 60 percent and sulfur dioxide emissions by 20 percent. When paired with sorbent injection technology, gas reburn can achieve a 50-percent reduction in SO_2 emissions. Other emerging technologies hold the promise of receiving even greater reductions.

In view of the demonstrated promise of natural gas cofiring technologies, it would be unfortunate to discourage their further development by excluding them from the clean coal technology extension.

I intend to offer an amendment to include cofiring as a retrofit technologies and to identify natural gas cofiring expressly among the technologies eligible for the extension.

ALTERNATIVE FUELS

I support a strong alternative fuels initiative as part of this legislation.

Urban air quality, whether acid rain, smog, or ozone, is a major and very troubling issue on our national agenda. Vehicle pollution is the major culprit, contributing to and accounting for 40 percent of the Nation's smog.

I think we can all agree, whether government policymakers, the business community, environmentalists or civic leaders, that it's time for America's cars, trucks, and buses to begin using cleaner fuels.

Vehicles emit three major pollutants-carbon monoxide, reactive hydrocarbons and nitrogen oxides.

Carbon monoxide reduces the blood's oxygen level, including sluggishness and endangering people with heart and circulatory disorders.

Reactive hydrocarbons and nitrogen oxides react with sunlight to form ground-level ozone, which has been identified as a cause of respiratory disorders, particularly in asthmatics, children and older people.

In addition to emitting these three pollutants, diesel vehicles also emit large quantities of particulate matter-black soot that causes eye, throat and respiratory problems.

In the United States, there are about 13 million fleet vehicles—school buses, taxis, trucks, delivery vans. They run throughout the day, have low fuel economy and mostly operate in the cities, where air pollution is worst. Using alternative fuels such as natural gas and oxygenates such as ethanol in these fleets will have the best immediate benefit for the country.

In the coming years, there will be an increasing number of vehicles running on alternative fuels. In order to stimulate the use of alternative fuels, I introduced legislation last session to require the conversion of the Federal fleet of vehicles to these fuels. The U.S. Government has a responsibility to take a leadership role in the effort to reduce carbon monoxide emissions through the use of cleaner burning fuels. I encourage the managers of the bill to include my Federal fleet requirements in whatever committee amendment may be offered.

Additionally, I strongly support the committee's effort to include a strong oxygenated fuels requirement in title II of the bill related to motor vehicles. Albuquerque, NM faced EPA sanctions in 1987 and 1988 as a result of noncompliance with CO emissions levels. Albuquerque has imposed a mandatory oxygenated fuels program and a vehicle inspection program which have helped reduce those CO levels to acceptable levels.

ADDITIONAL CONCERNS

I also plan to offer an amendment during consideration of this bill to effectively address worries I have regarding air pollution in the southwestern part of New Mexico. Particulate matter has formed a visible haze over much of the Rio Grande Valley and surrounding areas. I am concerned that part of this visibility problem is due to SO_2 emissions from the Nacozari and Cananea copper smelters in Sonora, Mexico. Both facilities are monitored by the Mexican Government which, under an agreement with the United States, has voluntarily agreed to operate the smelters in such a manner as to meet the same emissions requirements that all United States smelters are required to meet.

I understand the Mexican Government has certified that the facilities are currently meeting the emission requirements. However, I do realize that periodically the smelters are allowed by-pass emissions—when emissions can exceed normal levels for a limited period time. These by-pass emissions may be adding to an already serious CO and ozone problem that exists in the El Paso-Juarez area.

My amendment would instruct our negotiators to review these concerns with the Mexican authorities at the next official negotiating session and see if there is some way to lessen the severity of these by-pass emissions. I also will ask EPA to monitor the particulate matter on the U.S. side of the border and see if there are any additional steps that can be taken to address the problem. I am concerned not only from the perspective of visibility, which is very important to our quality of life in New Mexico but also because of the potential health effects of such pollution.

CONCLUSION

In summary, the sponsors of S. 1630 deserve our thanks for their efforts in crafting the bill that is before us to protect and improve our air quality. I look forward to working with them during consideration of the legislation and in helping them make the necessary adjustments to win broad support for the bill. I urge my colleagues to assist in this effort.

Mr. BAUCUS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. LIEBERMAN). Without objection, it is so ordered.

Mr. DURENBERGER. Mr. President, I rise to make a few comments with regard to the Clean Air Act provisions. Particularly these comments will be directed in the area of pollutants that are regulated or proposed to be regulated in the future under what is called the air toxics section of the bill. I intend to spend somewhat more time on Monday of next week dealing with the same subject, since some of the commercial criticism of this bill, as I have noticed in one of our local newspaper publications, and even to a degree some of the critique by the administration of the Senate version of the bill, has zeroed in on some portions of the air toxics section—principally the sections entitled "residual risk."

So that those of our colleagues who have not labored, as the current Presiding Officer has, with the committee over the years of hearings, discussion, debate, compromise between various versions of this bill and who are sort of befuddled, both by the chemistry and by the so-called safety and health aspects, who do not fully appreciate why in this particular section of the bill we have chosen to use technology as a device for measuring health and safety, as opposed to the risk-based standards that we were using earlier, I intend on Monday of next week to spend a great deal more time commenting in specific detail about provisions that relate to the estimate of residual risk.

I hope at that point not only will those of our colleagues who have to come to judgment on this bill be made aware of what is intended by this bill, but that those in the community that believe it to be regulated by the air toxic section of the bill might also concentrate some of their attention on the specifics of the legislation and the specifics of the way in which it will be implemented.

But for now, let me begin by saying that I am pleased to have the opportunity to be here at this particular stage in the process. All of us have worked at clean air for a long time. I have been at it since coming to the Senate.

We have not had a reauthorization since I came to the Senate. We really had not had an opportunity to do a reauthorization and some new clear thinking about a national policy on clean air until July 21 of the past year when the new President of the United States endorsed the reauthorization of the clean air bill. That was the opportunity that those of us who were working on reauthorization from a variety of different philosophical approaches finally had to come to the same table and deal with our differences, resolve them in the form of what I believe now, not only with regard to the air toxic section, the municipal incineration sections which I had a lot of the part of reauthoring, but in the nonattainment section, in the acid rain section, in addition, is the opportunity for a lot of people to come together in something as close to the middle ground on environmental legislation as I have seen since I have come to the Senate.

I think it would help the whole process if the administration, which has been a key player not only on the environmental side but on the economics of this and on the fiscal side of it, were to strongly endorse the large parts of this bill which are theirs and which they have helped to work out.

It might help to identify the areas that are relatively small in our differences and it would get a little more enthusiasm, if you will, for a process which has been here on the floor for the last 3 days without a lot of visible activity.

Let me begin to get to the point of air toxics by saying that there are two kinds of pollutants that are regulated under the Clean Air Act.

One group is called criteria pollutants and these are emitted in millions of tons in our air pollution problems across broad regions of the country. There are six criteria pollutants including sulfur dioxide, carbon monoxide, lead, ozone, nitrogen dioxide, and particulates. These are the six biggies.

The Environmental Protection Agency sets ambient air quality standards for each of these pollutants and the 50 States then take action to assure that the Standard is not exceeded. Issues related to criteria pollutants are generally referred to as the nonattainment problem reflecting the fact that many of our major urban areas in this country have failed to attain Federal standards for healthy air quality.

The other kinds of pollutants are called hazardous air pollutants or air toxics. They may be cancer-causing substances, call them carcinogens, but other health and environmental problems may also be caused by air toxics, and my comments this afternoon will focus on routine emissions of these toxic air pollutants.

Examples include benzine, which is a potent cancer-causing substance. The cancer it causes is leukemia. Gasoline fuels sold in the United States are on average 1.6 percent benzine and the percentage has been climbing over the last few years. Eighty-five percent of human exposure to benzine comes from automobile pollution.

Mercury is a metal found in trace amounts in coal and released to the air when the coal is burned in million-pound quantities. It is also released by incinerators burning garbage. It is used in latex paints to prevent mildew and as the paint weathers, substantial amounts of mercury may be released into the air.

Ammonia. Ammonia is a chemical used in industry. In fact, it is emitted by major manufacturing plants in 30 different industrial groups. It is also a fertilizer, as those of us from rural America understand, and is distributed broadly in America for that purpose. Although low exposures to ammonia are safe, high exposures can burn the eyes, skin, and lung tissue. Ammonia emissions in 1987 were larger than the emissions of any other air toxic.

The fluid that dry cleaners use to clean our clothes is a suspected carcinogen released in large amounts; so is the solvent that hospitals use to sterilize equipment. The list is long, and it touches every major industry from mining base metals to making high-technology electronics.

Major manufacturers are now required to report their air emissions of 350 of these substances. The data is summarized in what is called a Toxics Release Inventory by the EPA. The

current one showed 12.7 billion pounds of emissions in 1987. It is thought that the 2.7 billion pounds of air emissions are only one-fifth of the actual total since not all air toxics are covered and only major industries in the manufacturing sector of the economy are required to collect data. The 10 billion pounds would be a better estimate counting other industry, cars, trucks, and all the small sources.

The largest amounts of emissions were in the State of Texas—240 million pounds; in Ohio, 173 million pounds; Louisiana, 138 million pounds; Tennessee, 135 million pounds; and in the State of Virginia, 132 million pounds.

Although these air toxics can cause many adverse health effects, cancer is our principal concern; 25 percent of all Americans die of cancer. There are 1 million new cancer cases reported each year and 470,000 fatalities from this disease.

Most of those deaths are related to illnesses caused, as we know, by smoking and poor diet. A small but significant percentage of the cancers are caused by exposure to environmental pollutants.

In a 1989 study examining the potential cancer-causing effects of exposure to air toxics, EPA estimated a national annual cancer incidence of approximately 2,700 cases as a result of exposure to some 15 to 40 toxic air pollutants. That would mean that 190,000 Americans alive today might be expected to contract cancer from exposure to air toxics. That is taking the 2,700 annually times our average 70-year life span—190,000 Americans alive today are likely to die from exposure to air toxics.

Again, I say this estimate is conservative. It may be low, as there are a much larger number of air pollutants that have been identified than the 15 to 40 on this list and they have been identified as potentially toxic.

In 1987, the South Coast Air Quality Management District in California released a study on ambient concentrations of approximately 20 air toxics in the Los Angeles area. Based on that data and extrapolating that data to the Nation as a whole, cancer incidence attributable to toxic air pollution may be projected as high as 500,000 fatal cases for those Americans alive today—not 190,000 but 500,000.

And these estimates are based on studies of only a small number of pollutants. The EPA estimate is based on a series of studies for 15 to 40 pollutants. The South Coast Air Quality Management District looked at 20 pollutants—not including products of combustion like dioxins and furans which may be among the most potent threats. By way of comparison, the air toxics legislation before the Senate lists 200 substances for control. OSHA has regulated about 500 substances in the workplace. And a handful of States with active air toxics programs have set standards for 708 different pollutants a point I recall the current Presiding Officer bringing home to me about 6 months ago as we were working on finding an appropriate number which now ends up being about 200 in this bill.

An estimate of cancer risks based on exposure to only 20 or 40 substances certainly understates the risk that this pollution presents to public health.

The overall number of cancer cases is only one dimension of the problem. Another dimension of the problem is that the risk is not spread evenly. Those living near large chemical plants or in concentrated urban corridors face much higher risks than most Americans. So, it is also an equity issue.

EPA has examined cancer risks at more than 2,600 industrial facilities across the United States as part of its effort to promulgate air toxics regulations. At more than one-quarter of these facilities, toxic emissions produced cancer risks greater than 1 in 10,000 for people living nearest these plants. That is 1 additional cancer for each 10,000 persons exposed to emissions from these plants at the higher levels.

The 1987 South Coast study which I cited a moment ago cancer risks in the Los Angeles area for the mix of air pollutants from industrial sources, highway fuels and small business to exceed 1-in-1,000 not 1-in-10,000, but 1-in-1,000. For 1,000 people living near this exposure, at least one will die out of every thousand. It seems to me these are extraordinarily high risks. Based on the actual ambient concentrations recorded as part of the study, cancer deaths from air toxics in the Los Angeles metropolitan area were projected at 22 people per year.

OMB Director Richard Darman was quoted in the press last summer as saying that the chance of dying from exposure to air toxics is about the same as the chance of being hit by lightening. And therefore, we should take the money that would be spent implementing this program and spend it buying every American a pair of rubber sole shoes. I do not know if that is an accurate quote or not. But it is certainly not an accurate representation of the air toxics problem. Here is why.

Lightening is a random event spreading a small risk of death approximately evenly across the whole population. Toxic air pollution from industrial sources is, on the other hand, not random. The risks are unevenly distributed. Those living near large chemical and manufacturing plants or in highly developed urban areas face much larger risks than the general population as a whole.

It is not just a question of incidence—small risks widely distributed. It is also a question of equity. We must not allow a few Americans to face very high cancer risks that are the darkside of the chemical revolution? An esoteric discussion of national cancer statistics doesn't tell the whole story, here.

Those Americans living near these big plants and facing these high risks of toxic air pollution are like lightening rods in our chemical society. They need the measure of protection afforded by this bill.

And it is not just cancer. Only a third to a half of these chemicals are suspected of causing cancer. The rest are on the list because of other adverse effects: birth defects, genetic mutation, reproductive disfunction, nuerotoxicity, damage to internal organs—the kidneys and the liver, principally—accumulation in the tissue of fish and birds.

In fact, many of these pollutants have a health effect which has already been discussed at some length in this debate. They are ozone precursors. They are volatile organic compounds which combine with nitrogen oxides in the atmosphere to form smog. The air toxics provisions of title III in this bill would likely be justified from the standpoint of ozone controls alone, not counting its impact on air toxics.

Air pollution has also become a principal source of water pollution. Eighty percent of the most serious toxic pollution including PCB's in Lake Superior and 50 percent in Lake Michigan is fallout from the air and not from sewage or industrial discharges to the lakes or the watershed.

Mercury has also become a significant water pollutant in the Great Lakes region. Mercury bioaccumulates in the tissue of fish and may affect organisms all up the food chain including waterfowl and man. All of the lakes in Michigan are posted with warnings. Pregnant women and children shouldn't eat the fish at all. Healthy adults should not have more than one meal of fish per week in the State of Michigan.

Senator CHAFEE mentioned mercury in his comments yesterday. And on Monday I am going to have a map here showing the 20 States in the Union which have posted lakes or rivers for mercury contamination, including my own State of Minnesota.

Last fall our committee held a hearing on the toxic air pollution problem. One of the most moving statements I have ever heard before the Environment Committee occurred when one of the witnesses addressed the mercury contamination problem. The witness was Robert Miller who is Director of Air Quality for the State of Michigan. This is what he had to say:

I am here today to talk to you about one of the most important environmental issues

confronting the Great Lakes Region, and, I hope I'll be able to convince you, the [most] important environmental issues facing the nation.

As I was trying to clear my mind last night of what faced me this morning, I was forcing my mind to think about my trip up north that I have planned in 2 weeks. As I was doing that, an image came to mind that sort of put in focus the message I want to give you this morning. And that was the image of a father and son going north on a fishing trip sitting around the camp fire preparing the fish that they caught during the day, but having to be worried whether eating those fish was going to affect their health.

The Great Lakes, like a pack of cigarettes, contain, in all of the States, a warning, just like the Surgeon General's warning, that says "Caution: this product can be hazardous to your health."

And it's not just the Great Lakes. We now have a fish advisory for every lake in the State of Michigan against eating the fish or moderating your consumption of fish because of the toxics that are in them. Research indicates that air toxics deposition contributes from 46 to 99 percent of the lead, up to 90 percent of the PCB's and up to 97 percent of the DDT entering the Great Lakes.

That was the heart of Mr. Miller's testimony.

Over the past couple of years I have been asked many times why I am so interested in this air toxics issue. I fish with all four of my sons in the same part of the country. Mr. Miller said it a lot better than I could.

HISTORY OF SECTION 112

Section 112 of the Clean Air Act adopted in 1970 requires EPA to list each hazardous air pollutant which is likely to cause an increase in death or serious illness. Within 1 year after listing EPA is to establish emissions standards which would apply to sources of the listed pollutant "providing an ample margin of safety to protect public health."

In the 18 years of administering section 112, EPA has listed only eight pollutants: mercury, beryllium, asbestos, vinyl chloride, benzene, radionuclides, inorganic arsenic and coke oven emissions.

No standard has been promulgated for coke oven emissions, and for many other pollutants only a few of the source categories emitting the substance are actually regulated. For instance, mercury is a listed substance, but mercury emissions from powerplant boilers, which are exempt from the standards, are contributing to high mercury levels which cause lakes to be posted in these 20 States. Coal combustion contributes about one-quarter of all mercury emissions.

Mr. President, I am going to conclude my presentation today at that point, as the hour is getting late, and I just suggest to my colleagues that there is much more to the issue of toxic air pollutants and the effect that they have in this country than what I have seen in any of the commercial advertising opposing this bill.

I intend to spend as much time as is necessary on the floor of the Senate to convince the people who propose those ads, the people in the administration who have bought into the notion that cost is all that counts in an economic sense, that this section of the bill has been crafted not only with the public health of the people of this country in mind, but the economics of this great Nation as well.

The PRESIDING OFFICER (Ms. MIKULSKI). The Senator from Wisconsin.

Mr. KASTEN. Madam President, today we begin consideration of the most important environmental legislation the 101st Congress will face. The Clean Air Act is one of the key Federal programs designed to protect our natural environment.

This legislation breaks a longstanding impasse in Congress on updating the Clean Air Act. It has been a full 13 years since this legislation was last updated, and it is desperately needed. The Clean Air Act is truly critical to protecting the health of Americans and the health of their environment.

I hope we can move quickly to adopt new legislation to update the Clean Air Act.

I want to commend the President for providing the leadership to help move acid rain legislation. Without his support, I believe that parochial interests would continue to stall legislation to control acid rain.

I also want to commend the committee and Senate leadership for supporting rapid action on this legislation.

This legislation updates the Nation's principal air-quality law in the key areas of controlling the release of toxics, reducing urban air pollution and fighting acid rain. Each of these actions is necessary to protect the health of Americans and the health of their environment.

It is clear that there will be costs of implementing this legislation. But the cost of not updating the Clean Air Act is much higher than the cost of implementing the law that I expect the Senate will pass. If we continue to allow our Nation's waterways to be made sterile by acid rain, there will be real costs. If high concentrations of urban smog and other pollutants are left unabated, there will be real costs. Toxics released to the atmosphere have real costs by poisoning American's and our fertile environment. It is correct, there are costs to this legislation, but the costs of not acting are even greater.

There are several areas where I believe this particular legislation can be improved. I believe we should move further toward the concept of polluter pays, while maintaining this legislation's already high standards for reducing air pollution.

My greatest concern is that the Senate stick to its position that those responsible for pollution should pay for cleaning it up. I will strongly oppose any cost-sharing amendments that place the burden for cleaning up dirty plants on those that have already taken the environmentally responsible action and cut emissions.

In Wisconsin we have already enacted the Nation's toughest acid rain control law. We have already cut our emission of SO_2 by 40 percent. Wisconsin is more than willing to do its part to reduce acid rain. We also recognize that this is an international problem that needs international cooperation as well as a strong U.S. law.

But Wisconsin utility consumers who have already paid for cleaning up our generating plants should not be asked to pay for the cleanup of plants that have continued to foul our air.

I note particularly that some of the lowest utility rates in the Nation are in areas served by the dirtiest generating facilities. The States and utilities that have already acted and cut their emission rates should not be asked to pay twice for the fight against acid rain. Instead, the burden for cleaning up plants should be placed on those that use them.

It is my hope that we can stick to the principle of allowing the maximum flexibility on how to reduce the emission of pollution while sticking to tough environmental standards. Protecting our environment has to take the first priority, but we should invest our financial resources where we know they can accomplish the most.

In addition, there are several amendments which I believe can be worked out to address some unique situations in Wisconsin. I believe these amendments will stay within the bounds of not increasing the emission of air pollutants while allowing compliance with this legislation.

First, the issue of downwind ozone nonattainment. The six southeastern counties of Wisconsin are adjacent to another ozone nonattainment area—Chicago. Because air pollution moves with the prevailing winds, air quality in these counties is seriously impaired by activities in Chicago. In short, much of the air pollution in these six counties originates outside of our State.

The difficulty this poses is that the Nation's most polluted urban areas are given a much more generous timetable for meeting air-quality standards. Chicago will have 5 more years to meet air-quality standards than these Wisconsin counties will have. That means that while Wisconsin is expected to comply with much higher air-quality standards, Chicago will still be allowed to produce pollution at a higher rate, and there is nothing we can do about it. In fact, it is likely that these coun-

ties will be found in violation of the Clean Air Act because of actions taking place outside of their jurisdiction in an upwind State.

I do not mean to suggest that Chicago has no sympathy for our plight. In fact, our two States have entered into an agreement to cooperate in addressing the regional air pollution problem. They are pledging an unprecedented $11 million to identify how to solve this problem.

Unfortunately, the legislation we are considering today fails to recognize this interstate problem, and to provide a rational method of resolving it. I am very optimistic that we can resolve this dilemma, because all of the parties involved want to press for the earliest possible reduction in pollutants.

To help accomplish this, I intend to submit an amendment which I hope will be acceptable to the committee. So that all interested parties have the opportunity to review this situation and this possible amendment, I ask unanimous consent that a copy of the amendment be printed in the RECORD at this point.

There being no objection, the proposed amendment was ordered to be printed in the RECORD, as follows:

DOWNWIND OZONE NONATTAINMENT AMENDMENT

The following amendment to sections 181, 183 and 186 provides for special treatment of certain downwind ozone nonattainment areas when those areas are subject to interstate transport of pollutants to an extent sufficient to impact an area's capability to attain the ambient air quality standard. The scope of the amendment includes initial classification flexibility, delay of failure to attain and reclassification provisions and designation of the Lake Michigan Airshed as an ozone transport region.

The amendment to section 181 provides the Administrator some limited flexibility for initial classification of ozone nonattainment areas subject to criteria including the number of ozone exceedances, transport into or out of the area, and the mix of sources and air pollutants in the area.

The amendment section 183 recognizes the need in certain downwind nonattainment areas to delay the reclassification to a higher category, the schedule of additional control requirements, the increased source fees, and the expanded inventory and RACT requirements. The provision applies to areas in established transport regions impacted by significant upwind source areas and remains effective until the upwind area has met all VOC reductions required by the Act for its classification. At that time, the failure to attain provisions would impact both areas, triggering reclassification and, if interstate transport remains an issue, a new set of regional control strategies would have to be established through the ozone transport commission and SIP processes.

The amendment to section 186 establishes an ozone transport region for the Lake Michigan four state region.

Amend section 181.(a):

SEC. 181.(a) In line 20 insert after "exceeded" ", using the design value for the area".

Create a new subsection 181.(e):

SEC. 181. (e) CLASSIFICATION OF BORDERLINE AREAS.—In classifying an area under paragraph (a), if an area would be classified in another category if the design value in the area were 5 percent greater or 5 percent less than the level on which such classification would be based, the Administrator may, in his discretion, by the procedure required under paragraph (b), adjust the classification to place the area in such other category. In making such adjustment, the Administrator may consider the number of exceedances of the national primary ambient air quality standard for ozone in the area, the level of pollution transport between the area and other affected areas, and the mix of sources and air pollutants in the area.

Create a new subsection 183.(f):

SEC. 183. (f) CERTAIN DOWNWIND NONATTAINMENT AREAS.—If a state containing an ozone nonattainment area in an ozone transport region is located downwind of another ozone nonattainment area in the ozone transport region which is classified at an equivalent or higher category under section 181(a) and the state has submitted an approvable plan, has implemented the approved plan and has achieved the emission reductions required under paragraph (b)(2) and (3)(B) through the applicable attainment date, the state, notwithstanding any provision of section 181(c) or 184(d) or paragraph (b)(3)(B) and (7) of this section, shall

not be required to be reclassified;

not be required to reduce volatile organic compound emissions after the applicable attainment date except in accord with an approved plan

not be required to implement paragraph (b)(7); and

have an extension of the attainment date until the upwind nonattainment area has achieved the emission reductions required under par.(b)(3)(B).

Amend section 186. (a):

SEC. 186. (a) OZONE TRANSPORT REGIONS.—(1) The area comprising the State of Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Virginia, and the consolidated metropolitan statistical area including the District of Columbia is established as an ozone transport region. (2) The area comprising the State of Illinois, Indiana, Michigan, and Wisconsin is established as an ozone transport region. (3) The Administrator may add any State or portion of a State to any region established under this subsection or establish other ozone transport regions, consisting of two or more States, when the Administrator determines that the interstate transport of air pollutants from such State or States significantly contributes to concentrations of ozone or ozone precursors in any nonattainment area in another State classified under section 181(a) as a moderate, serious, severe, or extreme area for ozone. (4) The ozone transport commission established under subsection (b) for any ozone transport region may remove any State or portion of a State from the region if the commission determines that the control of emissions in that State or portion of a State pursuant to this section will not significantly contribute to the attainment of the primary ambient air quality standard for ozone in the ozone transport region.

Mr. KASTEN. Madam President, the second amendment that I am concerned about today deals with the credits created under this legislation for the reduction in airborne toxics. Let me say at the outset that I am a proponent of reducing airborne toxics. In fact, airborne toxics are the leading source of pollution in the upper Great Lakes. This phenomenon is a real threat to my constituents, so much so that the State of Wisconsin has adopted a tough state toxic control program.

This program, which Wisconsin adopted 18 months ago, regulates 400 airborne toxics. The proposed Federal program will control less than half of the materials regulated under the State law. Unlike this proposed legislation, the State program is in place now and is actually controlling toxic emissions.

This proposed legislation, however, penalizes States which have acted responsibly on their own to reduce the emission of airborne toxics. I recognize that the committee is seeking to press for the control of pollutants that would not be controlled otherwise. But it is also true that failing to make credits available for emissions reduced under State programs creates numerous environmental problems.

Not to put too fine a point on it, the committee proposal rewards the bad guys. The States that have dragged their feet to reduce emissions come out the best under this program. The voluntary credits are fully available to those States, while States that have acted responsibly are penalized by the lack of available credits.

This discourages States from acting on their own, and from improving on Federal law. Wisconsin's law, like that of other States, is broader than the proposed Federal law. If this proposal is adopted, I expect that many States will repeal their laws and allow the Federal law to be the only operative regulation.

The result—if you can believe it—will be an increase in the emission of toxics. I think we ought to turn this around—and to accomplish this objective I will be offering an amendment, which I hope will also have the support of the committee.

I ask unanimous consent that a copy of my amendment be printed at this point in the RECORD.

There being no objection, the proposed amendment was ordered to be printed in the RECORD, as follows:

VOLUNTARY TOXICS REDUCTION DEFINITION

The following amendment removes the potential penalty to hazardous air pollutant sources complying with State and local hazardous emission regulations by providing them equivalent access as that given unregulated sources to either an alternate emission limit or a five-year compliance extension depending on when the reductions are made.

112(i)(6)(D). For purposes of this paragraph, the term "voluntary" means not otherwise required by a Federal air pollution control law or regulation.

Mr. KASTEN. Madam President, another concern I have deals with incentives to use ethanol in ozone nonat-

tainment areas. Ethanol can be an important contributor to reducing one form of pollution—carbon monoxide. However, because of the low vapor pressure necessary to evaporate ethanol, it can add to another pollution problem—ozone. In warm weather, more ozone is formed with the use of ethanol fuels than would be formed with the use of gasoline.

It makes no sense to encourage the use of ethanol in ozone nonattainment areas in hot weather. To solve this problem, States should have the ability to override Federal law and discourage the use of ethanol. Again, I have prepared an amendment which I hope can be agreed upon. This amendment actually reduces air pollution, and will not impose an undue regulatory burden on anyone.

I ask unanimous consent that a copy of this amendment be printed at this point in the RECORD.

There being no objection, the proposed amendment was ordered to be printed in the RECORD, as follows:

ETHANOL BLENDS IN OZONE NONATTAINMENT AREAS AMENDMENT

SUMMARY

The following amendment removes the Federal preemption of States containing ozone nonattainment areas which prevents a State from adopting a more restrictive ethanol gasoline blend Reid vapor pressure waiver as an ozone control strategy.

TECHNICAL AMENDMENT LANGUAGE

Insert after paragraph (4) [Sec. 211(h)(4)]:

(5) A State which contains an ozone nonattainment area shall not be prohibited from adopting a lower Reid vapor pressure than that established under par. (4) for fuel blends containing gasoline and 10 per centum denatured anhydrous ethanol if the State demonstrates that the higher Reid vapor pressure established under par. (4) is contrary to the ozone control strategy in the State's implementation plan.

Mr. KASTEN. Madam President, I also think it is important to correct a technical mistake in the drafting of the committee bill. I believe this is a mistake made by the EPA, not by the committee or its staff. My amendment simply adds two existing generating facilities to the list of affected sources and units in phase I and II (table A). These are existing facilities that meet the criteria for inclusion on the list. Again, this amendment will not add to the creation of SO_2. I believe it is purely technical in nature.

I ask unanimous consent that a copy of this amendment be printed at this point in the RECORD.

There being no objection, the proposed amendment was ordered to be printed in the RECORD, as follows:

SUPPORT PARAGRAPH FOR ALMA 4 AND ALMA 5 IN TABLE A—SECTION 404

Dairyland Power Cooperative's (DPC) Alma units 4 and 5, totaling 136MWe, are part of a 200MWe coal-fired steam electric facility with a common stack. Under the phase I provisions of S1630, only table A units are affected. Since DPC will reduce emissions of SO_2 from Alma 4-5 in order to meet the State's acid rain requirements of 1993, we desired to include Alma 4 and 5 on table A. This would allow DPC to gain allowances for these units in both phase I and II, and bank the excess emission reductions.

Mr. KASTEN. Madam President, finally, a nuclear generating facility was recently retired in Wisconsin. The committee bill makes no provision for offsetting this loss in generating capacity by adding to the emission baseline. This amendment will have a minimal impact on SO_2 generation. Clearly, it should be added to the base.

I ask that this amendment be printed at this point in the RECORD.

There being no objection, the proposed amendment was ordered to be printed in the RECORD, as follows:

SUPPORT PARAGRAPH FOR LA CROSSE BOILING WATER REACTOR (LACBWR) CAPACITY FACTOR INCLUSION TO GENOA #3 IN TABLE A

Dairyland Power Cooperative (DPC) operated Genoa #2, a 50MWe nuclear power plant, over the baseline development years of 1985, 1986, and 1987. This nuclear unit was retired prematurely in 1987 due to licensing difficulties and other regulatory disincentives. Since DPC must now make up for the lack of nuclear generation with coal-fired generation, DPC wishes to increase the phase I and phase II allowances for Genoa #3 by the amount Genoa #2 (LACBWR) generated in 1985, 1986, and 1987.

The following changed table A implements these two changes:

TABLE A

State, Wisconsin, plant name	Unit	Phase I allowances	Phase II allowances
Alma	4	2,370	1,140
	5	4,320	2,070
Edgewater	4	24,700	11,900
La Crosse/Genoa	3	21,550	10,330
Nelson Dewey	1	6,010	2,880
	2	6,680	3,210
North Oak Creek	1	5,220	2,510
	2	5,140	2,470
Pulliam	8	7,510	3,600
South Oak Creek	5	9,670	4,640
	6	12,000	5,780
	7	16,200	7,770
	8	15,800	7,580

Alternative Language to Address the Retirement of LACBWR

Section 402

An Alternative for LACBWR (New Language is Underlined)

(d) The term "baseline" means the annual quantity of fossil fuel consumed, measured in millions of British Thermal Units ("mmBTUs"), by an affected unit, calculated as follows:

(4) In the event the owner or operator of a steam-electric existing unit or units removes or has removed from service a nuclear electric generating facility which was in operation during calendar years 1985, 1986, or 1987, the baseline for the steam-electric existing unit or units that will provide electrical generation to compensate for the removal from service of the nuclear electric generating facility shall be adjusted to account for the mmBTU in fuel which would have been consumed by the steam-electric existing unit or units had the nuclear electric generating facility been removed from service prior to January 1, 1985.

Mr. KASTEN. Madam President, there are two additional areas of concern to Wisconsin. These are provisions to: First, increase the flexibility of utilities in meeting SO_2 standards; and second, a provision by which a geographic anomaly has made the construction of a tall stack necessary under existing law to meet ambient standards.

At this point, I have not completed the preparation of amendments that do not add to the total emission of SO_2. Those calculations are being made, and I hope to offer them later.

I hope that we can work out these difficulties, and create an effective clean air bill.

Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations and a withdrawal which were referred to the appropriate committees.

(The nominations and withdrawal received today are printed at the end of the Senate proceedings.)

REPORT ON DEVELOPMENTS WITH RESPECT TO LIBYA—MESSAGE FROM THE PRESIDENT—PM 77

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States; which was referred to the Committee on Banking, Housing, and Urban Affairs:

To the Congress of the United States:

1. I hereby report to the Congress on developments since my last report of July 19, 1989, concerning the national emergency with respect to Libya that was declared in Executive Order No. 12543 of January 7, 1986. This report is submitted pursuant to section 401(c) of the National Emergencies Act, 50 U.S.C. 1641(c); section 204(c) of the International Emergency Economic

Powers Act, 50 U.S.C. 1703(c) ("IEEPA"); and section 505(c) of the International Security and Development Cooperation Act of 1985, 22 U.S.C. 2349aa-9(c).

2. Since my last report on July 19, 1989, there have been no amendments to the Libyan Sanctions Regulations, 31 C.F.R. Part 550 (the "Regulations"), administered by the Office of Foreign Assets Control ("FAC") of the Department of the Treasury. Additionally, since July 19, 1989, there have been no amendments or changes to orders of the Department of Commerce or the Department of Transportation implementing aspects of Executive Order No. 12543 relating to exports from the United States and air transportation, respectively.

3. During the current 6-month period, FAC has issued a limited number of specific licenses to individuals and corporations to permit them to engage in activities that would otherwise be prohibited by the Regulations. Under FAC licensing procedures, 23 individuals registered to travel to or remain in Libya with Libyan immediate family members. Fewer than 15 licensing actions were taken with respect to Libya.

4. Various enforcement actions mentioned in prior reports continue to be pursued. As reported previously, seven former officers of a Libyan student group operating under FAC license were convicted in November 1988 for the unauthorized use of student funds in violation of the Regulations. In May 1989, in the U.S. District Court for the Eastern District of Virginia, seven individuals associated with the student group were convicted of related charges of conspiracy, wire fraud, aiding and abetting, and credit card fraud. Their sentences ranged from 60 days' to 7 years' imprisonment with fines of up to $8,000.

In July 1989 the U.S. Customs Services seized a shipment of U.S.-origin electrical distribution and control equipment in Buffalo, New York, valued at $7,679 for an attempted illegal transshipment from Canada to Libya through the United States. In October 1989 the U.S. Customs Service seized a shipment of computer equipment valued at $7,500 for an attempted illegal transshipment to Libya through the Netherlands. Redelivery of the goods from the Netherlands to New York was effected prior to the seizure of the goods in New York.

In August 1989, in the U.S. District Court for the District of Minnesota, a Federal grand jury returned a four-count criminal indictment charging a U.S. firm and two of its corporate officers with unlicensed shipment of 43,400 pounds of chemicals to Libya in April 1986. Guilty pleas were entered by two corporate officers and on behalf of the corporation at a December 4, 1989, hearing. Sentencing is expected in January 1990.

During the current reporting period, FAC determined that the Government of Libya had illegally transferred certain of its physical assets in the United States to a Libyan student organization at the time the sanctions were imposed. In October 1989 FAC ordered the assets sold at auction with the proceeds deposited into a blocked account in the name of the Government of Libya.

5. The expenses incurred by the Federal Government in the 6-month period from July 19, 1989, through the present time that are directly attributable to the exercise of powers and authorities conferred by the declaration of the Libyan national emergency are estimated at $425,776. Personnel costs were largely centered in the Department of the Treasury (particularly in the Office of Foreign Assets Control, the Customs Service, the Office of the Assistant Secretary for Enforcement, the Office of the Assistant Secretary for International Affairs, and the Office of the General Counsel), the Department of State, the Department of Commerce, the Department of Justice, the Federal Reserve Board, and the National Security Council.

6. The policies and actions of the Government of Libya continue to pose an unusual and extraordinary threat to the national security and foreign policy of the United States. I shall continue to exercise the powers at my disposal to apply economic sanctions against Libya as long as these measures are appropriate, and will continue to report periodically to the Congress on significant developments as required by law.

GEORGE BUSH.
THE WHITE HOUSE, *January 25, 1990.*

1990 NATIONAL DRUG CONTROL STRATEGY—MESSAGE FROM THE PRESIDENT—PM 78

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on the Judiciary:

To the Congress of the United States:

Consistent with section 1005 of the Anti-Drug Abuse Act of 1988 (Public Law 100-690), I am today pleased to transmit my administration's 1990 National Drug Control Strategy for congressional consideration and action.

This report should be viewed as a companion volume to the National Drug Control Strategy that I sent to the Congress last September. In it you will find a comprehensive blueprint for Federal drug control activities for the next fiscal year. The principal goal of our strategy, however, remains the same: to reduce the level of illegal drug use in America. To help determine the most effective means of pursuing that objective, my administration has once again been aided by broad consultation with Members of Congress, Federal, State, and local officials, experts in the fields of drug prevention, treatment, and enforcement, and hundreds of interested and public-spirited citizens. The result, I believe, is a truly national plan to combat the illegal use of drugs, one that will bring us success in this new decade.

I am grateful for the enthusiastic and bipartisan support that the Congress gave to the National Drug Control Strategy last year, and I turn to you for that support again. I know that every Member of Congress shares my desire to overcome the terrible scourge of drugs. And so I ask you to join me in moving quickly to fund and implement the proposals and initiatives contained in this report. Full congressional support of this national strategy is essential if we are to give Americans the thorough and effective drug control policy they expect and deserve.

GEORGE BUSH.
THE WHITE HOUSE, *January 25, 1990.*

MESSAGES FROM THE HOUSE

At 11:42 a.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House disagrees to the amendment of the Senate to the bill (H.R. 2364) to amend the Rail Passenger Service Act to authorize appropriations for the National Railroad Passenger Corporation, and for other purposes; it asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints the following as managers of the conference on the part of the House:

From the Committee on Energy and Commerce: Mr. DINGELL, Mr. THOMAS A. LUKEN, Mr. ECKART, Mr. SLATTERY, Mr. BOUCHER, Mr. LENT, Mr. WHITTAKER, Mr. TAUKE (except for section 4 of the House bill and section 4 of the Senate amendment), and Mr. BLILEY (solely for section 4 of the House bill and section 4 of the Senate amendment).

Additional conferees from the Committee on the Judiciary (solely for section 4 of the House bill and section 4 of the Senate amendment): Mr. BROOKS, Mr. MAZZOLI, Mr. EDWARDS of California, Mr. FISH, and Mr. MOORHEAD.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. BENTSEN, from the Committee on Finance:

Abraham N.M. Shashy, Jr., of Texas, to be an Assistant General Counsel in the Depart-

ment of the Treasury (Chief Counsel for the Internal Revenue Service);

Martin H. Gerry, of California, to be an Assistant Secretary of Health and Human Services; and

Gail Roggin Wilensky, of the District of Columbia, to be Administrator of the Health Care Financing Administration.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. COATS:

S. 2023. A bill to amend the Internal Revenue Code of 1986 to provide for the establishment of family savings accounts, to provide that the earnings on such accounts will not be taxable, and for other purposes; to the Committee on Finance.

By Mr. DASCHLE (for himself and Mr. GRASSLEY):

S. 2024. A bill to provide for the coordination of ground water policy within the Department of Agriculture, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. HEINZ (for himself, Mr. MOYNIHAN, Mr. DURENBERGER, Mr. DANFORTH, Mr. SYMMS, and Mr. BOREN):

S. 2025. A bill to amend the Internal Revenue Code of 1986 to make permanent certain expiring tax provisions; to the Committee on Finance.

By Mr. SYMMS:

S. 2026. A bill to amend the Internal Revenue Code of 1986 to allow employees to elect to have a percentage of employer and employee social security contributions made to a qualified pension plan, and for other purposes; to the Committee on Finance.

By Mr. BIDEN (for himself, Mr. THURMOND, Mr. HEFLIN, Mr. KOHL, Mr. SPECTER, Mr. SIMON, and Mr. METZENBAUM):

S. 2027. A bill to require certain procedural changes in the United States district courts in order to promote the just, speedy and inexpensive determination of civil actions, and for other purposes; to the Committee on the Judiciary.

By Mr. SYMMS (for himself, Mr. BINGAMAN, Mr. JOHNSTON, Mr. MCCLURE, Mr. BUMPERS, Mr. WALLOP, Mr. BAUCUS, Mr. BURNS, Mr. DIXON, Mr. DOMENICI, Mr. GARN, Mr. GORTON, Mr. GRASSLEY, Mr. HATCH, Mr. HELMS, Mr. KASTEN, Mr. LOTT, Mr. LUGAR, Mr. STEVENS, Mr. WILSON, Mr. SIMON, and Mr. HATFIELD):

S.J. Res. 240. Joint resolution designating the week of June 10, 1990, through June 16, 1990, as "Multiple-Use Sustained-Yield Week"; to the Committee on the Judiciary.

By Mr. D'AMATO (for himself, Mr. MOYNIHAN, Mr. BOSCHWITZ, Mr. LIEBERMAN, Mr. LEVIN, and Mr. METZENBAUM):

S.J. Res. 241. Joint resolution to designate the week of April 29, 1990, through May 5, 1990, as "Jewish Heritage Week"; to the Committee on the Judiciary.

By Mr. THURMOND:

S.J. Res. 242. Joint resolution designating the week of April 22, through April 28, 1990, as "National Crime Victims' Rights Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. D'AMATO:

S. Res. 232. Resolution to commend Cantor Joseph Wieselman on the occasion of his retirement; to the Committee on the Judiciary.

By Mr. MITCHELL (for himself and Mr. DOLE):

S. Res. 233. Resolution to authorize testimony and document production by Senate employee and representation by Senate Legal Counsel in *Springfield Terminal Railway Co.* v. *United Transportation Union*, No. 88-0117 P; considered and agreed to.

By Mr. MITCHELL:

S. Res. 234. Resolution to direct the Senate Legal Counsel to appear as amicus curiae in *United States* v. *Mark J. Haggerty*, et al.; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. COATS:

S. 2023. A bill to amend the Internal Revenue Code of 1986 to provide for the establishment of family savings accounts, to provide that the earnings on such accounts will not be taxable, and for other purposes; to the Committee on Finance.

FAMILY SAVINGS ACCOUNTS

● Mr. COATS. Mr. President, today I am introducing legislation intended to help America's families. This bill will encourage families to save by avoiding double taxation of their nest eggs. The family savings account will provide a tax incentive for first home purchases, education, and retirement.

Every session of Congress since I first came to Washington as a freshman Congressman in 1980 I have introduced bills for first time homebuyer's savings accounts and education savings accounts. This family account combines those two ideas with a retirement IRA.

Families in Indiana and throughout America are struggling just to make ends meet. The goal of savings funds for education or a home seems impossible at times. This has hurt both families and the Nation, which needs savings to remain competitive.

It seems that the least we in Government can do to help families is to let them keep more of their own money. This bill will permit overtaxed families to keep some of that money through family savings accounts. I hope it is given careful consideration as we discuss tax reform policy.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2023

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FAMILY SAVINGS ACCOUNTS.

(a) IN GENERAL.—Subchapter F of chapter 1 of the Internal Revenue Code of 1986 (relating to exempt organizations) is amended by adding at the end thereof the following new part:

"PART VIII—FAMILY SAVINGS ACCOUNTS

"Sec. 529. Taxation of family savings accounts.

"SEC. 529. TAXATION OF FAMILY SAVINGS ACCOUNTS.

"(a) EXEMPTION FROM TAXATION.—

"(1) IN GENERAL.—Except as provided in paragraph (2), a family savings account is exempt from taxation under this subtitle.

"(2) UNRELATED BUSINESS INCOME.—A family savings account shall be subject to the tax imposed by section 511 (relating to imposition of tax on unrelated business income of charitable, etc. organizations).

"(b) DEFINITION OF FAMILY SAVINGS ACCOUNT.—

"(1) IN GENERAL.—For purposes of this section, the term 'family savings account' means a trust created or organized in the United States for the exclusive benefit of the individual and his beneficiaries, but only if the written governing instrument creating the trust meets the following requirements:

"(A) The trust is designated at the time of its establishment as a family savings account.

"(B) No contribution will be accepted unless it is in cash, stocks, bonds, or other securities which are readily tradeable on an established securities market, and, except in the case of contributions from another family savings account, contributions will not be accepted for the taxable year in excess of $2,000.

"(C) The trustee is a bank (as defined in section 408(n)) or another person who demonstrates to the satisfaction of the Secretary that the manner in which that person will administer the trust will be consistent with the requirements of this section.

"(D) No part of the trust assets will be invested in life insurance contracts.

"(E) The assets of the account may be invested in accordance with the direction of the individual contributing to the account, but, if more than one individual has made contributions to the account, the consent of all such individuals shall be required for any such direction.

"(F) The assets of the trust will not be commingled with other property except in a common trust fund or common investment fund.

"(G) Contributions may be made to the account only by the individual for whose benefit the account is established, the individual's spouse, and the individual's parents or children.

"(H) The account may not be established for the benefit of more than 1 individual.

"(I) The beneficiary of the account may not be the beneficiary of any other family savings account.

"(2) STOCK, ETC., TO BE VALUED AS OF TRANSFER DATE.—The fair market value of stocks, bonds, and other securities shall be determined as of the date on which transferred to the account. If the date of transfer falls

on a Saturday, Sunday, or public legal holiday, then the fair market value shall be determined by reference to the last preceding trading day on which such stocks, bonds, or securities could have been traded on an established securities market.

"(c) CONTRIBUTION LIMITS.—For purposes of this section—

"(1) IN GENERAL.—The aggregate amount which may be contributed to a family savings account for any taxable year shall not exceed $2,000.

"(2) ROLLOVER CONTRIBUTIONS.—No rollover contribution may be made to a family savings account established on behalf of an individual unless such rollover contribution is a contribution of a distribution or payment out of another family savings account established on behalf of such individual.

"(d) DISTRIBUTION RULES.—For purposes of this title—

"(1) IN GENERAL.—Except in the case of a qualified distribution, the rules of paragraphs (1) and (2) of section 408(d) shall apply to any distribution from a family savings account.

"(2) TREATMENT OF QUALIFIED DISTRIBUTION.—In the case of a qualified distribution from a family savings account—

"(A) the amount of such distribution shall not be includible in gross income; and

"(B) section 72(t) shall not apply.

"(3) QUALIFIED DISTRIBUTION.—For purposes of this subsection, the term 'qualified distribution' means any distribution—

"(A) made on or after the date on which the individual attains age 59½,

"(B) made to a beneficiary (or to the estate of an individual) on or after the death of the individual,

"(C) attributable to the individual becoming disabled (within the meaning of section 72(m)(7)), or

"(D) which is a qualified special purpose distribution (within the meaning of subsection (f)).

"(4) ROLLOVERS.—Paragraph (1) shall not apply to any portion of any payment or distribution which, within 60 days of receipt of such payment or distribution, is paid into a family savings account for the benefit of the individual for whom the account from which such portion is transferred was maintained.

"(5) EXCESS CONTRIBUTIONS RETURNED BEFORE DUE DATE OF RETURN.—Paragraph (1) shall not apply to the distribution of any contribution paid during a taxable year to a family savings account to the extent that such contribution exceeds the amount allowable under subsection (c)(1) if—

"(A) such distribution is received on or before the day prescribed by law (including extensions of time) for filing such individual's return for such taxable year, and

"(B) such distribution is accompanied by the amount of net income attributable to such excess contribution.

Any net income described in subparagraph (B) shall be included in the gross income of the individual for the taxable year in which it is received.

"(e) TAX TREATMENT OF ACCOUNTS.—

"(1) CESSATION OF TREATMENT AS ACCOUNT.—

"(A) IN GENERAL.—If during any taxable year of an individual who contributes to a family savings account—

"(i) the requirements of subsection (b)(1) are not met, or

"(ii) such individual engages in any transaction prohibited by section 4975 with respect to the account,

the account shall cease to be a family savings account as of the first day of that taxable year.

"(B) ACCOUNT TREATED AS DISTRIBUTING ALL ITS ASSETS.—In any case in which any account ceases to be a family savings account by reason of subparagraph (A) on the first day of any taxable year, paragraph (1) of subsection (d) shall apply as if there were a distribution on such first day in an amount equal to the fair market value (on such first day) of all assets in the account (on such first day).

"(2) EFFECT OF PLEDGING ACCOUNT AS SECURITY.—If, during any taxable year, the individual for whose benefit a family savings account is established uses the account or any portion thereof as security for a loan, the portion so used shall be treated as distributed to that individual.

"(f) QUALIFIED SPECIAL PURPOSE DISTRIBUTION.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified special purpose distribution' means—

"(A) a qualified first-time homebuyer distribution, or

"(B) an applicable educational distribution.

"(2) DISTRIBUTIONS USED TO PURCHASE A HOME BY FIRST-TIME HOMEBUYER.—For purposes of paragraph (1)—

"(A) IN GENERAL.—The term 'qualified first-time homebuyer distribution' means any payment or distribution received by a first-time homebuyer from a family savings account to the extent such payment or distribution is used by the individual before the close of the 60th day after the day on which such payment or distribution is received to pay qualified acquisition costs with respect to a principal residence for such individual.

"(B) SPECIAL RULE WHERE DELAY IN ACQUISITION.—If—

"(i) any amount is paid or distributed from a family savings account to an individual for purposes of being used as provided in subparagraph (A), and

"(ii) by reason of a delay in the acquisition of the residence, such amount cannot be so used,

the amount so paid or distributed may be paid into a family savings account as provided in subsection (d)(4) without regard to the 60-day limit, and, if so paid into such other account, subsection (d)(1) shall not apply to such amount.

"(C) DEFINITIONS.—For purposes of this paragraph—

"(i) QUALIFIED ACQUISITION COSTS.—The term 'qualified acquisition costs' means the costs of acquiring, constructing, or reconstructing a residence. Such term includes any usual or reasonable settlement, financing, or other closing costs.

"(ii) FIRST-TIME HOMEBUYER.—The term 'first-time homebuyer' means any individual if such individual had no present ownership interest in a principal residence before the acquisition of the principal residence to which this paragraph applies.

"(iii) PRINCIPAL RESIDENCE.—The term 'principal residence' has the same meaning as when used in section 1034.

"(iv) DATE OF ACQUISITION.—The term 'date of acquisition' means the date—

"(I) on which a binding contract to acquire the principal residence to which subparagraph (A) applies is entered into, or

"(II) on which construction or reconstruction of such a principal residence is commenced.

"(4) DISTRIBUTIONS FROM FAMILY SAVINGS ACCOUNTS FOR EDUCATIONAL EXPENSES.—

"(A) IN GENERAL.—For purposes of paragraph (1), the term 'applicable educational distributions' means distributions to an individual to the extent that the amount of such distributions (not otherwise treated as qualified special purpose distributions, determined after application of paragraph (3)) does not exceed the qualified education expenses of the individual for the taxable year.

"(B) QUALIFIED EDUCATION EXPENSES.—For purposes of subparagraph (A)—

"(i) IN GENERAL.—The term 'qualified education expenses' means tuition, fees, books, supplies, and equipment required for the enrollment or attendance of—

"(I) the taxpayer,

"(II) the taxpayer's spouse, or

"(III) the taxpayer's child (as defined in section 151(c)(3)) or grandchild,

at an educational institution described in section 170(b)(1)(A)(ii).

"(ii) COORDINATION WITH SAVINGS BOND PROVISIONS.—The amount of qualified education expenses for any taxable year shall be reduced by any amount excludable from gross income under section 135.

"(g) COMMUNITY PROPERTY LAWS.—This section shall be applied without regard to any community property laws.

"(h) CUSTODIAL ACCOUNTS.—For purposes of this section, a custodial account shall be treated as a trust if the assets of such account are held by a bank (as defined in section 408(n)) or another person who demonstrates, to the satisfaction of the Secretary, that—

"(1) the manner in which he will administer the account will be consistent with the requirements of this section, and

"(2) the custodial account would, except for the fact that it is not a trust, constitute a family savings account described in subsection (b).

For purposes of this title, in the case of a custodial account treated as a trust by reason of the preceding sentence, the custodian of such account shall be treated as the trustee thereof.

"(i) REPORTS.—The trustee of a family savings account shall make such reports regarding such account to the Secretary and to the individual for whose benefit the account is maintained with respect to contributions, distributions, and such other matters as the Secretary may require under regulations. The reports required by this subsection shall be filed at such time and in such manner and furnished to such individuals at such time and in such manner as may be required by those regulations."

(b) TAX ON EXCESS CONTRIBUTIONS.—Section 4973 of such Code (relating to tax on excess contributions to individual retirement accounts, certain section 403(b) contracts, and certain individual retirement annuities) is amended—

(1) by inserting "family savings accounts," after "accounts," in the heading of such section,

(2) by redesignating paragraph (2) of subsection (a) as paragraph (3) and by inserting after paragraph (1) the following:

"(2) a family savings account (within the meaning of section 529(b)), or",

(3) by striking out "or" at the end of paragraph (1) of subsection (a), and

(4) by adding at the end thereof the following new subsection:

"(d) EXCESS CONTRIBUTIONS TO FAMILY SAVINGS ACCOUNTS.—For purposes of this section, in the case of a family savings account, the term 'excess contributions' means the amount by which the amount contribut-

ed for the taxable year to the account exceeds the amount allowable under section 529(c)(1) for such taxable year. For purposes of this subsection, any contribution which is distributed out of the family savings account in a distribution to which section 529(d)(5) applies shall be treated as an amount not contributed."

(d) CONTRIBUTION NOT TO BE TREATED AS A GIFT FOR GIFT TAX PURPOSES.—Section 2503 of such Code (relating to taxable gifts) is amended by adding at the end thereof the following new subsection:

"(h) FAMILY SAVINGS ACCOUNTS.—For purposes of subsection (b), any payment made by an individual to a family savings account described in section 529(b) shall not be considered a gift of a future interest in property to the extent that such payment is allowed under section 529."

(e) TAX ON PROHIBITED TRANSACTIONS.—Section 4975 of such Code (relating to prohibited transactions) is amended—

(1) by adding at the end of subsection (c) the following new paragraph:

"(4) SPECIAL RULE FOR FAMILY SAVINGS ACCOUNTS.—An individual for whose benefit a family savings account is established shall be exempt from the tax imposed by this section with respect to any transaction concerning such account (which would otherwise be taxable under this section) if, with respect to such transaction, the account ceases to be a family savings account by reason of the application of section 529(e) to such account.", and

(2) by inserting ", or a family savings account described in section 529(b)" in subsection (e)(1) after "described in section 408(a)".

(f) FAILURE TO PROVIDE REPORTS ON FAMILY SAVINGS ACCOUNTS.—Section 6693 of such Code (relating to failure to provide reports on individual retirement account or annuities) is amended—

(1) by inserting "or a family savings account" after "annuities" in the heading of such section, and

(2) by adding at the end of subsection (a) the following: "The person required by section 529(i) to file a report regarding a family savings account at the time and in the manner required by such section shall pay a penalty of $50 for each failure unless it is shown that such failure is due to reasonable cause."

(g) CONFORMING AMENDMENTS.—

(1) The table of parts for subchapter F of chapter 1 of such Code is amended by adding at the end thereof the following new item:

"Part VIII. Family savings accounts."

(2) The table of sections for chapter 43 of such Code is amended by striking out the item relating to section 4973 and inserting in lieu thereof the following:

"Sec. 4973. Tax on excess contributions to individual retirement accounts, family savings accounts, certain 403(b) contracts, and certain individual retirement annuities."

(3) The table of sections for subchapter B of chapter 68 of such Code is amended by inserting "or on family savings accounts" after "annuities" in the item relating to section 6693.

(h) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1990.●

By Mr. DASCHLE (for himself and Mr. GRASSLEY):

S. 2024. A bill to provide for the coordination of ground water policy within the Department of Agriculture, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

GROUND WATER POLICY RESEARCH AND EDUCATION COORDINATION ACT

Mr. DASCHLE. Mr. President, today I am introducing legislation to improve the coordination of ground water policy, research and education efforts within USDA. This legislation will create a mechanism that will allow the farm community to become better educated on ground water protection. All facets of our society stand to gain from protection of ground water. Nearly 50 percent of the Nation's population and nearly the entire rural population is dependent on ground water for a source of drinking water.

In my role as chairman for the Subcommittee on Agricultural Research and General Legislation, I am responsible for the composition of the research title of the new farm bill. The legislation that I am introducing today, which is comparable to that previously introduced by the Congressman from Iowa, Mr. GRANDY, addresses many ground water research and extension concerns and can be used in developing a portion of the research title of the 1990 farm bill.

The primary purpose of the bill is to improve the coordination and management of USDA activities dealing with ground water policy, research and education. The bill focuses on ground water issues from an agricultural perspective.

The bill promotes cooperation and management of ground water policy within USDA, and with the States. It recognizes that ground water problems are site specific and that research and education policy must address the needs of individual ground water situations. The bill creates a mechanism for working with existing State programs and provides for improved Federal-State cooperation. The research and extension community, as well as the Soil Conservation Service, are given responsibility for finding solutions to the ground water problems, developing farming methods to reduce ground water pollution, raising awareness among farmers of ground water problems, and educating farmers on measures and practices to prevent ground water contamination.

There are six titles in the bill:

Title 1 Ground water policy in the Department of Agriculture.—This title lists the responsibilities of USDA, creates the Office of Ground Water Policy Coordination and specifies its duties with a Director of Ground Water Policy who will coordinate policy, research and education by the Department.

Improved management of ground water activities in the Department will also be accomplished by the formation of a coordinating committee of interagency heads who are involved in ground water activities. Technical support for ground water policy will be provided by a committee of Department technical experts.

The two committees will assist in developing a USDA "Agency-Specific Ground Water Policy Statement," covering USDA capabilities, jurisdictional problems and areas for research. The Director of Ground Water Policy will coordinate policy recommendations from agency directors into a "National Agricultural Ground Water Plan". This is a comprehensive 5-year plan for managing Department ground water policy, research and education. An annual "Ground Water Activities Report" by the Director, will allow the public to follow the progress of USDA on ground water activities.

Title 2 Coordination with State programs.—This title sets up a mechanism for coordinating activities with the States. A State ground water quality coordinator (within each State extension service) and ground water committees are established to accomplish this goal. The ground water coordinator must coordinate Federal policy with State policy, and with the ground water committee, review the State's nonpoint-source pollution plan (Sec. 319). The coordinator will be the lead official for ground water education.

Title 3 Extension and education.—The emphasis of this title is on education. The Extension Service is directed to improve programs to educate and assist farmers regarding nutrient management and pesticide application, so that programs focus more on ground water management. Programs to educate homeowners on household chemicals, pesticides and fertilizers management are also covered. A national advisory council is established to investigate and report on how to better manage these home products. Home chemicals, fertilizers and pesticides have largely been ignored in other ground water legislation.

Title 4 Soil Conservation Service.—The Soil Conservation Service [SCS] is instructed to work with the Extension Service and the Agricultural Research Service to study how best to implement ground water management practices in conjunction with their soil conservation activities. The bill instructs SCS to devise programs that protect ground water, but do not make production practices unprofitable. Improving management practices for agricultural inputs can reduce farming costs and ground water contamination.

Title 5 Research.—This title lists several technical research projects.

The research community is instructed to design a systems solution to production and ground water protection. The priorities for research are specific and focus on agricultural problems that are associated with ground water contamination. Use of biotechnology techniques and other environmentally benign agricultural chemicals would be high on the list.

Title 6 National Agriculture and Ground Water Clearinghouse.—Establishes a National repository at the National Agriculture Library in Beltsville, MD, for data and information on ground water.

By Mr. HEINZ (for himself, Mr. MOYNIHAN, Mr. DURENBERGER, Mr. DANFORTH, Mr. SYMMS, and Mr. BOREN):

S. 2025. A bill to amend the Internal Revenue Code of 1986 to make permanent certain expiring tax provisions; to the Committee on Finance.

CODIFICATION OF CERTAIN EXPIRING TAX PROVISIONS

Mr. HEINZ. Mr. President, I am introducing a bill for myself and Senators MOYNIHAN, DURENBERGER, DANFORTH, SYMMS and BOREN. This bill addresses one of the major problems we have with the various tax extensions. The bill we are introducing today combines all the extenders into one bill, and makes them all permanent.

The following is a list of the tax provisions, and when they originated:

1. Group legal services, 1976;
2. Employer-provided education assistance, 1978;
3. Targeted jobs tax credit, 1978;
4. Business energy credits, 1978;
5. Mortgage revenue bonds, 1980;
6. Non-conventional fuels production credit, 1980
7. Research and experimentation credit, 1981
8. Research cost allocation rules, 1981
9. Small issue manufacturing bonds, 1982
10. Orphan drug credit, 1983
11. Low income housing credit, 1986; and
12. Health insurance for the self employed, 1986.

All of these tax provisions expire sometime this year. Some expire on September 30, 1990, and the rest expire on December 31, 1990.

Just the expiration dates show how confusing the process for extending these provisions has become. When most of these provisions were enacted, they were set up to expire within a few years—usually between 2 to 5 years. This allowed Congress to reexamine each provision, determine whether each was working, and whether there were abuses. We then made changes as needed, and extended the provision. I would like to point out that each of the above tax provisions has previously expired, some several times, and Congress has reexamined all of them and extended them. We can no longer use the excuse that we need to study the provision to see if it is working properly. We have studied these provisions, we know they work. Yet we have not extended them permanently.

The bill I am introducing today does not change any of the provisions; it simply follows current law. But it makes all 12 of the provisions permanent. It restores certainty and predictability to the law.

Neither employers nor employees can reply on the provisions when they have no idea if we are going to extend them, or modify them one more time.

A telling example is the research and development credit. This credit was designed to encourage research, and to improve our companies productivity and competitiveness in the international marketplace. No one doubts that vigorous research and experimentation is critical to the innovation, technology, and productivity that will assure the United States its position in the world marketplace. The United States was and still is falling behind the rest of the world in research.

Most companies do long-term planning on a 5-year basis. Without a permanent R&D credit, a company cannot realistically make plans. I have talked to numerous corporate executives who advised me that it is impossible for them to do rational long-term planning with regards to research. They cannot take the gamble that Congress might not extend the credit. Its effectiveness has been hampered, since it has always been a temporary measure. While the credit has resulted in increased R&D, its full incentive effect has never been realized because corporate managers have not been able to count on the credits' continued existence as they plan their budgets and research investments. Since 1981, the credit has been changed, reduced and allowed to expire several times. It is clearly time to make the credit permanent.

The same argument can be made for each of the tax provisions. We want States, companies, and individuals to use these credits, but many are reluctant to invest their time and resources on a program that might not be there next year. Even Congress has trouble working with the programs when they are not extended properly.

A case in point is the targeted jobs tax credit [TJTC]. TJTC requires an appropriation for the Labor Department so that they can certify the targeted individuals who qualify for the program. The Appropriations Committee cannot make appropriations for a program that is not currently authorized in the law. Since the program is constantly expiring at the time the Appropriations Committee is marking up the Labor-HHS appropriations bill, the committee can never include a full year of funding for TJTC. As a result, money must be added later, causing a series of headaches for everyone—the Department of Labor, the State employment offices, the companies who have learned to utilize TJTC, and especially the targeted individuals who the program was intended to benefit.

For almost a decade we have extended many of these programs over and over again. We have paid for them with a permanent revenue increase, yet the programs have only been extended temporarily.

One of the major misconceptions about the extenders is that it really does not matter if they expire. We could always extend them next year. It is assumed that the affected taxpayers only need to file an amended return, and for some of the extenders and some of the taxpayers that might be the case. However, the burden to the IRS and the taxpayers is unwarranted, and it violates the first principle of public policy; namely, that decisionmaking should be timely and rational. Our present practice is not only hit or miss on timing, it is irrational in the on-again-off-again signal that it sends.

Employer provided education assistance is a useful remainder of the current and irrational public policymaking system. We have allowed this program to expire in the past on several occasions. Corporations who paid the tuition for their employees did not know whether to withhold on the amounts paid, or hope that Congress would extend the provision before tax filing season.

Most employers with whom I have talked decided to withhold. If Congress had not extended the legislation, the employee would have owed more taxes at the end of the year, taxes that employees had not had withheld, and that they had not counted on paying.

Well, in this instance we finally did extend the provision. Corporations had to adjust everyone's withholding to reflect the change. It was an added burden and expense to all involved and indeed—and this is the worst part—there were employees who had not gone to school because they could not afford the added cost.

Who benefited from Congress' delay and inaction and inconsistency? The answer is, no one benefited, and many people were hurt because employees failed to gain the skills they needed for themselves and for this country. If we are to improve our economic efficiency and ability, we certainly need thos skills.

Mr. President, one of the first questions I suppose anybody asked before sponsoring legislation is, how much is this going to cost? Because of the budget deficit, that is a legitimate question. But when we extend each of these provisions for a 1- or 2-year period over and over, we still have to permanently pay each time. Have we

saved anything? No. We are just being honest about the cost.

So when we talk about honesty in budgeting, let us be really honest and not play this game of on-again/off-again extenders. It is time we were honest about them and time to stop playing the game.

I am attaching at the end of this statement a short explanation of the 12 extenders. After all this time, I doubt if there is anyone in this body who is not familiar with the various tax provisions.

I urge my colleagues to sponsor this legislation, and bring a halt to battle of the extenders.

Mr. President, I ask unanimous consent that a copy of the bill, and a description of the extenders be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2025

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. EMPLOYER-PROVIDED EDUCATIONAL ASSISTANCE.

(a) IN GENERAL.—Section 127 of the Internal Revenue Code of 1986 (relating to educational assistance programs) is amended by striking subsection (d) and by redesignating subsection (e) as subsection (d).

(b) CONFORMING AMENDMENT.—Section 7101(a) of the Revenue Reconciliation Act of 1989 is amended by striking paragraph (2).

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1989.

SEC. 2. EMPLOYER-PROVIDED GROUP LEGAL SERVICES.

(a) IN GENERAL.—Section 120 of the Internal Revenue Code of 1986 (relating to group legal services plans) is amended by striking subsection (e) and by redesignating subsection (f) as subsection (e).

(b) CONFORMING AMENDMENT.—Section 7102(a) of the Revenue Reconciliation Act of 1989 is amended by striking paragraph (2).

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1989.

SEC. 3. TARGETED JOBS CREDIT.

(a) IN GENERAL.—Section 51(c) of the Internal Revenue Code of 1986 (defining wages eligible for targeted jobs credit) is amended by striking paragraph (4).

(b) AUTHORIZATION.—Paragraph (2) of section 261(f) of the Economic Recovery Act of 1981 is amended by striking "fiscal year 1982" and all that follows through "necessary" and inserting "each fiscal year such sums as may be necessary".

(c) EFFECTIVE DATES.—

(1) CREDIT.—The amendment made by subsection (a) shall apply to individuals who begin work for the employer after September 30, 1990.

(2) AUTHORIZATION.—The amendment made by subsection (b) shall apply to fiscal years beginning after 1990.

SEC. 4. QUALIFIED MORTGAGE BONDS.

(a) IN GENERAL.—Paragraph (1) of section 143(a) of the Internal Revenue Code of 1986 (defining qualified mortgage bond) is amended to read as follows:

"(1) QUALIFIED MORTGAGE BOND DEFINED.—For purposes of this title, the term 'qualified mortgage bond' means a bond which is as issued as part of a qualified mortgage issue."

(b) MORTGAGE CREDIT CERTIFICATES.—Section 25 of the Internal Revenue Code of 1986 (relating to interest on certain home mortgages) is amended by striking subsection (h) and by redesignating subsection (i) as subsection (h).

(c) EFFECTIVE DATE.—

(1) BONDS.—The amendments made by subsection (a) shall apply to bonds issued after September 30, 1990.

(2) CERTIFICATE.—The amendment made by subsection (b) shall apply to elections for periods after September 30, 1990.

SEC. 5. QUALIFIED SMALL ISSUE BONDS.

(a) IN GENERAL.—Subparagraph (B) of section 144(a)(12) of the Internal Revenue Code of 1986 (relating to termination dates) is amended to read as follows:

"(B) EXCEPTION FOR BONDS ISSUED TO FINANCE MANUFACTURING FACILITIES AND FARM PROPERTY.—Subparagraph (A) shall not apply to any bond issued as part of an issue 95 percent or more of the net proceeds of which are to be used to provide—

"(i) any manufacturing facility, or

"(ii) any land or property in accordance with section 147(c)(2)."

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to bonds issued after September 30, 1990.

SEC. 6. ENERGY INVESTMENT CREDIT FOR SOLAR, GEOTHERMAL, AND OCEAN THERMAL PROPERTY.

The table contained in section 46(b)(2)(A) of the Internal Revenue Code of 1986 (relating to energy percentage) is amended by striking "Sept. 30, 1990" in clauses (viii), (ix), and (x).

SEC. 7. HEALTH INSURANCE COSTS OF SELF-EMPLOYED INDIVIDUALS.

(a) IN GENERAL.—Section 162(a) of the Internal Revenue Code of 1986 (relating to special rules for health insurance costs of self-employed individuals) is amended by striking paragraph (6).

(b) CONFORMING AMENDMENT.—Section 7107(a) of the Revenue Reconciliation Act of 1989 is amended by striking paragraph (2).

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1989.

SEC. 8. LOW-INCOME HOUSING CREDIT.

(a) IN GENERAL.—Section 42 of the Internal Revenue Code of 1986 (relating to low-income housing credit) is amended by striking subsection (n).

(b) CONFORMING AMENDMENT.—Section 7108(a) of the Revenue Reconciliation Act of 1989 is amended by striking paragraph (2).

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to calendar years after 1989.

SEC. 9. RESEARCH CREDIT.

(a) IN GENERAL.—Section 41 of the Internal Revenue Code of 1986 (relating to credit for increasing research activities) is amended by striking subsection (h).

(b) CONFORMING AMENDMENTS.—

(1) Section 7110(a) of the Revenue Reconciliation Act of 1989 is amended by striking paragraph (2).

(2) Section 28(b)(1) of the Internal Revenue Code of 1986 is amended by striking subparagraph (D).

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1989.

SEC. 10. ALLOCATION OF RESEARCH AND EXPERIMENTAL EXPENDITURES.

Paragraph (5) of section 864(f) of the Internal Revenue Code of 1986 (relating to allocation of research and experimental expenditures) is amended to read as follows:

"(5) YEARS TO WHICH RULE APPLIES.—This subsection shall apply to taxable years beginning after August 1, 1989."

SEC. 11. EXPENSES FOR DRUGS FOR RARE CONDITIONS.

Section 28 of the Internal Revenue Code of 1986 (relating to clinical testing expenses for certain drugs for rare diseases or conditions) is amended by striking subsection (e).

SEC. 12. CREDIT FOR PRODUCING FUEL FROM A NONCONVENTIONAL SOURCE.

Subsection (f) of section 29 of the Internal Revenue Code of 1986 (relating to application of section) is amended—

(1) by striking "and before January 1, 1991" each place it appears in paragraph (a)(A), and

(2) by striking ", and before January 1, 2001" in paragraph (1)(B).

DESCRIPTION OF THE EXTENDERS

1. Group Legal Services.—Amounts contributed by an employer to a qualified group legal services plan for an employee (or the employee's spouse or dependents) are excluded from the employee's gross income for income and employment tax purposes. The exclusion also applies to any services received by an employee or any amounts paid to an employee under such a plan as reimbursement for the cost of legal services for the employee. The exclusion is limited to an annual premium value of $70. Section 120 of the Internal Revenue Code of 1986.

2. Employer-provided Education Assistance.—An employee's gross income and wages for income and employment tax purposes does not include amounts paid or incurred by the employer (up to $5,250 per calendar year) for educational assistance provided to the employee if such amounts were paid or incurred pursuant to an educational assistance program that must meet certain requirement. The provision does not apply to graduate level courses. Section 127 of the Internal Revenue Code of 1986.

3. Targeted Jobs Tax Credits.—A credit of 40% of the first $6,000 of qualified first year wages paid to a member of a targeted group. The maximum credit is generally $2,400. The targeted groups are: (1) vocational rehabilitation referrals; (2) economically disadvantaged youths aged 18 through 22; (3) economically disadvantaged Vietnam-era veterans; (4) Supplemental Security Income (SSI) recipients; (5) general assistance recipients; (6) economically disadvantaged cooperative education students aged 16 through 19; (7) economically disadvantaged former convicts; (8) Aid to Families with Dependent Children (AFDC) recipients and Work Incentive (WIN) registrants; and (9) economically disadvantaged summer youth employees aged 16 or 17.

4. Business Energy Credits.—A nonrefundable energy tax credit is allowed for certain investments in solar property, geothermal property and ocean thermal property. For solar and geothermal properties, the rate of the credit is 10 percent, and the rate of the credit for ocean thermal property is 15%.

5. Mortgage Revenue Bonds.—In general, mortgage revenue bonds qualify for tax-exemption under section 103 of the Code ("qualified mortgage bonds") are bonds the proceeds of which are used (net of costs of issuance and a reasonably required reserved

fund) to finance the purchase, or qualifying rehabilitation or improvement, of single-family, owner-occupied homes located within the jurisdiction of the issuer of the bonds.

6. Nonconventional Fuels Production Credit.—A tax credit is provided for the domestic production and sale of qualified fuels to unrelated persons. The credit is available for production and sale of the following fuels: (1) Oil produced from shale and tar sands; (2) Gas produced from geopressured brine, Devonian shale, coal seams, or a tight formation; (3) Gas produced from biomass, (4) Liquid, Gaseous or solid synthetic fuel (including alcohol) produced from coal (including ignite), including such fuels when used as feedstocks; (5) qualifying processed wood fuels; and (6) Steam from solid agricultural byproducts (not including timber byproducts). The credit equals $3 for each 5.8 million Btu's of energy.

7. Research and Experimentation Credit.—A 20% tax credit is allowed for qualified research expenditures incurred by a taxpayer in carrying on a trade or business. Except for certain university basic research payments, the credit applies only to the extent that the taxpayer's qualified research expenditures for the taxable year exceed the average amount of the taxpayer's yearly qualified research expenditures in the specified base period, which generally is the proceeding three taxable years.

8. Research Cost Allocation Rules.—Detailed rules for allocating and apportioning research and experimental expenses for purposes of computing the foreign tax credit limitation of a U.S. person, as well as for other purposes.

9. Small Issue Manufacturing Bonds.—Interest on certain small issues of private activity bonds are exempt from tax if at least 95% of the bond proceeds are used to finance manufacturing facilities or certain land or property for first-time farmers. Qualified small-issue bonds are issues having an aggregate authorized face amount of $1 million or less. Alternatively, the aggregate face amount of the issue, together with the aggregate amount of certain related capital expenditures during the 6-year period beginning three years before the date of the issue and ending three years after that date, may not exceed $10 million.

10. Orphan Drug Credit.—A tax credit of 50 cents on every dollar spent on rare disease research. Rare disease or condition means any disease or condition which affects less than 200,000 persons in the United States or affects more than 200,000 persons in the U.S. but for which there is no reasonable expectation that the cost of developing and making available in the U.S. a drug for such disease condition will be recovered from sales in the U.S. of such drugs.

11. Low-Income Housing Credit.—A credit is allowed in annual installments over 10 years for qualifying low-income rental housing, which may be newly constructed, substantially rehabilitated, or newly acquired existing residential rental property. Credit allocation is granted by State and local government credit authorities subject to an annual limitation for each State.

12. Health Insurance for the Self-Employed.—Provides a deduction for 25% of the amounts paid for health insurance for a taxable year on behalf of a self-employed individual and the individual's spouse and dependents.

By Mr. SYMMS:

S. 2026. A bill to amend the Internal Revenue Code of 1986 to allow employees to elect to have a percentage of employer and employee Social Security contributions made to a qualified pension plan; to the Committee on Finance.

SOCIAL SECURITY BENEFITS ENHANCEMENT ACT

Mr. SYMMS. Mr. President, constituents are writing us in anger that their Social Security taxes are being used for other purposes than for savings toward their own retirement. They don't really mind pay as we go financing for Social Security, because all of us agree we want to take care of promises made to current beneficiaries and those soon to retire.

But it makes people mad that Social Security taxes are used to conceal the true size of the deficit in other Federal funds accounts. They want real savings.

President Roosevelt and the 74th Congress established Social Security with the "public relations promise" that every American would be paying taxes to save for his or her retirement, and that is what every American today wants: Save the money, don't spend it.

I am introducing legislation today to fulfill the promise of the 74th Congress. The Social Security Benefits Enhancement Act would create a new family savings plan benefit as part of the Social Security system.

The Social Security Benefits Enhancement Act is a marriage of the best ideas from those who say we should cut the Social Security tax and restore pay- as-we-go financing—wedded to the proposal by President Bush to increase our national private savings rate and create family savings plan accounts for every American.

I support both of these great, creative ideas. Let's have honest accounting in Government by cutting the Social Security tax and let's increase the national private savings rate, to enhance retirement benefits.

The Social Security Benefits Enhancement Act would repeal the unnecessary 1988 and 1990 tax increases. Revenues from those tax hikes are only serving to conceal the deficit in the Federal funds accounts by collecting too much currently in the Social Security trust funds.

The Social Security Benefits Enhancement Act would use those surplus funds to increase the private savings rate of every American family, rather than spending it for other Government programs. This is what our constituents want.

Social Security current and future benefits would not be affected—the financing problem facing Social Security 25 years from now will still confront a future Congress, as it does today.

Even today we know some future Congress will have to find a way to redeem the Treasury securities in the OASDI trust funds. Even now, we know that future retirement benefits depend on taxes collected in the very same year benefits are paid out. There is no saving in the public sector; it's a contradiction in terms.

Under the Social Security Benefits Enhancement Act, there will be real savings. The future financing problem for common benefits will be unchanged—but every American family will also have a Social Security family savings plan in addition to currently authorized Social Security benefits.

These SSFSP accounts will make every American family better prepared for retirement, for home ownership, and for financing higher education for their children. Overall benefits are enhanced.

The Social Security Benefits Enhancement Act provides for every employer to establish, as part of his pension plan, a special account to collect the surplus that is today going to the Government for general spending.

Self-employed individuals would be authorized to set up their own savings plan, under proper supervision, and workers whose employers do not participate would have special accounts in the U.S. Treasury.

Every year, the Social Security trustees would calculate how much of the Social Security tax is needed to pay the coming year's benefits, and the surplus—if any—would be authorized to be paid by the employer, instead of to the Treasury, into the Social Security family savings plan accounts that every private pension fund in America would have, and which this proposal would establish.

Federal Government employees already enjoy a thrift savings plan with most of the features I would put in the Social Security Benefits Enhancement Act. I think the average American worker should have the same family savings opportunities as part of his or her retirement pension system as the Federal Government employees enjoy.

I ask unanimous consent for the text of my bill to be printed in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2026

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; AMENDMENT OF 1986 CODE.

(a) SHORT TITLE.—This Act may be cited as the "Social Security Benefits Enhancement Act".

(b) AMENDMENT OF 1986 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment is expressed in terms of an amendment to a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1986.

SEC. 2. ESTABLISHMENT OF SOCIAL SECURITY FAMILY SAVINGS PLAN.

(a) IN GENERAL.—Part I of subchapter D of chapter 1 (relating to pension, profit-sharing, stock bonus plans, etc.) is amended by adding at the end thereof the following new subpart:

"Subpart E—Social Security Family Savings Plan Accounts

"Sec. 420. Social security family savings plan accounts.

"SEC. 420. SOCIAL SECURITY FAMILY SAVINGS PLAN ACCOUNTS.

"(a) GENERAL RULE.—Any individual subject to the tax imposed by section 1401(a) or 3101(a) may elect to have contributions made on the employee's behalf to—

"(1) a Social Security Family Savings Plan Account (hereinafter in this section referred to as the 'Account') established by the individual's employer under subsection (b)(1), or

"(2) if there is no Account established by the employer, an Account established as provided in subsection (b)(2).

"(b) ESTABLISHMENT OF ACCOUNTS.—For purposes of this section—

"(1) EMPLOYERS.—Each employer maintaining a qualified plan may establish an Account, which shall be maintained as a separate account within such plan.

"(2) GOVERNMENT ACCOUNT.—

"(A) IN GENERAL.—The Commissioner of the Social Security Administration shall establish an Account within the Treasury of the United States.

"(B) ADMINISTRATION.—It shall be the duty of the Commissioner—

"(i) to invest such portion of the Account as is not, in the Commissioner's judgment, required to meet withdrawals,

"(ii) to report each year to the Congress on the financial condition and operation of the Account, and

"(iii) to provide methods for the transfer of the balance in the separate account of an individual to an Account established under paragraph (1) if the individual becomes eligible to participate in such Account.

"(3) SEPARATE ACCOUNTING.—Any Account established under paragraph (1) or (2) shall establish and maintain a separate account for each individual participating in the Account.

"(c) CONTRIBUTIONS TO ACCOUNTS.—

"(1) IN GENERAL.—If an employee elects to have contributions made on the employee's behalf to an Account for any plan year, the employer and employee shall each contribute on behalf of the employee for such plan year an amount equal to the excess FICA contribution.

"(2) CONTRIBUTIONS NONFORFEITABLE.—An employee's right to any contributions on behalf of such employee shall be nonforfeitable.

"(3) EXCESS FICA CONTRIBUTION.—For purposes of this subsection, the term 'excess FICA contribution' means the portion of the tax imposed by section 3101 or 3111, whichever is applicable, on wages received by an employee with respect to employment by the employer during any calendar year ending with or within the plan year as is attributable to the rate of tax under such section in excess of the applicable percentage.

"(4) SPECIAL RULES FOR SELF-EMPLOYED INDIVIDUALS.—In the case of an individual with respect to whom a tax is imposed under section 1401(a)—

"(A) for purposes of subsection (b)(1), an Account may be established in connection with a qualified plan in which such individual is a participant, and

"(B) the excess FICA contribution shall be the portion of the tax imposed by section 1401(a) on the net earnings from self-employment derived from the trade or business with respect to which the qualified plan is established which is attributable to the rate of tax in excess of the applicable percentage.

"(5) APPLICABLE PERCENTAGE.—For purposes of this subsection—

"(A) IN GENERAL.—The term 'applicable percentage' means 5.7 percent (11.4 percent in the case of the tax imposed by section 1401(a)).

"(B) ADJUSTMENTS TO REFLECT BALANCE IN TRUST FUNDS.—

"(i) IN GENERAL.—Not later than September 1 of each calendar year beginning after 1990, the Board of Trustees of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund shall estimate—

"(I) the expenditures from such trust funds for the next 2 fiscal years, and

"(II) the balance of the trust funds as of the close of the fiscal year in which the estimate is being made.

"(ii) DEFICITS.—If the Board of Trustees under clause (i) estimates that expenditures for the succeeding fiscal year will exceed revenues in the trust funds as of the close of the fiscal year in which the estimate is being made, the Board of Trustees may increase the percentage under subparagraph (A) (but not in excess of the rate of tax under section 3101(a), 3111(a), or 1401(a), whichever is applicable) to the percentage which would increase revenues into the trust funds to an amount not greater than such excess.

"(iii) SURPLUSES.—If the Board of Trustees under clause (i) estimates that revenues in the trust funds as of the close of the fiscal year in which the estimate is being made will exceed expenditures for the 18-month period beginning with the first day of the next fiscal year, the Board of Trustees may decrease the percentage under subparagraph (A) (but not below zero) to the percentage which would decrease revenues to an amount not greater than such excess.

"(C) PERIOD NEW PERCENTAGES IN EFFECT.—Any percentage change under subparagraph (B) shall be in effect for remuneration paid during the calendar year following the calendar year in which the estimate on which it was based was made.

"(d) TIME AND METHOD OF CONTRIBUTIONS.—

"(1) CONTRIBUTIONS BY EMPLOYEE TO AN EMPLOYER ACCOUNT.—An employee may not elect under subsection (a) to have contributions made to an Account established under subsection (b)(1) unless the employee consents to have the employee's contribution collected by the employer from the wages of the employee in the same manner as the tax imposed by section 3101.

"(2) DEPOSITS TO ACCOUNT.—

"(A) EMPLOYER ACCOUNTS.—Employer and employee contributions to an Account established under subsection (b)(1) shall be deposited into the Account at the same time as the taxes imposed by sections 3101, 3111, and 1401 are deposited into the Treasury of the United States.

"(B) GOVERNMENT ACCOUNT.—Employer and employee contributions to an Account established under subsection (b)(2)—

"(i) shall be paid and deposited by the employer at the same time and manner as the taxes deposited by sections 3101, 3111, and 1401, and

"(ii) shall be transferred at least monthly from the general fund of the Treasury to the Account and credited to the employee's separate account.

"(e) TAX TREATMENT OF ACCOUNTS.—

"(1) IN GENERAL.—For purposes of this title, and except as provided in subsection (f), an Account established under subsection (b)(1) shall be treated as a separate profit-sharing plan maintained by the employer.

"(2) PLAN NOT TAKEN IN ACCOUNT IN TESTING OTHER PLANS.—In determining whether any other qualified plan meets any requirement of this title, such plan shall not be aggregated with an Account established under subsection (b)(1).

"(f) DISTRIBUTION RULES.—For purposes of this title—

"(1) IN GENERAL.—Except in the case of a qualified distribution, any distribution from an Account shall be treated in the same manner as a distribution from a qualified plan.

"(2) TREATMENT OF QUALIFIED DISTRIBUTION.—In the case of a qualified distribution from an Account—

"(A) the amount of such distribution shall not be includible in gross income; and

"(B) section 72(t) shall not apply.

"(3) QUALIFIED DISTRIBUTION.—For purposes of this subsection, the term 'qualified distribution' means any distribution—

"(A) made on or after the date on which the individual attains the age used as the retirement age under section 216(l) of the Social Security Act,

"(B) made to a beneficiary (or to the estate of an individual) on or after the death of the individual,

"(C) attributable to the individual becoming disabled (within the meaning of section 72(m)(7)),

"(D) distributions described in section 72(t)(2)(B) (relating to distributions in connection with medical expenses), or

"(E) which is a qualified special purpose distribution (within the meaning of subsection (g)).

"(4) ROLLOVERS.—Paragraph (1) shall not apply to any portion of any payment or distribution which, within 60 days of receipt of such payment or distribution, is paid into another Account for the benefit of the individual for whom the Account from which such portion is transferred was maintained.

"(g) QUALIFIED SPECIAL PURPOSE DISTRIBUTION.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified special purpose distribution' means—

"(A) a qualified first-time homebuyer distribution, or

"(B) an applicable higher education distribution.

"(2) DISTRIBUTIONS USED TO PURCHASE A HOME BY FIRST-TIME HOMEBUYER.—For purposes of paragraph (1)—

"(A) IN GENERAL.—The term 'qualified first-time homebuyer distribution' means any payment or distribution received by a first-time homebuyer from an Account to the extent such payment or distribution is used by the individual before the close of the 60th day after the day on which such payment or distribution is received to pay qualified acquisition costs with respect to a principal residence for such individual.

"(B) SPECIAL RULE WHERE DELAY IN ACQUISITION.—If—

"(i) any amount is paid or distributed from an Account to an individual for purposes of being used as provided in subparagraph (A), and

"(ii) by reason of a delay in the acquisition of the residence, such amount cannot be so used,

the amount so paid or distributed may be paid into an Account as provided in subsection (f)(4) without regard to the 60-day limit, and, if so paid into such other Account, subsection (f)(1) shall not apply to such amount.

"(C) DEFINITIONS.—For purposes of this paragraph—

"(i) QUALIFIED ACQUISITION COSTS.—The term 'qualified acquisition costs' means the costs of acquiring, constructing, or reconstructing a residence. Such term includes any usual or reasonable settlement, financing, or other closing costs.

"(ii) FIRST-TIME HOMEBUYER.—The term 'first-time homebuyer' means any individual if such individual had no present ownership interest in a principal residence before the acquisition of the principal residence to which this paragraph applies.

"(iii) PRINCIPAL RESIDENCE.—The term 'principal residence' has the same meaning as when used in section 1034.

"(iv) DATE OF ACQUISITION.—The term 'date of acquisition' means the date—

"(I) on which a binding contract to acquire the principal residence to which subparagraph (A) applies is entered into, or

"(II) on which construction or reconstruction of such a principal residence is commenced.

"(4) DISTRIBUTIONS FROM ACCOUNTS FOR HIGHER EDUCATION EXPENSES.—

"(A) IN GENERAL.—For purposes of paragraph (1), the term 'applicable higher education distributions' means distributions to an individual to the extent that the amount of such distributions (not otherwise treated as qualified special purpose distributions, determined after application of paragraph (3)) does not exceed the qualified higher education expenses of the individual for the taxable year.

"(B) QUALIFIED HIGHER EDUCATION EXPENSES.—For purposes of subparagraph (A)—

"(i) IN GENERAL.—The term 'qualified higher education expenses' means tuition, fees, books, supplies, and equipment (other than expenses described in section 135(c)(2)) required for the enrollment or attendance of—

"(I) the taxpayer,

"(II) the taxpayer's spouse, or

"(III) the taxpayer's child (as defined in section 151(c)(3)) or grandchild,

at an eligible educational institution (as defined in section 135(c)(3)).

"(ii) COORDINATION WITH SAVINGS BOND PROVISIONS.—The amount of qualified higher education expenses for any taxable year shall be reduced by any amount excludable from gross income under section 135.

"(h) DEFINITION AND SPECIAL RULE.—For purposes of this section—

"(1) QUALIFIED PLAN.—The term 'qualified plan' means—

"(A) a plan described in section 401(a) which includes a trust exempt from tax under section 501(a),

"(B) an annuity plan described in section 403(a), and

"(C) a plan under which amounts are contributed by an individual's employer for an annuity contract described in section 403(b).

"(2) PLAN YEAR.—In the case of an Account established under subsection (b)(2), the plan year shall be the calendar year.

"(i) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary to carry out the purposes of this section, including, but not limited to—

"(1) regulations providing for rollovers of amounts in an Account in the case of separation from service, and

"(2) regulations coordinating this section with chapters 2 and 21 of this title."

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to plan years beginning after the date of the enactment of this Act.

SEC. 3. REDUCTION IN SOCIAL SECURITY EMPLOYMENT TAXES.

(a) IN GENERAL.—Subchapter C of chapter 21 is amended by redesignating section 3128 as section 3129 and by inserting after section 3127 the following new section:

"SEC. 3128. COORDINATION WITH SOCIAL SECURITY FAMILY SAVINGS PLAN ACCOUNTS.

"(a) GENERAL RULE.—The amount of the tax imposed by section 3101 or 3111 on any wages shall be reduced by the amount of the employee and employer contributions with respect to such wages to a Social Security Family Savings Plan Account established under section 420.

"(b) CROSS REFERENCE.—For regulations coordinating this chapter with section 420, see section 420(f)(2)."

(b) SELF-EMPLOYMENT TAXES.—

(1) IN GENERAL.—Section 1401 is amended by adding at the end thereof the following new subsection:

"(e) COORDINATION WITH SOCIAL SECURITY FAMILY SAVINGS PLAN ACCOUNT.—The amount of the tax imposed by section 1401(a) on the self-employment income of any individual shall be reduced by the amount of the contributions with respect to such income to a Social Security Family Savings Plan Account established under section 420."

(2) CROSS REFERENCE.—Section 1403(b) is amended by adding at the end thereof the following new paragraph:

"(4) For regulations coordinating this chapter with section 420, see section 420(f)(2)."

(c) CONFORMING AMENDMENT.—The table of sections for subchapter C of chapter 21 is amended by striking out the item relating to section 3128 and inserting in lieu thereof the following new items:

"Sec. 3128. Coordination with social security supplemental personal savings plan accounts.

"Sec. 3129. Short title."

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to remuneration paid after the date of the enactment of this Act.

By Mr. BIDEN (for himself, Mr. THURMOND, Mr. HEFLIN, Mr. KOHL, Mr. SPECTER, Mr. SIMON, and Mr. METZENBAUM):

S. 2027. A bill to require certain procedural changes in U.S. district courts in order to promote the just, speedy and inexpensive determination of civil actions, and for other purposes; to the Committee on the Judiciary.

CIVIL JUSTICE REFORM ACT

● Mr. BIDEN. Mr. President, I rise today to introduce the Civil Justice Reform Act of 1990. I believe that this comprehensive legislation will go a long way toward reducing the escalating costs and excessive delays that characterize so much of the civil litigation conducted today in our Nation's Federal courts. And if costs and delays are reduced, we will have succeeded in securing for all of our citizens the right to have their civil disputes resolved in a just, speedy, and inexpensive manner.

I am pleased to be joined in introducing this legislation by my very good friend and distinguished colleague and the ranking minority member of the Judiciary Committee, Senator THURMOND. I am also pleased that Senator HEFLIN, the distinguished chairman of the Judiciary Committee's Courts Subcommittee, as well as several other members of the Judiciary Committee, are joining me in its cosponsorship. I appreciate their support and the time they have already devoted to this important subject.

I am also pleased that Congressmen BROOKS and FISH, the chairman and ranking minority member of the House Judiciary Committee, and Congressmen KASTENMEIER, and MOORHEAD, the chairman and ranking minority member of the Courts Subcommittee, are introducing a companion to this bill in the House today. I very much appreciate their interest in and sponsorship of this legislation, and I look forward to working closely with them.

It is a rare occasion, as may colleagues know, for the chairmen and ranking minority members of the Senate and House Judiciary Committees to join in introducing legislation of this kind. Our joining together attests, in my view, to the severity of the problem of litigation costs and delays, and to the critical need for the reform measures proposed in the Civil Justice Reform Act of 1990.

Litigation costs and delays may, to some, be a curious subject of legislation. After all, litigation costs and delays are not problems we read about on the front pages of our newspapers; they don't dominate our news shows or television documentaries; they aren't the problems discussed day-in and day-out in the halls and meeting rooms of Congress and our State legislatures. But that doesn't mean that litigation costs and delays aren't real problems in need of real solutions:

Talk to the elderly woman seeking to recover her life savings in a simple Federal diversity case;

Speak with the young professional seeking damages because she was the victim of sex discrimination by her boss;

Spend some time with our Nation's CEO's and general counsels—whether they run a Fortune 100 corporation in Manhattan or Chicago, or a small family-owned business in Dover, DE; and

Talk to a member of the insurance industry, or, for that matter, talk to a claimant suing an insurance company.

What will all these conversations have in common, Mr. President? If they're like the ones I've had during the past several years, you'll hear one common theme over and over: My case costs too much money and takes too much time to resolve. Or, even worse, you'll hear from some people that they never even got into court in the first place, because they just couldn't afford to bring their case or run the risk if they did bring it that it would drag on for years as costs skyrocketed.

Mr. President, a survey of more than 2,000 Americans in 1987 showed that 71 percent believe that the overall cost of lawsuits is too high, and that 57 percent believe that the system fails to provide resolution of disputes without delay.

Quite simply, the civil justice system as we know it today is not fulfilling its basic objections of providing the "just, speedy and inexpensive" resolution of disputes. As Judge Jon Newman has written:

> Whether we have too many cases or too few, or even, miraculously, precisely the right number, there can be little doubt that the system is not working very well. Too many cases take too much time to be resolved and impose too much cost upon litigants and taxpayers alike. [Newman, "Rethinking Fairness:" Yale L. J. 1643 (1984).]

And as an American Bar Association task force put it:

> In a word, the public's perception is that excessive costs and delay render the law and lawyers incapable of performing the basic services for which they exist." [American Bar Association, Defeating Delay, Developing and Implementing a Court Delay Reduction Program (1986), at xiii.]

High litigation costs and excessive court delays, as one litigator has put it, "burden everyone and serve no one"—rich or poor, individual or corporation, plaintiff or defendant.

When it comes to the poor and middle class of this country, the courthouse door is rapidly being slammed shut. Many simply cannot afford to enter our current system or, if they can enter it, to afford to stay in. Quite simply, the system is operating in such a way that many people have found they are unable to make effective use of the courts to vindicate their legal rights. Meanwhile, many others who are in the system are often compelled by high costs and delays to settle early for less than adequate amounts. Former judge Marvin Frankel put it well when he said:

> The colossal problem of paying for lawyers and lawsuits * * * is, in the last analysis, at the heart of the evil of unequal justice. [Frankel, "Partisan Justice" (1980), at 102.]

A recent survey conducted by Louis Harris and Associates asked more than one thousand everyday participants in the civil justice system—private litigators representing plaintiffs and defendants, "public interest" litigators, corporate counsel and Federal trial judges—whether the high cost of civil litigation unreasonably impedes access to the courts by the ordinary citizen. Of the total respondents surveyed, strong majorities of each group said "yes"—use of the system by the ordinary citizen *is* impeded. Of the corporate general counsels, 67 percent said that access by the ordinary citizen is impeded.

These same respondents were asked whether, considering the legal resources of small and large interests, the civil justice system fairly balances those interests. Again, majorities of every group said that the system gives an unfair advantage to large interests.

The cold, hard fact is that the high price of litigating even simple cases is squeezing middle America out of the civil justice system. Although I'm sure we'll debate certain aspects of this legislation, there can be little disagreement at all about the effect of litigation costs on the average American's ability to afford a legal remedy. There are simply too many cases in which litigation costs are staggering.

The implications to America's future of these questions of access to the courts are obvious. Judge Learned Hand warned us decades ago that "If we are to keep our democracy, there must be one commandment: Thou shall not ration justice."

American businesses also suffer under heavy weight of high litigation costs. Our businesses spend too much on legal expenses at a time when they are confronted with increasingly intense international competition. Litigation results in lost business opportunities; it leads to the destruction of business relationships; and it requires a substantial investment of executive time—time and resources that could otherwise be devoted to productive business endeavors. More and more resources are diverted from the essential functions of making better products and delivering quality services at the lowest possible cost. In short, the burden of litigation costs—not liability or settlement outcomes, but the *costs of litigation*—cuts dramatically into the corporate bottom line.

The high cost of litigation is not the only problem that plagues the civil justice system. Delay, too, haunts the system. Indeed, delays throughout the course of litigation not only often inure to the benefit of one side over another, but also increase court backlog, inhabit the full and accurate determination of the facts, interfere with the deliberate and prompt disposition and adjudication of cases, and thereby contribute to high litigation transaction costs.

As one court put it more than a decade ago, delay—

> postpones the rectification of wrong and the vindication of the unjustly accused. It crowds the dockets of courts, increasing the costs for all litigants, pressuring judges to take shortcuts, interfering with the prompt disposition of those cases in which all parties are diligent and prepared for trial, and overhanging the entire process with the pall of disorganization and insolubility. But even these are not the worst of what delay does. The most erratic gear in the justice machinery is at the place of fact finding, and possibilities for error multiply rapidly as time elapses between the original fact and judicial determination. [*Southern Pacific Transportation Co.* v. *Stoot*, 530 S.W. 2d 930 (1975).]

Ten years ago, Justice Lewis F. Powell, Jr. foresaw the problems we are witnessing today. Dissenting from the 1980 amendments to the Federal discovery rules promulgated by the Supreme Court, Justice Powell criticized them as "inadequate" and expressed concern that real reform would be delayed for years by what he described as "tinkering" changes. He warned that without substantial change, the rules will "continue to deny justice to those least able to bear the burdens of delay, escalating legal fees and rising court costs." [446 U.S. 997, 998, 1000-1001 (1980) (Powell J., dissenting).]

Justice Powell's words were prophetic. High costs and excessive delay do combine to deny justice. They do combine to forestall the deliberate and prompt adjudication of disputes. And they do combine to ration commodities that a democracy should never ration—fairness, justice and access to the courts. Justice Powell's conclusion—that "litigation costs have become intolerable, and they cast a lengthening shadow over the basic fairness of our legal system" [446 U.S. at 1000]—is one I share.

That is why, Mr. President, I began approximately 18 months ago to look seriously at these problems and to try to develop some comprehensive, long-range and consensual solutions. As part of that analysis, I asked the Brookings Institution to convene a task force of authorities from throughout the United States to develop a set of recommendations to alleviate the problems of excessive cost and delay. The task force that eventually gathered at Brookings comprised leading litigators from the plaintiffs' and defense bar, civil and women's rights lawyers, attorneys representing consumer and environmental organizations, representatives of the insurance industry, general counsels of major corporations, former judges and law professors.

After several all-day meetings and thorough discussion and debate, the task force developed a comprehensive set of consensus recommendations. Those consensus recommendations are reflected in the task force's report, "Justice For All. Reducing Costs and Delay in Civil Litigation." I commend this report to anyone who is interested in improving our civil justice system. The legislation that I, Senator THUR-

MOND and others are introducing today is based, in large part, on the task force's recommendations.

In introducing this legislation, Mr. President, I don't claim that it offers a "quick fix" or that it is the "Holy Grail" of civil litigation reform. In fact, many of the key elements of the legislation have been advanced before by other groups and experts who have studied our civil justice system. In the past decade, numerous individuals and groups have carefully examined the discovery process, the management of cases by judges, the courts' adjudicatory role and a host of other important civil justice issues. The American Bar Association, the Association of Trial Lawyers of America, the American Law Institute, Senators HEFLIN and GRASSLEY and Congressmen KASTENMEIER and MOOREHEAD, to name just a few, have all made important contributions to improving the efficiency of the civil justice system while maintaining the essential requirements of justice, fairness and due process and preserving our commitment to the adversarial ideal.

My legislation builds upon these efforts, and combines what I and the many experts who gathered at Brookings believe to be the essential ingredients for a comprehensive program for change. In my view, we have the two critical elements of any successful reform program: good ideas, and widespread support for those ideas.

Mr. President, the recommendations on which this legislation is largely based have the strong and active support of many key participants in the civil justice system—people with intimate knowledge of the problems and keen insights into the solution.

Commenting on the recommendations advanced in the Brookings Task Force report, the Consumer Federation, for example, said:

> This is the only reform proposal presented to the Congress that would clean up our judicial system without denying the public essential legal rights. If Congress and the legal community implement the task force's civil justice reforms, legal costs will fall significantly and justice will be expedited in federal courts.

In addition, the Association of Trial Lawyers of America said that the procedural recommendations would "fairly and in a balanced manner expedite the resolution of civil claims and, in a balanced manner reduce the costs of reaching fair and just solutions for all parties to civil litigation."

Similarly, Marcia Greenberger, managing attorney for the National Women's Law Center, said:

> The Task Force's report is an effort to avert * * * a growing danger that unless we control the length of time and expense involved when turning to the courts, our justice system will burden everyone and serve no one * * *. [The report] suggests a series of steps which could facilitate the more efficient operation of the federal civil courts.

The business community also strongly supported the Brookings task force recommendations and the need for legislation to implement those recommendations. For example, The Business Roundtable said:

> The civil litigation report * * * takes a major step toward reform of civil litigation in the United States. * * * Once implemented, this proposal will profoundly affect civil litigation within the * * * Federal court system. * * *

Added Frank McFadden, chairman of the American Corporate Counsel Association and former chief judge of the U.S. District Court for the District of Alabama:

> I heartily endorse these proposals and hope that the Congress and the courts will make every effort to implement those recommendations to create a better system of justice for the citizens of this country.

Similarly, the American Insurance Association said that the Brookings task force recommendations make "significant progress in achieving our shared goals. It attacks some of the major sources of run-away legal costs, including excessive or abusive discovery, [and] the need for active judicial case management. * * * We hope that the * * * recommendations will speedily be enacted into law. * * *"

It should come as no surprise to any member of this body that these and other individuals and groups who were part of the Brookings task force usually disagree on legal and policy matters. Importantly, however, when it comes to the condition of our civil justice system and on the means of improving it, they find common ground.

We have, then, a window of opportunity to implement truly meaningful change in the civil justice system—change that will reduce costs and delays and that will improve access to the courts and the overall fairness of the system.

Before highlighting some of the legislation's specific provisions, I want to identify and discuss four cornerstone principles upon which the legislation is built:

First, the principle that reform must come from the "bottom up" through the development and implementation in each U.S. district court of "Civil Justice Expense and Delay Reduction Plans";

Second, the principle that every district court should develop and implement a system of "Differentiated Case Management," or case tracking;

Third, the principle that judicial case management should be applied in all Federal district courts; and

Fourth, the principle that courts need adequate funding to do the job our citizens rightly expect of them.

I. REFORM FROM THE BOTTON UP

The legislation I introduce today is based on the principle that reform must come from the "bottom up"—that is, from those who must live with the civil justice system on a regular basis. This principle is implemented in two significant ways.

First, the Civil Justice Reform Act of 1990 directs that within 12 months of enactment, each Federal district court must develop a "Civil Justice Expense and Delay Reduction Plan." The plans are to be developed by a planning group or similar advisory committee that will be convened in each district with membership from the bench, the public, and the bar. Each planning group will be chaired by the chief judge of the district court. Since court personnel will play an important role in the development of the plans, the district court clerk must also be a member of the planning group.

This broad membership will ensure that the public, the court, and the litigating community share in the development of the plans. I agree with the view of the Brookings task force that—

> the wide participation of those who use and are involved in the court system in each district will not only maximize the prospects that workable plans will be developed, but will also stimulate a much-needed dialogue between the bench, the bar, and client communities about methods for streamlining litigation practice.

Second, while section 471(b) of the bill identifies the core elements that must be included in each district court plan, each district is authorized to determine, through its planning group, how to apply those core elements in light of its particular needs and demands. Thus, Congress shapes each plan according to certain well-defined and uniformly applied parameters, and the districts then exercise their best judgment in carefully molding the plans to reflect their own image.

II. DIFFERENTIATED CASE MANAGEMENT

The centerpiece of the district court plans is a system of "Differentiated Case Management," or "DCM." Section 471(b)(1) directs the inclusion of such a system in every district court plan.

Differentiated Case Management is a program for court supervision of case progress that is designed to:

Make an early assessment of each case filed in terms of the nature and extent of judicial and other system resources required for preparation and disposition of the case;

Assign cases on this basis to appropriate processing paths that operate under distinct and explicit rules and procedures;

Apply the necessary level of court supervision and resources to each case consistent with its management requirements;

Establish appropriate monitoring mechanisms to track case progress and assure observance of deadlines for completion of case events; and

Assure the expeditious processing of each case by counsel and judicial system officials in accordance with the tasks required. [Program Announcement, "National Differentiated Case Management Program," at 1.]

A DCM system, therefore, combines three core concepts. First, it is "event-oriented," so that certain events in each litigation are viewed as important benchmarks in ascertaining case progress. Second, it controls the periods of time between case events and incorporates methods to supervise and control those intervals in order to make them more predictable. Third, it recognizes that while cases may be classified by broad definitions, each case is unique; thus, procedures are accommodated to fit the characteristics of each case. As Robert Lipscher, administrative director of the New Jersey courts and a leading expert in this area, has said, DCM is "a case management system where judges and case management teams employ multiple tracks to accommodate the special procedural and managerial requirements of different case types." [Speech of Robert D. Lipscher, May 3, 1988, at 2-3.]

On an informal basis, differentiated case management is already being utilized in some Federal district courts. Judges use their existing authority to manage their docket on a case-by-case basis, with procedures tailored to particular cases. I commend the district court judges who have exercised their authority in this fashion. In my view, in the view of the task force of authorities who prepared the Brookings report and in the view of other system experts, the time has come to formalize and regularize DCM concepts by channeling cases according to their needs and probable litigation "careers" to differentiated procedural treatments.

DCM, then, is a nonmechanistic approach to case processing. There is less reliance, in the words of Maurice Rosenberg, professor of law at Columbia University and a leading advocate of case tracking, "on a single set of monolithic rules of universal applicability." [Rosenberg, "Federal Rules of Civil Procedure in Action: Assessing Their Impact," 137 U. Pa. L. Rev. 2197, 2210 (1989).] Instead, as sections 471 (b)(1) and (b)(2) make clear, cases will be considered individually according to their relative complexity, anticipated trial length, anticipated need for judicial supervision and time required for discovery and preparation. Cases will then be assigned to appropriate processing tracks that correspond to their management and adjudicatory needs, with each track having specially tailored procedures and time standards.

Courts that have implemented case tracking systems generally use three tracks. Track One is for "expedited" cases and is designed to accommodate the special needs of cases that can be processed quickly because, in part, they will involve minimal pretrial discovery and other pretrial proceedings and will require little or no judicial intervention. Track Two is for "complex" cases and is designed to accomodate cases whose timely disposition is likely to require more intensive judicial intervention and control. Track Three is for "standard" cases—cases that do not fall into the other two categories. Under DCM, "[c]adillac-style procedures," in Professor Rosenberg's words, will no longer be used to process "bicycle-size lawsuits." [Rosenberg, "The Federal Civil Rules After Half a Century," 36 Maine L. Rev. 242, 247 (1984).]

As the legislation introduced today makes clear, implementation of a case tracking system involves time standards. As set forth in sections 471 (b)(1)(B) and (b)(6) each DCM system adopted by the district courts must assign cases to appropriate tracks that operate under distinct time frames for the completion of discovery, for the preparation and adjudication of motions and for trial. Judges would apply these time frames in the "typical" case falling within each track. The legislation allows each district, through the planning group mechanism, to develop the time standards that best suit its caseload and docket demands.

The DCM system that has been implemented in Bergen County, NJ, establishes general timeframes as follows: For expedited cases, discovery should be completed within 100 days and the case disposed of within 6 months; for standard cases, discovery should be completed within 200 days and the case disposed of within 12 months; for complex cases, the time frames for discovery and for case disposition are subject to the discretion of the individual judge.

Time standards, implemented as part of an overall case management system, have been identified in extensive research as an important means for reducing litigation costs and delays. For example, a recent study by the National Center for State Courts found that while time standards are—

not a panacea. * * * They can be an important part of a comprehensive program to reduce or prevent delays. First, they express an important concept: that timely disposition of the courts' business is a responsibility of the judiciary. Second, they provide goals for the court and the participants in the litigation process to seek to achieve, both in managing their total caseloads and in handling their individual cases. Third, they can lead directly to the development of systems for monitoring caseload status and the progress of individual cases, as participants in the process seek to manage their dockets more effectively in order to achieve their goals." [Mahoney, et al., Changing Times in Trial Courts (National Center for State Courts, 1988), at 63.]

A 1981 Government Accounting Office report is consistent with these findings. After reviewing 782 files on cases that took a year or more to terminate in nine Federal district courts, the GAO found the establishment of time standards for different stages of the cases to be the critical factor in effective case management. [Government Accounting Office, Better Management Can Ease Federal Civil Case Backlog (1981), at i.]

The adoption of time standards does not mean that speed will have somehow displaced justice as the primary judicial goal in the adjudication of cases. Quite the contrary—justice remains the primary judicial goal, with courts encouraged to take a more proactive role in guarding against unnecessary or excessive costs and delays. The case processing time standards to be established by each district will serve as guides for the disposition of cases, with the understanding that the plan will have sufficient flexibility [see Sections 471 (b)(5) and (b)(6)] to accommodate different problems that may arise from time to time in litigation.

Case tracking, both in theory and in practice, has received strong and widespread support.

The Harris survey of more than 1,000 participants in the civil justice system showed remarkably strong support for case tracking: 90 percent of plaintiff's and defense litigators, 89 percent of public interest litigators, 87 percent of corporate general counsel and 78 percent of the federal trial judges surveyed support it.

Furthermore, in its December 22, 1989 Tentative Recommendations, the Federal Courts Study Committee encouraged tracking cases by level of complexity.

Finally, a survey of lawyers who had participated in the DCM system in Bergen County indicated their strong support. The survey showed that 93.5 percent believed that the track assignments had been appropriate; more than 70 percent felt that the discovery periods developed for the three tracks were appropriate; more than half noted that monitoring of discovery deadlines enhanced the probability of timely case dispositions, a response that was consistent across all three tracks; and 54 percent felt that DCM substantially raised their expectations of reaching trial and having their cases disposed of within the week of the trial date.

Some may be critical of DCM because, in their view, it sacrifices quality for quantity—justice for efficiency. Nothing could be further from the truth. DCM has several qualitative aspects, including customized procedures for case categories; consensus development to the extent possible on the elements of the case plan—among the court and the attorneys; facilitating access to the court in a timely manner to resolve problems that develop; and increased judicial time for the adjudication of pending issues. DCM ensures that the unique characteristics of each case are recognized and respected. In sum, DCM has great potential to en-

hance the quality of justice through greater individual attention to cases from the time they are filed until their final adjudication or other disposition.

DCM also improves over-all system fairness. In some courts, cases are heard according to the bakery shop concept, as one court administrator puts it, of first in, first out. Each case is given a docket number when it is filed, and called to trial based on that number sequence without regard to the nature of the case and its demand for court time. As a result, cases that need only a short hearing are held up behind more complicated matters, solely because they were filed after the complex case. In contrast, under DCM system, cases that have little discovery and require little judicial intervention will get expedited treatment—not short treatment, but expedited treatment—and the parties will not have to wait simply because their docket number is lower than a more complex case. This means that the current logjam in many courts can be unplugged, with more cases being freed up for earlier disposition.

III. JUDICIAL CASE MANAGEMENT

During the last two decades, we have seem major developments in the field known as judicial case management. As the number of cases has increased and the cases themselves have become increasingly complex, judges, court administrators and civil justice system experts have recognized the importance of courts exercising early, active and continuous control over case progress. Indeed, as the Supreme Court recently said in an opinion by Justice Kennedy:

One of the most significant insights that skilled trial judges have gained in recent years is the wisdom and necessity for early judicial intervention in the management of litigation. [*Hoffman-La Roche Inc.* v. *Sperling*, 58 U.S.L.W. 4063, 4074 (Dec. 11, 1989).]

As early as the late 1970s, studies demonstrated the importance of exercising early and active judicial control over cases. The Federal Judicial Center, for example, studied the median disposition times of six urban trial courts. The primary finding was that greater and earlier judicial control over civil cases yields faster rates of disposition. The courts with the least amount of delay characteristically kept stricter control of the case by precise scheduling of the discovery cut-off date and other deadlines. The study concluded:

We found that a court can handle its caseload rapidly only if it takes the initiative to require lawyers to complete their work in a timely fashion. [Federal Judicial Center, *Case Management and Court Management in United States District Courts* (1977), at 17.]

A recent study of 26 urban trial courts by the National Center for State Courts also indicated that early and continuous control over case events was the best predictor of faster case processing times. Indeed, there is now a substantial body of data to support the notion that judicially imposed controls on the progression of even modest-sized cases can measurably improve efficiency without sacrificing the quality of justice rendered.

Some argue that judicial case management is inconsistent with our nations of due process and the proper functioning of the adversarial system. They urge the courts to maintain a "laissez faire" attitude, and argue that lawyers—not the court—should control the pace and conduct of litigation.

I reject this laissez-faire approach. I would argue that the movement toward greater judicial oversight is an attempt to preserve notions of fairness and maintain the adversary ideal. As Judge Robert F. Peckham, Chief Judge of the U.S. District Court for the Northern District of California, has said:

Case supervision is not a fundamental departure from the adversarial model but rather a modification that facilitates its meaningful operation. It does not detract from lawyers' traditional function, but instead assists attorneys in planning the efficient progress of lawsuits. [Peckham, "A Judicial Response to the Cost of Litigation: Case Management, Two-Stage Discovery Planning and Alternative Dispute Resolution," 37 *Rutgers L. Rev.* 253, 265 (1985).]

Judge Alvin B. Rubin, a circuit court judge on the U.S. Court of Appeals for the Fifth Circuit, has offered a compelling statement of why judicial case management is both appropriate and necessary:

The judicial role is not a passive one. A purely adversarial system, uncontrolled by the judiciary, is not an automatic guarantee that justice will be done. It is impossible to consider seriously the vital elements of a fair trial without considering that it is the duty of the judge, and the judge alone, as the sole representative of the public interest, to step in at any stage of the litigation where his intervention is necessary in the interests of justice. Judge Learned Hand wrote, '[a] judge is more than a moderator; he is charged to see that the law is properly administered, and it is a duty which he cannot discharge by remaining inert.' [Rubin, "The Managed Calendar: Some Pragmatic Suggestions About Achieving the Just, Speedy and Inexpensive Determination of Civil Cases in Federal Courts," 4 *Just. Sys. J.* 135, 136 (1979).]

And as Judge Peckham has concluded:

Judges cannot remain safely on their remote pedestal but must work with attorneys to place reason and civility before contentiousness and resistance. . . . [T]he cause of justice can no longer be served by a laissez faire judicial model. Our controlled inaction is an affirmative choice, an abdication of our responsibility to use our power to assist in restoring the health of our system. . . . [W]e cannot remain blind to the fact that the court's traditional remoteness contributes to the devasting abuses which threaten to subvert our system of due process.—[Peckham, 37 *Rutgers L. Rev.* at 266.]

While the principle of judicial case management runs throughout the legislation I'm introducing today, it is perhaps most apparent in Section 471(b)(3). That section directs each district to include as an element of its plan a discovery-case management conference in all cases except those assigned to the track designated for expedited litigation. Most important, this conference will ensure that all of our Federal district courts conduct an early examination of the case, focus the key issues and fix key dates that will enable him or her to monitor the pace of the case's development. The judge should explain to counsel the devices he or she intends to use to monitor the action and the long-range plan for monitoring case development. Section 471(b)(3) identifies in detail the range of issues that should be addressed at the discovery-case management conference.

For cases assigned to the track designated for complex litigation, the plan should require the court to build into its management plan at the outset a structured, regular procedure for monitoring intermediate case events and for narrowing and refining outstanding issues.

A central objective of the mandatory discovery-case management conference is to minimize discovery costs. Delineating the issues at an early stage of the litigation will minimize such costs, since the parties can then be steered away from aimless or redundant discovery. More than a decade ago, Judge William W. Schwarzer, of the U.S. District Court for the Northern District of California, has commented on the importance of a compulsory status conference, which, by setting discovery guidelines tailored to the case, can reduce subsequent discovery disputes and piecemeal motions to compel or for protective orders, and tend to nip in the bud any notion by a party to wage an attrition campaign using discovery as a weapon." [Schwarzer, "Managing Civil Litigation: The Trial Judge's Role," 61 *Judicature* 400, 407 (1978).]

The mandatory discovery-case management conference can also help the parties focus on possible grounds for dismissal or summary judgment. If it seems that motions are probable, the court should set dates and briefing schedules.

Judged Peckham has highlighted certain intangible benefits of the early conference. He has found that the conference itself warns the lawyers that they have a vigilant judge. It also gives a judge a feel for the case and for the lawyers. In the end, since this conference will often be the first contact between the court and the attorneys, the judge can use his consider-

able influence to set the tone of the relationship in which he and the attorneys are likely to be engaged for the duration of the litigation. [Peckham, "The Federal Judge as a Case Manager: The New Role in Guiding a Case from Filing to Disposition," 69 *Calif. L. Rev.* 770, 782 (1981).]

Some might argue that these conferences will themselves be costly, particularly in terms of judicial time they will require. This concern, in my view, is unfounded. Indeed, the best answer to it is provided by Judge Peckham, chief judge to one of our nation's busiest courts. Judge Peckham estimated that a judge could "easily conduct all status conferences for a full caseload in 1 day per month and certainly in no more than 2." As he put it, "[t]his is very little time to expend in facilitating the prompt and fair disposition of cases. [Peckham, 37 *Rutgers L. Rev.* at 267.]

Finally, the legislation provides that the judge, and not a magistrate, preside over the discovery-case management conference. Given the importance assigned to and the range of decisions to be made at the conference under this legislation, it should be conducted by an Article III judge. Furthermore, the conference may lose some of its significance in the minds of the attorneys if presided over by a magistrate, since the unfortunate fact is that many attorneys seem to be far more willing to take frivolous positions before a magistrate than they would be to take the same positions before the judge who will try the case. Furthermore, magistrates may themselves be more reluctant than judges to frame the contours of the litigation, limit discovery, establish a date certain briefing schedule and address the full panoply of discovery-case management conference issues.

IV. ADEQUATE FUNDING

There's no doubt that for the courts to do the job our citizens rightly expect of them and for this legislation to be successful, additional funding is necessary. Some funds must be appropriated to the Federal district courts to carry out the initial phases of planning and implementation of the civil justice expense and delay reduction plans. Furthermore, a differentiated case management system is very information-intensive. To be effective, therefore, it needs some form of automated support. Automation is necessary to provide information on: First, case categorization; second, case tracking through all events and processing stages in each track; third, reporting to provide *operational* support to court personnel; fourth, communications, particularly between the court and attorneys and litigants; fifth, scheduling with some degree of sophistication to monitor court resources and maximize their utilization; and sixth, statistical and exception reports for monitoring and evaluation.

The Federal Judicial Center is also assigned new tasks under the bill, and it will require some modest amount of additional funds to carry them out.

Section 479 of the bill mandates the expansion of training of district court judges, magistrates and key court personnel in the techniques of case management. While some funding is already provided for training, some modest increase will be necessary to pay for this all-important additional training.

To fund these and other aspects of the legislation, a total of $16,000,000 is authorized.

In the rest of my statement, I intend to highlight some other key parameters within which the district plans must be adopted. As I noted earlier, I believe that the legislation provides a degree of national uniformity while leaving sufficient flexibility to the district courts to respond to their particular needs.

Setting Early, Firm Trial Dates. The legislation directs that each district's plan include a requirement for setting early, firm trial dates at the mandatory discovery-case management conference or, if no such conference is held, in the discovery-case management order. For cases assigned to the track designated for complex litigation, it is suggested that the court, to the maximum extent possible, give the parties an idea at the outset of the litigation how soon after discovery is completed that the trial will occur, and courts are directed to set the trial date no later than 120 days before the discovery cut-off date.

Several experts and substantial data indicate that setting early, firm trial dates is one of the most effective tools in case management. In Professor E. Donald Elliott's words:

> Perhaps the most important single element of effective managerial judging is to set a firm trial date. . . . This creates incentives for attorneys to establish priorities and 'narrow the areas of inquiry and advocacy to those they believe are truly relevant and material' and to 'reduce the amount of resources invested in litigation.' [Elliott, "Managerial Judging and the Evolution of Procedure," 53 *U. Chi. L. Rev.* 306, 313, 314 (1986).]

Similarly, Wayne Brazil, currently a magistrate in the U.S. District Court for the Northern District of California and one of the leading court reform experts, reported in 1981 that—

> data produced by our interviews and by other studies indicate that fixing early and firm dates *for the completion of trial preparation and for the trial itself* is probably the single most effective device thus far developed for encouraging prompt and well-focused case development." [Brazil, "Improving Judicial Controls over the Pretrial Development of Civil Actions: Model Rules for Case Management and Sanctions, "American Bar Foundation Journal" (1981) 873, 917 (emphasis added).]

A recent study of 26 urban trial courts by the National Center for State Courts found that a firm trial date policy is related to faster case processing times. [National Center for State Courts, *Examining Court Delay. The Pace of Litigation in 26 Urban Trial Courts* (1989), at 32-34.]

An American Bar Association task force on litigation costs and delay concluded that a firm trial date is an absolutely vital feature of any case management system. The task force identified five reasons "why judges, lawyers and academics agree on this concept:

> Settlement probabilities are increased dramatically when enforced early evaluation devices are backed by a certain trial date;
>
> Where the court requires counsel to adhere to schedules for the completion of events, credibility is enhanced when the court also complies with time deadlines;
>
> No attorney wants or will assemble a cast of witnesses and parties only to be frustrated when the trial does not begin when scheduled; and
>
> A firm trial date is cost-effective for the trial attorney because it allows efficient and predictable scheduling of the only commodity the attorney has to sell—time. [American Bar Association, *Defeating Delay, Developing and Implementing a Court Delay Reduction Program* (1986) at 39.]—

The Harris survey of more than 1,000 participants in the civil justice system also found strong support for scheduling early and firm trial dates: 79 percent of the plaintiffs' litigators, 76 percent of defendants' and public interest litigators, 85 percent of the corporate counsel and 89 percent of the Federal judges agreed with this view.

Discovery Controls. Discovery abuse is a principal cause of high litigation transaction costs. Indeed, in far too many cases, economics—and not the merits—govern discovery decisions. Litigants of moderate means are often deterred through discovery from vindicating just claims or defenses, and the litigation process all to often becomes a war of attrition for all parties—rich or poor, plaintiff or defendant. As Professor Maurice Rosenberg has written:

> Costs of discovery can be so high that they force settlements that would not occur, or, more likely, force settlements on different terms than would otherwise have been reached. . . . Discovery practice in Federal litigation has taken on a life of its own. The first principle is 'when in doubt, discover.' [Rosenberg, 137 *U. Pa. L. Rev.* at 2203, 2204.]

Excessive and abusive discovery has been recognized as a serious problem for some time. More than 10 years ago, a study of Federal trial judges in two district courts found that they perceived "unnecessary, expensive, overburdening discovery as a substantial threat to the efficient and just functioning of the Federal trial system for civil litigation." [C. Ellington, *A Study of Sanctions for Discovery Abuse* (1979), at 37.] In 1980, a study of law-

yers in Chicago found that 49 percent of those practicing in Federal courts believe that "overdiscovery" is a major abuse of the discovery process." [Brazil, "Civil Discovery: Lawyers' Views of its Effectiveness, its Principal Problems and Abuses," *American Bar Foundation Research Journal* (1980), at 787.]

More recently, the Harris survey of more than 1,000 participants in the civil justice system found that the most important cause of high transaction costs or delays that increase those costs is perceived to be lawyers who abuse the discovery process. Lawyers who "over-discovery" cases rather than focus on controlling issues and lawyers and litigants who use discovery as an adversarial tool or tactic to raise the stakes for their opponents were the most frequently cited causes of high transaction costs.

The legislation attacks the discovery problem from several directions.

First, as I've mentioned, the tracking systems to be implemented in each district will include periods for the completion of discovery. Specifically, section 471(b)(6) requires "that each processing track in the district's tracking system establish presumptive time limits for the completion of discovery so that parties are apprised upon track assignment of the time within which discovery must be completed."

It's important to recognize that the discovery time limits are *presumptive.* This ensures that sufficient flexibility is retained for those cases warranting extentions of time. One example of a showing of good cause warranting an extention would be if additional discovery would not delay the trial. Absent such special circumstances, however, discovery should be limited according to the time frame set forth in the guidelines for the particular track to which the case has been assigned.

Second, section 471(b)(7) requires that each district court include in its plan procedures for making the discovery process track specific. Specifically, each district is to consider identifying and limiting the volume of discovery available, and phasing the use of discovery into two or more stages.

With respect to phasing discovery, I have been taken with the approach first suggested by Judge Peckham. The first stage is limited to developing information needed for a realistic assessment of the case. If the case does not terminate then, a second stage of discovery would commence, this one for the purpose of preparing for trial. Limiting discovery initially to those crucial issues that highlight the essential strengths and weaknesses of a case will often lead to considerable savings of time and money for clients and the court system. The information derived from the first stage should suffice for the disposal of many cases, without having to incur the expense of discovery that merely amplifies and cumulates already available evidence or that is directed to peripheral issues.

Another means of phasing discovery is to divide the use of interrogatories according to the stage of the case. The U.S. District Court for the Southern District of New York currently utilizes such a rule, which limits the type of interrogatories that may be served at particular stages of the litigation.

I should note that imposing discovery limitations is entirely consistent with the 1983 amendments to the Federal Rules of Civil Procedure. Rule 26(b)(1)(iii) was amended to permit the court to limit discovery where it would be unduly burdensome or expensive, taking into account the needs of the case, the amount in controversy, limitations on the parties' resources and the importance of the issues at stake in the litigation. This was an extremely valuable addition to the rules, but for whatever reason, it has not been utilized to any great extent.

Third, section 471(b)(8) requires that each district adopt as an element of its plan a rule that the parties attempt to resolve all discovery disputes informally before filing motion papers with the court.

I believe that these and other measures that the district courts may adopt will assist in reducing the costs of discovery.

Expanded use of alternative dispute resolution. As many of my colleagues know, the term "alternative dispute resolution," or "ADR," covers a broad range of approaches to dispute processing apart from the traditional adversary system. Those approaches include arbitration, mediation, the summary jury trial and the mini-trial. Section 471(b)(10) of the legislation directs each district court to include in its plan a comprehensive alternative dispute resolution program covering the full panoply of ADR mechanisms. Section 473(a)(6) requires that the Federal Judicial Center advise and report on the use of ADR through the district court plans.

The authorization for expanded use of ADR, together with a reporting requirement, is predicated on the view, as expressed most recently by the Federal Courts Study Committee in its Tentative Recommendations, that ADR "is at a mid-point in its development, beyond the stage at which it should be limited to local experiments but not so advanced as to permit the formulation of uniform national rules. . . ." [Federal Courts Study Committee, *Tentative Recommendations,* (Dec. 22, 1989), at 40.]—

Early Neutral Evaluation Programs. Section 471(b)(11) directs each district court to develop an Early Neutral Evaluation Program as part of the implementation of its civil justice expense and delay reduction plan. "ENE," as it commonly referred to, is a specific form of alternative dispute resolution that has achieved great success, particularly in the U.S. District Court for the Northern District of California. Its success, I might add, is due in large part to the great effort of commitment of one of the district's magistrates, Wayne Brazil.

The centerpiece of the ENE program is a confidential, non-binding case evaluation conference, attended by all counsel and their clients, and hosted by a neutral member of the private bar who has substantial litigation experience and who is an expert in the principal subject matter of the lawsuit. This conference takes place early in the pretrial period so that the parties will be in a position to use what they learn and accomplish during the proceeding to make the case development and settlement processes more rational, less expensive and less time-consuming.

In a survey of lawyers who participated in the ENE program in the Northern District of California, strong majorities found that it contributed to communication across party lines, to issue clarification, to prospects for settlement and to setting the groundwork for cost-effective discovery. Indeed, almost 90 percent of the lawyers whose cases had been compelled to participate in ENE expressed the view that the program should be expanded to more cases in the Federal courts.

Section 471(b)(11) directs each district to develop an Early Neutral Evaluation Program.

Firm policies on continuances. A firm policy on granting continuances is critical to date certain scheduling. Indeed, where judicial enforcement of scheduled dates is the norm, the entire set of expectations and attitudes of the trial bar will adjust to that norm.

Section 471(b)(6) of the bill directs the districts to develop firm rules on continuances in their plans. One element of those rules must be that the party, as well as the lawyer, sign requests for continuances. By requiring the party to sign and thus requiring the lawyer to explain the reasons for his request to his client, it is hoped that the number of unfounded requests will be reduced.

Procedures for the Disposition of Motions. In my discussions about this subject, I have been startled by the extent to which lawyers and their clients are concerned about the time that it often takes the court to decide fully briefed motions. Some of those motions relate to discovery issues, while others relate to issues that would be dispositive for some or all of the claims in the case. If their experiences are broadly representative of others—and I believe that they are—something must be done at the federal

district court level to reduce delays in deciding motions, without, of course, sacrificing the quality of the decisionmaking. And I believe there is room to reduce delays without sacrificing justice.

Section 471(b)(9) directs the district courts to adopt procedures for resolving motions necessary to meet the applicable trial dates and discovery deadlines. Furthermore, to enhance judicial accountability, Section 474 provides for expanded publication of statistics on motion decisions. This information will be published and made available to everyone—citizens, legislators and the media—as well as to the judiciary. By increasing the visibility of the linkage between the standards, statistics and judicial performance, the importance of all three should be increased as well.

Transition programs. In those districts with large case backlogs, it will be necessary to develop and implement a transition program. As set forth in section 474, that program should include assessment of current caseload; analysis of productivity; utilization of special expertise, where appropriate; and a scheduled termination of the transition program, with interim goals resulting in full implementation of the district court's plan.

Model plans. To give the district courts some guidance in the development of their plans, section 472 provides for the development of a model plan by the Federal Judicial Center within 6 months of enactment of the legislation. I anticipate that while the districts will use this model plan for guidance, none will adopt it in its entirety, since the districts will want to provide for the own unique demands and needs.

If, for some reason, a district does not develop a plan under this legislation, the model plan would automatically go into effect.

Case management training. Section 479 provides for the expansion of current judicial training programs to include a new curriculum and emphasis on case management. Training will also be made available to magistrates and district court clerks.

This expanded training is necessary for several reasons. First, with the development and implementation of the district court plans, new information—descriptive and statistical—will be generated and will need to be transmitted to the courts. Second, there are many judges who have experimented successfully with various procedural approaches outlined in this legislation. In addition, there are law professors and other independent experts on judicial management who have examined these issues. Expanded training will enable the accumulated learning on the subject to be better transmitted throughout the federal judiciary.

Review in five years. Section 478 provides that after five years, the Federal Judicial Center shall report on the effectiveness of the civil justice expense and delay reduction plans in reducing litigation costs and delays and in securing the just, speedy and inexpensive resolution of civil actions. If the report determines that the plans have not been effective, we are committing to review the statute and assess whether some modifications are warranted.

Mr. President, I will announce shortly dates for hearings on this legislation. Once those hearings are completed and we determine whether, based on the testimony we receive, any we determine whether, based on the testimony we receive, any changes in the bill are warranted, I intend to move this bill quickly. I look forward to working with the Nation's judiciary on this important subject. Their support will undoubtedly be an important ingredient in the success of this effort to reduce litigation costs and delays, and I look forward to the presentation of their views in a timely fashion.

In the final analysis, when cases cost so much and take so long that some people can't use the courts at all and that those who can use them find their pocketbooks depleted at record pace, we have a problem of major dimensions that demands our attention. It's a problem that's not subject to quick fixes or easy solutions. Only hard work, careful study, sound ideas and long-term commitment will make our system of civil justice a system of which all of us can be proud. I believe the Civil Justice Reform Act of 1990 combines the elements necessary for comprehensive and meaningful change, and that if enacted, the legislation will help ensure that disputes are resolved fairly, promptly and inexpensively. That is what our citizens rightly expect, and that is what they rightly deserve.

Mr. President, I ask unanimous consent that the test of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD; as follows:

S. 2027

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Civil Justice Reform Act of 1990".

SEC. 2. FINDINGS.

The Congress finds that—

(1) the fundamental objectives of the civil justice system, as expressed in Rule 1 of the Federal Rules of Civil Procedure, are the "just, speedy and inexpensive determination of every action";

(2) some minimal level of efficiency and economy is a precondition for the delivery of justice to all;

(3) the delivery of justice is also dependent upon the availability of sufficient time for the thoughtful and deliberate adjudication of cases on the merits, since such adjudication is a principal function of the trial court judge;

(4) litigation transaction costs, in complex as well as in relatively routine cases, are high and are increasing;

(5) delays throughout the course of litigation not only often inure to the benefit of one side over another but also increase court backlog, often inhibit the full and accurate determination of the facts, interfere with the deliberate and prompt disposition and adjudication of cases and thereby contribute to high litigation transaction costs;

(6) high and increasing litigation costs cast doubt upon the system's fairness and its ability to render justice, because those costs unreasonably impede access to the courts and make it more difficult for aggrieved parties to obtain proper and timely judicial relief, or, in some cases, to obtain any relief at all;

(7) high and increasing litigation costs also burden American businesses, which are compelled to spend increasingly more money on legal expenses at a time when they are confronted with intense international competition and to divert valuable resources from the essential functions of making better products and delivering quality services at the lowest possible cost;

(8) given current litigation practices, litigation costs and delays and the problems attendant thereto will increase substantially during the next decade;

(9) the dual problems of excessive litigation costs and delays indicate that the civil justice system is not fulfilling its fundamental objectives of adjudicating and resolving cases fairly, promptly, and inexpensively;

(10) each Federal district court should develop a comprehensive plan to reduce excessive costs and delays and thereby to improve the system's over-all fairness and its ability to render justice;

(11) in developing its plan, each district court should draw upon the expertise in the bench, the bar and the public, thereby maximizing the prospects that workable plans will be developed and stimulating a much-needed dialogue about methods for improving the fairness of the system and for streamlining litigation practice;

(12) in light of the diversity of caseloads, types of litigation, local characteristics of the caseflow process, and the number of judges and support staff available across different Federal jurisdictions, each district court should have sufficient flexibility to formulate the specific details of its plan within certain well-defined and uniformly applied parameters;

(13) by improving the quality of the process of civil litigation, the plans will contribute to improvement of the quality of justice that the civil litigation system delivers;

(14) the substantially changed civil litigation system, evidenced by the burgeoning cost, complexity and volume of civil litigation, suggests that in the development of district court plans, the same set of generic procedures need not, and should not, apply to all types of cases;

(15) the plans should also recognize that there has not been adequate utilization of available and existing tools to respond to this substantially changed civil litigation system, to control costs and delays and thereby to secure the "just, speedy and inexpensive" determination of civil disputes;

(16) as part of their effort to manage civil cases more effectively and otherwise respond to the changing litigation system,

some district courts on a formal basis, and some district court judges on an informal basis, already apply different types of procedures to different types of cases;

(17) evidence from these courts suggests that an effective case management program should incorporate several interrelated components, including—

(A) mechanisms to take early, active control of each case filed;

(B) time goals for case adjudication and other disposition;

(C) court participation in decisions relating to case progress;

(D) control over the discovery process;

(E) deadlines, in appropriate cases, for completion of required case events;

(F) court monitoring of compliance with the deadlines; and

(G) credible trial dates;

(18) differentiated case management, of the type implemented in several State courts through case tracking systems that assign each case to a distinct processing path, is the logical extension of these components and now is warranted on a regularized and formalized basis;

(19) differentiated case management enhances the quality of the civil litigation process by—

(A) customizing procedures for each case category;

(B) encouraging consensus management of each case to the maximum extent possible;

(C) monitoring and facilitating the movement of the case;

(D) facilitating access to the court in a timely manner to resolve problems that develop; and

(E) ensuring that judges have adequate time to adjudicate issues pending before them;

(20) each case tracking system should implement the two interrelated procedures of establishing early, firm trial dates and imposing time limits on the completion of discovery, with related controls over the filing and resolution of motions;

(21) this linkage is necessary, in part, because the early completion of discovery can be counterproductive if the trial is then long delayed;

(22) because statistical studies demonstrate that approximately 95 percent of all civil cases are resolved or otherwise terminated without a trial, and because pretrial processing expenses, particularly for discovery, are often disproportionate to the case, greater attention should be devoted to the pretrial process;

(23) a critical element of the pretrial process is early and active judicial intervention, which can aid greatly in—

(A) defining the issues to be litigated and limiting pretrial activity to relevant matters;

(B) controlling pretrial discovery and other activity to avoid unnecessary expense and burden;

(C) arriving at a settlement in appropriate cases as early as possible or attempting to identify methods for resolving it as expeditiously and economically as possible;

(D) facilitating an adjudication on the merits in appropriate cases; and

(E) ensuring that any trial will be well focused and well prepared;

(24) a 1981 General Accounting Office study found the establishment and enforcement of time standards for different stages of civil cases to be a critical factor in reducing delay;

(25) a recent study by the National Center for State Courts presenting the most broadly based empirical evidence ever collected regarding the extent and nature of court delay indicates that—

(A) early court control over the scheduling of case events, including early resolution of motions, and firm trial dates are characteristic of the courts with the least amount of delay; and

(B) time goals for case processing are also an important predictor of shorter case processing times;

(26) the importance of case processing time standards has been recognized by the organized bench and bar, with standards developed by the National Conference of State Trial Judges adopted by the American Bar Association in 1984, and with similar standards developed by the Conference of State Court Administrators adopted in 1983 and endorsed by the Conference of Chief Justices in 1984;

(27) while some courts already set early and firm trial dates, discovery deadlines and other case event deadlines pursuant to their authority under Rule 16 of the Federal Rules of Civil Procedure, others are reluctant to do so, as recent data suggest that—

(A) the extent to which judges comply with the requirement to prepare scheduling orders varies, as does the extent to which they issue such orders within required time limits;

(B) in those cases with scheduling orders, approximately one-half have at least one extension to that order;

(C) in some districts, most cases are by local rule exempted from the scheduling requirement; and

(D) the use of status conferences varies substantially from district to district and from judge to judge;

(28) a broader requirement is necessary in light of the view of many experts that fixing early, firm dates and other case event deadlines is the single most effective device for encouraging prompt and well-focused case development;

(29) discovery deadlines, in the form of presumptive time limits for the completion of discovery for different categories of cases, are particularly important because if implemented as part of an overall case management system, they can provide much needed controls on a discovery process often characterized by obstructionist, dilatory, and redundant discovery tactics that lead to the "overdiscovery" of cases rather than to attempts to focus on controlling issues;

(30) time limits on discovery can encourage litigants and their attorneys to—

(A) narrow their areas of inquiry to those that are truly relevant and material;

(B) establish priorities for completion of the most important tasks as quickly as possible; and

(C) devote more attention to weighing the value of uncovering every single item of "relevant" material against the value of resolving the dispute more fairly, quickly and inexpensively;

(31) presumptive time limits are consistent with the now recognized need to structure and narrow discovery as reflected in part in Rule 26(b)(1)(iii) of the Federal Rules of Civil Procedure, which permits the court to limit discovery where it will be "unduly burdensome or expensive, taking into account the needs of the case, the amount in controversy, limitations on the parties' resources, and the importance of the issues at stake in the litigation";

(32) delays in deciding fully briefed motions contribute to the costs of litigation by preventing the narrowing of issues, encouraging the parties to conduct unnecessary discovery and requiring rediscovery;

(33) the reduction of such delays can be encouraged by substantially expanding the availability of public information about backlogs in undecided motions;

(34) another important element of the pretrial process that can reduce litigation costs is the exploration of the wide range of alternative means of dispute resolution, including arbitration, mediation, the minitrial and the summary jury trial;

(35) another element of the pretrial process that can reduce litigation costs is the intervention of a neutral party in the early stages of the litigation process—

(A) to force the parties to confront the merits of their case and their opponents' case;

(B) to identify those questions of fact and law that actually are in dispute as early as possible;

(C) to develop an efficient approach to discovery; and

(D) to provide a frank assessment of the case and its overall value.

SEC. 3. AMENDMENT TO TITLE 28, UNITED STATES CODE.

Title 28, United States Code, is amended by adding at the end of part I the following new chapter:

"CHAPTER 23—CIVIL JUSTICE EXPENSE AND DELAY REDUCTION

"Subchapter I—Civil Justice Expense and Delay Reduction Plans

"Sec.
"471. Civil justice expense and delay reduction plan.
"472. Model plan.
"473. Report by Federal Judicial Center.
"474. Backlogs in district courts.
"475. Automation.
"476. Manual for litigation management.
"477. Authorization.
"478. Congressional review.

"Subchapter II—Case Management Training

"Sec.
"479. Judicial case management training programs.
"480. Authorization.

"Subchapter I—Civil Justice Expense and Delay Reduction Plans

"§ 471. Civil justice expense and delay reduction plan

"(a)(1) On or before the expiration of the 12-month period following the date of the enactment of this chapter, each United States district court shall develop a civil justice expense and delay reduction plan in accordance with this chapter. Such plans shall apply to all civil proceedings. Each United States district court shall develop its plan with a view toward facilitating deliberate adjudication on the merits in appropriate cases, streamlining discovery, improving judicial case management, and renewing its commitment to the just, speedy, and inexpensive resolution of civil disputes.

"(2) The civil justice expense and delay reduction plans shall be developed in each district by a planning group or similar advisory committee with membership from the bench, the public, and the bar. Such groups shall be appointed by the chief district court judge of the district and shall include the chief district court judge of the district, a magistrate in the district, the district court clerk, public representatives, lawyers who represent the Federal, State and local governments in the district, and lawyers practicing in law firms of diverse sizes, in

corporations and for public interest groups so that each of the major categories of litigants in the district shall be represented. Such groups shall also include a person designated by the chief district court judge as the reporter.

"(3) Each United States district court shall implement its civil justice expense and delay reduction plan by local rule in accordance with the provisions of section 2071 of this title.

"(b) Each civil justice expense and delay reduction plan shall include the following:

"(1) A system of differentiated case management designed to—

"(A) make an early assessment of each case filed according to criteria including—

"(i) case complexity, including the number of parties involved, the number of claims and defenses raised, the legal difficulty of the issues presented, and the factual difficulty of the subject matter;

"(ii) amount of time needed to prepare the case;

"(iii) anticipated trial length; and

"(iv) judicial and other system resources required for the preparation and disposition of the case;

"(B) assign cases on this basis to appropriate processing tracks that operate under distinct and explicit rules, procedures and timeframes for the completion of discovery and for trial;

"(C) apply the necessary level of court supervision and resources to each case consistent with its management requirements;

"(D) establish appropriate mechanisms to monitor case progress and assure observance of deadlines for completion of case events; and

"(E) assure the expeditious processing of each case by counsel and judicial system officials in accordance with the tasks required.

"(2) To effectuate the early assessment of each case as set forth in paragraph (1)(A), in each district's differentiated case management system—

"(A) cases shall be classified on intake through an expanded civil cover sheet, which the clerk of each district court, designated track coordinator or other person to whom track assignment responsibilities have been delegated would use in making the initial track assignment;

"(B) counsel shall have the opportunity to indicate within a short time period that a different track applies;

"(C) disputes over the track assignment shall be raised first with the district court clerk, designated track coordinator or other person to whom track assignment responsibilities have been delegated, and, if not resolved, addressed by the judge at the mandatory discovery-case management conference described in paragraph (3), or, if no such conference is held, decided by the judge, who shall include a statement of reasons, within 30 days of the original track assignment; and

"(D) cases shall be reassigned to a different track if warranted and with reasons stated based on a changed assessment of the factors set forth in clauses (i) through (iv) of paragraph (1)(A).

"(3) A requirement that, subject to paragraph (4), a mandatory discovery-case management conference, presided over by a judge and not a magistrate, be held in all cases within 45 days following the first responsive pleading to the complaint, motion, or other paper, whichever occurs first, and that at such discovery-case management conference, the judge to whom the case is assigned shall—

"(A) explore the parties' receptivity to and propriety of settlement or proceeding with the litigation;

"(B) identify or formulate the principal issues in contention and, in appropriate cases, provide for the staged resolution or bifurcation of issues consistent with Rule 20(b) of the Federal Rules of Civil Procedure;

"(C) prepare a discovery schedule and plan consistent with the presumptive time limits for the completion of discovery as set forth in paragraph (6) and the discovery controls as set forth in paragraph (7);

"(D) require, in all cases assigned to the complex track, the attendance of an attorney for each party with authority to bind the party to the same extent as trial counsel regarding all matters that the court has previously identified will be discussed and that the participants should on that basis reasonably anticipate may be discussed, and permit, in cases not assigned to the complex track, some or all of the required participants to participate by telephone;

"(E) fix the time to file, hear, and decide motions in accordance with the procedures as set forth in paragraph (9);

"(F) fix the date or dates for additional conferences before trial, and a date for the final pretrial conference;

"(G) fix a time certain for trial consistent with the procedures as set forth in paragraph (5) and in cases assigned to the track designated for complex litigation, the court shall, to the fullest extent possible, apprise the parties of the period of time after discovery is completed within which the trial will occur;

"(H) decide whether to enlist the services of a magistrate and, if so—

"(i) to make every effort before the conference to select the person who will serve in that capacity and to arrange for him or her to be present at the conference; and

"(ii) specify the tasks to be referred and the scope of the magistrate's authority;

"(I) for cases assigned to the track designated for complex litigation, calendar a series of monitoring conferences, presided over by a judge and not a magistrate, for the purpose of extending stipulations, refining the formulation of issues and focusing and pacing discovery; and

"(J) address any other matters appropriate in the circumstances of the case.

"(4) Procedures for exempting cases assigned to the track designated for expedited or simple litigation from the discovery-case management conference requirement on the basis that the issues raised by such cases are sufficiently limited that the court can issue, within 45 days of the first responsive pleading to the complaint, motion, or other paper, whichever occurs first, a standard order scheduling—

"(A) a trial date;

"(B) discovery, including discovery cutoff dates; and

"(C) dates for filing and deciding substantive and discovery motions.

A judge may, in his or her discretion, hold a discovery-case management conference in a case assigned to the track designated for expedited or simple litigation.

"(5)(A) Subject to the provisions of subparagraph (B), a requirement that the court set a time certain for trial whether by specific day, week, 2-week period or month, at the mandatory discovery-case management conference or, as to those cases in which such conference is not held, in the order referred to in paragraph (4).

"(B) In cases assigned to the track designated for complex litigation, the court shall, not later than 120 days before the date that discovery will be completed, set a date for trial. Each district's plan may include a provision for extending the trial date by order of court for good cause shown.

"(6)(A) Subject to the provisions of subparagraph (B), a requirement that each processing track in the district's tracking system establish presumptive time limits for the completion of discovery so that parties are apprised upon track assignment of the time within which discovery must be completed.

"(B)(i) Deadlines for the completion of discovery may be extended only by order of the court for good cause shown such as subsequent discovery will not delay trial.

"(ii) All requests for extensions of the deadline for completion of discovery shall be signed by the attorney and the party making the request.

"(iii) In cases assigned to the track designated for complex litigation, the court may establish at the initial conference time limits for the completion of intermediate steps in the discovery process and identify a date certain by which it will set a final discovery cutoff date.

"(7) Procedures for making the discovery process track-specific, so that, with respect to each processing track in the district's tracking system, consideration is given to—

"(A) identifying and limiting the volume of discovery available to avoid unnecessary or unduly burdensome or expensive discovery;

"(B) phasing discovery, including the phased use of depositions upon oral examination under Rule 30 of the Federal Rules of Civil Procedure, depositions upon written questions under Rule 31 of the Federal Rules of Civil Procedure, interrogatories to parties under Rule 33 of the Federal Rules of Civil Procedure, production of documents and things and entry upon land for inspection and other purposes under Rule 34 of the Federal Rules of Civil Procedure, and requests for admissions under Rule 36 of the Federal Rules of Civil Procedure, into two or more stages;

"(C) developing means for the voluntary exchange of information; and

"(D) encouraging new and more cooperative discovery devices.

"(8) Procedures specifying that the court will not entertain any discovery motion, except those motions brought by a person appearing pro se and those brought pursuant to Rule 26(c) of the Federal Rules of Civil Procedure by a person who is not a party, unless counsel for the moving party has filed with the court, at the time of filing the motion, a statement showing that a reasonable good faith effort has been made to reach agreement with opposing counsel on the matters set forth in the motion.

"(9) Procedures for resolving motions necessary to meet the trial dates and the discovery deadlines established pursuant to the plan, including the adoption of time guidelines for the filing and disposition of substantive and discovery motions.

"(10) A comprehensive program providing for adjudication and, in appropriate cases, alternative dispute resolution, which would make available to the parties and their counsel the full range of alternative dispute resolution mechanisms, including mediation, arbitration, minitrial, and summary jury trial. If such program includes the mandatory reference of certain cases to an alternative dispute resolution mechanism,

provision shall be made for motions to exempt a case from the mandated procedure.

"(11) An early neutral evaluation program, to which certain categories of cases identified in each plan will be assigned and through which the parties and their counsel present the legal and factual bases of their case to a neutral court representative at a nonbinding conference that takes place at the earliest possible stage in the litigation.

"(12) A requirement that, upon notice by the court, representatives of the parties with authority to bind them in settlement decisions be present or available by telephone during any settlement conference.

"(13) Procedures for the regular publication of pending undecided motions and caseload progress for each individual judge to enhance judicial accountability.

"(14) Procedures for identifying, and reviewing from time to time, functions performed in the district by magistrates with a view to determining which functions within constitutional and statutory limits can best be performed by judges or by magistrates.

"(15) Procedures for judges to exchange information about their role in adjudicating contested motions and other matters.

"(c) Once developed, each United States district court, when it provides copies of its plan to the judicial council of the relevant circuit and to the Administrative Office of the United States courts in accordance with section 2071 of this title, shall also submit a report explaining how such plan complied with the provisions of subsection (b) of this section.

"(d) The judicial council of the relevant circuit shall exercise its authority in accordance with subsection (c)(1) of section 2071 of this title to review and evaluate a district court's plan and, if necessary, modify or abrogate elements of the plan to ensure that the plan complies with the provisions of subsection (b) of this section.

"(e) The Judicial Conference may review and evaluate any determinations of the circuit judicial councils in accordance with subsection (d) of this section.

"§ 472. Model plan

"(a)(1) The Judicial Conference of the United States and the Federal Judicial Center shall develop, in consultation with the individuals and groups from whom membership of the district court planning groups or similar advisory committees as set forth in section 471(a)(2) is drawn, a model civil justice expense and delay reduction plan in accordance with the criteria set forth in section 471(b) on or before the expiration of the 180-day period following the date of enactment of this chapter.

"(2) Such model plan shall be accompanied by a report explaining how the plan addresses the criteria set forth in section 471(b).

"(3) The model plan and the accompanying report shall be made available to each district court to use in developing its specific plan.

"(4) The model plan and the accompanying report shall also be submitted to the Senate and House Judiciary Committees.

"(b) If, at the expiration of the 12-month period following the date of the enactment of this chapter, a district court has failed to develop a civil justice expense and delay reduction plan, the model plan shall, after appropriate public notice and comment, immediately take effect in that district.

"§ 473. Report by Federal Judicial Center

"(a) On or before the expiration of the 24-month period following the date of the enactment of this chapter, the Federal Judicial Center shall report to the Congress with respect to the establishment and implementation of civil justice expense and delay reduction plans transmitted to the Administrative Office of the United States Courts by United States district courts. Such report shall include, among other things, information showing the number of United States district courts establishing and implementing plans in accordance with section 471, the contents of such plans, and the number of such courts implementing the model plan in accordance with section 472.

"(b) In reporting on the contents of the district court plans implemented in accordance with section 471, the Federal Judicial Center shall specify how each plan addressed, among other things—

"(1) the acquisition of initial case information and the creation of a case tracking record;

"(2) the number of case processing tracks;

"(3) the criteria for differentiating among cases and assigning them to one of the tracks;

"(4) the development of a disposition plan and timetable;

"(5) trial scheduling;

"(6) the use of alternative dispute resolution techniques;

"(7) the notification and communication among the court and attorneys, including mechanisms by which judges and administrators both within and outside the court consult concerning management and administrative issues affecting the court;

"(8) the management and monitoring of case progress;

"(9) the means for data input and case recordkeeping; and

"(10) the procedures for evaluating system performance.

The Federal Judicial Center's report shall also analyze the impact of the plans on the time available to judges to address complex, novel, or difficult issues of law or fact.

"(c) It shall be the function of the Federal Judicial Center to study on a continuing basis the effects of the various procedural reforms adopted pursuant to this chapter. It shall be the function of the Judicial Conference of the United States to develop, based on the findings arising out of such studies, new procedural recommendations from time to time, for United States district courts. Each United States district court shall make available to the Administrative Office of the United States Courts and the Federal Judicial Center such data and other information that the Administrative Office and the Federal Judicial Center determine to be necessary to enable them to carrying out their functions under this chapter.

"§ 474. Backlogs in district courts

"(a) In conjunction with developing and implementing its plan in accordance with section 471, each United States district court shall develop and implement a transition program for handling any backlog of cases within such district. Such program shall include an assessment of the current backlog problem experienced by such district court, a requirement that any case pending for more than 12 months be scheduled for a discovery-case management conference, an analysis of current judicial productivity, possible revision of current local rules to address the backlog, and a schedule for terminating the transition program, with interim goals leading to the full implementation of the district's civil justice expense and delay reduction plan.

"(b) In developing a transition program, each district shall establish an accurate inventory of pending cases if such inventory does not exist. Such inventory will enable the district to undertake steps that can be taken to reduce the number and age of its actual pending civil caseload, including setting older cases for a monitoring or other status conference or directly for the trial.

"(c)(1) In assessing its current backlog, each district shall prepare a backlog index, which is the ratio of the number of civil cases pending on January 1 of the preceding full calendar year divided by the number of civil cases disposed of during that year.

"(2) When transmitting its transition program to the Administrative Office of the United States Courts according to subsection (d), each district shall record its backlog ratio. When the Federal Judicial Center submits its report according to section 473, it shall prepare a civil case backlog index showing the ratios for all of the Federal district courts.

"(d) A copy of each transition program developed pursuant to subsection (a) shall be transmitted to the Administrative Office of the United States Courts with the plan and report submitted in accordance with section 471(c).

"§ 475. Automation

"(a) For purposes of enabling United States district courts to implement the provisions of section 471, the Administrative Office of the United States Courts shall automate the court's docket, in each district where such automation has not yet been established.

"(b)(1) The Administrative Office of the United States Courts shall ensure that such automation enables each court, in implementing the provisions of section 471(b)(13), to make available to the public a quarterly report listing all pending submitted motions before each judge that are unresolved for more than 30, 60, and 90 days, and all succeeding 30-day increments. Such report shall include data for each judge of the district indicating the aging of his or her caseload in each of the tracking categories developed by the district under its civil justice expense and delay reduction plan, as well as data indicating the number of written opinions, the number of bench trials and the number of jury trials.

"(2) To facilitate the reporting required under subsection (1), the Administrative Office of the United States Courts shall standardize court procedures for categorizing or characterizing judicial actions, including defining what constitutes a 'dismissal' and how long a case has been 'pending'.

"§ 476. Manual for litigation management

"The Judicial Conference shall take such action as may be necessary to prepare a Manual for Litigation Management. Among other things, the manual shall provide commentary on the civil justice expense and delay reduction plans, explain the rationale behind various decisions underlying such plans, and identify how provisions in the plans have increased the time available for trials and for the deliberate adjudication of cases on the merits. It shall be the purpose of such manual to set forth the basic management tools as well as provide commentary on what experience has taught about the effective use of such tools.

"§ 477. Authorization

"(a) For the purpose of enabling the Administrative Office of the United States Courts to provide automated systems to im-

plement the civil justice expense and delay reduction plans in accordance with section 471, there is authorized to be appropriated such sums, not to exceed $10,000,000, as may be necessary.

"(b) For the purpose of assisting financially the United States district courts to develop plans required by this chapter, carrying out the study required by section 473(b), carrying out the provisions of section 474, carrying out the provisions of section 476, and other provisions of this subchapter, there is authorized to be appropriated such sums, not to exceed $5,000,000, as may be necessary.

"§ 478. Congressional review

"Upon the completion of the 5-year period following the date of enactment of this chapter, the Federal Judicial Center, based on its continuing study in accordance with section 473(b), shall prepare a report on the effectiveness of the civil justice expense and delay reduction plans in reducing litigation transaction costs and delays, in increasing the time of judges that is available for trial of cases and for the adjudications of cases on the merits and in otherwise securing the just, speedy and inexpensive resolution of civil actions. Such report shall be submitted to the Senate and House Judiciary Committees. If the report determines that the plans have not been effective, Congress shall review this subchapter and assess whether modification or termination of the program of civil justice expense and delay reduction plans is warranted.

"Subchapter II—Case Management Training

"§ 479. Judicial case management training programs

"The Federal Judicial Center shall take such action as may be necessary to expand current judicial training programs to include a new curriculum and emphasis on case management so that the accumulated learning on management and adjudicatory techniques is communicated on a regular and formal basis to all district court judges, magistrates, clerks of the district courts, and other court personnel whom the Center may designate.

"§ 480. Authorization

"For the purpose of enabling the Federal Judicial Center to carry out the provisions of section 479, there is authorized to be appropriated such sum, not to exceed $1,000,000, as may be necessary.".

SEC. 4. TABLE OF CONTENTS.

Part I of the table of contents of title 28, United States Code, is amended by adding at the end thereof the following:

"Civil Justice Reform ..... 471.".●

Mr. THURMOND. Mr. President, today I rise along with Senator BIDEN to introduce the Civil Justice Reform Act of 1990. This legislation is designed to reduce litigation costs and to increase the administrative efficiency of the civil litigation process in the Federal courts.

Over recent years, the workload of the Federal court system has increased dramatically. At the same time, we must assure that the manpower and equipment necessary to meet this increased workload is provided. Unless we do so, the result will be a feeling among members of the bench and bar that civil litigation in the Federal court system is much too costly and takes far too much time to resolve disputes.

Based upon these concerns, the Brookings Institute organized a task force which produced the "Justice For All Report," which makes several recommendations to reform the civil justice process. The task force was composed of a vast array of individuals that represent competing interests within our civil judicial system. The legislation we are introducing today embodies their recommendations and should provide a necessary starting point for consideration and discussion.

Among other things, the bill directs each of the Federal district courts to develop and implement civil justice delay and expense reduction plans within guidelines set forth by Congress. The district courts have been given flexibility to create procedures and policies commensurate with the characteristics of their own particular dockets.

Specifically, the bill creates a case management and tracking system in which cases are assigned to varied processing paths, each of which have separate time frames for the completion of discovery and for trial. A premium is placed on setting early and firm trial dates. Time guidelines are set for completion of discovery and necessary motions. An emphasis is placed on early, active, and continuous docket control by the court. Additionally, this bill creates a voluntary alternative dispute resolution program. Finally, this legislation provides for improved and expanded case management training for district court judges.

Mr. President, it is appropriate to consider procedural changes which would reduce the costs and delays confronted by those who seek to resolve their disputes through the civil litigation system.

We must ensure that the public has confidence in our Federal court system to resolve their legal disputes. For these reasons, I am pleased to introduce the Civil Justice Reform Act of 1990.

By Mr. SYMMS (for himself, Mr. BINGAMAN, Mr. JOHNSTON, Mr. MCCLURE, Mr. BUMPERS, Mr. WALLOP, Mr. BAUCUS, Mr. BURNS, Mr. DIXON, Mr. DOMENICI, Mr. GARN, Mr. GORTON, Mr. GRASSLEY, Mr. HATCH, Mr. HELMS, Mr. KASTEN, Mr. LOTT, Mr. LUGAR, Mr. STEVENS, Mr. WILSON, Mr. SIMON, and Mr. HATFIELD):

S.J. Res. 240. Joint resolution designate the week of June 10, 1990, through June 16, 1990, as "Multiple-Use Sustained-Yield Week"; to the Committee on the Judiciary.

MULTIPLE-USE SUSTAINED-YIELD WEEK

Mr. SYMMS. Mr. President, today I take pride in joining with my colleague from New Mexico, and 18 of our fellow Senators, in introducing a joint resolution commemorating the beginning of the fourth decade of the Multiple-Use Sustained-Yield Act of 1960.

That act, signed by the President on June 12, 1960, embodies the fundamental concepts that govern the Federal Government's vast landholdings—both Forest Service and Bureau of Land Management—comprising over 720 million acres of land and covering almost one-third—31 percent—of the surface area of the United States.

In that light, one could call the Multiple-Use Sustained-Yield Act the corporate policy statement for the world's third largest real estate holding company—with only the U.S.S.R. and China controlling more land.

The legislative history behind the Multiple-Use Sustained-Yield Act is an important one. The bill signed by the President, H.R. 10572, was an original bill reported by Congressmen Cooley and Poage, then chairman and vice chairman of the House Agriculture Committee. I think it is significant to note that it was one of approximately 50 similar bills introduced that year to legislate a multiple-use/sustained-yield policy for management of Government lands.

In the debate just prior to passage of the bill by the House, Representative George M. Grant of Alabama, explained the intent of the Multiple-Use Sustained-Yield Act as follows:

This bill will direct the Secretary of Agriculture to administer the national forests for all of their renewable resources, and none of these resources is given a statutory priority over the others. All of these resources provide great benefits to the Nation, and all of these resources in general should be given equal consideration in managing the national forests under the principle of multiple use.

In Senate debate on the Multiple-Use Sustained-Yield Act, Senator Humphrey of Minnesota rose to say that the bill, "represents a sound public policy and constitutes 'good legislation.'" He was particularly pleased that "no weakening amendments were adopted in the Senate," and he concluded his remarks inserting the following letter:

Hon. HUBERT H. HUMPHREY,
Senate Office Building, Washington, DC.

The undersigned national membership conservation organizations endorse and reaffirm their full support of the objectives of national forest multiple-use bills H.R. 10572 and S. 3044. We believe H.R. 10572, as passed by the House, protects total public interest in the natural resources values of national forests and urge its adoption without amendment.

The letter was signed by: The American Forestry Association, the Citizens Committee on Natural Resources, the National Audubon Society, the North American Wildlife Foundation, the Wilderness Society, and the Izaak Walton League of America.

39-059 O-91-20 (Pt. 1)

Mr. President, over the past three decades, Senator Humphrey's comments have certainly been borne out—the Multiple-Use Sustained-Yield Act stands today as perhaps the most well-respected of all of this Nation's national environmental protection statutes. It is hailed by naturalists and loggers, hikers and bikers, bird watchers and cattle grazers as a landmark in the protection and preservation of the valuable resources to be found on Government lands.

The question of sustainable development is one of growing importance today. Can nations grow and develop without destroying the natural resources? We have seen tremendous devastation in the Third World caused by reckless government abuse of resources—deforestation, destruction of rare ecosystems, and the pollution of critical water supplies. The challenge of the 1990's will be to address development in a more sustainable way—making it possible to do both: Expand and develop a thriving economy and a higher standard of living, while leaving a natural resource base for future generations to enjoy.

This concept, of making multiple use of our natural resources, preventing one single use from overcoming the other values, in a way that never depletes the resources faster than nature can replenish it—is the key to wise stewardship of land. The resolution Senator BINGAMAN and I are introducing today officially proclaims the 30th anniversary of the historic statute that incorporated this vital principle into our national land management policy—and designates the week of June 10 through 16 as "National Multiple-Use Sustained-Yield Week." I urge the land management agencies of the Government to devote due attention to this anniversary—and to refresh in their memories the wise policy set forth in this law whose anniversary we are celebrating.

Mr. President, I ask unanimous consent that an article appearing in the Denver Post of March 16, 1960, advocating the importance of the Multiple-Use Sustained-Yield Act, be inserted in the RECORD, along with a copy of the joint resolution and a list of organizations and letters endorsing it, at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S.J. RES. 240

Whereas 1990 marks the 30th anniversary of enactment of the Multiple-Use Sustained-Yield Act of 1960 (16 U.S.C. 528 through 531);

Whereas national forests were established to improve and protect the forests within their boundaries;

Whereas national forests are managed to meet outdoor recreation, range, timber, watershed, wildlife, fish, wilderness, and other needs including those set forth in the Act of June 4, 1987;

Whereas the Multiple-Use Sustained-Yield Act of 1960 was enacted by Congress to enhance and supplement the purposes for which the national forests were established;

Whereas under the Multiple-Use Sustained-Yield Act of 1960, the term "multiple use" includes the management of all the various renewable surface resources of the national forests so that such resources are utilized in the combination that will best meet the needs of the American people;

Whereas multiple use management of Government lands accommodates the needs of various land uses by reducing conflict between such uses, and by providing for harmonious and coordinated management of resources;

Whereas under the Multiple-Use Sustained-Yield Act of 1960, the term "sustained yield of several products and services" means the achievement and maintenance in perpetuity of a high-level annual or regular periodic output of the various renewable resources of the national forests without impairment of the productivity of the land;

Whereas it is the duty of the Secretary of Agriculture to protect and manage the lands of the national forests, under a multiple-use, sustained-yield basis, and such duty is essential to the continued welfare and security of this Nation; and

Whereas the Multiple-Use Sustained-Yield Act of 1960 was signed into law on June 12, 1960 by President Dwight D. Eisenhower: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of June 10, 1990, through June 16, 1990, is designated as "Multiple-Use Sustained-Yield Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate activities and programs.

LIST OF ORGANIZATIONS

The following organizations endorse and support commemoration of the 30th Anniversary of the Multiple Use Sustained Yield Act:

American Farm Bureau Federation,
American Motorcyclist Association,
American Pulpwood Association Inc.,
Arizona Farm Bureau Federation,
Blue Ribbon Coalition Inc.,
Idaho Association of Counties,
Idaho District Three Elected Officials,
Idaho Farm Bureau Federation,
Idaho Mining Association,
Idaho Women in Timber,
Illinois Farm Bureau,
Iowa Department of Natural Resources, Parks Division,
Intermountain Forest Industry Association,
International Association of Snowmobile Administrators,
National Hardwood Lumber Association,
North Idaho Chamber of Commerce,
Northern Resources Alliance of Minnesota,
Northwest Mining Association,
Northwest Timber Workers Resource Council,
Pacific Northwest 4-Wheel-Drive Association,
Southern Oregon Timber Industries Association,
Timber Association of California,
Timber Producers Association of Michigan and Wisconsin,
U.S. Chamber of Commerce,
Utah Farm Bureau Federation,
Western Mining Council,
Western States Public Lands Coalition,
Wilderness Impact Research Foundation, and
Wind River Multiple Use Advocates.

BEAR ISLAND TIMBERLANDS CO., L.P.,
Ashland, VA, December 27, 1989.

Hon. STEVE SYMMS,
U.S. Senate,
Washington, DC.

DEAR SENATOR SYMMS: As a professional forester and as the Woodlands Manager of the second largest private timberland owner in the Commonwealth of Virginia, I congratulate you on your "Multiple-Use Sustained Yield Week" Resolution.

All to often it seems that the true meaning of conservation is changed from "the wise use of" to preservation i.e. "non use". The concept of sustained yield embodies the best of both. One, it means a steady use by man. Two, it means the resource will be there producing for future generations. Furthermore, the multiple-use aspect recognizes that the complex ecosystem of the forest can fulfull many need/uses simultaneously.

Sincerely,

DONALD F. AUGUST,
Woodlands Manager.

TIMBER PRODUCERS ASSOCIATION OF MICHIGAN AND WISCONSIN RESOLUTION

Whereas over 80 percent of U.S. Forest Service Lands are managed under the Multiple Use-Sustained Yield Act: and

Whereas the year 1990 marks the 30th Anniversary of that Act: and

Whereas the Forest Service has a responsibility to promote and practice Multiple Use of its lands: and

Whereas the Multiple Use-Sustained Yield Act is of tremendous importance to members of the Timber Producers Association of Michigan and Wisconsin, be it therefore.

Resolved that the Timber Producers Association of Michigan and Wisconsin requests the Forest Service to use a substantial amount of their public relations and educational funds to promote Multiple Use of their lands, recognizing the 30th Anniversary of the MUSY Act, be it further.

Resolved that the Timber Association of Michigan and Wisconsin supports, and request the Michigan and Wisconsin Congressional Delegation to support, U.S. Senator Steve Symms (R-ID) and U.S. Senator Jeff Bingaman (D-NM) in Multiple Use-Sustained Yield Act.

Passed by the Board of Directors and dated this 29th day of December, 1989.

STATE OF IOWA,
DEPARTMENT OF NATURAL RESOURCES,
November 30, 1989.

Hon. CHARLES GRASSLEY,
Congress of the United States, Hart Senate Office Building, Washington, DC.

DEAR SENATOR GRASSLEY: The honorable senators Steve Symms and Jeff Bingaman are sponsoring a Senate Joint Resolution which would establish a Multiple-Use Sustained-Yield Week. I am requesting your support of this resolution. The national forests are a valuable national resource and, through sound management, can provide a wealth of experiences to a variety of outdoor recreation user groups and conservation enthusiasts. The national forests also serve as an important economic base in sev-

eral regions of our nation through the provision of harvestable timber and mineral resources.

The key to the future of our national forests is wise management! Multiple use not only can be, but should be a part of any future plans for our national forests. We should not eliminate the opportunity for wise use of these natural resources. We should have faith in our resource managers and the public input process to establish sound management practices. A Multiple-Use Sustained-Yield Week could accomplish a great deal by informing the public of the values of our national forests, the importance of multiple-use for all outdoor recreation/conservation user groups and the values to local and national economies from carefully planned and executed economic activities. It would also provide an excellent opportunity for public input for the future management of our vast national forests.

Although we do not have any national forests in Iowa, many Iowan's travel to these areas and enjoy using them by hiking, backpacking, horseback riding, canoeing, snowmobiling, ATV and trailbike riding and skiing. Multiple-use of the national forests is important to Iowan's. Thank you for any support you can provide for this joint resolution.

Sincerely,

BOB WALKER,
Trails Coordinator, Trails and Waterways Unit.

INTERNATIONAL ASSOCIATION OF SNOWMOBILE ADMINISTRATORS,
November 30, 1989.

Mr. STEVE SYMMS,
U.S. Senate, Committee On Environment and Public Works, Washington, DC.

DEAR HON. SENATOR SYMMS: We appreciate your sincere efforts in supporting multiple use of public lands and your sponsorship of the Senate Joint Resolution establishing a Multiple-Use Sustained-Yield Week. The national forests are a valuable national resource and, through sound management, can provide a wealth of experiences to a variety of outdoor recreation user groups and conservation enthusiasts. The national forests also serve as an important economic base in several regions of our nation through the provision of harvestable timber and mineral resources.

The key to the future of our national forests is wise management! Multiple use not only can be but should be a part of any future plans for our national forests. We should not eliminate the opportunity for wise use of these natural resources through wilderness designation. We should have more faith in our resource managers and the public input process to establish sound management practices. Wilderness designation indicates a lack of trust with the public input process and the professionalism of area managers.

The International Association of Snowmobile Administrators supports your proposal to establish a Multiple-Use Sustained Yield Week and will actively encourage Congress to approve this measure. Thanks again for all of your efforts to provide for the wise use of our national forests.

Sincerely,

BOB WALKER,
Chair.

IDAHO WOMEN IN TIMBER,
Cascade, ID, November 1, 1989.

Senator STEVEN SYMMS,
Hart Building,
Washington, DC.

To Whom It May Concern:

The following resolution was approved by the Payette River Chapter of Idaho Women in Timber, with the urgent request that all Members of the Senate support this resolution:

The Payette River Chapter of Idaho Women in Timber hereby issues this statement of approval for the resolution being co-sponsored by Senators SYMMS, of Idaho, and BINGAMAN, D-New Mexico, defining the advantages of multiple use of our Government lands, in honor of the 30th anniversary of the Multiple Use Sustained Yield Act.

We further urge that implementation of this original act be more strictly enforced by the Forest Service, in spite of appeals and court orders attained by groups to impede its enforcement.

We have enjoined this cause to promote the multiple use of every sector of Idahos resources, dedicated to the full and proper utilization of our public lands, as the original bill intended.

Approved this 15th day of November, 1989, in Cascade, Idaho.

Respectfully,

CARMA CRABB,
President.
JONI L. FIELDS,
Secretary.
MONA PETERSON,
Treasurer.

IDAHO MINING ASSOCIATION,
Boise, ID, November 21, 1989.

Hon. JAMES A. MCCLURE,
U.S. Senate,
Hart Building, Washington, DC.

DEAR SENATOR MCCLURE: The Board of Directors of the Idaho Mining Association has unanimously endorsed the resolution sponsored by Senator Symms on the 30th Anniversary of the Multiple-Use Sustained-Yield Act.

The IMA strongly supports the concept of multiple use of government lands and commends Senator Symms for his leadership in providing an opportunity to showcase and define the advantages of this important Act. We urge you to cosponsor this joint resolution to designate a Multiple-Use Sustained-Yield Week.

Sincerely,

JACK LYMAN,
Executive Director.

IDAHO FARM BUREAU FEDERATION,
Boise, ID, November 14, 1989.

Senator STEVE SYMMS,
U.S. Senate,
Hart Building, Washington, DC.

DEAR STEVE: On behalf of Idaho Farm Bureau I want you to know that we are very proud and pleased that you have taken the lead in the 30th Anniversary celebration of the "Multiple-Use Sustained Yield Week" June 6-16, 1990.

Idaho Farm Bureau is a strong supporter of multiple use of our public lands and will help in our state to make this a memorable occasion in Idaho. We believe this observance is very appropriate as many times in the discussion of uses of public lands we fail to recognize the benefits of multiple use.

We are ready and willing to work with all the other users of our public lands in Idaho and will through our Farm Bureau communications network try to coordinate our observance with other states in the West.

Sincerely,

DAVE BIVENS,
Director Public Affairs.

IDAHO DISTRICT 3 RESOLUTION NO. 1

Whereas over 80 percent of the forest service lands are managed under the Multiple Use and Sustained Yield Act; and

Whereas the year 1990 marks the 30th anniversary of that act; and

Whereas, recognizing the Forest Service has a responsibility to promote multiple use of its lands and recognizing the Multiple Use-Sustained Yield Act is of considerable importance to members of the State of Idaho District Three County Elected Officials: Now, therefore, be it

Resolved, That the State of Idaho District Three County Elected Officials requests the Forest Service to use a proportionate amount (80%) of its public relations and educational funds to promote multiple use, recognizing the 30th anniversary of the act in 1990; and be it further

Resolved, That the State of Idaho District Three County Elected Officials supports U.S. Senator Steve Symms (R-ID) and U.S. Senator Jeff Bingaman (D-NM) in their resolution before Congress commemorating the 30th anniversary of the Multiple Use-Sustained Yield Act.

Dated this 19th day of January, 1990 at the quarterly meeting of the general membership in Canyon County, Idaho.

STATE OF IDAHO DISTRICT 3 COUNTY ELECTED OFFICIALS

Adams County: Larry E. Peterson, Commissioner; Edwin D. Kesler, Commissioner; Walter W. Francis, Commissioner; Michael Fisk, Clerk-Aud-Recorder; Karen Hatfield, Assessor; Nancy Armitage, Treasurer; Rich Green, Sheriff; Michael Pierce, Prosecuting Attorney; Paul T. Wehman, Coroner.

Boise County: Andrew F. Russo, Jr., Commissioner; David Alley, Commissioner; Mary Hanson, Commissioner; Arlene C. Kolar, Clerk-Aud-Recorder; C. Joan Canody, Assessor; Carlyne E. Reed, Treasurer; Craig Landers, Sheriff; Edwin W. Stockly, Prosecuting Attorney; and Lynda Kuwahara, Coroner.

Canyon County: Glenn Koch, Commissioner; Joyce Chase, Commissioner; Carlos Bledsoe, Commissioner; Ned Kerr, Clerk-Aud-Recorder; Sam McConnell, Assessor; Zelda Nickel, Treasurer; Gary Putman, Sheriff; Richard Harris, Prosecuting Attorney; and Dale Haile, Coroner.

Gem County: Dorothy Hartgrove, Commissioner; James A. Jonely, Commissioner; William F. Russell, Commissioner; Thelma Kolodziej, Clerk-Aud-Recorder; Frances McCall, Assessor; Edith Sawyer, Treasurer; Jim Wood, Sheriff; Richard Linville, Prosecuting Attorney; and Walter F. Potter, Coroner.

Elmore County: M.A. Bud Riddle, Commissioner; John Shrum, Commissioner; John Hiler, Commissioner; Ramona E. Yrazabel, Clerk-Aud-Recorder; James Haydon, Assessor; Carol Olds, Treasurer; Rick Layher, Sheriff; Barbara J. Neilson, Prosecuting Attorney; and H. Verl Humphreys, Coroner.

Owyhee County: Richard Bass, Commissioner; Harold Tolmie, Commissioner; Chester W. Sellman, Commissioner; Barbara Jayo, Clerk-Aud-Recorder; Larry Bachman, Assessor; Joan Bachman, Treasurer; Timothy J. Nettleton, Sheriff; Paul R. Byers,

Prosecuting Attorney; and Harvey Grimme, Coroner.

Payette County: Kenneth Gissel, Commissioner; John Purdum, Commissioner; Arnold R. Howard, Commissioner; Laura Stigile, Clerk-Aud-Recorder; Harold Curt, Assessor; Betty Adler, Treasurer; Bob Barowsky, Sheriff; Bruce Birch, Prosecuting Attorney; and Robert Bigelow, Coroner.

Valley County: Tom N. Olson, Commissioner; Adolf Heinrich, Commissioner; Howard Koskella, Commissioner; Leslie Irwin, Clerk-Aud-Recorder; Robert Downend, Assessor; Carmen M. Irwin, Treasurer; Lewis Pratt, Sheriff; Clayton Andersen, Prosecuting Attorney; and Marvin Heikkila, Coroner.

Washington County: Don Stephens, Commissioner; Arthur Correla, Commissioner; Mildred Horton, Commissioner; Mary Kautz, Clerk-Aud-Recorder; Lynn Wiggins, Assessor; Irene Goins, Treasurer; James Johnston, Sheriff; Ira Burton, Prosecuting Attorney; and Robert E. Thomsason, Coroner.

AMERICAN MOTORCYCLIST ASSOCIATION,
Westerville, OH, December 7, 1989.

Hon. STEVE SYMMS,
U.S. Senate,
Washington, DC.

DEAR SENATOR SYMMS: The American Motorcyclist Association (AMA) is a national organization with 170,000 enthusiast members. We are very concerned with any measure that could affect our members enjoyment of the sport. It is in this regard we write, to urge you to cosponsor a Joint Resolution by Senators SYMMS and BINGAMAN, designating the week of June 10, 1990 as "Multiple-Use Sustained-Yield Week."

We and our members are strong believers in the multiple-use and sustained-yield concepts for our public lands. These management ideals harken to the can-do American spirit of Teddy Roosevelt and Gifford Pinchot. They have served our nation well and have helped provide the flexibility we need to solve problems, develop new programs and continue access for the public good.

As we move toward the twenty-first century, many challenges face our public lands. Increased urbanization, use conflicts, the development of new product industries, and the need for species preservation make it clear we have not, and will never, outgrow the need for these concepts.

The AMA therefore respectfully requests you cosponsor the designation of the week of June 10, 1990 as "Multiple-Use Sustained-Yield Week."

Sincerely,

ERIC LUNDQUIST,
Legislative Affairs Specialist,
Government Relations.

BLUE RIBBON COALITION, INC.,
Pocatello, ID.

RESOLUTION NO. 1

Whereas over 80 percent of the forest service lands are managed under the Multiple Use and Sustained Yield Act; and

Whereas the year 1990 marks the 30th anniversary of that act; and

Whereas, recognizing the Forest Service has a responsibility to promote multiple use of its lands and recognizing the Multiple Use-Sustained Yield Act is of considerable importance to members of the Blue Ribbon Coalition;

Now, therefore, be it Resolved That the Blue Ribbon Coalition requests the Forest Service to use a proportionate amount (80 percent) of its public relations and educational funds to promote multiple use, recognizing the 30th anniversary of the act in 1990;

And be it further Resolved That the Blue Ribbon Coalition supports U.S. Senator STEVE SYMMS (R-ID) and U.S. Senator JEFF BINGAMAN (D-NM) in their resolution before Congress commemorating the 30th anniversary of the Multiple Use-Sustained Yield Act.

Dated this 19th day of November, 1989 at the annual meeting of the general membership in Reno, Nevada.

BLUE RIBBON COALITION, INC.,
CLARK L. COLLINS,
Executive Director.

[From the Denver Post, Mar. 15, 1960]

WE NEED A MODERN FOREST LAW

A bill of vital interest to Western States, where most of the national forests are located, is to be given hearing, starting Wednesday, before the Forestry Subcommittee of the House Agriculture Committee in Washington.

The purpose of the bill, H.R. 10572, is to spell out clearly, our national policy for the administration of the 181 million acres of forest lands which comprise one of our greatest public assets.

The need for this legislation stems from the fact that the law of 1897, establishing the national forests, contemplated that the principal value of these lands would be to furnish the country with timber.

Therefore, the original act emphasized timber production and mentioned only casually that the Secretary of Agriculture was to have authority to regulate the occupancy and use of the forests.

By a process of evolution, the national forests have come to have many uses. They are the source of water for 1,800 municipalities (including Denver) and more than 600 hydroelectric plants. They furnish one-third of the Nation's big game and provide grazing for one-fifth of the U.S.-grown sheep, and one-eighth of our cattle.

One of the important uses, not anticipated in 1897, is for recreation. Millions of Americans hunt, fish, camp, ski, hike, and picnic in national forests each year.

Use of the forests for multiple purposes has worked well and has been in the public interest but the basic act has never been updated to recognize, specifically, these additional uses.

As a result, some of the uses approved by the Secretary of Agriculture have been challenged from time to time. Stockmen at times have complained that the Secretary had no business allowing the forests to be used for hunting and fishing. Recreation groups have argued that the Secretary should bar livestock from forests.

These bills before the House committee merely ratify the policy for multiple use of the forests which has been in effect for many years. It recognizes that forests may be used for outdoor recreation, range, timber, watershed, and wildlife and fishing purposes as well as for mining.

It permits the Secretary to decide in particular areas the relative value of each use—such as the use for wildlife as compared with the use for domestic animals or the use for timber as compared with use for recreation. This ratification by Congress of long-standing forest policies is vital to the development of the West and is necessary to assure the maximum beneficial use of resources while, at the same time, protecting those resources from overuse and depreciation.

Mr. BINGAMAN. Mr. President, I rise to add my support and sponsorship to a provision that the Senator from Idaho is introducing, and I am joining him in introducing today, a joint resolution to commemorate the week of June 10 as Multiple-Use Sustained-Yield Week. This honors the 30-year-old Multiple-Use Sustained-Yield Act, which was enacted by Congress to guide the management of our national forests. This act provides a solid foundation for administration of the national forest natural resources and stresses both the commodity and the noncommodity uses of those resources.

The statute requires USDA Forest Service managers to consider outdoor recreation, range, timber, watershed, wildlife, fish, wilderness, and other values in managing the National Forest System.

Mr. President, the 156 national forests, the 19 national grasslands, and the 16 land utilization projects that make up our National Forest System are located in 44 of our States, in Puerto Rico, and the Virgin Islands. Of the natural resources on these 191 million acres, 9.2 million of those are in my home State of New Mexico, and they represent some of the Nation's greatest assets and have major economic, environmental, and social significance for all Americans.

Mr. President, I urge my colleagues to join with Senator SYMMS and myself in passing this joint resolution.

The Multiple-Use Sustained-Yield Act provides a solid foundation for administration of the national forests' natural resources and stresses both commodity and noncommodity uses. The statute requires that USDA Forest Service managers consider outdoor recreation, range, timber, watershed, wildlife, fish, wilderness, and other values in managing the National Forest System. In addition, the Multiple-Use Sustained Yield Act prescribes the founding principle of sustained yield directing that no renewable resource may be consumed faster than nature can replenish it.

The 156 national forests, 19 national grasslands, and 16 land utilization projects that make up the National Forest System are located in 44 States, Puerto Rico, and the Virgin Islands. The natural resources on these 191 million acres, of which 9.2 million are in New Mexico, represent some of the Nation's greatest assets and have major economic, environmental, and social significance for all Americans.

The Forest Service provides leadership in the management protection, and use of almost one-third of all Federal land in the United States. The agency is dedicated to multiple-use management of these lands for sustained yields of renewable resources

such as outdoor recreation, forage, wood, water, fish, and wildlife.

National Forest System lands are truly "America's Great Outdoors." Each year the Forest Service supplies more outdoor recreation than any other Federal agency. Much of this recreation use takes place in the natural forest environment where driving for pleasure, whitewater rafting, backpacking, hunting, and fishing are very popular. However, the national forests also contain a wide range of developed facilities, for the convenience and enjoyment of those who camp, picnic, boat, swim, or engage in winter sports. The Forest Service administers a variety of congressionally designated areas such as national recreation areas and wild and scienic rivers. In addition, the agency manages prehistoric and historic properties on National Forest System lands.

The Forest Service pioneered the establishment of wilderness on national forests in 1924 with the Nation's first such area—the Gila Wilderness in my home State of New Mexico. Wilderness is administered to provide for scientific, scenic, educational, conservation, historical, recreation, and other uses consistent with wilderness resource protection.

The Forest Service manages more than 14 percent of the Nation's 1.2 billion acres of rangeland to conserve the land and its vegetation while providing food for both domestic livestock and wildlife. Emphasis is placed on the management of range vegetation to maintain or enhance water quality and quantity, soil productivity and stability, wildlife habitat, and recreation opportunities.

Of the 191 million acres of national forests, 86.5 million acres are classified as commercial forests. Commercial forest land is land that is available for, and capable of, producing crops of industrial wood. The National Forest System contains the largest supply of standing softwood sawtimber in the United States and it plays a vital role in meeting the Nation's wood product needs. Our national forests help furnish America with lumber and plywood for housing and industrial demands, and with paper products.

Much of the Nation's water supply flows from National Forest System lands. Assuring adequate yields of high quality water and continuing soil productivity are the aims of the Forest Service's watershed management programs.

In cooperation with the States, the Forest Service manages fish and wildlife habitat to benefit both commercial and recreational users. The National Forest System is becoming increasingly important for wildlife and fish-related recreation as private lands are converted to other uses and the costs of hunting, fishing, and nonconsumptive uses increase on private lands. As about 30 percent of the threatened and endangered species in the United States find their remaining habitat on National Forest System lands, top priority is given to maintaining and improving habitat for these species.

While energy and mineral resources are not renewable, they are one of the multiple uses of our national forests and national grasslands. National Forest System lands contribute significantly toward meeting the Nation's needs for hard rock minerals, coal, oil, gas, and geothermal resources.

Under the Multiple-Use Sustained-Yield concept, the Forest Service relies on long-range program planning to assure that the resource demands placed on National Forest System lands are met, and that the productivity and environmental quality of these lands are maintained. The Forest Service's land management planning process results in integrated planning for all resources that identifies a balance between the multiple use of National Forest System lands on a sustainable long-term basis.

Demands for a variety of competing uses of our natural resources are causing serious problems in much of the world today. All to often, developing countries utilize their natural resources for short-term economic gain, ignoring the scientific, aesthetic and other long-term values inherent in public stewardship. Fortunately, for three decades, U.S. policy has recognized the need to manage our own national forests' resources on a multiple-use, sustained-yield basis.

As we move toward the 21st century demands on our natural resources will become increasingly more complex. We need to continue to emphasize the concepts of the Multiple-Use Sustained-Yield Act and ensure that our public land resources are managed in a wise and responsible manner. Continued balanced and biologically sound resource management of National Forest System lands is critical.

Gifford Pinchot, America's first forester and the first Chief of the Forest Service, laid the foundation for the development of the Multiple-Use Sustained Yield Act when he said that "Caring for the land and serving the people is the goal of the U.S. Forest Service."

I urge my colleagues to join Senator SYMMS and me in supporting this joint resolution to designate the week of June 10, 1990, as "Multiple-Use Sustained-Yield Week."

By Mr. D'AMATO (for himself, Mr. MOYNIHAN, Mr. BOSCHWITZ, Mr. LIEBERMAN, Mr. LEVIN, and Mr. METZENBAUM):

S.J. Res. 241. Joint resolution to designate the week of April 29 through May 5, 1990, as "Jewish Heritage Week"; to the Committee on the Judiciary.

JEWISH HERITAGE WEEK

● Mr. D'AMATO. Mr. President, I rise today to introduce a joint resolution which would declare April 29 through May 6, 1990, "Jewish Heritage Week."

In our diverse and varied Nation, the contributions of all cultural and ethnic groups are indispensible. More specifically, the significant contributions of the American-Jewish population to our society have proven to be outstanding. Advances in a variety of fields such as industry, medicine, and education are to be credited to the efforts of Jews, and their contribution to the sciences alone has been noteworthy.

The upcoming spring months are ones of special historic and religious interest to the Jewish community, and Jewish Heritage Week seeks to highlight these important occasions. One such occasion is the 42d anniversary of Israel's independence day, which is celebrated on April 30, 1990. Needless to say, the alliance between the United States and Israel is an important and cherished one, and one that certainly deserves our recognition.

Another approaching event to be commemorated by Jewish Heritage Week is Holocaust Memorial Day, which will be observed this year on April 22, 1990. In remembrance of the Holocaust, not only Jews but all people mourn the senseless and brutal tragedy inflicted on several races and countless innocent individuals during the Second World War. April 22 also commemorates the Warsaw Ghetto Uprising, which demonstrated the courage and strength of Jews imprisoned in Warsaw.

Passover, too, will be commemorated by Jewish Heritage Week. This religious occasion, which occurs from April 10 to 17, 1990, celebrates the historic journey made by the Hebrew people as Moses led them from slavery in Egypt to freedom in the Promised Land.

Finally, Jerusalem Day, which will be observed on May 23, 1990, signals the anniversary of the unification of Jerusalem after the Six-Day War.

Jewish Heritage Week will designate the week of April 29 through May 6, 1990, as a significant celebration to commemorate the Jewish experience. This year's celebration will focus on "Women of Valor: Celebrating the American-Jewish Woman," wherein the contributions and achievements of American-Jewish women will be examined and praised. The week will be characterized by appropriate activities and celebrations, and I urge all of my colleagues to join me in cosponsoring this joint resolution.

I ask unanimous consent that the text of this joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 241

Whereas May 10, 1990, marks the forty-second anniversary of the founding of the State of Israel;

Whereas the months of April, May, and June contain events of major significance in the Jewish calendar, including Passover, the anniversary of the Warsaw Ghetto Uprising, Holocaust Memorial Day, and Jerusalem Day;

Whereas the Congress recognizes that an understanding of the heritage of all ethnic groups in this Nation contributes to the unity of this Nation;

Whereas understanding among ethnic groups in this Nation may be fostered further through an appreciation of the culture, history, and traditions of the Jewish community and the contributions of Jewish people to this Nation: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of April 29, 1990, through May 5, 1990, is designated as "Jewish Heritage Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States, departments and agencies of State and local governments, and interested organizations to observe such week with appropriate ceremonies, activities, and programs.●

By Mr. THURMOND:

S.J. Res. 242. Joint resolution designating the week of April 22 through April 28, 1990, as "National Crime Victims' Rights Week"; to the Committee on the Judiciary.

NATIONAL CRIME VICTIMS' RIGHTS WEEK

Mr. THURMOND. Mr. President, I am pleased to introduce today a Senate joint resolution which designates the week of April 22 to 28, 1990, as "National Crime Victims' Rights Week."

It is a sad legacy that over the past few years, nearly 35 million Americans were victimized annually by criminal acts; 6 million individuals per year are raped, robbed, beaten, or murdered. The impact of crime is devastating to innocent victims and their families. In addition to the physical injuries and the financial losses, the victim is further scarred with the emotional loss of one's sense of dignity, security, and trust in other human beings. It is disturbing that the likelihood of becoming a victim of violent crime is now greater than that of being injured in an automobile accident.

Further compounding the pain and anguish victims must endure has been an historical insensitivity to their plight. The criminal justice system has oftentimes ignored the rights of victims before making crucial decisions regarding their cases or failed to notify them that a defendant had been released on bail. While the system offered legal representation and other forms of aid to the accused, it offered minimal assistance to the victim in recovering from the tremendous burden resulting from victimization.

Seven years ago, the President's Task Force on Victims of Crime presented an agenda to correct these injustices and restore balance to the criminal justice system. At the Department of Justice, an Office for Victims of Crime was established within the Office of Justice Programs for the purpose of helping States implement the task force's recommendations. The Federal Government began awarding fines collected from convicted Federal offenders to the States to aid victims of crime. In addition, the National Victims Resource Center within the Office for Victims of Crime was established to provide information on victim assistance programs and laws. Largely as a result of these efforts, community programs for victims have grown in number and now every State has a designated agency responsible for victim services.

Much progress is being made to help the victims adjust, but much more needs to be done. Through the continued efforts of State and local governments and private organizations and concerned citizens, the trauma suffered by the innocent victims of crime will be eased.

I urge my colleagues to join with me and support this resolution.

ADDITIONAL COSPONSORS

S. 134

At the request of Mr. GLENN, the name of the Senator from North Dakota [Mr. CONRAD] was added as a cosponsor of S. 134, a bill to establish the congressional scholarships for science, mathematics, and engineering, and for other purposes.

S. 216

At the request of Mr. MOYNIHAN, the name of the Senator from Oregon [Mr. HATFIELD] was added as a cosponsor of S. 216, a bill to establish the Social Security Administration as an independent agency, which shall be headed by a Social Security Board, and which shall be responsible for the administration of the Old-Age, Survivors, and Disability Insurance Program under title II of the Social Security Act and the Supplemental Security Income Program under title XVI of such act.

S. 478

At the request of Mr. ROCKEFELLER, his name was added as a cosponsor of S. 478, a bill to provide Federal assistance to the National Board for Professional Teaching Standards.

S. 619

At the request of Mr. SARBANES, the name of the Senator from Oregon [Mr. HATFIELD] was added as a cosponsor of S. 619, a bill to authorize the Alpha Phi Alpha Fraternity to establish a memorial to Martin Luther King, Jr., in the District of Columbia.

S. 670

At the request of Mr. ARMSTRONG, the names of the Senator from New Jersey [Mr. BRADLEY], the Senator from Idaho [Mr. SYMMS], and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of S. 670, a bill to recognize the organization known as the Retired Enlisted Association, Inc.

S. 695

At the request of Mr. ROCKEFELLER, his name was added as a cosponsor of S. 695, a bill to promote excellence in American education by recognizing and rewarding schools, teachers, and students for their outstanding achievements; enhancing parental choice; encouraging the study of science, mathematics, and engineering, and for other purposes.

S. 814

At the request of Mr. DOMENICI, the name of the Senator from Rhode Island [Mr. CHAFEE] was added as a cosponsor of S. 814, a bill to provide for the minting and circulation of $1 coins, and for other purposes.

S. 972

At the request of Mr. WIRTH, the name of the Senator from Nevada [Mr. BRYAN] was added as a cosponsor of S. 972, a bill to transfer to the Secretary of Health and Human Services the authority of the Secretary of Energy to conduct epidemiological studies of the effects of radiation, and for other purposes.

S. 1076

At the request of Mr. BURDICK, the name of the Senator from Oklahoma [Mr. BOREN], the Senator from Michigan [Mr. LEVIN], the Senator from Florida [Mr. GRAHAM], and the Senator from Rhode Island [Mr. PELL] were added as cosponsors of S. 1076, a bill to increase public understanding of the natural environment and to advance and develop environmental education and training.

S. 1169

At the request of Mr. ROTH, the name of the Senator from New Jersey [Mr. LAUTENBERG] was added as a cosponsor of S. 1169 a bill to provide administrative procedures for noncontroversial tariff suspensions.

S. 1207

At the request of Mr. PACKWOOD, the name of the Senator from Wyoming [Mr. SIMPSON] was added as a cosponsor of S. 1207, a bill to amend the Communications Act of 1934 to reform the radio broadcast license renewal process and for other purposes.

S. 1224

At the request of Mr. BRYAN, the name of the Senator from South Dakota [Mr. DASCHLE] was added as a cosponsor of S. 1224, a bill to amend

the Motor Vehicle Information and Cost Savings Act to require new standards for corporate average fuel economy, and for other purposes.

S. 1226

At the request of Mr. MCCONNELL, the name of the Senator from Minnesota [Mr. DURENBERGER] was added as a cosponsor of S. 1226, a bill to provide a cause of action for victims of sexual abuse, rape, and murder, against producers and distributors of pornographic material.

S. 1540

At the request of Mr. JEFFORDS, the name of the Senator from Vermont [Mr. LEAHY], and the Senator from Mississippi [Mr. COCHRAN] were added as cosponsors of S. 1540, a bill to establish a critical languages and area studies program.

S. 1600

At the request of Mr. FORD, the name of the Senator from Connecticut [Mr. DODD] was added as a cosponsor of S. 1600, a bill to enhance the safety of air travel through a more effective Federal Aviation Administration, and for other purposes.

S. 1669

At the request of Mr. BENTSEN, the name of the Senator from Colorado [Mr. WIRTH] and the Senator from Florida [Mr. GRAHAM] were added as cosponsors of S. 1669, a bill to provide Hispanic-serving institutions of higher education with financial assistance to improve their capacity to expand Hispanic educational attainment.

S. 1696

At the request of Mr. KENNEDY, the name of the Senator from Minnesota [Mr. DURENBERGER] was added as a cosponsor of S. 1696, a bill to amend title 28 of the United States Code to prohibit racially discriminatory capital sentencing.

S. 1785

At the request of Mr. MOYNIHAN, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of S. 1785, a bill to exclude the Social Security Trust Funds from the deficit calculation and to extend the target date for Gramm-Rudman-Hollings until fiscal year 1997, and to establish a point of order for the protection of the trust funds.

S. 1787

At the request of Mr. DECONCINI, the name of the Senator from Minnesota [Mr. DURENBERGER] was added as a cosponsor of S. 1787, a bill to restore the recordkeeping requirement of the Child Protection and Obscenity Enforcement Act of 1988.

S. 1858

At the request of Mr. KASSEBAUM, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of S. 1858, a bill to amend the Federal Aviation Act of 1958 relating to bankruptcy transportation plans.

S. 1943

At the request of Mr. PRESSLER, the name of the Senator from Hawaii [Mr. INOUYE] was added as a cosponsor of S. 1943, a bill to authorize a program of scientific drilling into the continental crust of the United States.

S. 1950

At the request of Mr. GLENN, the name of the Senator from Ohio [Mr. METZENBAUM] and the Senator from North Dakota [Mr. CONRAD] were added as cosponsors of S. 1950, a bill to establish regional Science, Mathematics, and Technology Education Consortiums, and for other purposes.

S. 2006

At the request of Mr. GLENN, the names of the Senator from Tennessee [Mr. GORE] and the Senator from Colorado [Mr. WIRTH] were added as cosponsors of S. 2006, a bill to establish the Department of the Environment, provide for a global environmental policy of the United States, and for other purposes.

S. 2019

At the request of Mr. SYMMS, the names of the Senator from Alabama [Mr. HEFLIN] and the Senator from Texas [Mr. GRAMM] were added as cosponsors of S. 2019, a bill to amend title XVIII of the Social Security Act to eliminate the reimbursement differential between hospitals in different areas.

SENATE CONCURRENT RESOLUTION 52

At the request of Mr. HATFIELD, the name of the Senator from New Mexico [Mr. BINGAMAN] was added as a cosponsor of Senate Concurrent resolution 52, a concurrent resolution to express the sense of the Congress of science, mathematics, and technology education should be a national priority.

SENATE CONCURRENT RESOLUTION 87

At the request of Mr. KENNEDY, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of Senate Concurrent Resolution 87, a concurrent resolution in support of the United Nations Secretary General's current efforts regarding Cyprus.

SENATE RESOLUTION 159

At the request of Mr. THURMOND, the name of the Senator from Oregon [Mr. HATFIELD] was added as a cosponsor of Senate Resolution 159, a resolution designating August 14, 1989, as "Social Security Administration Employee Recognition Day."

AMENDMENT NO. 199

At the request of ARMSTRONG, the name of the Senator from Oregon [Mr. HATFIELD] was added as a cosponsor of amendment No. 199 proposed to S. 5, a bill to provide for a Federal program for the improvement of child care, and for other purposes.

SENATE RESOLUTION 232—RETIREMENT OF CANTOR JOSEPH WIESELMAN

Mr. D'AMATO submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 232

Whereas Cantor Wieselman is retiring after having served the congregation of Temple Beth-El in Poughkeepsie, New York, for over 20 years;

Whereas Cantor Wieselman was born of immigrant parents in the Lower East Side of New York City, New York;

Whereas Cantor Wieselman attended evening courses at the City College of New York and worked in the daytime to assist with family finances;

Whereas Cantor Wieselman completed studies at the City College of New York after having served this Nation during World War II as an Aircraft Specialist in the United States Armed Forces;

Whereas Cantor Wieselman subsequently underwent extensive musical, voice, and religious training with the American Theatre Wing, the Jewish Theological Seminary, and the Graduate School of Education at New York University;

Whereas before going to Poughkeepsie, New York, Cantor Wieselman served congregations in Duluth, Minnesota, New Britain, Connecticut, and Massapequa, New York, where, as in Poughkeepsie, in addition to carrying out cantorial and teaching duties Cantor Wieselman served as a Mohel for ritual circumcisions and also helped many children to prepare for Bar Mitzvahs;

Whereas Cantor Wieselman served the public for many years with a high degree of competence, loyalty, and dedication: Now, therefore be it

Resolved, That the Senate of the United States recognizes the outstanding public service of Cantor Wieselman, and that, on the occasion of the retirement of Cantor Wieselman, the Senate expressed best wishes to Cantor Wieselman, his wife, Kathy, and his daughters, Suri, Illana, Naomi, and Amy.

SEC. 2. The Secretary of the Senate shall transmit a copy of the resolution to Cantor Joseph Wieselman.

● Mr. D'AMATO. Mr. President, I rise today to honor Cantor Joseph Wieselman, who has retired after more than 20 years of service to Temple Beth-El in Poughkeepsie, NY.●

SENATE RESOLUTION 233—AUTHORIZING CERTAIN TESTIMONY

Mr. MITCHELL (for himself and Mr. DOLE) submitted the following resolution; which was considered and agreed to:

S. RES. 233

Whereas, in the case of *Springfield Terminal Railway Co.* v. *United Transportation Union*, No. 88-0117 P, pending in the United States District Court for the District of Maine, counsel for the plaintiff has served deposition subpoenas for testimony and the production of documents on the Office of Senator George J. Mitchell and Robert J. Carolla, an employee on the staff of Senator Mitchell;

Whereas, pursuant to sections 703(a) and 704(a)(2) of the Ethics in Government Act,

2 U.S.C. §§ 288b(a) and 288c(a)(2) (1988), the Senate may direct its counsel to defend employees of the Senate with respect to subpoenas directed to them in their official capacity;

Whereas, by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that evidence under the control or in the possession of the Senate is needed for use in any court for the promotion of justice, the Senate will take such action as will promote the ends of justice consistent with the privileges of the Senate: Now, therefore, be it

Resolved, That the Senate Legal Counsel is directed to represent Robert J. Carolla and the Office of Senator George J. Mitchell in connection with discovery in this case.

SEC. 2. That Robert J. Carolla is authorized to testify and to produce records, including telephone records of the Senate Telecommunications Office pertaining to the office of Senator George J. Mitchell, relevant to the case of *Springfield Terminal Railway Co.* v. *United Transportation Union,* except concerning matters for which a privilege should be asserted.

SENATE RESOLUTION 234—AUTHORIZING AN APPEARANCE BY THE SENATE LEGAL COUNSEL

Mr. MITCHELL submitted the following resolution; which was considered and agreed to:

S. RES. 234

Whereas, in *United States* v. *Mark J. Haggerty, et al.,* No. CR-89-315R, pending in the United States District Court for the Western District of Washington, the constitutionality of the Flag Protection Act of 1989, Public Law No. 101-131, amending 18 U.S.C. § 700, has been placed in issue;

Whereas, pursuant to sections 703(c), 706(a), and 713(a) of the Ethics in Government Act of 1978, 2 U.S.C. §§ 288b(c), 288e(a), and 288l(a)(1988), the Senate may direct its Counsel to appear as amicus curiae in the name of the Senate in any legal action in which the powers and responsibilities of Congress under the Constitution are placed in issue: Now, therefore be it

Resolved, That the Senate Legal Counsel is directed to appear as amicus curiae in the name of the Senate in *United States* v. *Mark J. Haggerty, et al.* in support of the constitutionality of the Flag Protection Act of 1989.

NOTICES OF HEARINGS

COMMITTEE ON VETERANS' AFFAIRS

Mr. CRANSTON. Mr. President, I announce, for the information of Senators, that the Committee on Veterans' Affairs, which I am privileged to chair, is scheduled to hold a hearing Thursday, February 1, 1990, in SR-418 at 8:30 a.m., to consider the nomination of D'Wayne Gray to be Chief Benefits Director of the Department of Veterans Affairs.

COMMITTEE ON RULES AND ADMINISTRATION

Mr. FORD. Mr. President, I wish to announce that the Committee on Rules and Administration will meet on Thursday, February 22, 1990, at 9:30 a.m., in SR-301, to receive testimony on S. 1543, to authorize the Colonial Dames at Gunston Hall to establish a memorial to George Mason in the District of Columbia. Anyone wishing to testify or to submit a statement for the hearing record is requested to contact Mr. Jack Sousa, chief counsel of the Rules Committee, on 224-5648.

The committee will proceed at 10 a.m. to a hearing on the nomination of Robert William Houk, of Ohio, to be Public Printer. Senators, Representatives, and other interested individuals and organizations who wish to testify or submit a statement on this nomination are requested to contact Mr. Sousa.

Mr. President, I wish to announce that the Committee on Rules and Administration will meet on Tuesday, February 27, 1990, at 9:30 a.m., in SR-301, to mark up pending executive, legislative, and administrative business, including the nomination of Robert William Houk, of Ohio, to be Public Printer, and S. 1543, to establish a memorial to George Mason in the District of Columbia. The committee will also mark up other items ready for consideration at the time of the meeting.

For further information regarding this markup, please contact Carole Blessington of the Rules Committee staff on 224-0278.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, January 25, at 3 p.m. to hold a hearing on the situation in Panama.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BAUCUS. Mr. President, I ask unanimous consent that the full Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on January 25, 1990, at 9:30 a.m., for a continuation of the January 24 hearing to receive testimony on the energy policy implications of S. 1630, the Clean Air Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Thursday, January 25, 1990, at 9:30 a.m. to hold a hearing on the "Impact of Agriculture on Ground Water: Opportunity for Action."

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet in open session on Thursday, January 25, 1990, at 9:30 a.m. to receive testimony on allied perceptions on the Soviet threat.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet in closed session on Thursday, January 25, 1990, at 2 p.m. to discuss the nomination of Victor Stello, Jr., to be the Assistant Secretary of Energy for Defense Programs.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE HOTEL JEROME: A PIECE OF COLORADO HISTORY

● Mr. WIRTH. Mr. President, Coloradans are rightfully proud of their State's many treasures. Not least among these is the grand dame of inns, the Hotel Jerome in Aspen, CO. In its early days, this majestic hotel provided weary travelers sanctuary from harsh weather, inhospitable terrain and long, dusty roads. This year the Hotel Jerome celebrates 100 years of service. In that century the hotel has undergone several transformations, starting first as an inn of solitary rooms with baths down the hall, to its present incarnation that provides visitors with a choice of luxury suites and a gourmet dining room.

Even more intriguing is the history the hotel witnessed in the Aspen community over the years—as the city grew from a small mining camp, to the State's first town to be electrified, to the booming ski resort it is today.

Mr. President, as the Hotel Jerome celebrates its 100th birthday, I would like to share with our colleagues an article that appeared in the Denver Post about the hotel. I commend the Hotel Jerome on its first 100 years and wish it well as it carries 100 years of fine tradition into a second century of service.

[From the Denver Post, Nov. 22, 1989]

ASPEN'S HOTEL JEROME MARKS CENTURY OF GRANDEUR

(By Joanne Ditmer)

ASPEN.—It's an extraordinary town belle who enters her second century looking better than ever. But the Hotel Jerome, the beloved 100-year-old landmark of this Victorian silver mining community, is one of those rare timeless beauties.

The Jerome, the Belle of the Roaring Fork, has been heart and hub of Aspen social life since it opened on Thanksgiving Eve, Nov. 27, 1889. That spectacular coming-out party attracted "the swells" from the region, as well as business tycoons from New York and Chicago.

In honor of its 100th anniversary, a free open house will be held at the hotel from 10 a.m. to 5 p.m. today. Visitors are invited to wear period costumes to the gathering, and prizes will be awarded for the most authentic attire. Roving entertainment reminiscent of the Victorian era, a slide show of Aspen and the hotel's history, tours and displays of local artifacts will help celebrate the hotel's founding.

The event culminates in a gala $350-per-person Grand Ball tonight, complete with the "appearance" of Teddy Roosevelt and Jerome B. Wheeler, who built the hotel and the Wheeler Opera House two blocks away.

Aspen was barely resting easy from pushing out the Utes when Wheeler, former president of Macy's Department Store in New York City, first turned his savvy entrepreneurial eye on the fledgling mining community in 1882. He and his wife had moved to Manitou Springs in hopes it would cure her tuberculosis, and almost immediately he discovered Aspen and its silver mines.

He invested in mines, built the essential smelting plant and sampling mill, financed a company to transport ore, founded the town's first bank, bought a ranch, a marble quarry and a coal company. He financed the first hydroelectric plant in 1885, which led to Aspen becoming the first Colorado mining camp to have electric power for its mines, as well as being the state's first wholly electrified town.

Even as he made his fortune, he was sensitive to the need to make Aspen a special place to live. He gave money to plant trees and flowers throughout the town, and even in 1895, author Frank Hall characterized Aspen (then known as Ute City) as the "handsomest, most substantial and attractive mining town in the Rocky Mountains."

From 1889 to 1893, an estimated $44 million in silver, lead and other metals was taken from Pitkin County.

Against this booming economy, a trio of innkeepers borrowed money from Wheeler to build the most impressive hotel west of the Mississippi.

But before construction was completed, they slipped out of town in the middle of the night, leaving Wheeler with a not-quite-finished hotel.

With his characteristic meticulous attention to detail, Wheeler finished the hotel, a marvel with its indoor plumbing, electric lights in every room, one of the first elevators in the West, and unparalleled luxury in every appointment. Alas, the Silver Crash of 1893 wiped out Wheeler and other mining millionaires, and he lost the hotel for back taxes in 1909.

Mansour Elisha, a Syrian salesman who had stopped at the Jerome on his travels, first leased it, then bought it for back taxes in 1911. He and his family owned and operated it through the down years, when the town's population dropped to 300, and during World War II, when the 10th Mountain Division training at Camp Hale near Leadville conquered Independence Pass and discovered Aspen—and the Jerome bar.

The town's renassisance dawned when Elizabeth Paepcke brought her husband Walter to Aspen in 1945. The Chicago industrialist, head of Container Corporation of America, was searching for a place that could be a summer cultural center for the pursuit of spiritual, intellectual and aesthetic values.

Paepcke took a 25-year lease on the Hotel Jerome, imported new management, and turned the hotel over to his friend Herbert Bayer, an artist who taught at Germany's famed Bauhaus School of Design, to redesign the inn. Bayer painted the red brick hotel pale gray trimmed in "Bayer blue," including over the arched windows, which resulted in "blue eyebrows" that townspeople loved dearly for nearly 40 years.

Throughout the years, the Jerome bar has remained a favorite watering hole for everyone from stars of stage and screen and high-finance moguls to local carpenters and ski instructors. But over time, the genteel hotel grew shabby and earned a reputation for erratic quality.

Dick Butera, owner of the Aspen Club and former president of the Hilton Head Co. in South Carolina, and his partner Jim McManus of Westport, Conn., came to the rescue in 1985. Thanks to a $6-million renovation, they restored the elegance of the Jerome's beginnings.

The 90 little rooms—some with baths down the hall—were remodeled into 21 luxurious rooms and six suites, and a new wing compatible with the original was added. The remodeled hotel now boasts 94 luxurious guest rooms, including 15 suites, a ballroom and other modern amenities missing in the original. Designer Zoe Compton furnished the hotel with authenic antiques, and searched out and renovated forgotten furnishings to re-create an opulence rarely seen.

The Hotel Jerome is one of nine properities that comprise the growing luxury division of Coastal Hotel Group of Chicago. In July, Wolfgang A. Triebnig arrived to become general manager of the Jerome, after six years as managers of the Park Hyatt in Chicago and 12 years with Stouffer Hotels in Washington.

A native of Vienna—who for the past five years has skied at Vail, but never at Aspen—Triebnig is in love with the Jerome and exuberant as it enters its second century.

"The Jerome has a history of 100 years . . . to uphold that tradition and what it represents today, is most exciting," said Triebnig. "I like to think that the upper crust of society stayed here, and that's what we're going to have again. We're going to make it the best of the best, give a home-away-from-home comfort while we maintain the luxury."

Evidence of that striving for excellence is the new menu in the hotel restaurant, the Silver Queen. Dinner there now is a superlative gourmet experience, with a price to match.

"The Jerome belongs to the community of Aspen," he added. "There's nothing else in Aspen to compare; it's always been The Place."

The black tie/period costume Grand Ball tonight is a benefit for the Aspen Historical Society. It will include a banquet, musical revue, skits, a candlelight toast and dancing in the Eastlake-Gothic style ballroom, which was added with the new wing five years ago.

Among the celebrants at the ball will be tennis champion Martina Navratilova; Olympic skier Kiki Cutter; Janet Guthrie, the only woman ever to compete in the Indianapolis 500; and such ski legends as Art Pfister and Peter Seibert, Vail founder. (For information, call the hotel at 1-920-1000.)●

THE CONGRESS BELLS RING

● Mr. DANFORTH. Mr. President, the Congress Bells in the Old Post Office Tower rang out over the noon hour on January 23 to commemorate the opening day of the 101st Congress, 2d session. Thanks to the good efforts of Sir H.D.H. Wills, C.B.E., T.D., D.L., the bells were a gift to the Congress from the British Ditchley Foundation on the occasion of the U.S. Bicentennial in 1976. Since 1983, when they were installed and dedicated, the Congress Bells have been rung to mark holidays and the opening and adjournment of Congress. The bells are cast in weight and tone similar to the bells of Westminster Abbey, and are rung in the ancient style of change ringing by members of the Washington Ringing Society. Tony Buttle, John King, Hat Morgan, Alex Netchvolodoff, Carolyn Orems, and Quilla Roth rang the bells from 12 noon until 1 p.m., on the 23d.●

THE JEWEL OF EASTERN COLORADO: TARADO MANSION

● Mr. WIRTH. Mr. President, recently I had an opportunity to visit the Tarado Mansion in the high plains of eastern Colorado with its owner Jim Petersen. This Greek revival mansion, which is a reconstruction of an abandoned local landmark named the Adam's Hotel, was moved from downtown Arriba to just south of that small farming community in 1972 and stands as a jewel in the middle of Lincoln County.

Mr. Petersen and the Eastern Colorado Preservation Society have made Tarado Mansion a showcase for priceless antiques from all over the world. Every room is full of fascinating items that date back hundreds of years and make a visitor feel as if he or she has taken a trip back to a time when life was less hectic and more genteel. Each of the mansion's four bedrooms has its own style of decor from Victorian to French, American oak to oriental. Paintings by eastern Colorado artists and a large pipe organ fill the lower level ballroom.

A separate house to the side of Tarado is dedicated year-round to Santa Claus with a large collection of toys. This December marked the fifth "Christmas Walk" at Tarado, when every room in the mansion is decorated for the season in exquisite detail—so much that you expect to hear a jolly "Ho! Ho! Ho!" eminating from the next room at any time.

I congratulate Mr. Petersen and the Eastern Colorado Preservation Society for helping to bring tourists to Lincoln County by truly making Tarado Mansion a beautiful and fascinating place to visit at any time of the year. I encourage all Coloradans and the Members of the Senate to visit Tarado

Mansion if they are ever in eastern Colorado.●

SENATOR LUGAR'S SPEECH ON THE DEMOCRATIC REVOLUTION

● Mrs. KASSEBAUM. Mr. President, on January 12, 1990, Senator LUGAR delivered a keynote address on "The United States and the Democratic Revolution" to the International Leadership Forum of the Center for Strategic and International Studies in San José, Costa Rica.

Senator LUGAR's speech eloquently analysed the role of the United States in the struggle for democracy and specifically assessed the current situation in Nicaragua. I believe we all can benefit from reading Senator LUGAR's views, particularly on the elections in Nicaragua which will take place at the end of February. Consequently, I am submitting the full text of the speech for inclusion in the RECORD.

THE UNITED STATES AND THE DEMOCRATIC REVOLUTION

(Address by Senator Richard G. Lugar)

As the world enters the 1990's, the United States is on the threshold of a major debate on the role of our country in the leadership of world affairs. At a time when the Warsaw Pact nations of Eastern Europe are seeking to establish democratic political institutions and various forms of market economic systems—while pleading for massive United States assistance—a major U.S. news magazine recognized Soviet President Mikhail Gorbachev as "Man of the Decade." The basic rationale for this award came from an analysis that Soviet permissiveness made possible the liberation of states enslaved for more than four decades by a combination of Soviet military occupation and local Communist police states.

Many American voices, and I am one of them, argue that the solidarity and successful political and military policies of NATO were much more responsible for European freedom in 1989.

Even though the year of 1989 ended with Germans dancing on the Berlin Wall, the year had begun for many American intellectuals with Professor Paul Kennedy's suggestion from his book, *The rise and Fall of the Great Powers,* that the United States and the Soviet Union were like two scorpions in a bottle, battling to the death while the economic authority of Japan and the Federal Republic of Germany rushed past the distracted and severely depleted "cold warriors." Many Americans began the year convinced that our national influence was dwindling, our resources much more limited than we had assumed, and that our allies were failing to pay their fair share of common defense while taking unfair advantage in international economic competition. Now, many of these same Americans claim not only a temporary victory in the Cold War, but the end of the Cold War and the necessity of identifying and spending a "peace dividend" from the estimated savings of future defense budgets.

I am sensitive to the views I have summarized but I believe they are all wrong. Let me share a glimpse of my own vision. At the end of 1989, I was exhilarated to hear Lech Walesa addressing a joint session of the United States Congress. I applauded Leonard Bernstein's Christmas performance of Beethoven's Ninth Symphony on both sides of the Berlin Wall, and I was elated when United States troops conducted an efficient military operation in Panama that protected Americans in that country, safeguarded operation of the Canal under the Treaty, and made possible the installation of leaders elected by the people of Panama last May.

In the coming debate in the United States Senate, and more importantly in other public fora in our country, I will argue that the United States is a world superpower that must stay fully engaged with friendly nations in our hemisphere, in Europe, in Asia, in the Middle East, and in Africa. We are advocates of democracy, of human rights, of religious, academic and economic freedom. We are honest brokers of disputes in every geographical region and trusted guarantors of peaceful relations among nations and of safe passage on the high seas. We have been the major factor in the development of universal communications which has made possible the universal transmission of our ideas and our idealism. We have been and remain the major factor in the growth of the world trading system. Our prosperity and that of every other nation depend on the strength and continuity of that leadership.

For all of those reasons, we will continue to require military forces sufficient to play all of our roles in every theater. If there is to be a peace dividend in the years to come, it will come from our continued economic growth in a world economic system which our active leadership must continue to help structure and secure.

All of this is certainly arguable and will be argued at length. In in this paper, I will confine my vision to the specific interest that the United States has in spreading knowledge about democratic institutions and in assisting people in every land to enjoy personal and national growth most likely to occur in a democratic atmosphere.

At minimum, I believe that democratic practices must include the right of each adult citizen to cast a secret ballot with results accurately recorded in a choice with more than one candidate from more than one party. Leadership must be identified for a term of office and under conditions where temporary powers end, and succession occurs through secret ballot, again and again. Selection of leadership and exposure of ideas and performance can come only through free speech and a free press. This implies a whole set of human rights and personal liberties universally respected by citizens and upheld by the state, with an independent court system providing dispute resolution and justice vis-a-vis the state and among various individual citizens and groups.

Adopting democratic procedures and even maintaining human rights and free and open discussion does not ensure prosperity. Each nation must encourage and reward enterprise, hard work, respect for wisdom and a strong sense of public spirit. But process is crucially important. Many new democracies recognize the need for expertise in fashioning political and economic procedures. The goal is to incorporate the experience of others and "leap frog" over many stages of purely indigenous development.

The United States has always been interested in fostering the democratic process. Our history pulsates with the enthusiasm to help others; but the last decade was a time of especial vigor for U.S. advocates of democracy. The National Endowment for Democracy, the Republican and Democratic Party Institutes which work with the Endowment, and the privately supported Center for Democracy became advocates for free and fair elections in a host of countries. Their guidance was sought in actually setting up democratic housekeeping as new administrators and legislators assumed democratic responsibilities for the first time. Other countries in Europe and in the Western Hemisphere encouraged similar foundations for democratic institution-building. Many started long before the United States entered the field.

A dramatic manifestation of this democratic advocacy was the appointment of official election observer groups that arrived in countries on the threshold of watershed elections, and who informed the world whether those election were free and fair. Well-observed and publicized elections in Zimbabwe and El Salvador occurred in the first half of the 1980s.

The Philippine election of February, 1986 marked an important turning point in elevating the role of elections in a transition to democracy. It was especially important because it occurred in a very large and complex nation, the election results were widely disputed, and the entire process was covered by a multitude of the international electronic and print media. They beamed the drama around the world, day after day, throughout the election, and during the subsequent "people power" revolution.

President Ferdinand Marcos called a "snap" election and demanded that the United States send an official observer delegation to validate what he had anticipated would be an overwhelming mandate to govern. After a stream of American Congressional and Reagan Administration visitors advised Marcos that he must be more effective against Communist guerrillas and in cleansing Philippine institutions, Marcos decided to demonstrate his authority by engaging in a public relations campaign.

The opposition to Marcos united behind a single candidate: Corazon Aquino. Her campaign was perceived as enough of a threat that Marcos attempted and failed to gain Philippine Supreme Court nullification of the election. Comprehensive fraud, predominately by incumbents, was perpetrated, leading ultimately to an overall international judgment that the reported results were invalid.

The internal debate within the Reagan Administration following the election was important not only becuase it led to the recognition and support of the new Aquino presidency, but because it produced a dramatic and comprehensive new statement of U.S. foreign policy.

On March 14, 1986, President Reagan stated:

"For more than two generations the United States has pursued a global foreign policy. Both the causes and consequences of World War II made it clear to all Americans that our participation in world affairs, for the rest of this century and beyond, would have to go beyond just the protection of our national territory against direct invasion. We had learned the painful lessons of the 1930s that there could be no safety in isolation from the rest of the world. . .

". . . In the past several weeks, we have met these responsibilities—in difficult circumstances—in Haiti and the Philippines. We have made important proposals for peace in Central America and southern Africa. There and elsewhere, we have acted in the belief that our peaceful and prosperous future can be best assured in a world in

which other peoples too can determine their own destiny, free of coercion or tyranny either at home or abroad.

"The prospects for such a future—to which America has contributed in innumerable ways—seem brighter than they have been in many years. Yet we cannot ignore the obstacles that stand in its path. We cannot meet our responsibilities and protect our interests without an active diplomacy backed by American economic and military power. We should not expect to solve problems that are insoluble, but we must not be halfhearted when there is a prospect of success. Wishful thinking and stop-and-go commitments will not protect America's interests . . .

". . . In this global revolution, there can be no doubt where America stands. The American people believe in human rights and oppose tyranny in whatever form, whether of the left or right. We use our influence to encourage democratic change, in careful ways that respect other countries' traditions and political realities as well as the security threats that many of them face from external or internal forces of totalitarianism."

Let me underline that President Reagan stressed a global foreign policy, an active diplomacy backed by American economic and military power, and opposition to tyranny of the left and the right.

The televised images of the Philippine election had a profound impact in Asia, but also in Latin America. Political ferment in South Korea and Taiwan was obvious, but President Oscar Arias told then Vice President George Bush and me, as we arrived for his inaugural ceremonies in 1986, that he and many other Costa Ricans had been watching the Philippine election on television with keen interest. They liked what they perceived to be a new American enthusiasm for democracy as distinguished from preoccupation with the realpolitik of single-minded interest in the retention of military bases.

The Philippine election experience also illuminated problems. Americans were pleased that Corazon Aquino was a fresh symbol of goodness in politics, but they became impatient with the stubborn facts of civil strife, domestic corruption and interminable discussion about the future of the Clark and Subic bases. Even four years later—after Filipinos have ratified a Constitution by nearly 75 percent, elected a new Congress with new responsibilities and necessary checks and balances with the President, elected local officials, increased foreign exchange reserves, reduced the national debt with regular payments, engendered real growth of approximately 6 percent annually for three years following negative growth during the final Marcos years, and reduced the percentage of Filipinos living in abject poverty—still many Americans seem eager to seize upon new allegations that President Aquino is weak and relatively ineffective.

Admittedly, the tedium of building a democracy dissipates the excitement of a dramatic election victory filled with promises and hopes for a better future. The world is fickle in deciding what is newsworthy, with an attention span too short for the development and growth of a democracy.

We must be constant in our strong support and appreciation of democracies whose elections we observe. Democracy is difficult and often precarious as fulfillment of hopes is demanded by the people. And, unfortunately, democracy is a reversible process.

Both elements, the election process and the development process, are essential. The blessings of 1989 have presented champions of democracy with an abundance of new opportunities.

Elections in Asia, the Soviet Union, Eastern Europe and Latin America were extraordinarily important political events in the 1980s. For sake of vivid and timely illustrations, I will concentrate my attention on the May, 1988 election in Panama and the forthcoming February election in Nicaragua.

The Philippine election became the archetype of formal election observation and follow-through in foreign policy formulation by the United States and other interested governments. Free and fair elections came to be perceived in my country as a primary method for validating public opinion, legitimizing government actions and resolving seemingly intractable foreign policy dilemmas.

The Bush Administration inherited from the Reagan years the problems of United States relations with Panama and Nicaragua. Looking ahead toward horizons well beyond such a troubled legacy, President Bush and Secretary of State Baker saw remarkable opportunities to improve bilateral relations with the Soviet Union and to bring about substantial advantages for democracy in Eastern Europe. Understandably, they devoted primary time and travel to Europe.

I suggested to them that we must also pay attention to the one event in Panama's calendar that offered hope for a breakthrough, namely the early May election. Semi-miraculously, just as in the Philippines, the opposition to General Noriega came together behind Guillermo Endara as a single presidential standard-bearer with two able vice presidential candidates from other parties. Just as in the Philippines, the Catholic Church offered substantial support to the opposition. Just as in the Philippines, it was assumed by all outside and inside observers that Noriega would do what he needed to do to win the election, that it was absolutely essential to encourage opposition candidates to stay the course, even at great personal peril to themselves and to their followers.

I encouraged Allen Weinstein and the Center for Democracy to establish a visible information clearinghouse headquarters in Panama City. Dr. Weinstein had visited the Philippines at the request of the Senate Foreign Relations Committee in late 1985 and prepared the observer group that I was to co-chair. We had comprehensive knowledge of the election code, of the election players, and of levers which we employed to open up the channels of observation and dialogue with the government.

As the activities of the Center for Democracy became evident in Panama, General Noriega decided to shut them down. Unlike Marcos, Noriega did not invite official observers nor engage in dialogue on arrangements. But by 1989 the election observation process had become mature and sophisticated. The free and fair election cry had become persistent. The candidates were encouraged to contest the election, and former U.S. President Jimmy Carter and his group of former Western hemisphere heads of state kept visiting with Noriega throughout the election. The Catholic Church retained quick count tally sheets from a large percentage of voting tables reminiscent of the fledgling NAMFREL movement in the Philippines in 1984 and of the full-blown operations of NAMFREL citizen watchers and volunteers in 1986.

Although General Noriega nullified the election in 1989 just as Marcos had threatened to do in 1986, Noriega was less successful in scrubbing all the votes off the international scoreboard. It was apparent that Endara had won. The legitimacy of his presidency was established then, even if not realized until December.

To the strong credit of the Central American Presidents, they have pursued the resolution of the Nicaraguan problem through a scheduled free and fair election which was accelerated through negotiations to February 25, 1990. In this region, free and fair elections have taken root. Costa Ricans have perfected the democratic election process and I have observed well-administered elections in Guatemala and El Salvador. The recent Honduran election also was exemplary.

Yet the future of the Central American democracies is jeopardized by violence in Nicaragua and El Salvador and by the pervasive economic poverty of the region. The political turmoil and the economic crisis will not be alleviated until peace is obtained and the basic elements of the democratic experience are visible and habitual in all of Central America.

I shall not review the history of United States-Nicaraguan relations. They have been disastrous. They may remain that way after February 25, but the preoccupation of the United States with democracy and with free and fair elections as a first step guarantees that February 25 will be a vital date for the beginning of a new debate on United States policy toward Nicaragua.

I am not alone in perceiving that the Sandinistas have established the current election procedures with reluctance. They are not persuaded that their mandate for a limited term to govern comes from the secret ballots of their countrymen, and they are deeply concerned, as are most incumbents, that they might lose a free and fair election.

The principal reason for subjecting themselves to an election test is pressure from within Central America, with the concerted leadership of the democratically elected Central American presidents. Perhaps they also believe that some degree of harmony with the United States must precede economic recovery and that the *sine qua non* for United States commercial ties or lifting stringent economic sanctions is legitimacy for their government through free and fair elections.

Early last summer I suggested to President Bush, Vice President Quayle and Secretary Baker, that given the importance of this election to the potential alleviation of one of the worst dilemmas of American foreign policy, a Presidential observation group for Nicaragua should be appointed months in advance so that all members could visit the country frequently and come to a careful understanding of both history and current circumstances. Ideally, the observer group should be composed of roughly equal membership from House and Senate, Republicans and Democrats, and from those who have voted for and against aid to the Nicaraguan Contras.

A consensus judgment about the February 25 election coming from such a group could produce a constructive Congressional debate after February 25. It was and is my hope that a consensus policy might replace a decade of bitter, divisive debate which has injured U.S. relations with many nations in the hemisphere.

In unprecedented fashion, President Bush did appoint a 20 member Nicaraguan elec-

tion observer group on November 14 to be co-chaired by Congressman Tony Beilenson, a California Democrat, and me. We were charged with a mission of visiting Nicaragua in all possible locations and were given the widest possible latitude for our deliberations and report. After the November congressional recess, members planned to travel to Nicaragua but were stopped in their tracks by an official directive from Nicaragua denying visas to all members of the Presidential observer group.

I do not intend to go to Nicaragua to observe the election unless I am invited by the government and given access to all parts of the country and all aspects of the election. I have written to President Ortega to point out that I must now seriously consider asking President Bush to disband our group. We have not been allowed to witness the campaign nor to investigate charges of harrassment of election personnel and disruption of political rallies, or charges that fear engendered by military action intimidates political activity. A careful judgment about a free and fair election based only on ballots cast and counted on February 25 will lack credibility without continuous examination of the procedures of voter registration, candidate access to the mass media and the general climate for democracy. The election must be both free on election day and fair on the days of the campaign leading up to the election.

The Nicaraguan government has compounded observation difficulties by using the pretext of a mistaken U.S. search of the Nicaraguan Ambassador's residence in Panama as an opportunity to expel most of an already small staff from the American embassy in Managua. The official American presence whose reporting is essential in reaching informed foreign policy judgments is at an historically low level just before the U.S. debate on Nicaraguan policy is about to begin. In my Philippine experience, our observer group had the benefit of full cooperation of the host government, a superb Ambassador and staff that gave brilliant reporting and full support to our mission for months in advance. As observers who were also elected public officials, we worked diligently to furnish our President and our congressional colleagues with our best judgment and information on which the future relationship between the Philippines and the United States might be based.

The Nicaraguan government responds, in part, that the United Nations and the Organization of American States will have many teams of observers in the country. In addition, President Carter's group, the Center for Democracy, and many foreign delegations will be present. Perhaps election events in Nicaragua will be so obvious as to be easily understood without sophisticated analysis or careful inspection of preparation and procedure. But early indications point to a close election, campaign violence, and a fractious congressional and public debate on Nicaragua.

I am puzzled by current Sandinista tactics. They have submitted to an apparently unwanted election to satisfy neighboring democracies, European benefactors and, ultimately the United States, with the hope of ending crippling economic sanctions and the civil war. Why should access be denied to United States Congressmen and to professional U.S. embassy personnel who could give a continuous flow of eye-witness information during an election campaign deemed crucial to the future of the country?

Whether I or any of the official U.S. observers ever see Nicaragua or not, a congressional debate will commence soon. It will play a critical role in shaping future U.S.-Nicaraguan relations. I intend to play a vigorous role in it. I will cite the following factors as relevant to the election process thus far:

(1) The ground rules for the election have been set entirely by the Sandinistas except at the time of the National Dialogue when an accord with the opposition was dictated by a Sandinista need for an agreement to take to the Tela conference of Central American Presidents. The National Dialogue was supposed to resume immediaetely thereafter, but the Sandinistas have refused all opposition requests for a resumption of discussion on key remaining issues.

(2) The Mainstream Opposition has only one representative out of five members on the Electoral Council. The Chairman, an able man, and staff are largely holdovers from the Sandinista-appointed Council for the 1984 election.

(3) A large registration of voters indicated enthusiasm of most Nicaraguans for the elections, although the presence of armed soldiers and para-military Ministry of the Interior troops at some polling stations has troubled citizens trying to assess the wisdom and prudence of electoral participation.

(4) Although registration was completed in late October, the opposition received registration lists only in late December—affording relatively little time to check for accuracy given a January 15 deadline for completion. (An important aspect of Philippine election fraud was the appearance of voter lists only on election day in many precincts with a high percentage of mistakes or deliberate omissions.)

(5) An increase in violence at rallies usually directed by Sandinistas against UNO personnel and increasing intimidation of UNO poll watchers and local candidates has been noted by the Center for Democracy. Specific violent activity has been cited by the OAS, and the UN has generally condemned the increase in violence.

(6) *Barricada* and *Nuevo Diario*, Sandinista newspapers, have consistently identified UNO with the Contras and the Somoza National Guard during the present time of especial national tension. President Ortega has embellished this by fantasizing a United States-backed invasion of Nicaragua and by threatening to kill any opposition person who supports such an invasion.

(7) The Sandinista advantages of incumbency include liberal use of public funds, grossly disproportionate television programing and an apparent calculation that a mood of fear is more appropriate than a mood of hope and national celebration. (An atmosphere of hope and celebration was evident and inspiring in the Guatemalan election of 1985, for example.).

Regardless of who wins the February election, United States policy should have some benchmarks for judging democratic progress in Nicaragua with which to gauge the extent of post-election U.S. assistance. It is useful to list these benchmarks now.

(1) Sandinistas and Contras will need to engage in the oft-postponed dialogue which could have followed Tela on demobilization of the huge Sandinista army in coordination with Contra demobilization. Such mutual demobilization must include safe return for the contras and integration into the mainstream of life in the country. The army should be a national Nicaraguan Army flying the Nicaraguan national flag and not a Sandinista Party army flying the Sandinista flag. Imagine for a moment the problem of sorting out a United States policy of assistance if Mrs. Chamorro should win the election and the Sandinista retain a huge army under their party flag.

(2) A tolerance for diversity and pluralism must be established in which neighborhood watch committees, Ministry of the Interior para-military forces, secret "MINT" prisons for political opponents, and all elements of Sandinista neighborhood control should be terminated.

(3) A system of justice including judges and courts independent from and superior to the executive branch of government should be instituted.

(4) A consititution recognizing all political forces—not just the Sandinistas—will need to be drafted and adopted. That constitution or a separate bill of rights should recognize freedom of the press, property rights and the normal freedoms which similar documents in our hemisphere have enumerated. Many of these same benchmarks are relevant to current changes in Eastern Europe and Asia.

I have highlighted the present democratic challenge in Nicaragua in order to take American foreign policy from a statement of broad definitional ideals to specific actions which can be noted, applauded and supported with generous hands of reconciliation and fraternal democratic relationships. As in the Philippine development, the going will be hard and tedious but the United States and its democratic friends must be prepared for long-term supportive roles. Institutional memories must be improved substantially before superficial snap evaluations are rendered.

During 1989, I witnessed election campaigns in Uruguay, Brazil, Chile and Peru. I was deeply moved by the quality of the candidates and campaigns in each of those countries, as well as the extraordinary sense of hope and faith in democracy even under arduous circumstances.

In December, I shared the same excitement in a European visit with activists from the Warsaw Pact counties. They are preparing for their campaigns, earnestly trying to organize the contending parties and frame the electoral circumstances in just a few months of time.

The Sandinistas in the Nicaraguan election are different. Unlike European Communists who have lost confidence in their ability to govern or guide their countries to prosperity—and unlike a host of countries all over the world discovering market economic principles and preparing to enter into a competitive world economy—the Communists in Nicaragua are confident and enjoy a sizable percentage of popular support. They manifest, also, and eagerness for confrontation with the Unites States and, on occasion, neighboring countries.

The sheer act of holding an election and the constitutional and governmental reorganization in the aftermath will make a difference in the life of Nicaragua and our hemisphere. That is true for any nation but especially true for Nicaragua and its neighbors.

Many years ago, the distinguished host of this forum on democracy, President Oscar Arias of Costa Rica pointed out that democracy would not be safe in Central America until all of the governments were the product of free and fair elections. Such democracies do not inflict war or threats of war upon each other, nor do they support insurgent groups to undermine democracy in the neighborhood. And until there is peace through democracy, the volume of economic development capital which the Kissinger-

Jackson Plan suggested in the early '80s or a multi-lateral assistance initiative such as the plan now being instituted in the Philippines is simply not going to happen in Central America.

What will happen over the next few months, is that the United States will make an insistent point that almost every country in the world now manifests a strong desire for democratic institutions. This started in frequent U.S.-Soviet meetings from the Presidential summit on down. The Soviets claim that they recognize and support this democratic trend. We shall ask them pointedly for appropriate deeds.

Governments such as Cuba and Nicaragua claim they are revolutionaries who overthrew dictators and founded new societies dedicated to services and equity for all of the people. They have organized large armed forces to resist either external or internal tampering with their idealism. They are fearful that their hard-won victories will be lost through electoral disaffection. Fidel Castro has simply ignored calls for any vote confirming his legitimacy or tenure.

The Sandinistas in Nicaragua, faced with economic devastation, a long struggle involving Nicaraguan Contras and strong democratic pressure from neighbors, have conceded the idea of a free and fair election with some international observers of their choice.

My prayer is that a free and fair election will take place in Nicaragua and that subsequent developments will initiate a democratic transition. I believe that the United States will be successful in gaining Soviet cooperation in winding down hostile military assistance and economic subsidies to countries in our hemisphere. Likewise, U.S. assistance to Eastern European countries seeking democracy will surely be predicted on an end to their assistance to undemocratic nations in our hemisphere.

An active United States role in promoting and protecting democracy and freedom of the seas all over the globe certainly implies that we will maintain security for the United States and its friends in the Western Hemisphere.

Although I am exhilarated, as are most Americans, about the strength of the democratic revolution around the world and the exciting new potential for human freedom which is at hand, I am not persuaded that the triumph of democracy and liberal economic institutions is either a done deed or is necessarily inevitable.

Ruling groups who have a vision of how the world works and are prepared to enforce that vision with authoritarian governments of the left or right are still present and active in disquieting numbers. Some have affirmed that they will do what they have to do in order to maintain power indefinitely.

Thus, even at a time of well deserved celebration by advocates of democracy, it is appropriate to get down to hard cases. It is appropriate to survey each promising opportunity for change through the strenuous, well organized, and increasingly sophisticated means which democratic advocates have employed in championing the free and fair election route.

One such opportunity lies immediately ahead in Nicaragua. I am confident that we will encourage many more opportunities before the year is over.●

THE PASSING OF A REMARKABLE WOMAN: ELIZABETH GASQUE VAN EXEM

● Mr. HOLLINGS. Mr. President, I rise today to pay tribute to a remarkable South Carolinian and a good friend, Elizabeth Gasque Van Exem, of Cedar Tree Plantation. Mrs. Van Exem, who died late last year at the age of 103, was the first woman elected to the U.S. Congress from South Carolina. A vigorous Democrat throughout her long life, she was sent to Congress in a special election following the death of her first husband, Allard Henry Gasque of Florence, in 1938. In addition to her political activism, she was an author, lecturer, dramatist, and renowned hostess. She remarried in 1942 to the late Arsene J. Van Exem.

She was born Elizabeth Mills Hawley, and grew up on a rice plantation near Blythewood, SC. She was educated at the South Carolina Co-Educational Institute in Edgefield, and at Greenville Female College, now Furman University, from which she graduated in 1906. That year she received the college's coveted Endel Medal in dramatics.

Elizabeth knew every President from Woodrow Wilson to Franklin Delano Roosevelt, and was close friends with a Who's Who of prominent Washington politicians during the 1920's and 1930's. Returning to South Carolina in the early 1940's, she played leadership roles in a wide range of civic clubs, and was an active member of St. Stephen's Episcopal Church in Ridgeway, SC. Her final resting place is in Mount Hope Cemetery in Florence, SC.

Mr. President, Elizabeth Gasque Van Exem was a proud daughter of South Carolina. She made political history as the first woman to represent my State in Congress. However, she will be better remembered by me, by thousands of other South Carolinians, and by her many descendants as a exceptionally warm, vivacious, and intelligent woman—a woman who brightened our lives, and will be greatly missed.●

REPORT ON VISIT TO PANAMA, JANUARY 19 TO JANUARY 22, 1990

● Mr. D'AMATO. Mr. President, between January 19 and 22, I visited Panama as cochairman of the Senate Caucus on International Narcotics Control, at the invitation of Panama's President Guillermo Endara.

In the course of the visit, I met with as wide a range of people as I could. I met with our own diplomats, including Ambassador Deane Hinton and Deputy Chief of Mission John Bushnell; military officers, including Gen. Maxwell Thurman, Commander in Chief, USSOUTHCOM, and Gen. Marc Cisneros; and drug enforcement agents.

I also met with the Papal Nuncio, Monsignor Laboa, as well as Panamanians from all walks of life, including President Endara, Vice Presidents Ricardo Arias Calderon and Guillermo Ford, the poor and refugees of the Chorillo district, people at Sunday Mass, and a wide range of Panamanian officials, bankers, businessmen, and community leaders.

Every one I met expressed the very deeply felt hope that after so many years of oppression, real freedom and democracy can take root in Panama.

At Mass on Sunday, at Cristo Rey Church in Panama City, Father Javier Villanueva gave an eloquent homily, in which he gave the best analysis of the situation in Panama that I have heard. If you want to understand Panama, study this sermon.

I ask that a translation of Father Villanueva's sermon be printed immediately following my remarks.

Father Villanueva said that in recent years, the Panamanian people had become exiles in their own country. They were, he said, "Exiled from justice. Exiled from liberty." There was nothing more, he added, "than corruption, putrefaction, assassinations, and crimes."

Looking to the future, he told the people not to go to the Government for political jobs, which have accounted for as much as 25 percent of Panama's total employment in recent years.

He told the people not to ask the Government for a piece of the pie because there is no pie—Noriega took all the pie.

For too long, the people of Panama were beaten, tortured, and forced to live in fear.

They know that it is Operation Just Cause that has given them the chance to be free of that brutality.

According to a Gallup poll taken in January 1990, 86 percent of the Panamanian people would describe United States military action under Operation Just Cause as a liberation rather than an invasion.

The people of Panama desperately want to be free of the old way of doing things, in which almost every Government service and agency in Panama had been turned into part of a criminal enterprise.

Under Noriega, there was criminality in everything, from the sale of passports, to money laundering, to the smuggling of high-technology equipment and arms in the Colon Free Zone and elsewhere.

Establishing effective systems to combat this criminality is one of the new Government's most important and most difficult challenges.

One way to meet this challenge is to set up internal affairs offices to encourage honest procurement, law enforcement, immigration, customs, reve-

nue collection, and Government services.

If these offices are set up and permitted to function, and if the many other plans now being talked about are actually implemented, Panama will have a real chance to achieve the goal Father Villanueva spoke of: "a free country with justice and liberty."

Fortunately, there is growing recognition that the old ways of doing things must change, and that the potential benefits of real reform are substantial.

For example, a U.S. Customs agent told me that at one location, collections increased from $10,000 one day, to $20,000 the second day, to $40,000 the third day. The Government had received no revenue from this site at the same time a year ago, presumably because of corruption.

Both Panama and the United States have made great sacrifices, including the 26 Americans and hundreds of Panamanians who died during Operation Just Cause, to end the tyranny of the past. The United States has a deep moral obligation to make sure that those deaths were not in vain.

We must help Panama become a bridgehead for democracy and freedom and to show that freedom pays a special dividend.

We must remember that the aid we provide is not a gift. As Father Villanueva said, aid is nothing more than a restitution of what was taken away from the Panamanian people by those who we once supported, the Panamanian Defense Forces.

And let there be no mistakes. Father Villanueva is absolutely right when he says, "the United States aided, created, and increased the power of Noriega's absurd army."

If democracy and freedom are to flourish, it is essential that Panama's economy be rebuilt and reintegrated into the international economy.

As one person in Panama said, "it's hard to eat democracy." Panamanians very much want to go back to work—back to raising families and building communities—and we have a deep moral obligation to help them do exactly that.

We also have a deep moral obligation to help Panama free itself from involvement with the drug cartels, particularly in the area of money laundering.

In this regard, we have already made a start. We have received—and continue to receive—a wealth of intelligence about money laundering, and the operations of the cartels.

On January 10, 1990, Panama and the United States signed a mutual antidrug cooperation agreement.

Panama has also begun to freeze large numbers of drug trafficker accounts.

Assuming Presidential assurances that progress in fighting drug smuggling and money laundering will continue, our next step must be to recertify Panama as cooperating with the United States in the war on drugs.

At every meeting, I stressed that there will be no aid to Panama without substantially increased cooperation in this area.

Recertification will enable the United States to provide much needed drug enforcement assistance and other forms of aid to reinvigorate Panama's antidrug effort and its legal economy.

After recertification, we need to develop memorandums of understanding between United States and Panamanian law enforcement agencies to add real substance to the framework mutual cooperation agreement signed on January 10.

Panama and the United States also need to conclude as soon as possible an agreement to combat money laundering and to share evidence in criminal investigations, along the lines of the Mutual Legal Assistance Treaty we have with the Cayman Islands.

This can be done first by Executive agreement, and eventually by mutual legal assistance treaty.

I stressed the need for such an agreement at meetings with United States and Panamanian officials, and with the Panamanian Bankers Association. Most, but not all, of those familiar with the United States-Cayman Islands Mutual Legal Assistance Treaty were agreeable on this point.

Significantly, I was told at the meeting with the bankers association that most deposits in Panama of funds belonging to Colombian nationals are in Colombian banks in Panama.

I was later told to expect opposition from certain Colombian banks doing business in Panama. This opposition must be overcome, because, as far as the United States is concerned, the money laundering party is over.

Panama has replaced the corrupt and brutal Panamanian Defense Forces [PDF] with a new 12,000-person Panamanian Public Forces [PPF] under Col. Herrera Hassan, as well as a new 700-member investigative police force under the attorney general. The process of rooting out corrupt members of the PPF and investigative police is another top priority of the Government.

The United States administration's aid package for Panama needs to be put on a fast track, and safeguards need to be instituted to ensure that aid reaches the people in real need as quickly as possible.

The people of Panama need immediate help with the basic necessities of life. Many, like those in the Chorillo and Tocumen neighborhoods, have an urgent need for housing relocation assistance and clean water.

The Government and private sector need an infusion of aid through grants, loans, release of funds in escrow, restoration and expansion of trade benefits, and other assistance, in order to help them get an immediate start on reducing unemployment—in some areas as high as 30 to 40 percent—restoring order, and reducing crime levels that in some areas are alarmingly high.

Another challenge Panama must face is the pernicious role of Cuban, Nicaraguan, and Libyan agents.

According to information provided by the Defense Department, as the Noriega regime became increasingly isolated over the past year, Panama came to rely increasingly on radical anti-American countries for military and financial assistance. The three major contributors have been Cuba, Nicaragua, and Libya.

Cuba supplied hundreds of tons of material and supplies, much of it military related, as well as training and technical assistance to Panama.

Nicaragua became the primary routing channel for Cuban material and probably also directly provided weapons and supplies.

In return for use of Panamanian territory as an operating base, including terrorist-related support activities, Libya provided financial assistance to Noriega.

Both Cuba and Nicaragua used Panamanian territory for coordination of support activities with regional leftist radical groups, intelligence collection against the United States, and circumvention of United States trade embargoes.

In February 1988, Cuba began deliveries, sometimes using Panamanian Air Force flights of military material and supplies to Panama. In the last 12 months, there were at least five Panamanian flights to Cuba to pick up weapons.

The weapons provided are almost exclusively Communist bloc manufactured and cover a wide range, from small arms to antiaircraft artillery.

According to the Defense Department, some 15,000 to 20,000 AKM/AK-47 rifles, over 1,000 rocket-propelled grenade launchers, and approximately 11 antiaircraft guns were delivered from Cuba and Nicaragua.

Cuba and Nicaragua provided training assistance to the Panama Defense Forces, both in these countries and Panama.

Along with material provided, Cuba sent technical advisers to assist the PDF and also aided the Noriega regime in devising public relations and propaganda campaigns.

Both Havana and Managua are believed to have shared with the PDF the benefits of their experience in organizing civilian defense committees for intelligence collection and population control in developing the Dignity Battalions.

Under the Noriega regime, Libya was allowed significant freedom to use Panamanian territory for coordination of its support to terrorist and insurgent groups throughout Latin America. In return, Libya provided Noriega with significant financial assistance totaling millions of dollars. This investment was one of Libya's largest outside the Middle East. Libya also maintained contact with a number of radical leftist parties and individuals in Panama.

With so many difficulties facing Panama, it is now time not just for the United States, but for all countries, and especially those in Latin America, to help. They can begin by recognizing Panama's Government, which, according to a January 1990 Gallup poll, 95 percent of the Panamanian people believe has the right to govern.

Panama has great strengths: A strategic location, the canal, oil pipeline, an entrepreneurial spirit, high literacy rate, and above all, a resilient people with a deep faith, who live liberty.

For too long, the people of Panama felt the heel of tyranny on their necks. Now that Panama is free, we in the United States owe the Panamanians more than speeches and promises about helping them rebuild a free and prosperous society. We owe them meaningful action, and we owe it to them now.

The sermon follows:

[Sermon Given by Father Javier Villanueva, Sunday, January 21, 1990, in Cristo Rey Church, Panama City, Panama]

SERMON OF FATHER JAVIER VILLANUEVA

My Dear Brothers and Sisters:

"Syndrome" is a Greek word that means characteristic symptoms of an illness. Two acts stand out from the early history of the people of Israel, prodigious acts which transformed them. First, when the hand of God liberated the Israelites from captivity in Egypt, putting them on their way through the desert toward the promised land. The second act was also transcendental in the life of the people. The Lord once again liberated them from another captivity.

The people of Israel, who began to enjoy freedom and to live under the trees which they had planted and to bathe in the waters of their own rivers, were shaken once again by an act of aggression towards another captivity—that of Babylonia. I say this because, with the people of Israel, these two captivities became neither a syndrome, nor a burden that weighed continually on their shoulders but, rather, a push from God spurring them on their way to get to the promised land that he had designated for them.

It is true that the people of Israel kept these two acts in mind, but they weren't debated or engulfed in juridical disquisitions or in useless dialogues. These acts were foremost in their minds as two historic facts. Not as syndromes, but points of reference, so as not to lose courage on their journey. First, by continuous exodus and second by returning to their homeland to rebuild all that had been demolished, starting with the temple, and then settling down in the promised land.

The Noriega Era cannot become a syndrome for those of us who live here in Panama. Certainly, it can be a point of reference, but not a reason to hurl ourselves into putrid waters. It shouldn't become a scapegoat. The Noriega Era cannot serve the failings of the person who forfeits his sense of justice.

I have already reviewed Noriega's realm. All that fantasy, a fantasy that harbored absolutely nothing but corruption. That "Year 2000," that "For Panama, my life," that "Not one step backward." All that which wasn't. That which resulted not in sovereignty but in "sovereign-itis" and that which wasn't independence or patriotism, but a syndrome, a syndrome of sickness which drove Panama to the edge, if we haven't already fallen into the abyss. Call it a point of reference, call it the hand of God who became tired of seeing so much corruption, hearing the crying of the mothers and feeling the pain of an entire nation that shouted to the Lord. The Lord says: "Help those who cry for Him, and those who look for Him."

The Lord remembered us and directed a change of course toward the road of liberation, justice, and freedom. At that point the jurists become embroiled in arguments over whether it was an invasion, an intervention, or an act of aggression. Those people faithful to God, in their own way, with their logic very often outside of the lawyer's terminology, believe that it was an invastion, but not an invasion of Panama. Because Panama was two nations, or one nation and one country and an anti-country because there were exiles who had to leave the country. But here, within our own country, we felt exiled. Exiled from justice. Exiled from liberty. It was an exile. The country was divided between a corrupt country, that country with bellicose strength, that country with the power of destruction, and the other country. The country which felt annihilated before so much, so many weapons, so much expulsion, so much disarray, torture, and imprisonment.

Therefore, the invasion was against the anti-country, against the corruption. And Noriega and his men didn't even believe in what they said. All that fanfare of shouting and slogans—at first shot, all of them fled like rabbits. All that which was not fictitious, all of that collapsed and the true country now starts to take its first difficult and costly steps toward its reconquest: a free country with justice and liberty.

This is what the first lesson has indicated and what Jesus symbolizes in the Bible. The joy and happiness of beginning to build a new country because we have to admit to ourselves that those spiritual ruins which cannot be seen are great. But they have certain manifestations, such as the physical ruins that our astonished glances capture as we walk the streets.

Not only was the economy in shambles, but there was an almost epidemic and contagious plague upon all of us. Without realizing it, we were entering on a wave of corruption, anti-ethics, and anti-values. We called justice injustice, and true justice could not be spoken. It was a subversive concept.

The same goes for liberty and democracy. They were subversive words, and they were not only subversive, but for us they are concepts that we don't know or recognize. Twenty-one years. Who can define liberty? Yes, we know that it is marvelous to be free, live in justice, live in democracy. But aren't we afraid of liberty? Aren't we afraid of justice? Of course we are! Because it is something surprising, like someone who has before him an apparition, a vision. There is fear before the surprise. Not crushing fear, but an uncertainly.

We don't know what democracy is because they have been trying to teach us falsely for so long. Most recently, they have tried to teach within the schools a concept totally distinct from reality. The spokesman from the corrupt regime came to tell us that here we were living in true liberty, that we lived democratically. They practically swore to it, inviting us to look around, to see that this was a free and sovereign country. That is why we can't ignore the ruins—because one has to work on the physical reconstruction of the country—unless we want to see ourselves approaching another ill-fated crisis.

One can not ignore the spiritual, moral, and ethical formation of our people. How many lawyers have no idea what it is to enter into litigation with the confidence that the legal processes will operate smoothly? What a surprise for those lawyers who complete a case, and those who already have spent 30 or 40 years trying to enter courtrooms and approach higher courts, when they knew all the time that the judge's verdict, however well-educated he might be, would not be accepted because it was against the regime.

We have to learn. And it is a very great task for the church, the family and the educators, going about inculcating these values, which were bombarded with greater ferocity than the Cuartel Central (army headquarters). Our values have been twisted to the point of absurdity. Noriega and his followers were almost Satanic in denying entrance to civic-minded clubs because the people in those clubs were teaching decency, because they were quoting the words of their country's forefathers and the patriots of the republic. This is because Noriega and his men claimed that sovereignty wasn't discussed, that nationalism wasn't even talked about.

What we have often understood and seen with our own eyes, drawing aside that false curtain of "sovereign-itis," was that there was nothing more than corruption, putrefaction, assasinations and crimes. We also have to listen to the Apostle St. Paul, the non-conformist, the disciple who teaches us a very important lesson at this moment. From the beginning of Christianity factions developed in the church. On the one hand, there was someone who preached well, and on the other hand, there was another who, due to his age, had diseased gums and bad teeth and was unable to pronounce his words clearly. And I think this latter was the case with St. Paul.

St. Paul had been eloquent. He was an erudite scholar. He was a Pharisee who was familiar with all of the Scriptures and drew on them frequently and brilliantly. But little by little, he lost that charisma which fades with age.

And there were other, younger, handsomer disciples. And people went to listen to their eloquent voices. St. Paul, who never had any problem speaking the truth, says that one should do away with factions, that one can not say "I am a disciple of Peter, I am a disciple of Paul, I am a disciple of so-and-so." Or is it that perhaps Peter, Paul, and the so-and-so have given their lives for you?

There is only one God who is Jesus Christ. I want to bring this to bear in order to illuminate the present situation. Many times I said that after the fall, or more accurately, the flight of the Noriega regime, we needed to unite all political fronts in support of a

new president. That the people needed to set aside their political differences and undertake the task of overthrowing Noriega and his followers. That during these years one would have to work hard—even though we are counting on assistance—an assistance which is obligatory and part of the American conscience.

Because the Senator is well aware of the fact that the United States aided, created, and increased the power of Noriega's absurd army, such that, this isn't a present given to us but, ethically and morally, it justly is a restitution. I know that this sermon is being accurately translated for you, Senator, and perhaps what you can emphasize to your colleagues in Washington is that it is a moral obligation and it is just compensation, and not a gift from the United States—all your restitution of what was taken away from us by those who were your unconditional allies: the Panamanian Defense Forces.

Dear Brothers and Sisters, let us not annoy the Panamanian Government by asking for political positions. Or by dividing up what Noriega—whose balloon deflated in front of El Carmen Church—called the pie. There is no pie left, because Noriega ate the whole pie.●

DR. JAMES WILSFORD AND THE MIRACLE IN ORANGEBURG

● Mr. HOLLINGS. Mr. President, we politicians are good at giving speeches on the importance of education. We love to sing hosannas to teachers and the public schools. But, when you get down to it, here at the Federal level, education is a lot like the weather: everybody talks about it but nobody does anything about it. Well, let me take this opportunity to introduce my Senate colleagues to one man—Dr. James Wilsford of Orangeburg, SC—who has taken the bull by the horns and, by his example, is making a tremendous difference for public education in America.

As superintendent of schools in Orangeburg, SC, Dr. Wilsford has been the leader of a remarkable transformation. Five years ago, his school district ranked near rock bottom in performance in the State, with a dropout rate of 40 percent. Today, the annual dropout rate is less than 2 percent, and Orangeburg schools are objectively rated among the elite public schools in South Carolina. More than half of the graduates at Orangeburg's Wilkinson High School go on to college.

Certainly, some of the credit must go to the South Carolina's 1984 Education Improvement Act, a gutsy piece of legislation that added a penny to the State's sales tax to finance reform initiatives in the public schools. By overwhelmingly backing that bill, South Carolinians showed a willingness to put their money where their mouth is on the subject of quality education. And, again, what a stark contrast this is to Washington, where the lame excuse at the highest levels is that we have more will than wallet. Nonsense. We are a wealthy Nation. The only question is whether we are unselfish and wise enough to invest in the next generation as opposed to squandering our resources on present consumption.

Yes, South Carolinians have matched their will with their wallet. But even more importantly, South Carolinians have been blessed with educational innovators and leaders of Dr. Wilsford's caliber. Dr. Wilsford has mobilized parent involvement in the schools. He has initiated a broad range of extracurricular activities to encourage academic achievement—to keep kids off the streets and away from drugs and alcohol. He has backed his teachers to the hilt, and insisted on high expectations from his students. The results have been extremely impressive. All of us in South Carolina take great pride in Dr. Wilsford's accomplishments, and in the superb effort by teachers and parents who have rallied to his trumpet.

Mr. President, several weeks ago we heard an unfortunate speech by the U.S. Secretary of Education in which he accused the States and localities of merely going through the motions on education reform. My answer to Secretary Cavazos is very simple: Come on down to South Carolina. Specifically, pay a visit to Orangeburg's public schools. If what Dr. Wilsford's is doing constitutes going through the motions, then we urgently need to distill it, bottle it, and ship it to every State in the Nation.

Mr. President, Parade Magazine profiled Dr. Wilsford and the Orangeburg reforms in its January 14, 1990, edition, and I ask that the article be reprinted in the RECORD at the end of my remarks.

In closing, let me simply say that my hat is off to Dr. Wilsford for the superb job he is doing—not just for the schools in Orangeburg, but for public education across the Nation. We are still learning from his leadership and example.

The article follows:

FIRST LESSON: BELIEVE IN YOURSELF

(By Al Santoli)

Something special is happening in the public schools of Orangeburg, S.C. Five years ago, before sweeping state education reforms, the school district ranked near the bottom in performance, with a 40 percent dropout rate. Today the annual dropout rate is less than 2 percent, and nine of Orangeburg's 10 schools rank among the state's top performers. Although most of the semi-rural area's 6500 students are descendants of slaves and still live in poverty, more than half of Orangeburg-Wilkinson High School's graduates are entering college. Parents who once appeared apathetic in regard to their children's future have become directly involved.

"Kids need a push from the parents," says Mattie King, whose daughter Tiffany is in the second grade at Rivelon Elementary. "In the community, there are a lot of single-parent families. But I would like to see every child finish high school, go to college and get a good job. Parent volunteers help children from broken homes or those whose families are having problems."

Mrs. King is among a large number of parents at Rivelon who together volunteer an average 1000 hours a year as office and library assistants and teacher's aides. After-school programs such as the Boys Club, Girl Scouts and anti-drug activities keep kids off the streets and away from harmful influences.

"Some think that poor people don't care about their children," says Dr. James Wilsford, 55, the district's school superintendent. "But as an inner-city high school principal, I learned that, although parents may never initiate a phone call to say they're worried about their kids, they usually respond when we call them. In Orangeburg, we run an 'early childhood' parenting program in all the elementary schools. Our teachers and counselors try to keep in close contact with parents at the middle and high schools as well. The PTA has high turnouts."

Wilsford and his wife, Helen, who teaches computer programming at the high school's vocational center, are the parents of three. Tall and studious-looking, James Wilsford came from the working class in Akron, Ohio, but went on to earn a Ph.D. at the University of South Carolina. In 30 years of teaching, he has been recognized as a pioneer in remedial education for deprived children. In 1989, he was named National Superintendent of the Year.

"You shouldn't sell a child short because of the house he or she lives in," says Wilsford. "I don't believe in blaming failing performances on young people because they are black or poor or from single parents. If the superintendent and teachers feel that way, the students and their parents will also. We don't only focus on A or failing students. There's a lot to be said for a C student who works hard. He's going to be a good worker and a good parent."

Typical of the newly ambitious young people in Orangeburg is Walter Jefferson, a high school graduate with a goal. Since his mother's death in New York when Walter was 13, he has lived with his aunt and uncle. Ernestine and Herb Fairey. "When I first came down here, I was still in shock," Walter recalls. "I felt really on my own. I got into some fights because I felt expected to prove myself." But with the encourgement of teachers and his aunt and uncle, Walter turned himself around. He is now planning to pass up academic and football scholarship offers so he can attend a military-preparatory school with the hope of achieving his ultimate dream—to be accepted to the Air Force Academy and become a pilot.

Dr. Wilsford credits South Carolina's 1984 Education Improvement Act as the catalyst for the dramatic turn-around in his schools. The EIA provided funding for innovative remedial programs to improve literacy and math skills, as well as enrichment programs for gifted students. Adding a penny to the sales tax and earmarking it for education increased the state's 1989-90 school budget by $283 million. Pay raises and incentives have boosted teacher morale, and computer technology has been introduced into classrooms.

Orangeburg now has a ratio of about one computer for every six students. Doing math, reading or science exercises at computer terminals individually or in teams, students are becoming familiar not only with the technology but also with the teamwork required in today's hi-tech workplaces.

The Write To Read lab at Rivelon Elementary is a carpeted playroom with craft tables. Here kindergartners learn the alphabet and phonetic spelling and begin typing little stories at the blue computer screens. Teacher Nancy Bozard says: "To learn to read, we teach letters and sounds by telling stories, playing games and writing on the blackboard. Getting younger kids comfortable with computers will be a great incentive for learning throughout their schooling."

At the high school, a former vocational shop has been transformed into a 120-table computer lab where students with learning problems spend at least one compensatory period each day practicing reading or math. Remedial classes are mandatory for those who score below average in basic skills.

"When our students are absent," says Harold McClain, principal of the 2000-student high school, "we have a computerized device that calls parents. Teachers and counselors also will call. If there are repeated unexcused absences, we refer the problem to family court."

In smaller schools, technology plays a smaller role in monitoring students' progress. At Nix Elementary, until she retired as principal, Irene McCollom made weekly visits to classrooms to evaluate teacher performance and learn students' names and abilities. "To get our kids to achieve," Mrs. McCollom recalls, "we came together as a faculty."

"The faculty developed a unified 'assertive discipline' plan, and we sent copies to parents," she adds. "Classes were rewarded with popcorn or ice cream parties for good behavior. But if a child continually disobeyed and parents would not cooperate, I put the kids in my car and took them home. The first year, I took at least five kids to parents at their jobs. Most parents cooperated after that."

The inspirational efforts of Mrs. McCollom and her colleagues are reflected in the students' grades. In 1974, a few years after South Carolina schools were integrated, only 14 percent of fourth-graders in Orangeburg's six elementary schools scored above the national average in language, reading and math skills. By 1989, the number of students above the national average had leaped to 59 percent. For three consecutive years, Nix Elementary has received state academic-achievement awards. And while the basic literacy rate steadily improves at every grade level in Orangeburg, student self-confidence grows and the dropout rate is dramatically reduced.

"We can no longer pass kids to a higher grade level whether or not they know anything," says Dr. Wilsford. "Our success in dropout-prevention is partly due to remedial labs and multimedia classroom technology we've introduced. But the main reason is that we've developed comprehensive programs geared to building kids' self-image, beginning in preschool and kindergarten. Through teachers caring and expanding their relationship with parents, we've developed a positive attitude toward learning."●

STATE ENERGY CONSERVATION PROGRAMS IMPROVEMENT ACT

Mr. MITCHELL. Madam President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar Order No. 433, S. 247, a bill to increase the efficiency and effectiveness of State energy conservation programs.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (S. 247) to amend the Energy Policy and Conservation Act to increase the efficiency and effectiveness of State energy conservation programs carried out pursuant to such act, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the majority leader?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Energy and Natural Resources, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

That this Act may be cited as the "State Energy Efficiency Programs Improvement Act of 1989".

SEC. 2. TABLE OF CONTENTS.—

Sec. 1. Short title.
Sec. 2. Table of contents.
Sec. 3. State energy conservation goals.
Sec. 4. Required State energy conservation plan elements and consolidation of energy extension service.
Sec. 5. Optional State energy conservation plan elements and consolidation of supplemental State energy conservation plan.
Sec. 6. Additional conditions for Federal assistance.
Sec. 7. State energy advisory board.
Sec. 8. Update of energy conservation program for schools and hospitals.
Sec. 9. Weatherization assistance for low-income persons.
Sec. 10. Support for technology applications.
Sec. 11. Authorizations of appropriations.
Sec. 12. Territorial energy assistance program.

SEC. 3. STATE ENERGY CONSERVATION GOALS.—Section 364 of the Energy Policy and Conservation Act (42 U.S.C. 6324) is amended to read as follows:

"STATE ENERGY EFFICIENCY GOALS

"SEC. 364. Effective October 1, 1990, each State energy conservation plan with respect to which financial assistance is made available by the Secretary under this part shall contain an energy efficiency goal, and may contain interim goals, for such State, which, as a result of the implementation of such plan, shall achieve at least a 10 percent improvement in the efficiency of use of energy supplies consumed in such State in the year 2000 compared to the projected energy consumption, as of October 1, 1990, for such State in the year 2000. The plan shall specify the assumptions used by the State in the determination of its projected energy supplies and demands taking into account population trends, economic growth, and the effects of Federal, State, and local energy efficiency programs.".

SEC. 4. REQUIRED STATE ENERGY CONSERVATION PLAN ELEMENTS AND CONSOLIDATION OF ENERGY EXTENSION SERVICE.—(a) IN GENERAL.—Section 362(c) of the Energy Policy and Conservation Act (42 U.S.C. 6322(c)) is amended—

(1) by striking "and" at the end of paragraph (4);

(2) by striking the period at the end of paragraph (5) and inserting in lieu thereof a semicolon; and

(3) by adding at the end thereof the following new paragraphs:

"(6) procedures for ensuring effective coordination among various local, State, and Federal energy conservation programs within the State, including any program administered within the Office of State and Local Assistance Programs of the Department of Energy as of December 31, 1987, and the Low Income Home Energy Assistance Program administered by the Department of Health and Human Services;

"(7) in accordance with subsection (f), programs to implement all the functions of the Energy Extension Service, as provided by law on the day before the date of enactment of the State Energy Efficiency Programs Improvement Act of 1989; and

"(8) in a supplementary contingency plan, energy emergency policies and procedures to deal with energy supply disruptions including petroleum products, electricity, natural gas, coal, and other energy supply and delivery disruptions.".

(b) ENERGY EXTENSION SERVICE.—Section 362 of the Energy Policy and Conservation Act (42 U.S.C. 6322) is amended by adding at the end thereof the following new subsection:

"(f) The programs to implement all the functions of the Energy Extension Service, as provided for by subsection (c)(7), shall—

"(1) include programs for identification, development, and demonstration of energy efficiency opportunities, techniques, methods, materials, and equipment (including those that are responsive to local needs or resources) and alternative energy technologies such as solar heating and cooling for agricultural, commercial, and small business operations, individual energy consumers, and new and existing residential, commercial, and agricultural buildings or structures;

"(2) provide for technical assistance, instructions, information dissemination, and practical demonstrations with respect to energy efficiency opportunities;

"(3) provide, to the maximum extent practicable within personnel and funding limitations, active outreach energy extension assistance (including information on end-user technology requirements) at the local level through appropriate offices (including metropolitan offices) and through county agents and technical staff assistance;

"(4) make maximum use of existing outreach or delivery mechanisms or programs and include, to the maximum extent practicable, any State, local, university, college, or other organization's programs for energy information, education, or technology transfer which have activities or purposes similar to those of this part; and

"(5) establish and implement policies and procedures designed to assure that assistance provided under this part does not replace or supplant the expenditure of other Federal or State or local funds for the same purposes, but instead supplements such funds and increases the expenditure of such State or local funds to the maximum extent practicable.".

(c) ELIMINATION OF ENERGY EXTENSION SERVICE.—The National Energy Extension Service Act (title V of Public Law 95-39) is repealed.

SEC. 5. OPTIONAL STATE ENERGY CONSERVATION PLAN ELEMENTS AND CONSOLIDATION OF SUPPLEMENTAL STATE ENERGY CONSERVATION PLAN.—(a) IN GENERAL.—Section 362(d) of the Energy Policy and Conservation Act (42 U.S.C. 6322(d)) is amended—

(1) by striking paragraphs (3), (4) and (5);

(2) by adding at the end thereof the following new paragraphs:

"(3) programs for financing energy efficiency and renewable energy capital investments, projects, and programs—

"(A) which may include loan programs and performance contracting programs for leveraging of additional public and private sector funds, and programs which allow rebates, grants, or other incentives for the purchase and installation of energy efficiency and renewable energy measures;

"(B) in addition to or in lieu of programs described in subparagraph (A), which may be used in connection with public or nonprofit buildings owned and operated by a State, a political subdivision of a State or an agency or instrumentality of a State, or an organization exempt from taxation under section 501(c)(3) of the Internal Revenue Code of 1986;

"(4) programs to increase transportation energy efficiency, including programs to accelerate the use of alternative transportation fuels for State government vehicles, fleet vehicles, taxis, mass transit and privately owned vehicles;

"(5) programs for encouraging and for carrying out energy audits with respect to buildings and industrial facilities (including industrial processes) within the State;

"(6) programs to promote the adoption of integrated energy plans which provide for—

"(A) periodic evaluation of a State's energy needs, available energy resources (including greater energy efficiency), and energy costs; and

"(B) utilization of reliable energy supplies, including greater energy efficiency, that meet applicable safety, environmental, and policy requirements at the lowest cost;

"(7) programs to promote energy efficiency in residential housing, such as—

"(A) programs for development and promotion of energy efficiency rating systems for newly constructed housing and existing housing so that consumers can compare the energy efficiency of different housing; and

"(B) programs for the adoption of incentives for builders, utilities, and mortgage lenders to build, service, or finance energy efficient housing;

"(8) programs to protect consumers from any unfair or deceptive acts or practices which relate to the implementation of energy efficiency measures and renewable resource energy measures;

"(9) programs to promote energy efficiency as an integral component of economic development programs conducted by State, local or other governmental entities, and energy utilities;

"(10) programs to modify patterns of energy consumption so as to reduce peak demands for energy and improve the efficiency of energy supply systems, including electricity supply systems;

"(11) programs to encourage integrated energy and environmental planning by other State, county, and local governmental agencies and authorities, including regulatory authorities with jurisdiction over energy utilities;

"(12) in accordance with subsection (g), programs to implement the function of the Energy Technology and Engineering Services Program; and

"(13) any other appropriate method or programs to conserve and to promote efficiency in the use of energy.".

(b) ENERGY TECHNOLOGY AND ENGINEERING SERVICES PROGRAM.—Section 362 of the Energy Policy and Conservation Act (42 U.S.C. 6322) is amended by adding at the end thereof the following new subsection:

"(g)(1) The purposes of this subsection are to—

"(A) strengthen State outreach programs to aid small and start-up businesses;

"(B) foster a broader application of engineering principles and techniques to energy technology product development, manufacturing, and commercial production by small and start-up businesses; and

"(C) foster greater assistance to small and start-up businesses in dealing with the Federal Government on energy technology related matters.

"(2) The programs to implement the functions of the Energy Technology and Engineering Services Program, as provided for by subsection (d)(12), shall—

"(A) aid small and start-up businesses in discovering useful and practical information relating to manufacturing and commercial production techniques and costs associated with new energy technologies;

"(B) encourage the application of such information in order to solve energy technology product development and manufacturing problems;

"(C) establish an Energy Technology and Engineering Services Program affiliated with an existing entity in each State;

"(D) coordinate engineers and manufacturers to aid small and start-up businesses in solving specific technical problems and improving the cost effectiveness of methods for manufacturing new energy technologies;

"(E) assist small and start-up businesses in preparing the technical portions of proposals seeking financial assistance for new energy technology development and commercialization; and

"(F) facilitate contract research between university faculty and students and small start-up businesses, in order to improve energy technology product development and independent quality control testing.

"(3) Each State energy technology and engineering services program shall develop and maintain a data base of engineering and scientific experts in energy technology development and commercialization interested in participating in the service. Such data base shall, at a minimum, include faculty of institutions of higher education, retired manufacturing experts, and national laboratory personnel.

"(4) The services provided by the energy technology and engineering services program established under this section shall be available to any small or start-up business. Such service programs shall charge fees which are affordable to a party eligible for assistance, which shall be determined by examining factors including (A) the costs of the services received; (B) the need of the recipient for the services; and (C) the ability of the recipient to pay for the services.

"(5) For the purposes of this subsection, the term—

"(A) 'institution of higher education' has the same meaning as such term is defined in section 1201(a) of the Higher Education Act of 1965 (20 U.S.C. 1141(a));

"(B) 'small business' means a private firm that does not exceed the numerical size standard promulgated by the Small Business Administration under section 3(a) of the Small Business Act (15 U.S.C. 632) for the Standard Industrial Classification (SIC) codes designated by the Secretary of Energy;

"(C) 'start-up business' means a small business which has been in existence for 5 years or less.".

(c) AMENDMENTS TO DEFINITIONS.—Section 366(4) of the Energy Policy and Conservation Act is amended—

(1) by striking "building or industrial" and inserting in lieu thereof "building, building system, energy consuming device associated with the building, or industrial"; and

(2) by striking "the date of enactment of the Energy Conservation and Production Act" and inserting in lieu thereof "May 1, 1989".

(d) ELIMINATION OF SUPPLEMENTAL STATE ENERGY CONSERVATION PLANS.—Section 367 of the Energy Policy and Conservation Act (42 U.S.C. 6327) is repealed.

SEC. 6. ADDITIONAL CONDITIONS FOR FEDERAL ASSISTANCE.—(a) Section 363(b) of the Energy Policy and Conservation Act (42 U.S.C. 6323(b)) is amended by adding new paragraphs (4) and (5) as follows:

"(4) In fiscal years 1991 and 1992, the percentage of available Federal financial assistance provided a State under this part shall be equal to the percentage the State received in fiscal year 1990 of the aggregate financial assistance by all States under this part and under section 506 of the National Energy Extension Service Act (42 U.S.C. 7005(i)).

"(5) The Secretary shall by rule establish the formula for the allocations of financial assistance after fiscal year 1992 on the basis of population and other factors the Secretary deems appropriate.".

(b) Section 363 of the Energy Policy and Conservation Act (42 U.S.C. 6322) is amended by adding at the end thereof the following new subsections:

"(d) In order for any State energy conservation plan to be eligible for Federal assistance under this section, the State must submit to the Secretary a supplementary contingency plan pursuant to section 362(c)(8) governing emergencies within such State. The contingency plan shall include an implementation strategy or strategies (including regional coordination) for dealing with such energy emergencies. The submission of such plan to the Secretary shall be for informational purposes only.

"(e) The Secretary shall establish policies and procedures designed to assure that Federal financial assistance under this part, the Weatherization Assistance for Low-Income Persons Program under part A of title IV of the Energy Conservation and Production Act (42 U.S.C. 6861, et seq.), and the Energy Conservation Program for Schools and Hospitals under part G of this Act (42 U.S.C. 6371, et seq.), will be used only to supplement, and not be used to supplant, State and local, to the extent practicable, to increase the amount of such funds that otherwise would be available, in the absence of such Federal financial assistance, for those programs set forth in the State energy conservation plan approved pursuant to subsection (b).".

SEC. 7. STATE ENERGY ADVISORY BOARD.—Section 365 of the Energy Policy and Conservation Act (42 U.S.C. 6325) is amended by adding at the end the following:

"(g)(1) There is hereby established within the Department of Energy a State Energy Advisory Board (hereafter in this subsection referred to as the 'Board') which shall consist of not less than 18 nor more than 21 members appointed by the Secretary. Not less than eight of the members of the Board shall be persons who serve as directors of the State agency, or a division of such agency, responsible for developing State energy conservation plans pursuant to section 362. Not less than four members shall be directors of State or local Low Income Weatherization Assistance Programs. Other members shall

be appointed from persons who have experience in energy efficiency or renewable energy programs for the private sector, consumer interest groups, utilities, public utility commissions, educational institutions, financial institutions, or research institutions. A majority of the members of the State Energy Advisory Board shall be State employees.

"(2) The Board shall—

"(A) make recommendations with respect to the energy efficiency objectives of the programs carried out under part G of this title, and under part A of title IV of the Energy Conservation and Production Act to the Assistant Secretary for Conservation and Renewable Energy, the Director of the Office of State and Local Assistance Programs, and the Director of the Building and Community Systems Office within the Department of Energy;

"(B) serve as a liaison between the States and such Department on energy efficiency and renewable energy resource programs;

"(C) recommend changes to State and Federal energy policies;

"(D) review State energy conservation plans and the implementation of State energy conservation programs for the purpose of making recommendations to the Secretary regarding programmatic and administrative policies designed to strengthen the programs and improve their effectiveness;

"(E) review implementation by the States, of the Low-Income Weatherization Program and evaluate the performance of such States for the purpose of making recommendations to the Secretary regarding programmatic and administrative policies designed to strengthen the programs and improve their effectiveness, including actions that should be considered to provide non-Federal resources, including private resources, to supplement Federal financial assistance; and

"(F) encourage technology transfer of the results of research and development activities carried out by the Federal Government with respect to energy efficiency and renewable energy resources.

"(3) The Secretary shall designate 1 member to serve as its chairman, 1 member to serve as its vice-chairman, and 1 member to serve as its secretary, who shall serve in those offices no longer than 2 years.

"(4) The Secretary shall provide the Board with such services and facilities as may be necessary for the performance of its functions.

"(5) The Board shall be nonpartisan.

"(6) The Board may adopt administrative rules and procedures.

"(7) Consistent with Federal regulations, the Secretary shall reimburse members of the Board for expenses (including travel expenses) necessarily incurred by them in the performance of their duties.

"(8) The Board shall meet at least three times per year and shall submit an annual report to the Secretary and the Congress on the activities carried out by the Board in the previous fiscal year, including any recommendations it may have for administrative or legislative changes.".

SEC. 8. UPDATE OF ENERGY CONSERVATION PROGRAM FOR SCHOOLS AND HOSPITALS.—(a) NON-FEDERAL SHARE OF A PROJECT.—Section 396(b)(1) of the Energy Policy and Conservation Act (42 U.S.C. 6371e(b)(1)) is amended by adding at the end thereof the following: "The non-Federal share of the costs of any such energy conservation project may be provided by using programs of innovative financing for energy conservation projects, including loan programs and performance contracting even if clear title to the equipment does not pass to the school or hospital until after the grant is completed.".

(b) AMENDMENTS TO DEFINITIONS.—

(1) Section 391(1) of such Act (42 U.S.C. 6371(8)) is amended by striking "April 20, 1977" and inserting in lieu thereof "May 1, 1989".

(2) Section 391(8) of such Act (42 U.S.C. 6371(8)) is amended by inserting the words "administrative facilities," after the word "dormitories,".

(c) ADDITIONAL LIMITATION.—Redesignate section 396(d) of such Act as subsection (d)(1) and add the following new paragraphs (2) and (3):

"(2) A State may utilize up to 100 percent of the funds provided under this part for technical assistance, except that—

"(A) not more than 15 percent of the aggregate funds used by the State to provide technical assistance and for implementation of energy conservation measures pursuant to schools and hospitals programs may be expended for such technical assistance; and

"(B) administration of schools and hospitals activities by such State shall be in accordance with applicable regulations.

"(3)(A) If (i) a State has adopted a State plan in accordance with section 394, the administration of which is in accordance with applicable regulations, and (ii) the State annually certifies to the Secretary that the Federal funds expended for schools' and hospitals' activities by such State are less than 15 percent of the aggregate funds used by the State for the implementation of energy conservation measures pursuant to the schools' and hospitals' programs, then—

"(B)(i) The limitations of paragraph (2) shall not apply to the State schools and hospitals programs under this part, (ii) the State may utilize up to 100 percent of the funds provided under this part for program and technical assistance and up to 50 percent of the funds provided under this part for marketing and other costs associated with leveraging of other non-Federal funds for technical assistance and energy conservation measures under this program, and (iii) the State may administer a continuous and consecutive application and award procedure for providing technical assistance under this part, in accordance with regulations established by the Secretary for this purpose.".

(d) REPEAL OF EDUCATIONAL AGENCY EXCLUSION.—Section 396(e) of the Energy Policy and Conservation Act (42 U.S.C. 6371e(e)) is repealed.

SEC. 9. WEATHERIZATION ASSISTANCE FOR LOW-INCOME PERSONS.—(a) COOLING WEATHERIZATION MATERIALS.—Section 412(9) of the Energy Conservation and Production Act (42 U.S.C. 6862(9)) is amended by deleting "and" at the end of subparagraph (F), redesignating subparagraph (G) as subparagraph (H), and adding the following new subparagraph:

"(G)(i) subject to clause (ii), cooling efficiency modifications including, but not limited to, replacement air-conditioners, ventilation equipment, screening, window films, and shading devices; and

"(ii) the Secretary shall establish criteria for use by States to determine cooling efficiency modifications that qualify for financial assistance as consistent with the purposes of this part; and".

(b) Section 413(b)(2) of such act is amended by—

(1) deleting "and" at the end of paragraph (A);

(2) amending paragraph (B) to read as follows:

"(B) provide guidance to the States in the implementation of this part, including guidance designed to insure that a State establishes (i) procedures to assure that tenants paying for energy as a portion of their rent shall enjoy the protection that paragraph (5) provides, and (ii) a process for monitoring compliance with its obligations pursuant to this part, and"

(3) adding a new paragraph (C) as follows:

"(C) designed to (i) secure the purposes of the Federal investment pursuant to this part, and (ii) address the issues of eviction and sale.".

(c) Section 413(b) of such Act is amended by adding new paragraphs as follows:

"(5) Where the dwelling consists of a rental unit or rental units, the State, in the implementation of this part, shall insure that—

"(A) the benefits of weatherization assistance in connection with such leased units, including units where the tenants pay for their energy through their rent, will accrue primarily to the low-income tenants residing in such units;

"(B) for a reasonable period of time after weatherization work has been completed on a dwelling containing a unit occupied by an eligible household, the tenants in that unit (including households paying for their energy through their rent) will not be subjected to rent increases unless those increases are demonstrably related to matters other than the weatherization work performed; and

"(C) no undue or excessive enhancement will occur to the value of such dwelling units.

"(6) The regulation promulgated pursuant to paragraph (2) shall authorize States to require financial participation from owners of multifamily buildings where weatherization services are being provided.".

(d) REVISION OF ALLOCATION FORMULA.—Section 414 of the Energy Conservation and Production Act is amended—

(1) by adding at the end of subparagraph (C) of subsection (a) before the period; "and their potential for energy savings";

(2) by redesignating existing subparagraph (D) as subparagraph (E) and inserting a new subparagraph (D) as follows:

"(D) The cost of heating and cooling.".

(3) by adding a new subsection (c) as follows:

"(c) Effective fiscal year 1991, and annually thereafter, the Secretary shall update the population, climatic, residential energy use, and all other data used in allocating the funds of the Low-Income Weatherization Assistance Program among the States pursuant to section 414(a). Thereafter, the Secretary shall update these data with the most current data available no less than once every year.".

(e)(1) WAIVER OF LIMITATIONS.—Redesignate subsection (a) of section 415 of the Energy Conservation and Production Act (42 U.S.C. 6865(a)) as paragraph (2) and insert after "SEC. 415." and before the redesignated paragraph a paragraph (a)(1), as follows:

"(a)(1) The limitations of paragraph (2) shall not apply to a State weatherization program under this part if the State or area weatherization plan adopted by a State in accordance with subsection (b), in the judgment of the Secretary, after consultation with the State Energy Advisory Committee, includes—

"(A) evaluation procedures which establish priorities for selection of weatheriza-

tion measures based on their cost and contribution to energy efficiency;

"(B) standards to be used by the State to determine whether to invest in individual energy efficiency measures based on a rate of return that will ensure that investment in each measure is an appropriate use of low-income weatherization assistance; and

"(C) energy audit procedures and techniques which measure (i) the energy requirements of individual dwellings; (ii) the rate of return of each conservation investment; and (iii) the interaction between energy efficiency measures".

(2) Amend the redesignated paragraph 415(a)(2), by adding a comma at the end of the last sentence before the period and the following: "except that a State may provide in the plan adopted pursuant to subsection (b) for subgrantees receiving grants in amounts less than $350,000, whom the State has determined require additional financial assistance to effectively implement the administrative requirements established by the Secretary pursuant to this part, to use up to an additional 5 percent of the subgrant made under this part for implementation of such administrative requirements".

(f) DWELLING UNIT LIMITATION.—Section 415(c) of such Act (42 U.S.C. 6865(c)) is amended—

(1) in paragraph (1), by striking "The expenditure" and inserting in lieu thereof "Except as provided in paragraphs (3) and (4), the expenditure"; and

(2) by adding at the end thereof the following new paragraphs:

"(3) Beginning with fiscal year 1990, the $1,600 per dwelling unit limitation provided in paragraph (1) shall be adjusted annually by increasing the limitation amount by an amount equal to the percentage increase in the Consumer Price Index for the previous fiscal year multiplied by the limitation amount for such previous fiscal year. The increase under the preceding sentence for any fiscal year shall not exceed 3 percent.

"(4)(A) In addition to the average per dwelling unit limitation applicable in a State under paragraphs (1) and (3), the Secretary may, upon application by a State, establish an average per dwelling unit limitation for dwelling units in such State—

"(i) which conform to program requirements;

"(ii) which, in addition to any other weatherization modifications, have furnace efficiency modifications made under this part; and

"(iii) for which determination is made pursuant to regulations prescribed by the Secretary that such furnace efficiency modifications are a cost-effective use of funds.

"(B) The average per dwelling unit limitation applicable in a State to units described in subparagraph (A) shall not exceed an amount equal to—

"(i) the amount permitted for the expenditure of financial assistance for labor, weatherization materials, and related matters for dwelling units in such State under paragraphs (1) and (3), plus

"(ii) an amount determined by the Secretary to be the average amount that is appropriate for furnace efficiency modifications of dwelling units of the type assisted under this part in such State.".

(g) NON-FEDERAL FUNDING REQUIREMENT.—Section 414(b)(3) of such Act is amended by deleting "and (B)" and inserting the following:

"(B) for employing Federal financial assistance under this part to increase the portion of low-income weatherization assistance that the State obtains from non-Federal sources, including private sources, and (C)".

(h) ADDITIONAL REPORTING REQUIREMENT.—Section 421 of such Act is amended by adding at the end thereof the following: "Such report shall include information and data furnished by each State on the average costs incurred in weatherization of individual dwelling units.".

(i) REPEAL OF PERFORMANCE FUND.—Section 415(d) of such Act (42 U.S.C. 6865(d)) is repealed.

(j) ESTABLISHMENT OF WEATHERIZATION INCENTIVE FUND.—Section 415 of such Act (42 U.S.C. 6865) is further amended by adding new subsections (d) and (e), as follows:

"(d) Beginning in fiscal year 1992, the Secretary, to the extend provided for in the Appropriations Act, may allocate such funds as are provided in the Low-Income Weatherization Incentive Fund to provide supplementary financial assistance to those States which the Secretary determines have achieved the best performance during the previous fiscal year in achieving the purposes of this part. In making this determination the Secretary shall:

"(1) consult with the State Energy Advisory Board pursuant to section 365(g)(2)(E); and

"(2) give priority to those States which have employed Federal financial assistance under this part to increase the portion of low-income weatherization assistance that the State obtains from non-Federal sources, including private sources.

"(e)(1) Beginning in fiscal year 1991, the Secretary may allocate among the States an equal amount, not to exceed $100,000 per State, of the funds appropriated for the purposes of this part. Such funds shall be available to the States to provide supplementary financial assistance to those subgrantees which the States determine have achieved the best performance during the previous fiscal year in advancing the purposes of this part, except that none of such funds may be used for State administration of this program. In making such determination, States shall give priority to those subgrantees who by rule, law, or administrative and executive action have provided non-Federal resources, including private resources, to supplement Federal financial assistance under this part.

"(2) The regulations promulgated by the Secretary pursuant to section 413(b) shall include guidelines to be used by each State in making the determination under paragraph (1). When promulgating such guidelines the Secretary shall consult with the State Energy Advisory Board pursuant to section 365(g)(2)(E).".

(k) ASSISTANCE FOR UNEMPLOYED PERSONS TRAINING PROGRAM.—The Secretary shall make available to States from available funds up to $300,000 in the aggregate to establish training programs for unemployed persons in low-income weatherization auditing and installation skills.

SEC. 10. SUPPORT FOR TECHNOLOGY APPLICATION.—(a) The Secretary shall establish a low-income home weatherization technology applications project and a State energy conservation technology applications project in the Office of Conservation and Renewable Energy. These projects shall identify and evaluate the technologies, measures, and practices, including energy evaluation instruments, which are most effective in increasing energy efficiency. The projects also shall provide mechanisms for assisting State and local providers in applying improvements to their markets and service areas; including but not limited to, technical papers and manuals, training sessions and direct access to technical specialists.

(b) The low-income home weatherization technology applications project and State energy conservation technology applications project shall conduct specialized research and technical assistance to address the needs of warm weather States in implementing cooling measures and developing audits suitable for warm climates.

(c) In the report pursuant to section 421 of the Energy Policy and Conservation Act, the Secretary shall report on progress in the application of energy efficiency technology measures and management practices, including those for cooling measures, for low-income weatherization and other purposes.

SEC. 11. AUTHORIZATIONS OF APPROPRIATIONS.—(a) STATE PLAN PROGRAM.—Section 365(f) of the Energy Policy and Conservation Act (42 U.S.C. 6324(f)) is amended to read as follows:

"(f) For the purpose of carrying out this part, there are authorized to be appropriated in accordance with section 660 of the Department of Energy Organization Act $25,000,000 for fiscal year 1991, $35,000,000 for fiscal year 1992, and $45,000,000 for fiscal year 1993.".

(b) ENERGY CONSERVATION PROGRAM FOR SCHOOLS AND HOSPITALS.—Section 397 of the Energy Policy and Conservation Act (42 U.S.C. 6371f(a)) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 397. For the purpose of carrying out this part, there are authorized to be appropriated in accordance with section 660 of the Department of Energy Organization Act $40,000,000 for fiscal year 1991, $50,000,000 for fiscal year 1992, and $60,000,000 for fiscal year 1993.".

(c) WEATHERIZATION ASSISTANCE PROGRAM.—Section 422 of the Energy Conservation and Production Act (42 U.S.C. 6872) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 422. (a) There are authorized to be appropriated in accordance with section 660 of the Department of Energy Organization Act for purposes of carrying out the weatherization program under this part other than sections 415 (d) and (e), $200,000,000 for fiscal year 1991 and such sums as may be necessary for 1992 and 1993.

"(b) There are authorized to be appropriated in accordance with section 660 of the Department of Energy Organization Act for purposes of carrying out the weatherization program under sections 415 (d) and (e), $20,000,000 for 1991 and such sums as may be necessary for 1992 and 1993.".

SEC. 12. TERRITORIAL ENERGY ASSISTANCE PROGRAM.—(a)(1) The Secretary of Energy, pursuant to the Federal Nonnuclear Energy Research and Development Policy Act of 1974 (42 U.S.C. 5901, et. seq.), may grant financial assistance to insular area governments to carry out projects to evaluate the feasibility of, develop options for, and encourage the adoption of energy efficiency and renewable energy measures which reduce the dependency of the insular area on imported fuels and improve the quality of life in the insular area.

(2) Any applicant for financial assistance under this section must evidence coordination and cooperation with, and support from, the affected local energy entities in the area with necessary expertise to successfully effectuate the project, including, but not limited to, the local energy agencies and

power authorities, public works departments, the Army Corps of Engineers, the Pacific International Center for High Technology Research, and the Center for Energy and Environmental Research of the University of Puerto Rico.

(3) In determining the amount of financial assistance to be provided for a proposed energy-efficiency or renewable energy measure, the Secretary shall consider—

(A) whether the measure will reduce the relative dependence of the insular area on imported fuels;

(B) the ease and costs of operation and maintenance of any facilities contemplated as a part of the project;

(C) whether the project will rely on the use of conservation measures or indigenous, renewable energy resources that were identified in the 1982 territorial energy assessment or are identified by the Secretary as consistent with the purpose of this section;

(D) whether the measure will contribute significantly to the quality of the environment in the insular area; and

(E) any other factors which the Secretary may determine to be relevant to a particular project or measure.

(4) The Secretary shall require at least 20 percent of the costs of any project under this section to be provided from non-Federal sources. Such cost sharing may be in the form of in-kind services, donated equipment, or any combination thereof.

(b) For the purpose of this section, the term—

(1) "insular area government" means American Samoa Government, Commonwealth of the Northern Mariana Islands, Commonwealth of Puerto Rico, Federated States of Micronesia, Government of Guam, Republic of the Marshall Islands, Republic of Palau, and United States Virgin Islands; and

(2) "1982 territorial energy assessment" means the assessment prepared by the Department of Energy pursuant to the Omnibus Territorial Act. (Public Law 96-597, 94 Stat. 3480; as amended by Public Law 99-213, 97 Stat. 1460).

(c) For each fiscal year, there is hereby authorized to be appropriated for the purposes of this section, $500,000.

The PRESIDING OFFICER. Are there further amendments to the bill? If not, the question is on agreeing to the committee substitute amendment.

The committee substitute amendment was agreed to.

Mr. MITCHELL. Madam President, I move to reconsider the vote by which the committee amendment was agreed to.

Mr. DURENBERGER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. If there be no further amendments to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. MITCHELL. Madam President, I move to reconsider the vote by which the bill was passed.

Mr. DURENBERGER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

STATE DEPARTMENT AUTHORIZATION BILL—UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Madam President, I ask unanimous consent that the majority leader, after consultation with the Republican leader, may proceed to the consideration of Calendar Order No. 421, H.R. 3792, the State Department authorization bill at any time on Monday, January 29; that the bill be considered under a 1-hour time limitation with the time equally divided and controlled between Senators PELL and HELMS or their designees; that no amendments or motions to commit be in order; and that a vote on final passage of the bill occur at 5 p.m. on Tuesday, January 30, with rule XII, paragraph 4 having been waived.

Mr. DURENBERGER. Madam President, we have no objection on our side.

The PRESIDING OFFICER. Without objection, it is so ordered.

REMOVAL OF INJUNCTION OF SECRECY—TREATY DOCUMENT NOS. 101-8 AND 101-9

Mr. MITCHELL. Madam President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from the Treaty on the International Registration of Audiovisual Works (Treaty Document No. 101-8) and the Supplementary Protocol to the Tax Convention with the Tunisian Republic (Treaty Document No. 101-9), transmitted to the Senate January 24 by the President.

I also ask that the treaties be considered as having been read the first time; that they be referred, with accompanying papers, to the Committee on Foreign Relations and ordered to be printed; and that the President's messages be printed in the RECORD.

The PRESIDING OFFICER. Is there objection?

Mr. DURENBERGER. There is no objection on the Republican side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The messages of the President are as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Treaty on the International Registration of Audiovisual Works done at Geneva on April 20, 1989. I also transmit, for the information of the Senate, the report of the Department of State with respect to the Treaty.

The Treaty establishes a multilateral system to facilitate enforcement of rights and to increase legal security concerning audiovisual works in foreign countries and to contribute to the fight against piracy. Essentially, the Treaty is administrative and procedural in nature; it is not a copyright treaty and therefore would not affect substantive national copyright laws. The registration system is voluntary and may be used at the option of the producer of audiovisual works.

As noted in the report of the Department of State, United States ratification of the Treaty would not require any amendments to the copyright laws of the United States or any other implementing legislation.

I recommend that the Senate give early and favorable consideration to the Treaty and give its advice and consent to ratification.

GEORGE BUSH.

THE WHITE HOUSE, *January 24, 1990.*

To the Senate of the United States:

I transmit herewith for Senate advice and consent to ratification the Supplementary Protocol to the Convention between the Government of the United States of America and the Government of the Tunisian Republic for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income, signed at Tunis on October 4, 1989. I also transmit, for the information of the Senate, the report of the Secretary of State.

The supplementary protocol amends the income tax convention with Tunisia that was signed on June 17, 1985, and transmitted to the Senate on March 13, 1986. The subsequent enactment of the Tax Reform Act of 1986 occurred before the Senate could consider the convention. The supplementary protocol amends the convention by incorporating changes in U.S. law enacted in the Tax Reform Act of 1986. Of particular importance are the provisions authorizing imposition of the new U.S. branch tax and limiting the benefits of the convention to residents of the two Contracting States by preventing their diversion to residents of third countries.

I recommend the Senate give early and favorable consideration to the convention and supplementary protocol and give its advice and consent to ratification.

GEORGE BUSH.

THE WHITE HOUSE, *January 24, 1990.*

AUTHORIZATION FOR TESTIMONY AND PRODUCTION OF DOCUMENTS AND REPRESENTATION BY SENATE LEGAL COUNSEL

Mr. MITCHELL. Madam President, on behalf of myself and the distinguished Republican leader, Mr. DOLE, I send to the desk a resolution on authorization of testimony and document production by a Senate employee and representation by the Senate

legal counsel and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 233) to authorize testimony and document production by Senate employee and representation by Senate Legal Counsel in Springfield Terminal Railway Co. v. United Transportation Union, No. 88-0117 P.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. MITCHELL. Mr. President, the plaintiff in this civil action, a railroad seeking to overturn an arbitration award in a railway labor safety dispute, has served deposition subpoenas for testimony and documents on my office and member of my staff named Robert Carolla. Mr. Carolla is a legislative assistant who assists me with transportation and labor issues, among other matters.

During the last Congress, the Senate agreed to Senate Resolution 494, which authorized the Senate legal counsel to represent Senator KERRY and his staff in connection with this same matter, and last session the Senate agreed to Senate Resolution 208, authorizing an employee on Senator KERRY's staff to testify and produce documents at a deposition. Discovery has also been sought in this matter from staff of Members of the House of Representatives, including Representatives SILVIO CONTE of Massachusetts and OLYMPIA SNOWE and JOSEPH BRENNAN of Maine.

This resolution would authorize Mr. Carolla to testify and to produce documents consistently with the court's previous orders in this case and the privileges of the Senate. The resolution provides for representation by the Senate legal counsel to protect the Senate's privileges.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 233) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

S. RES. 233

Whereas, in the case of Springfield Terminal Railway Co. v. United Transportation Union, No. 88-0117 P, pending in the United States District Court for the District of Maine, counsel for the plaintiff has served deposition subpoenas for testimony and the production of documents on the office of Senator George J. Mitchell and Robert J. Carolla, an employee on the staff of Senator Mitchell;

Whereas, pursuant to sections 703(a) and 704(a)(2) of the Ethics in Government Act, 2 U.S.C. §§ 288(b(a) and 288c(a)(2) (1988), the Senate may direct its counsel to defend employees of the Senate with respect to subpoenas directed to them in their official capacity;

Whereas, by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that evidence under the control or in the possession of the Senate is needed for use in any court for the promotion of justice, the Senate will take such action as will promote the ends of justice consistent with the privileges of the Senate: Now, therefore, be it

Resolved, That the Senate Legal Counsel is directed to represent Robert J. Carolla and the Office of Senator George J. Mitchell in connection with discovery in this case.

SEC. 2. That Robert J. Carolla is authorized to testify and to produce records, including telephone records of the Senate Telecommunications Office pertaining to the office of the Senator George J. Mitchell, relevant to the case of Springfield Terminal Railway Co. v. United Transportation Union, except concerning matters for which a privilege should be asserted.

Mr. MITCHELL. Madam President, I move to reconsider the vote by which the resolution was agreed to.

Mr. DURENBERGER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DIRECTING THE SENATE LEGAL COUNSEL TO APPEAR AS AMICUS CURIAE

Mr. MITCHELL. Madam President, I send to the desk a resolution to direct the Senate legal counsel to appear as amicus curiae in the name of the Senate in defense of the constitutionality of the Flag Protection Act of 1989, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 234) to direct the Senate legal counsel to appear as amicus curiae in United States v. Mark J. Haggerty, et al.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. MITCHELL. Mr. President, on November 19, 1989, the Senate agreed to Senate Resolution 213, directing the Senate legal counsel to appear as amicus curiae in United States versus Eichman and two related cases in the U.S. District Court for the District of Columbia. The defendants in those cases, who were charged with violating the Flag Protection Act of 1989, have moved to dismiss the charges against them on the ground that the act is unconstitutional. In light of the fact that the Department of Justice, in the course of advocating a constitutional amendment on the flag, had questioned the legislation's constitutionality under the Supreme Court's recent decision in Texas versus Johnson, the Senate took the precautionary measure of authorizing an appearance as amicus curiae to assure that the act receive a full and unequivocal defense.

The Senate's action appears to have been well taken. Although the Justice Department opposed the defendants' motions to dismiss in these cases, its brief substantially reiterates the position the Department took before Congress in opposing the Flag Protection Act. The Department's brief reserves the right to defend the act before the Supreme Court on the theory that Texas versus Johnson was wrongly decided, but the Congress sought in drafting the statute to assure that the Federal flag law complied with that decision.

The constitutionality of the act has also been challenged in United States versus Haggerty, et al., a case pending in the United States District Court for the Western District of Washington. That case involves seven individuals who are charged with having violated the act in connection with the burning of a U.S. flag that flew over a U.S. post office in Seattle. The defendants in the Seattle case have also moved to dismiss the charges on the ground that the act is unconstitutional. Their brief in support of the motion is virtually identical to the brief filed on behalf of the defendants in the cases pending in the District of Columbia.

It is impossible to predict which challenge to the Flag Protection Act will reach the Supreme Court first through the expedited review procedures provided for in the act. For this reason, and based on the assumption that the Department of Justice will file a brief in the Western District of Washington that is similar to its brief in the District of Columbia, this resolution will authorize the Senate to appear in United States versus Haggerty, et al., as amicus curiae in support of the act's constitutionality.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 234) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

S. RES. 234

Whereas, in the United States v. Mark J. Haggerty, et al., No. CR-89-315R, pending in the United States District Court for the Western District of Washington, the constitutionality of the Flag Protection Act of 1989, Public Law No. 101-131, amending 18 U.S.C. § 700, has been placed in issue;

Whereas, pursuant to sections 703(c), 706(a), and 713(a) of the Ethics in Government Act of 1978, 2 U.S.C. §§ 288b(c), 288e(a), and 288*l* (a) (1988), the Senate may direct its Counsel to appear as amicus curiae in the name of the Senate in any legal action in which the powers and responsibilities of Congress under the Constitution are placed in issue: Now, therefore, be it

Resolved, That the Senate Legal Counsel is directed to appear as amicus curiae in the name of the Senate in United States v. Mark J. Haggerty, et al., in support of the constitutionality of the Flag Protection Act of 1989.

Mr. MITCHELL. Madam President, I move to reconsider the vote by which the resolution was agreed to.

Mr. DURENBERGER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDERS FOR MONDAY

RECESS UNTIL 2 P.M.

MORNING BUSINESS

Mr. MITCHELL. Madam President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 2 p.m. on Monday, January 29, 1990, and that following the time for the two leaders there be a period for morning business until 2:30 p.m., with Senators permitted to speak therein for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

SCHEDULE

Mr. MITCHELL. Madam President, at 2:30 the Senate will resume debate on S. 1630, the clean air bill.

Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE REPUBLICAN PAGES

Mr. DURENBERGER. Madam President, we are always saying hello and goodbye to people around here, so it seems to me. I want to take the occasion this evening to say not only goodbye, bon voyage, but thank you very much to a group of Republican pages who struggled with all of us for the last 5 months, but particularly through the last 3½ very difficult months of 1989, and to say in my experience here in the Senate we have never been as pleased with our association with any young people as we have with Laine Levine, Amy Knorr, Jim McNary, Amy Auckerman, Cara Kristopherson, Katherine Zorn, Peter Maughan, Jane Clayton, and my favorite Minnesotan, Andrea Mack.

RECESS UNTIL 2 P.M., MONDAY, JANUARY 29, 1990

Mr. MITCHELL. Madam President, if the distinguished acting Republican leader has no further business and if no other Senator is seeking recognition, I now ask unanimous consent that the Senate stand in recess, under the previous order, until 2 p.m. on Monday, January 29, 1990.

There being no objection, the Senate, at 5:30 p.m., recessed until Monday, January 29, 1990, at 2 p.m.

NOMINATIONS

Executive nominations received by the Senate January 25, 1990:

DEPARTMENT OF DEFENSE

CHARLES M. HERZFELD, OF NEW JERSEY, TO BE DIRECTOR OF DEFENSE RESEARCH AND ENGINEERING, VICE ROBERT CLIFTON DUNCAN, RESIGNED.

DONALD JAY YOCKEY, OF CALIFORNIA, TO BE DEPUTY UNDER SECRETARY OF DEFENSE FOR ACQUISITION, VICE MILTON L. LOHR, RESIGNED.

DEPARTMENT OF ENERGY

ROBERT H. GENTILE, OF OHIO, TO BE AN ASSISTANT SECRETARY OF ENERGY (FOSSIL ENERGY), VICE JAMES ALLAN WAMPLER, RESIGNED.

DEPARTMENT OF VETERANS AFFAIRS

D'WAYNE GRAY, OF VIRGINIA, TO BE CHIEF BENEFITS DIRECTOR, DEPARTMENT OF VETERANS AFFAIRS, FOR A TERM OF 4 YEARS (NEW POSITION).

U.S. INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

RONALD WILLIAM ROSKENS, OF NEBRASKA, TO BE ADMINISTRATOR OF THE AGENCY FOR INTERNATIONAL DEVELOPMENT, VICE M. ALAN WOODS, DECEASED.

INTER-AMERICAN FOUNDATION

RONALD WILLIAM ROSKENS, OF NEBRASKA, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE INTER-AMERICAN FOUNDATION FOR THE REMAINDER OF THE TERM EXPIRING SEPTEMBER 20, 1992, VICE M. ALAN WOODS, DECEASED.

U.S. INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

C. ANSON FRANKLIN, OF VIRGINIA, TO BE AN ASSISTANT ADMINISTRATOR OF THE AGENCY FOR INTERNATIONAL DEVELOPMENT, VICE THOMAS R. BLANK, RESIGNED.

NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE

THE FOLLOWING-NAMED PERSONS TO BE MEMBERS OF THE NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE FOR THE TERMS INDICATED:

FOR A TERM EXPIRING JULY 19, 1993:

WANDA L. FORBES, OF SOUTH CAROLINA (REAPPOINTMENT).

CHARLES E. REID, OF NEW JERSEY (REAPPOINTMENT).

FOR A TERM EXPIRING JULY 19, 1994:

DANIEL W. CASEY, OF NEW YORK (REAPPOINTMENT).

ELINOR H. SWAIM, OF NORTH CAROLINA (REAPPOINTMENT).

IN THE ARMY

THE FOLLOWING-NAMED OFFICER TO BE PLACED ON THE RETIRED LIST IN THE GRADE INDICATED UNDER THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTION 1370:

To be lieutenant general

LT. GEN. ROBERT J. DONAHUE, [redacted], U.S. ARMY.

THE FOLLOWING-NAMED OFFICER TO BE PLACED ON THE RETIRED LIST IN THE GRADE INDICATED UNDER THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTION 1370:

To be lieutenant general

LT. GEN. FRED HISSONG, JR. [redacted], U.S. ARMY.

THE FOLLOWING-NAMED OFFICERS FOR APPOINTMENT IN THE U.S. ARMY NATIONAL GUARD TO THE GRADE INDICATED, UNDER THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTIONS 593(A), 3385 AND 3392:

To be major general, Adjutant General's Corps

BRIG. GEN. GREGORY P. BARLOW, [redacted]
BRIG. GEN. STANLEY M. HENG, [redacted]

IN THE AIR FORCE

THE FOLLOWING-NAMED OFFICERS FOR APPOINTMENT IN THE U.S. AIR FORCE TO THE GRADE OF BRIGADIER GENERAL UNDER THE PROVISIONS OF SECTION 624, TITLE 10 OF THE UNITED STATES CODE:

COL. JERROLD P. ALLEN, [redacted] REGULAR AIR FORCE.
COL. GEORGE T. BABBITT, JR., [redacted] REGULAR AIR FORCE.
COL. RICHARD C. BETHUREM, [redacted] REGULAR AIR FORCE.
COL. BRUCE J. BOHN, [redacted] REGULAR AIR FORCE.
COL. ROY D. BRIDGES, JR., [redacted] REGULAR AIR FORCE.
COL. JEFFREY G. CLIVER, [redacted] REGULAR AIR FORCE.

WITHDRAWAL

Executive message received January 25, 1990, withdrawing from further Senate consideration the following nomination:

DEPARTMENT OF VETERANS AFFAIRS

D'WAYNE GRAY, OF VIRGINIA, TO BE CHIEF BENEFITS DIRECTOR, DEPARTMENT OF VETERANS AFFAIRS, (NEW POSITION), WHICH WAS SENT TO THE SENATE ON JANUARY 23, 1990.

EXTENSIONS OF REMARKS

MEDICAL WASTE: WHY HOSPITAL AND HEALTH INSURANCE COSTS KEEP SOARING

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. STARK. Mr. Speaker, our constituents wonder why health costs keep soaring—why their health insurance premiums, their hospital bills, and their Medicare taxes keep rising. A big part of the answer is the medical waste caused by hospital overbuilding and competition that actually raises costs and prices.

The following front-page Wall Street Journal article of January 10, 1990, is one of the best descriptions of the problem I have seen.

We all are about to be lobbied by hundreds of hospital administrators from around the Nation who are coming to Washington for their annual convention. I hope each Member could ask those who lobby them for more Medicare money why the taxpayer should pay for such poor business practices.

The article follows:

[From The Wall Street Journal, Jan. 10, 1990]

MEDICAL WASTE: HOSPITAL CONSTRUCTION BOOMS, DRIVING COST OF HEALTH CARE UP

(By Kenneth H. Bacon)

FORT WAYNE, IND.—Frederick Kerr peers into what he calls "the biggest hole in Fort Wayne" and describes the five-story hospital being built there.

Due to open in 1992, the $91.2 million building on the outskirts of town will supplant an aging downtown hospital and offer the newest of equipment and amenities, says Mr. Kerr, the president of Lutheran Hospital. A new hospital would seem to be a welcome addition: It might attract doctors and patients, provide jobs and, many people believe, help bring in industry.

But in fact, many businesses in this industrial city fear that the new hospital will accelerate the health-cost spiral and hamper their ability to compete at home and abroad. They warn that Lutheran's expense of servicing its debt for the hospital will add at least $75 a day to the $750 it currently costs for an average day of care there. And they fear that the city's two other hospitals, seeking to keep up, will undertake costly remodelings and raise their rates, too.

A RIVAL RESPONDS

Sure enough, rooms at Parkview Memorial, the city's biggest hospital, "are going to have to have some of the amenities that the new hospital has. That's just part of the cost of doing business," says Lavon Miller, Parkview's vice president for facilities. "Our doctors are going to have to have a parking lot as close to the building as we can make it. The carpet in the lobby is going to have to be replaced. The patients and physicians demand it."

The fuss in Fort Wayne is anything but unusual. It is a microcosm of a growing debate nationwide. Hospital construction is booming despite anguish over rising health-care costs and despite the fact that far more hospitals have empty beds than waiting lists. Although some hospitals in urban areas, especially New York City, have extremely high occupancy rates, more than one-third of the nation's 947,000 community-hospital beds are empty.

"There is, without a doubt, excess capacity in the system that we can't afford," says Louis Sullivan, the secretary of Health and Human Services.

The cost of completed hospital-construction projects totaled $14.9 billion in 1988, up 17.9% from 1987, according to a survey by Modern Healthcare magazine. And taxpayers are footing much of the bill, primarily through tax-exempt bonds—$11.4 billion of such hospital securities were issued in 1988—and through $5.8 billion of largely unmonitored federal subsidies.

As a group, hospitals are good credit risks. But the combination of low occupancy, attempts to control health-care costs and debt burdens approaching $93,000 a bed has produced a wave of credit-rating reductions on hospital bonds, according to Health Care Investment Analysts Inc., a Baltimore research firm. The ratio between downgrades in ratings and upgrades rose to 12-to-1 last year from 2-to-1 last year from 2-to-1 in 1983, the government calculates.

ADDING SERVICES

Instead of building new facilities, many hospitals are adding services and modernizing as a marketing strategy to attract patients from competing institutions. But in the health business, unlike most others, competition drives prices up, not down. Research by HCIA finds prices generally higher in competitive, multihospital markets than in single-hospital areas.

"Hospitals don't compete on price; they compete on services," explains Carl Schramm, the president of the Health Insurance Association of America. With occupancy low, "the pure economic response is that you develop things to fill your hospital." Aside from offering new, expensive technology, hospitals have set up centers for diet control, sports medicine, drug and alcohol treatment and psychiatry to attract patients to empty beds.

But the cost of excess capacity goes beyond higher prices. "More capacity to provide more services . . . simply raises volume and expenditures," contends Rep. Fortney Stark, a California Democratic who heads a House Ways and Means health subcommittee. "Therefore, the high rate of excess capacity in beds and services leads directly to unnecessary admissions and procedures."

He adds: "there's nobody in the American Hospital Association whose mother has ever told him that enough is enough."

The cost of this kind of competition is at the heart of the debate in Fort Wayne. The Northern Indiana Business Group on Health, a coalition of 16 companies employing 32,000 workers in the Fort Wayne metropolitan area of 300,000 people, unsuccessfully challenged Lutheran's project, in a public statement, as "inadvisable at this time." The coalition, which includes Lincoln National Corp., the large insurance company based here, and units of General Electric, General Motors and Motorola, argues that, to hold down costs, the area's three hospitals—Lutheran, Parkview and St. Joseph Medical Center—should instead be reducing duplicative services.

In this case, Lutheran Hospital isn't expanding. It currently operates 447 beds and bassinets; the new hospital will have 390. At its old facility, Lutheran will continue to operate 57 psychiatric and drug an alcohol treatment beds and run a senior service center. And at 77.3%, Lutheran's occupancy rate is well above the national average. But Mr. Kerr says he hopes that the new facility will help Lutheran expand its market share by drawing patients from competing in local hospitals.

Costly competition already plagues Fort Wayne. Parkview, with 632 beds and an occupancy rate of 68.8%, recently opened a $9 million maternity wing with a neonatal center and 40 birthing units, where a woman stays in one room for labor, delivery and recovery.

Everybody agrees that this is the newest, largest maternity center in Fort Wayne, but Lutheran's Mr. Kerr boasts that "we did renovating on our existing space to beat them to the punch with single-room birthing." Actually, St. Joseph's was first with single-room birthing, says John Farrell, the chief operating officer at the city's smallest hospital, with 328 beds and an occupancy rate of 47.4%. "We had it before they did; we just didn't market it," he says, And with the new competition expected from Parkview, "I'm redoing mine a little right now—$300,000 to $400,000 facelift," he adds.

COMPETITION IN MACHINERY

Fort Wayne's hospitals compete in other apparently redundant ways. All three perform open-heart surgery and operate magnetic-resonance imaging machines, which cost more than $1 million apiece. Two have lithotripter machines (Lutheran's cost $850,000), which destroy gall and kidney stones without surgery.

Competition also involves expanding to new locations. St. Joseph's started by opening a medical office building in a high-growth area several miles north of its downtown location. Lutheran has also opened, on the site of its new hospital, a new office building with an active outpatient surgery center. So far, Parkview hasn't branched out from its extensive campus, but Mr. Miller is thinking about it. A big map in his office shows possible satellite locations near suburban highway intersections. Such facilities may be necessary to promote "bonding" with Parkview's doctors, he says.

"It's an extremely competitive town in terms of health care." St. Joseph's Mr. Farrell explains, with the competition centering on services and location. "We have found that there's not a lot of price sensitivity here," he says.

That may be changing, both here and around the nation. Fort Wayne businesses

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

are beginning to negotiate with hospitals and doctors for price breaks. The Northeast Indiana Business Group is working to set up a purchase plan that should increase companies' bargaining power. One company in the group complains that the cost of an average hospital stay for its employees rose 35% between 1986 and 1988.

Nationally, the number of hospital beds is shrinking, but not fast enough. "I don't think anybody anticipated the tremendous diversification of services" that have attracted new patients and helped hospitals postpone the pressures to close that they would otherwise feel from falling hospital admissions and shorter lengths of stay, says Daniel Dragalin, Prudential Insurance Co.'s vice president for medical services. "But I think we're going to go through a period of pain."

FEDERAL FINANCING PROGRAMS

The current building boom is very much a product of the enactment of Medicare for the elderly and Medicaid for the poor nearly 25 years ago. The new coverage provided a steady flow of federal funds to hospitals. In addition, Medicare agreed to reimburse hospitals for reasonable capital costs incurred to provide care to the elderly. With guaranteed federal funding, hospitals could easily borrow money.

Before Medicare, hospitals raised most of their money through charitable contributions. "An ethic of penurious management of resources pervaded most hospitals," according to a study by Mr. Schramm and George Pillari, HCIA's president. "Because the sources of capital in the past were individual contributors, the hospital was careful in developing building plans, erecting only physical plant that appeared necessary at the time." But the switch to public financing made it easier to finance expansion and led to overcapitalization in the industry, they argue.

Medicare reimburses hospitals for part of their capital costs on a pass-through basis. The money can support expenditures ranging from the purchase of magnetic-resonance imaging machines to construction of parking garages; Medicare doesn't try to determine whether the projects are necessary to provide medical services in a particular area.

The program bases capital payments on the percentage of a hospital's patients on Medicare rather than on its occupancy rate. So, a hospital with an occupancy rate of only 40% but with 80% of its patients on Medicare can get a larger reimbursement on a given investment than a hospital with an 80% occupancy rate but only 40% of its patients on Medicare.

In 1991, however, the government is scheduled to link reimbursements more closely to the services that hospitals actually provide Medicare patients—a move expected to reduce the capital subsidies and perhaps slow the building binge.

Parkview's Mr. Miller believes that with both government and business fighting to hold down health-care costs, the demand for Fort Wayne's nearly 1,400 hospital beds is likely to fall further. "We'll probably need half the beds we currently have by the year 2000," he says. "We could probably get by with two hospitals."

CONGRESS NEEDS TO ENACT CAMPAIGN-FINANCE LEGISLATION

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. MAZZOLI. Mr. Speaker, I disagree with Mr. Van Dyk and Fortune's editors and headline writers on the headline on this article.

I do not feel current campaign practices have corrupted Washington, but these practices desperately need to be reformed.

Because of Mr. Van Dyk's lengthy experience in Washington and in political campaigns—and despite the rather sensational headline—I feel his recommendations on how to correct election and campaign abuses deserve to be placed in the RECORD for our colleagues and readers to ponder.

[From Fortune, Dec. 18, 1989]

HOW TO END WASHINGTON CORRUPTION

(By Ted Van Dyk)

In almost 30 years of working in Washington politics, I've not seen a time when the process has been shallower or when fewer people involved have been truly interested in the substance of national policy. When I first came to Washington, cash-in-the-envelope was the normal form of corruption, but somehow the system still worked: Strong leadership and big ideas dominated. Today, and despite ongoing scandals like those surrounding the Department of Housing and Urban Development and certain S&Ls, there is probably less corruption of the old kind. Even so, the political system does not work anymore. The political parties and senior congressional leaders have lost their traditional mediating, consensus-forming roles. Special interests and their money have taken their place.

Politicians seeking election or reelection ignore these powerful groups at their peril. In 1990, campaigns in big states like New Jersey or Illinois could cost at least $10 million each. Candidates can raise that sort of money only by allocating a stunning percentage of their time and energy to the care and feeding of political action committees and of individual fund raisers who can shake the maximum allowable $1,000 contributions from hundreds of individuals.

A candidate's other daily preoccupation is to improve his or her current status with muscular constituencies that live and die with "vertical" issues such as abortion, flag desecration, school prayer, steel and textile import quotas, or the continuance of federal contracts or installations. The candidate is unconcerned with more important "horizontal" issues such as national economic growth or East-West relations. This also explains the unwillingness of both the White House and Congress to attack federal budget deficits with either tax increases or spending cuts—measures that might offend powerful groups or donors.

Then there is the matter of how political money, once raised, is spent. In most campaigns well over half goes to television commercials. Other large chunks go to pollsters and professional consultants. In earlier years these things were a part of any national or other campaign, but they were a small part. Campaigns were mostly driven by the views of the candidates. Those views sometimes came from reasoned consideration, at other times from least-common-denominator pandering to opinion. But they did not come from sources that forge the campaign "positions" of most candidates today, namely tracking polls, focus groups, or the notions of professional consultants who, outside their narrow technical spheres, are essentially know-nothings.

The first national campaign in which I played any serious role was the 1964 Johnson-Humphrey triumph over Senator Barry Goldwater. I worked as a campaign aide to Humphrey, for whom I later wrote speeches. Lyndon Johnson won overwhelmingly, in part because of a manipulative national media campaign that falsely characterized Goldwater as someone who would risk nuclear war, destroy Social Security, and expand the war in Vietnam (the last mentioned being something that Johnson did immediately after he was reelected President). The media campaign was effective. But also, in an election that would have been won under any circumstance, it degraded the process and set a precedent for the low-level demagoguery we've seen in many campaigns since, including last year's Bush-Dukakis contest and the campaigns this fall in New Jersey, Virginia, and New York City. I'm ashamed now of what in 1964 I thought was clever.

Many people of integrity still battle to serve the larger public interest. But we can't depend on them to save us—we need to fix the system in which they work. Here are some proposed changes:

(1) Put limits on campaign spending: Total spending in federal races should be capped at least 50% below 1988 levels, when congressional elections cost a total of nearly $500 million. Spending limits also would allow nonincumbent challengers a chance to unseat incumbents armed with enormous campaign kitties.

(2) Eliminate PACs: There's much pious talk about political action committees being vehicles for democratic expression. They are not. For the most part, PACs are blunt-force objects intended to pry policy objectives out of the candidates who take their money. Candidates bully PACs too.

(3) Raise limits on individual spending: To fill the gap now occupied by PAC money, let individuals give up to $20,000 each instead of the present $1,000. Require them to report it publicly and to give through their party rather than directly to individual candidates.

(4) Give power back to the parties: If all political campaign money indeed were channeled through the two major parties, they would regain some of their lost power and thus their ability to create consensus on difficult but vital issues such as deficit reduction. This also would enable party leaders to apply discipline to legislators who now are able to thumb their noses because they owe nothing to their parties.

(5) Make broadcast time free: The nation's television stations, which use the airways courtesy of public license, should provide free time to Democratic and Republican nominees in all federal and gubernatorial races. This alone would cut present campaign budgets in half. In primary races, free time should be allocated to joint appearances by all candidates.

(6) Stop TV spots: In return for free air time, the candidates would have to pledge not to use professionally produced commercials. They'd have to appear in person and tell us who they were and where they wanted to take us. Candidates would think twice about throwing wild charges or misstating the facts. Commercials featuring

third parties or voice-overs lie easily; candidates appearing live lie more dangerously because the media are apt to nail them.

(7) Squeeze out the consultants: If slick, professionally produced TV commercials were outlawed, most of the consultants would find their income base so jeopardized they'd have to resort to less lucrative work. I've known most of them over the years. A few are honorable people; the majority are shallow hustlers.

(8) Make the presidential nominating process more rational: All the abuses that are crippling House and Senate politics are also damaging presidential politics. Two things would go furthest toward making the nominating process rational and fair. First, remove the tyranny of early states such as Iowa, where a few hundred activists dominate the process. Instead, we need a series of four or five regional primaries. This would expose candidates' views on issues of national concern rather than focusing on single-state issues, which often happens now. Second, set aside 33% of the two parties' total convention delegate votes to be used by unpledged elected and party officials able to bring independent judgment to the nominating process.

SUPPORT H.R. 2712—TO PROVIDE STATUTORY AUTHORITY TO PROTECT THE CHINESE STUDENTS IN THE UNITED STATES

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. MACHTLEY. Mr. Speaker, yesterday, we voted on the question of overriding the President's veto of H.R. 2712, legislation to provide statutory authority to protect Chinese nationals studying here in the United States. There are many reasons I felt it was important to support the override.

Some will argue that the President's directive offers equally as much protection as that offered under H.R. 2712, legislation Congresswoman PELOSI has sponsored—and of which I am a cosponsor. This may be true from the administration's mine, or my neighbor's point of view. But, then again, we are not the people who would be most affected by this decision.

I am not threatened with return to a country whose leadership conducted a bloody massacre against my friends and countrymen; nor am I troubled with the threat of an unfair trial, and the potential of my summary execution at the hands of the government; nor am I threatened with reprisals against family members abroad who have been forced to write letters condemning me as an incendiary or a revolutionary.

The answer to the question of who is most affected by a decision on whether or not to override the President's veto is obvious—it is the Chinese students themselves. And it is them who I think we should most closely listen to as we make decisions for their futures, and formulate policy responses to their concerns.

That message made clear, I ask you to listen to the following excerpt from a letter drafted by a group of Chinese nationals studying in the United States. They write:

We are extremely afraid of our security if we were forced to return to China. Because most of us have either participated or been actively involved in a wide range of peaceful activities to support the pro-democracy movement in China. The Chinese fascist regime has vowed to persecute those who dare to call for democracy, freedom and human rights. We have certainly met the standard of "well founded fear of persecution" if we were forced to return to China . . .

Therefore, we beg you to pass legislation to eliminate our fears . . . We believe that if the visa status of the 40,000 well-educated Chinese students and scholars can not be resolved legislatively, then the majority of them will either apply for political asylum with the INS whose administrative functions will be heavily burdened by the increased case load, or others who fear for reprisals against their families in China due to their filing of asylum applications in the U.S. will simply stay here and become "illegals" who cannot perform their qualified functions and would be a waste to society as a whole.

And I am pleased that the vast majority of the House of Representatives joined me in making this message heard by voting to override the veto of H.R. 2712, and to provide the Chinese students with the legislative remedy they have called for.

NEWSLETTER AND SURVEY ON THE FEDERAL BUDGET DEFICIT

HON. ANTHONY C. BEILENSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. BEILENSON. Mr. Speaker, I would like to share with our colleagues a newsletter on the Federal budget deficit that I wrote for my constituents last fall, and the results of the questionnaire I sent to them as a followup.

I was personally encouraged by the response to both the newsletter and the questionnaire. After the newsletter was sent, we received a great many letters, phone calls, and comments at community meetings from constituents expressing their grave concerns about the deficit as well as their willingness to accept unpopular spending cuts and tax increases to bring this problem under control.

The response to the questionnaire, sent to over 200,000 households of voters, was even more gratifying. We received over 8,000 responses—most of which were filled out by two persons—to this rather time-consuming survey. In both part I, "General Spending Priorities," and part II, "Specific Choices for Reducing the Deficit," the respondents showed strong support for cutting defense spending and raising taxes—the two principal ways available to reduce the deficit.

Seventy-seven percent of the respondents believe that the Federal Government should spend less on defense, and a majority believe we should spend more on assistance to the poor, on public investment and infrastructure, and on environmental protection. Near majorities also want more spending on benefits for the elderly and on law enforcement. But, importantly, by nearly 2 to 1, these voters are willing to pay more taxes to fund increases in these programs.

Asked to choose among specific options for reducing the deficit over the next 5 years, a majority of the respondents selected enough program cuts—mostly from defense—to cut the 1994 deficit by $52 billion, and enough tax increases to cut that year's deficit by another $47 billion, assuming those measures were enacted now. This response demonstrates the willingness of the voters of the 23d Congressional District of California to accept much greater spending cuts and tax increases than President Bush or Congress have thus far been willing to support.

The newsletter and questionnaire follow:

SPECIAL REPORT: THE FEDERAL BUDGET DEFICIT—SEPTEMBER 1989

(BY CONGRESSMAN ANTHONY C. BEILENSON)

OUR NATION'S MASSIVE BORROWING IS DRAINING OUR RESOURCES AND MORTGAGING OUR CHILDREN'S FUTURE

The federal government's rapidly growing mountain of debt, caused by our enormous annual budget deficits, continues to be the most serious and threatening problem facing our nation.

This report is the first of two newsletters I am devoting entirely to the subject of the budget. It discusses why the U.S. government's debt grew so dramatically, how our annual deficits are hurting the U.S. economy and our international position, and what the obstacles are to dealing seriously and realistically with our budget problem. My next newsletter will be a questionnaire giving you the opportunity to choose what steps you personally would support to reduce to deficit.

Why so much attention to this one issue? Because the threat that these deficits pose to our nation's economic health profoundly influences every decision the President and Congress make about every other issue. Until we bring these deficits under control, our options for dealing with every other national problem are severely limited—we can't even begin to adequately address the drug crisis, homelessness, gaps in our health care system or any of the other major social problems that virtually everyone agrees we should be confronting. Defense policies, too, will continue to be shaped more by budget pressures than by an objective evaluation of our national security needs.

PILING UP THE NATIONAL DEBT

Budget deficits are not something new; the federal government has spent more money than it has taken in almost every year since World War II. But the deficits after 1981 have averaged $180 billion a year—nearly three times the size of the largest single deficit prior to 1981. And, these deficits have occurred at a time when the government has had no legitimate reason to borrow so heavily: our nation has been at peace and, for the last seven years, enjoying what has become the longest economic expansion of the post-World War II period.

As a result of these huge recent deficits, our national debt has soared from $930 billion in 1981 to $2.8 trillion today. In the eight years of Ronald Reagan's presidency, we tripled the total amount of debt that had been accumulated during the previous two hundred years of U.S. history, from the beginning of George Washington's presidency to the end of Jimmy Carter's.

This year, American taxpayers will pay $169 billion—about 15% of the federal budget—just to finance the debt. That means that 15% of the money the federal government spends this year won't be used to defend our country or pay Social Security checks or fight drug abuse, crime, or illiteracy; it will be used simply to make interest payments to people—a growing number of whom are not Americans—who have loaned the U.S. government money to finance this deficit spending.

HOW DID THE DEFICITS GET OUT OF HAND?

In the late 1970's, the federal government was incurring what then seemed like very large deficits—$40 to $73 billion a year. But the deficits soared far above those levels in the early 1980's, after we slashed individual and corporate income taxes and at the same time dramatically increased defense spending.

Those tax cuts, which were the cornerstone of President Reagan's "supply-side" economic policy, have been by far the largest contributor to our deficit problem. Although some of the revenues we lost initially were made up later. Treasury figures show that tax reductions made during the 1980's have resulted in a net loss of $202 billion in revenues this year alone—far more than enough to cover this year's deficit.

Congress cut domestic programs substantially in the early 1980's and has maintained lower levels of spending in that area ever since, but those cuts have been far outweighed by the immense loss of revenues, the simultaneous increases in defense spending—and the soaring cost of interest payments on the national debt which resulted from these policies.

THE FAILURE OF THE GRAMM-RUDMAN-HOLLINGS ACT

In 1985, when the deficit had passed the $200 billion mark and was projected to go even higher in future years, Congress decided drastic action was needed. Unable to raise revenues because of President Reagan's absolute objection to tax increases, and unwilling to cut domestic programs even more deeply, Congress instead enacted a procedure, known as the Gramm-Rudman-Hollings Act, designed to force the President and Congress to balance the budget over the following five years.

As many of us predicted, that law has not worked. It was supposed to reduce each year's deficit by $36 billion: if Congress didn't cut the deficit through the normal legislative process, then "automatic" spending cuts would do the job for us. But Congress and the Administration have found ways to avoid reducing each year's deficit to the required level without triggering the automatic cuts.

This year's deficit, which the Act had originally promised to reduce to $72 billion, will instead be about $160 billion—higher than it was in 1987 and 1988. The deficit would actually be much higher—about $216 billion—if we didn't count this year's $56 billion in surplus Social Security funds that are supposed to be set aside and saved for retirees in the next century.

Now, four years after we passed a law that was supposed to guarantee a balanced budget in five years, a balanced budget is nowhere in sight.

THE CONSEQUENCES OF LARGE DEFICITS

Because the U.S. has enjoyed modest economic growth with moderate inflation in recent years, the damage these deficits are causing is not yet all that evident to everyone. But they are, in fact, seriously undermining our economy and our well-being.

The government's immense amount of borrowing has pushed up interest rates and is absorbing three-quarters of private savings, depriving our economy of funds that would otherwise be available for investment in plants and equipment that would create new jobs and increase productivity. This low level of investment is reducing our standard of living now, and will continue to do so in the years ahead.

In fact, this current period of economic growth is the first in fifty years in which the average working American's wages, adjusted for inflation, have gone down rather than up. Lower wages, along with higher interest rates, are preventing many young families from buying homes of their own. In contrast to every previous generation of Americans, today's young adults have less promising economic prospects than their parents had.

Our budget deficits are also responsible for our large trade deficits and our huge foreign debt. In the early 1980's, the budget deficits drove up the cost of the dollar and made U.S. exports uncompetitive. U.S. businesses lost overseas markets which may never be regained, along with two million high-paying manufacturing jobs that have probably been lost forever. At the same time, our high interest rates have been a magnet for foreign investors, who are now providing over half of all the funds for investment in the U.S.

The result? Just eight years ago, the U.S. was the world's largest creditor nation. Now we're the largest debtor nation and our foreign debt is growing each year. We used to be a nation that produced more than it consumed; now we consume more than we produce. The U.S. used to drive the world economy by lending money for investment and by exporting our products worldwide; now the situation is reversed—foreign investment and imports are driving our economy.

The most troubling aspect of our deficit problem is the legacy of debt we are leaving to future generations. Our children and grandchildren will be burdened with higher taxes throughout their lives just to pay the interest on the $2 trillion that has been added to our national debt during this decade alone. Leaving so much debt to future generations wouldn't be nearly so inexcusable—and immoral—if we were borrowing in order to make investments in programs and infrastructure that would help increase productivity and improve the quality of life in the future. But that's not the case—we've been borrowing largely for current consumption, to cover the cost of programs and services that benefit us now but which we have not paid for.

To make matters worse, we are leaving future generations of Americans heavily indebted to and dependent upon other nations. Historically, world power and influence have been wielded by creditor nations. Now that we are a debtor nation, the diplomatic and commercial advantages we have been accustomed to having are shifting to West Germany, Japan and other countries that are able to capture markets and buy up businesses and real estate in the U.S. and throughout the world.

Leading economists have warned bluntly: unless we reduce the federal deficit, it will only get worse—there will be an even greater decline in our standard of living and our world power as we become even more indebted to and dependent upon foreign investors.

WHY WE ARE FAILING TO REDUCE THE DEFICIT

The only ways to reduce the deficit are to cut programs or raise taxes, but polls consistently show that a majority of Americans do not want to do either.

Beyond this public resistance, there are other obstacles to cutting the deficit which are evident from a close look at how our federal dollars are spent:

15% of the budget is used to pay interest on the debt. This is a fixed obligation of the U.S. Government that cannot be reduced unless borrowing is reduced.

25% of the budget goes to defense. President Bush wants modest growth in defense, while Congress is more inclined to reduce Pentagon spending. Defense has already been cut in each of the last four years (when measured in inflation-adjusted dollars), so additional cuts are becoming increasingly difficult.

23% of the budget is used for other entitlement programs—such as Medicare, Medicaid, federal military and civilian retirement, and veterans benefits. Because the number of people who become eligible for these programs increases every year, it is extremely difficult to reduce their costs. Also, it's unfair to reduce federal retirement benefits (a large portion of this category) if Social Security benefits are protected from similar reductions.

The remaining 16% of the budget covers everything else—highways and mass transit, science and health research, law enforcement and federal courts and prisons, education and job training, national parks, toxic waste clean-up, air and water pollution control, the space program, immigration and customs services, and more. President Bush proposed cutting some of these programs, too, but most of them were cut drastically during the Reagan years. Also, the individual programs that comprise this category are such tiny fractions of our total budget that further cuts in them can never make a substantial contribution to reducing the deficit.

In addition to the programs the government has already been paying for, there are new demands on the federal purse that we must contend with. The most notable one is the cost of protecting the savings that Americans would otherwise lose through failed savings and loan institutions. President Bush's plan to do this, which Congress recently approved, will probably cost $300 billion or more over the next 30 years.

We are also going to have to pay for cleaning up and modernizing our aging nuclear weapons plants, which is expected to cost between $150 and $200 billion. And, we need to modernize our air traffic control system, which will cost about $25 billion; repair or replace our nation's 240,000 deficient bridges, at a cost of about $50 billion; and clean up hazardous waste sites at military facilities, which will cost $11 to $14 billion.

In addition, there is a virtual consensus among Republicans and Democrats alike on the need to spend more money to fight drug abuse, provide health care for those who lack insurance or need long-term care, help parents with child-care costs, improve education, provide more job training, shelter the homeless, build new prisons and new roads, better address the AIDS crisis, and clean up our environment.

On top of meeting those needs, President Bush and others strongly support building a $30 billion space station and sending a mission to Mars, which would require spending $400 billion over the next 30 years.

SOLVING THE PROBLEM: THE NEED FOR LEADERSHIP

For all of these reasons, it's not going to be possible to reduce the deficit through spending cuts alone. What we need is a sensible combination of spending cuts and tax increases, phased in gradually over the next several years.

For those of us in Congress who believe strongly that we should be paying in full the costs of the programs the government is providing, the last several years have been enormously frustrating. Despite widespread agreement about the need to balance the federal budget, we have repeatedly failed to prevail over the strong political pressure to protect government spending and to avoid raising taxes.

I hate to end on a gloomy note, but the unfortunate truth is that unless the President and Congress decide to give the deficit the serious attention it deserves—and ask the American people to accept the measures needed to solve it—there is little hope for progress on this problem any time soon.

THE 1990 BUDGET: A SQUANDERED OPPORTUNITY

Earlier this year, President Bush and Congress agreed on a budget that is supposed to bring the federal deficit down to $100 billion in 1990, as required by the Gramm-Rudman-Hollings deficit-reduction law. However, that plan contains so many accounting gimmicks that it won't actually reduce the deficit very much at all. Next year's deficit is more likely to be in the $140-$150 billion range.

The use of accounting gimmicks—such as removing programs from the budget or counting on better economic performance than most economists believe possible—is not new. But Congressional Administration negotiators relied on them to a greater extent for the 1990 budget than ever before. Because I believe Congress owes our country a much more serious and realistic response to our deficit problem, I voted against that budget.

Even the negotiators themselves admitted that the plan was full of "blue smoke and mirrors," but they justified it as the best we could do under the circumstances. These circumstances, however, were merely the political considerations that dominated the moment. President Bush and Congressional leaders were eager to show that they could work together in a bi-partisan manner on the budget. At the same time, the President didn't want to renege on his campaign pledges to provide full funding for Social Security, to spend more for certain domestic programs, and—most of all—not to raise taxes. Congress, for its part, wanted to avoid initiating cuts in popular programs or proposing tax increases that the President opposed.

The new spirit of White House-Congressional goodwill is a welcome change from the bickering that characterized the later years of Mr. Reagan's presidency. But, unfortunately, this new mood caused us to squander an important opportunity to make real headway on the deficit. In working together, the President and Congress ended up, helping protect each other's campaign pledges instead of trying to solve our very serious budget problem. Once again, the hard decisions about where to cut spending and how to raise taxes were put off until a future time.

BORROWING FROM SOCIAL SECURITY: THE REAL DEFICIT IS EVEN WORSE

The federal budget deficit will be about $160 billion this year, but if the $56 billion in surplus Social Security funds were not counted, the deficit would be $216 billion. This $216 billion figure is a more accurate gauge of the amount of debt the federal government is actually incurring this year.

When the Social Security system was on the brink of bankruptcy in 1983, President Reagan and Congress worked out a rescue plan that included a long-term, gradual buildup of reserve funds to help pay for retirement benefits for the large "baby boom" generation in the next century.

In theory, it was a good idea. After the year 2010, the number of workers paying into the Social Security system will decline substantially in relation to the number of retirees collecting benefits, so having reserve funds will help avoid raising payroll taxes or cutting retirement benefits at that time.

But in reality, we don't save these surplus Social Security funds; the Treasury borrows them to help pay for other government programs, and gives the Social Security program an IOU. These surpluses are providing an increasing share of the money the Treasury borrows each year, which means that we are gradually relying on them more and more to fund other government programs—and, in the process, creating an enormous long-term liability in the Social Security program. Unless this changes, the generation that follows the baby boomers will have to pay extraordinarily high income taxes to pay back the massive amount of money that was borrowed from the Social Security system—or the government will have to go much more deeply into debt.

Congress is very much aware of the dangers of spending the surplus Social Security trust funds now, and most of us want to set these funds aside for the future, which would not only restore the integrity of the Social Security program, but would also result in honest budgeting.

But, unfortunately, we are going to have a very difficult time wearing ourselves from using Social Security surpluses to disguise the size of the deficits we are running for other government programs. If we can't find the political will to stop borrowing $160 billion a year, how will we ever find the will to stop borrowing $160 billion plus the Social Security surplus?

1989 QUESTIONNAIRE RESULTS

WHAT SHOULD THE GOVERNMENT DO TO REDUCE DEFICITS?

If we don't change our spending and tax policies, the federal government will continue to run huge budget deficits every year, and our current $3 trillion federal debt will soar to even greater heights. In addition to costing hundreds of billions of dollars in interest payments, our nation's massive borrowing will undermine our economic strength and the well-being of future generations of Americans.

But we can't reduce these deficits unless we break the budget stalemate in Washington which is rooted in strong public resistance to both program cuts and tax increases. That is why it is extremely important to me to know your views on how the government spends your tax dollars and how you think we should close the enormous gap between what the government collects in revenues and what it spends.

Part I: General Spending Priorities

First, please indicate your feelings, in general, about whether the federal government currently spends too much, about the right amount, or not enough in each of the following broad categories of the budget:

Budget category	Percent
National defense:	
Too much	77.2
About right amount	19.3
Not enough	3.5
Benefits for the elderly (Social Security, Medicare, federal retirement):	
Too much	9.3
About right amount	42.5
Not enough	48.2
Assistance to the poor (Aid to Families with Dependent Children, Supplemental Security Income, Medicaid, food stamps, public housing):	
Too much	20.5
About right amount	28.6
Not enough	50.9
Public investment and infrastructure (Highways, mass transit, ports and harbors, airports, science and health research, space program, education, etc.):	
Too much	8.3
About right amount	34.9
Not enough	56.8
Environmental protection (National parks and wildlife refuges, air and water pollution control, toxic waste clean-up, etc.):	
Too much	6.3
About right amount	29.3
Not enough	64.4
Law enforcement (Federal courts and prisons, FBI, anti-drug programs and other crime-fighting assistance):	
Too much	14.3
About right amount	38.2
Not enough	47.5
If you checked "not enough" on one or more of the above categories, are you willing to pay more taxes to fund additional spending in those areas?	
Yes	63.0
No	37.0

Part II: Specific Choices for Reducing the Deficit

In this section, please indicate your specific choices for reducing the deficit.

Most of these proposals were compiled by the non-partisan Congressional Budget Office (CBO) in a report to Congress on options for reducing the deficit. CBO did not endorse any of these proposals and was, in fact, careful to point out the pros and cons of each one—as I would have done here if we had more space.

Because most of these proposals save more money or produce more revenue in future years than they do at first, I have listed the amount of deficit-reduction they would produce in 1994—if enacted this year. By necessity, the list does not include every possible option, but it does present most of the choices the President and Congress actually have.

Please check off the boxes to the right of the proposals you would support. If you wish, you may also add up the savings and revenues that your choices would produce, subtract them from the projected 1994 deficit of $128 billion, and see how close you would come to balancing the federal budget five years from now. (The figure of $128 billion is the official CBO projection, but it is quite optimistic—it assumes that there will be neither an economic downturn nor any new federal spending during the next five years. The actual 1994 deficit is therefore likely to be much higher.)

POSSIBLE SPENDING CUTS

[Dollars in billions]

	Savings in 1994	Percent
A. NATIONAL DEFENSE		
1. Eliminate B–2 "Stealth" bomber	$5.0	69.5
2. Limit Strategic Defense Initiative ("Star Wars") to research and development	2.5	76.2
3. Eliminate pay raise for military personnel in one year out of the next five	2.1	34.5
4. Cut weapons procurement:		
a. By 10% over five years	5.4	28.2
b. By 25% over five years	13.1	57.3
5. Cut armed forces operation and maintenance:		
a. By 10% over five years	9.5	37.2
b. By 25% over five years	22.3	41.5

POSSIBLE SPENDING CUTS—Continued

[Dollars in billions]

	Savings in 1994	Percent
6. Reduce the 2.1 million active duty military personnel:		
a. By 10% (210,000 people)	6.2	35.3
b. By 20% (420,000 people)	12.5	46.2
B. SOCIAL SECURITY AND OTHER ENTITLEMENT PROGRAMS		
1. Eliminate cost-of-living increases for one year out of the next five for Social Security, federal retirement, and veterans' compensation recipients	14.7	31.2
2. Raise Medicare beneficiaries' premiums to cover 30% (instead of 25%) of physicians' services	7.6	29.8
3. Freeze Medicare reimbursement rates for hospitals and physicians for one year out of the next five	5.9	51.5
4. End compensation for veterans with low disability ratings (conditions that do not hamper ability to work)	1.7	54.3
5. Cut Aid to Families with Dependent Children and food stamps by 10%	3.0	23.7
C. ALL OTHER DOMESTIC PROGRAMS AND FOREIGN AID		
1. Cancel the NASA Space Station (projected to cost a total of $26 billion)	3.7	33.3
2. End federal subsidies for wastewater treatment plants mandated by Clean Water Act to ensure unpolluted water supplies	1.8	8.0
3. Cut environmental protection programs by 10%	0.6	11.0
4. End postal subsidies for non-profit organizations	0.4	57.8
5. End Small Business Administration loan programs	0.5	27.7
6. Reduce mass transit subsidies by providing only 50%, not 80%, of construction funds, and ending all operating assistance	1.6	29.0
7. End federal subsidies for airport construction	1.6	36.7
8. End funding for arts and humanities	1.1	31.8
9. Reduce National Institutes of Health research (cancer, heart disease, diabetes, AIDS, etc.) by 10%	0.4	8.2
10. End home heating assistance for the poor	1.7	10.8
11. End legal assistance for the poor	0.4	15.3
12. Cut public housing by 10%	0.9	17.5
13. Cut aid to education by 10%	2.0	13.0
14. Cut war-on-drugs funding by 10%	0.7	21.0
15. Eliminate cost-of-living increases for federal employees for one year out of the next five	4.4	50.3
16. Cut foreign aid (economic and military) by 20%	2.8	75.2
17. Cut Congress' expenses (staff, office accounts, mail costs) by 20%	0.2	72.3

POSSIBLE REVENUE INCREASES

[Dollars in billions]

	Revenue gain in 1994	Percent
1. Raise tax rates for individuals taxpayers on income over $200,000 from current 28% to 33%	$15.1	76.3
2. Raise top corporate income tax rate from 34% to 36%	5.6	69.7
3. Tax Social Security payments the same way private pensions are taxed (85%, rather than 50%, of benefits would be counted as taxable income)	25.7	13.8
4. Reduce tax deduction for business meals and entertainment from 80% to 50%	3.7	69.0
5. Tax employer-paid health insurance benefits over $100 (single) or $250 (family) per month	20.5	17.3
6. Impose a 5% national sales tax on all items except food, housing, and health care	84.3	36.0
7. Raise the federal gas tax:		
a. By 10¢ a gallon	10.0	28.0
b. By 20¢ a gallon	20.0	20.3
8. Raise the cigarette tax by 16¢ a pack	2.7	78.5
9. Raise taxes on beer by 47¢ a six-pack, and on wine by 51¢ a bottle	5.0	77.8
10. Impose a 0.5 percent tax on the value of stocks and other securities when they are bought or sold	15.0	53.0

JANUARY IS BIRTH DEFECTS PREVENTION MONTH

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. MICHEL. Mr. Speaker, please join the President, the March of Dimes Birth Defects Foundation, and me in recognizing January as "Birth Defects Prevention Month."

Each year in the United States, about 250,000 infants—1 out of every 14 are born with a birth defect. Because there are more than 3,000 conditions collectively termed birth defects, prevention can not be measured in the total eradication of a single disease. Instead, we must focus on increasing the number of infants born healthy.

The March of Dimes is doing just that through its "Campaign for Healthier Babies." Chapters throughout the Nation are mobilizing community resources and raising public awareness, with the goal of insuring that each new baby will have the best chance for a healthy start in life, beginning with prenatal care for expectant mothers.

I would like to insert into the RECORD the following statement issued by President Bush when he met with the March of Dimes national ambassador earlier this month.

THE WHITE HOUSE,
Washington, DC.

MARCH OF DIMES BIRTH DEFECTS PREVENTION MONTH, JANUARY 1990

As a new decade dawns, the March of Dimes continues to wage an old yet noble battle—the battle to prevent birth defects and the devastating toll they exact in human suffering.

Founded over a half-century ago, the March of Dimes and its hardworking staff members and volunteers have helped make great strides in improving maternal and child health. Prioneering research into the treatment of heart disorders of babies still in the womb and developing effective treatment for infant respiratory distress syndrome are two of the major ways this outstanding organization is saving lives.

Tragically, however, we now face new and more deadly challenges to the health of our children. Drug addiction and the AIDS virus threaten the lives of many. Added to this challenge is the high rate of teenage pregnancy in the United States and the great number of women who receive little or no prenatal care. Much work remains to be done in giving babies a healthier start in life.

I am confident that, with greater public awareness and with the good efforts of organizations like the March of Dimes, we can meet these challenges and give greater care to mothers and their children. As an expression of our commitment to this cause, I urge all Americans to join with Barbara and me in observing January 1990 as March of Dimes Birth Defects Prevention Month.

GEORGE BUSH.

DON RAY'S DEDICATION TO IMPROVEMENT OF CIVIC EDUCATION IN INDIANA

HON. PETER J. VISCLOSKY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. VISCLOSKY. Mr. Speaker, upheaval in Eastern Europe has captivated world attention over the past several months as Eastern bloc countries rally for change and democratic reform. The dismantling of the Berlin Wall, which divided East and West Germany for over 40 years, has provided the most dramatic symbol of the democratic movement. It is my sincere hope that the voices of the Eastern European people will be answered with additional democratic reforms leading to free elections.

In the wake of the remarkable changes in Eastern Europe, I believe it is important to reflect upon the democratic foundations that have nurtured the development of our Nation. The Constitution of the United States has provided the basis for democratic government in this country for over 200 years. We should make a concerted effort to transmit the fundamental principles and values of American democratic institutions to young people in this country.

In this regard, I am pleased to commend the efforts of Don Ray, an educational leader who has volunteered his time to bring the "We the People * * * Bicentennial Programs on the Constitution and the Bill of Rights" to thousands of upper elementary, middle, and high school students in the First Congressional District of Indiana. The curriculum incorporated in the "We the People * * *." program introduces students to the philosophical ideals of our Founding Fathers, the historical background of the Philadelphia Convention, and the issues and debates that influenced the writing of our Constitution. Included in this program are the National Bicentennial Competition, its noncompetitive companion program, Congress and the Constitution, and the National Historical Pictorial Map Contest, all of which are administered in the First Congressional District by Mr. Ray and at the State level by Robert S. Leming.

"We the People * * *" also teaches students about how the American Government is organzied and how it protects the rights and liberties of all U.S. citizens. In addition, students learn the responsibilities which accompany the rights of citizenship in a democracy. It is ironic and troubling that while people in Czechoslovakia and Romania and willing to risk their lives for the right to vote in free elections, only 20 percent of the eligible voters in this country under the age of 30 take advantage of this same right. In addition, many young people in this country do not have a clear understanding of the purpose or appreciate the importance of the American Constitution.

Mr. Ray's efforts to educate students in Indiana are an important step in reversing the disturbing trend of political apathy among our future leaders to one of active and informed participation in America's political process. His dedication to the improvement of civic education in Indiana has been exemplary. I am pleased to express my admiration and appreciation for Don Ray's impressive contributions to the development of competent and responsible citizenship.

CALIFORNIA NURSES CONDEMN HUMAN RIGHTS ABUSES IN CENTRAL AMERICA

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. EDWARDS of California. Mr. Speaker, earlier this month I had the opportunity to meet with members of the California Nurses

Association in San Jose. Like most Americans, they are troubled by the ongoing violence in Central America. Yet, as health care professionals they feel a special obligation to speak out in an effort to bring attention to the suffering in those countries.

Accordingly, the California Nurses Association has passed a resolution condemning the human rights abuses in Central America and declaring its support for organizations engaged in supplying humanitarian aid to this region. The Central American people need to know there are Americans who want to help make a difference in their region, and I commend the members of the association for lending their voices to this effort.

I would like to insert the resolution in the RECORD and I commend it to the attention of my colleagues.

HEALTH RIGHTS IN CENTRAL AMERICA

Whereas, the California Nurses Association has a commitment to human rights and the promotion of health, and

Whereas, the peoples of El Salvador, Honduras, Guatemala, and Nicaragua have experienced and are continuing to experience violations of their human rights and rights to access to adequate health care, and

Whereas, acts of violence against nurses and other health care personnel, the supression of health professionals' organizations, destruction of health care facilities, and kidnapping and murder of patients in violation of internationally recognized principles of the neutrality of health care personnel and institutions by military forces—including those funded, armed, supplied and trained by the U.S. Government—are common in El Salvador, Guatemala, Honduras, and Nicaragua, and

Whereas, nurses have a responsibility as health professionals, and as citizens, to speak out against human rights violations; Therefore be it

Resolved, That the California Nurses Association shall condemn violations of human rights and the neutrality of health care institutions and personnel in Central America, and the role of the U.S. Government in arming, training, and funding many of the violators, and be it further

Resolved, That it shall be the policy of the California Nurses Association to endorse and publicize campaigns, coalitions, groups, and organizations providing material humanitarian aid to the victims of human rights violations in Central America and be it further

Resolved, That the California Nurses Association shall sponsor or co-sponsor a report to the 1990 ANA House of Delegates on U.S. policies in Central America, and be it further

Resolved, That this resolution shall be distributed to all members of the California Congressional delegation, the American Nurses Association, and the other ANA constituent members.

(Passed by the House of Delegates of the California Nurses Association, September 26, 1989)

WHY HEALTH COSTS ARE SO HIGH

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. STARK. Mr. Speaker, our constituents are worried about the soaring cost of health insurance, hospital bills, and Medicare taxes.

Much of the reason for the incredible rate of health inflation is due to waste in the medical sector.

Following is a revealing article from the January 1990 issue of San Francisco Medicine by Dr. Laurens White, former president of the California Medical Association.

Next time a health care provider lobbies us for more money, we should ask them how they explain this kind of insane, cost-inflating business behavior.

WE DON'T NEED ANY MORE RADIATION THERAPY CENTERS

(By Laurens P. White, M.D.)

A large increase in the cost of health care is about to be dropped on the citizens of San Francisco. The long-suffering folks who will pay for this splendor have been offered no opportunity to participate in its development, no chance to say no to its implementation. It is time for San Franciscans to demand some larger role in deciding what forms of health care they wish, and how much they are willing to spend for it.

There is general agreement that the costs of health care are already too high, with health insurance almost unaffordable for many of us. These high costs of insurance/care are resulting in more and more people losing or never getting health insurance, through their work, or on their own. The rapid increase in people with health care needs but with no means to pay for their care is breaking hospitals, especially public and non-profit facilities and emergency services. The desire for health care is insatiable, whether we are insured or not, and all of us want our share, or more than our share.

Most of us are in awe of the new technology in medicine. We take, as a matter of course, heart-lung transplants, renal dialysis, curative therapy of acute leukemia and Hodgkin's Disease, and the beginning of genetic manipulation. We have great respect for Harold Varmus and Mike Bishop at UCSF, even if we don't understand why they so richly and belatedly deserved the Nobel Prize in Medicine. We have not seriously questioned the priorities which have favored research and experimental treatment, such as liver transplants, over adequate pre-natal care for women, especially poor pregnant women. We have allowed the University of California to favor research over patient care, even when we know that failing to fund pre-natal care has wound up costing more in the long run. Caring well for pregnant women lacks the excitement of bone marrow transplants, although it is more effective than transplants. Our priorities are askew.

At this moment Pacific Presbyterian Medical Center is building a radiotherapy center at Clay and Buchannan Streets as the first phase of a planned cancer center. The total cost may be more than $20 million. There are already eight radiation therapy centers in San Francisco, all seriously underutilized. Three of them (Children's, Mount Zion and Saint Francis) are within 15 blocks of PPMC; two others, (St Mary's and Letterman) are just a few blocks further; and the other three (Davies, UCSF and Seaton) still further in this small city. A ninth radiation therapy treatment center is just what we don't need, as it will fill no needs of the people of San Francisco, but if PPMC's marketing plans are correct, it will attract new patients.

Not to be outdone, UCSF, which controls Mount Zion Hospital, is said to be planning to rebuild the Zellerbach/Saroni Tumor Institute there, to enlarge it and, for some $15-20 million create another cancer center at Mount Zion, 11 blocks from PPMC. Children's Hospital, a few more blocks away, is also in the planning stages for the expansion of their radiation therapy center for unknown millions of dollars, and Saint Francis Hospital is spending nearly $6 million to modernize their radiation therapy department.

San Francisco does not need a new radiation therapy center. I do not argue against modernization of older facilities, but rather in favor of combining these separate little facilities, and combining with PPMC, in creating a single inter-hospital center for cancer treatment. The very considerable dollars going into four independent and uncoordinated centers would be better spent in creating one joint center of real excellence, with better facilities, for less money. What a joint center wouldn't do is guarantee PPMC its own little money machine, or the administration of Mount Zion, Children's and Saint Francis "full service" hospitals.

And who suffers from these plans? YOU DO!!! You pay for all this, whether you are aware of it or not. Rich donors give the capital for the facilities and thereby avoid paying tax on their capital gains. You pay, instead. But the cost of operating these centers is recovered from fees they charge patients, and the more unused capacity they have the higher the fees must be from each patient. There are no economies of scale—rather the opposite. You pay more than you should have to pay. (You pay, even if your insurance company writes the checks; the insurance company simply raises its premiums to cover its costs.)

San Francisco has, for years, been suffering from an excess of hospital beds, and of small hospitals. A merger of Seton and St. Mary's, now under discussion, could close another 300 beds, and merge their two radiotherapy departments, both desirable goals. St. Joseph's Hospital and Marshal Hale have closed and merged, respectively, and French is now part of Kaiser. Time and reality have done slowly what human intelligence should have done sooner and less expensively.

I believe the people of San Francisco should rise up to prevent the building/rebuilding of four radiation therapy centers by four SF hospitals. We should demand that we have some input into how our system will be improved, not for profit for the few but for the benefit of the many. One of the major jokes in health care is the fantasy that non-profit hospitals don't make profits. There is, in most of our minds, nothing evil about a profit, but it cannot be life's highest goal. It cannot dominate our planning for our future in health care.

Better care for all is obtainable if we insist on it. It will include access to basic care for everyone, and, as a change from the past, will need to include some prioritization so that we can afford to provide really important basic care to all, and not delude our-

selves that we can afford everything for everyone. We don't now, we never have done so and we don't have the will to do it.

We must not allow the professors at PPMC, or UCSF, or others to do all the planning without us. Don't allow them to spend what they like of our money, in the guise of high-technology health care, and then extort the money back in outrageous fees for their high-tech services. We should get "mad as Hell" and decide not to "take it" anymore. The people of San Francisco need to speak up.

THE DOLE PROPOSAL FOR FOREIGN AID REDISTRIBUTION IS A MISTAKE

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. MACHTLEY. Mr. Speaker, very recently, the distinguished gentleman from the other body, Mr. DOLE, offered a proposal to take 5 percent in across-the-board cuts from the five top recipients of U.S. foreign aid—Egypt, Israel, Pakistan, the Philippines, and Turkey, in order to provide these funds to Eastern Europe, Panama, and other emerging democracies.

I can't support this proposal.

We give foreign aid to the five mentioned countries for a reason: because they desperately need it, and because it is an investment in our own strategic and diplomatic interests.

Despite their own economic and strategic concerns, these countries have been openly responsive to U.S. concerns.

We want to see peace and stability for Eastern European countries and for other incipient democracies. But we should not blindly focus our attentions on our new friends at the expense of other urgent areas of our world.

The recent relaxation of United States-Soviet tensions is a miraculous gift, and has provided us for the opportunity for new relationships in Europe.

However, these great changes do not imply that the challenges faced by the Middle East or the Philippines Islands have also faded. In fact, these regions of the world are facing new and tougher difficulties which threaten the stability and security of their nations.

In Israel, strategic concerns are further complicated by the economic problem of resettling the many Soviet Jewish refugees now coming to their country.

Any cuts in our foreign assistance program should be made thoughtfully and specifically and not through broad slashes which can shift the balance of power in strategically important areas such as the Middle East. Instead, cuts in foreign assistance—or in any Federal funding—should be made on a case-by-case basis which reflects the complexities involved.

DAN McKINNON

HON. DUNCAN HUNTER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. HUNTER. Mr. Speaker, the article below is a profile of Dan McKinnon, a good friend and a great American. I believe it will be of interest to my colleagues.

The article follows:

DAN MCKINNON

(By James Bernstein)

As chairman of the Civil Aeronautics Board a decade ago, Dan McKinnon's chief job was to carry out Congress' mandate to close the regulatory agency and allow the free market to govern the nation's airline industry.

Now, he is hoping the market is free enough so there will be room for an airline company he is starting.

Next Monday, North American Airlines, the air charter and feeder company McKinnon has been organizing for more than a year, plans to begin flying to the Caribbean, as well as cross-country for El Al Israel Airlines, bringing El Al passengers to New York to meet flight bound for Tel Aviv.

It will be the newest airline to open in the country, and if history is any guide, it faces an uphill battle. Industry experts say that most of the five or so new airlines that open each year do not survive because of stiff industry competition.

"It's a huge risk," said McKinnon, a lean, gray-haired, 55-year-old Californian who chaired the CAB from 1981 until it closed in 1984, as mandated by the Airline Deregulation Act of 1978, which called for government to stop regulating fares and routes and leave that to the airlines themselves. But McKinnon, the scion of wealthy family with interests in Texas and California newspapers and broadcast stations, said his gamble is "based on some pretty good knowledge."

"My period of time at the CAB was some of the most turbulent in the industry," he said in an interview last week in a crowded office overlooking a runway at John F. Kennedy International Airport, where North American is headquartered. The early 1980s saw two unprecedented events in the airline industry: the strike by the nation's air-traffic controllers and the bankruptcy of Braniff Airlines.

"Dan McKinnon was the guy who had to go out and tell everybody the government wasn't going to bail out an airline," McKinnon said, "You got to see what made airlines successful."

McKinnon is banking that his charter and feeder formula will fit into a profitable niche. He estimates the start-up costs alone are $1.6 million. McKinnon said he will lay out the money and ultimately will receive about $400,000 from El Al, which will own a 24.9 percent stake in North American.

On Mondays and Wednesdays, North American plans scheduled flights to Los Angeles, where it is to pick up passengers holding El Al tickets to Tel Aviv. They are to be flown to New York to meet an El Al flight on a coordinated schedule that would eliminate waiting at the airport. On the same days, North American would return El Al passengers to Los Angeles.

On Thursdays, Fridays and Saturdays, the airline is to make charter flights to Club Med resorts in the Caribbean—to Pointe-a-Pitre in Guadeloupe and Fort-de-France in Martinique—and to a new resort, Las Bahias de Huatulco, on Mexico's southern Pacific coast. Other charter service may be arranged later.

North American's beginnings will be humble.

It is leasing one Boeing 757 passenger plane, a fuel-efficient aircraft that can seat 213, for both the El Al and charter service. McKinnon said he is negotiating for another leased aircraft.

The company has 56 employees, including 12 pilots and 27 flight attendants. North American also is negotiating to feed other airlines, but McKinnon declined to discuss other deals.

At first, a lot of North American's success will depend on the relationship with El Al. McKinnon, a former Navy pilot and flying buff who has piloted everything from military spy planes to motorless gliders, said he got the idea to start his own airline more than a year ago in a casual conversation with Sam Kunda, a friend and former El Al executive whom he met while chairing the CAB.

David Shein, El Al's vice president and general manager in New York for North and South American operations, said last week that Kunda had mentioned McKinnon to him. Shein said El Al was seeking a domestic feeder to expand its existing Los Angeles-to-New York service.

"We're the matchmaker," Shein said. "We approached Dan McKinnon." He described McKinnon as "an old friend of Israel and the Israeli air force." McKinnon, who had worked for the Central Intelligence Agency for a year, beginning in 1985, wrote a book in 1986, "Bullseye-One Reactor," about the Israeli air attack in 1981 on an Iraqi nuclear reactor.

Shein estimated the coordinated flights will save passengers 2½ hours of travel time. They'll be able to fly to New York and then board El Al without having to wait for refueling, Shein said. No refueling stop will be necessary in Europe either. North American will have Hebrew-speaking "hostess" and serve Kosher food.

McKinnon said he knows the going will be tough. A conservative Republican who wears his hair cropped military style and sports an American flag pin in his lapel, McKinnon became a decorated helicopter rescue pilot in the Navy during the 1950s. He was credited with 62 rescues while on active duty.

"Guys ejected, airplanes ditched, people fell overboard, ships sank," he says as he recalls a three-year stint as a naval aviator that ended in 1960.

He returned to his hometown of San Diego, bought a radio station and soon discovered the broad appeal of country-western music. He was described as a skillful promoter of country-western singers, luring such stars as Willie Nelson and Glen Campbell to town. He became such an enthusiast that in 1977 he was named president of the Country Music Association.

Later, McKinnon thought he would follow in the footsteps of his father, Clinton Dan McKinnon, a congressman from California and a newspaper and broadcast magnate whose publications included the San Fernando Valley Times. But the younger McKinnon was unsuccessful in his 1980 run for a seat in the U.S. House of Representatives, even though he had solid conservative credentials and close ties to Ronald Reagan.

But McKinnon was not done with politics or Washington. At 7 a.m. one day in 1980,

he said, he got a call from the Reagan transition team, asking if he'd like to become chairman of the Civil Aeronautics Board. "I didn't even know what the CAB did," McKinnon said. "The idea was to come and shut it down."

Under McKinnon, the 44-year-old agency was reduced from about 800 people to 300, and then closed. He said he persuaded many of them to believe in the necessity of CAB's demise. "I put 300 people out of work and made them happy about it."

In Washington, McKinnon was known as earnest and hard-working, but with little knowledge of the complex airline industry.

"My recollection is that Mr. McKinnon was a Reagan political appointee who obtained his training on the job," said Barry Roberts, a Washington attorney who practiced before the CAB when McKinnon was chairman.

McKinnon admits he lacked industry background, but said he was successful in transferring the CAB's responsibilities to the Department of Transportation and the airlines.

"I had a mountaintop experience," he said of those years. "There was nothing better than CAB. I love aviation. I love flying. I traveled the world and negotiated treaties, dealt with Congress, did all the 'Good Morning America' and 'Today' shows."

During his years in Washington, McKinnon took an occasional test flight in an Air Force F-15 jet fighter and once bounced through the Colorado hills on a 500-mile motorcycle race with racing stars Parnelli Jones and Al Unser. He also did some glider piloting and flew the super-secret U-2 spy plane.

But can this man run an airline? Philip Davidoff, chairman of the American Society of Travel Agents' aviation commission, said McKinnon's chances will be better if he does not try to expand too quickly.

McKinnon agrees. "The idea is not to get so big you get into trouble," he said. "You've got to stick to your niche. What are crumbs to the big boys will be a meal for us."

SENSE OF CONGRESS RESOLUTION

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. COUGHLIN. Mr. Speaker, today I am introducing a sense-of-the-Congress resolution with our Select Narcotics Committee chairman, Mr. RANGEL, which urges the President of the United States to, at the earliest date possible, certify Panama as cooperative in combatting drugs, declares congressional intent to expeditiously enact a joint resolution—as required by law—approving such certification, and commends the Endara government of Panama for its demonstrated commitment to combat the scourge of drugs.

As you know, the Noriega government of Panama, which was decertified by the President on March 1, 1989, for its role in money laundering and drug trafficking activities, has been replaced by a democratic government. However, Panama's current status as "decertified" still requires the United States to withhold desperately needed bilateral aid and to oppose multilateral loans to Panama.

Panama has clearly demonstrated its intent to work with us in fighting drugs. The new government and the United States have reached a comprehensive "Mutual Cooperation Agreement for Reducing Demand, Preventing Illicit Use and Combatting Illicit Production and Traffic of Drugs." The agreement was signed on January 10, 1990, in Panama City by Mel Levitsky, our Assistant Secretary of State for the Bureau of International Narcotics Matters and Ramon Lima C., Panama's Vice Minister of Government Justice. It entered into force upon signature.

Panama, because of its geographic position and role as a banking center, is critically important in the region's antidrug effort and deserves to be certified as fully cooperative in the drug fight. Once the President submits his certification of Panama the Congress must enact a separate joint resolution approving the determination of the President for the certification to take effect.

I urge my colleagues, on both sides of the aisle, to support this resolution and take the first step toward allowing Panama to be a full-fledged ally in the war against drugs. The full text of the resolution is inserted at this point in the RECORD.

KILDEE HONORS PAGES

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. KILDEE. Mr. Speaker, I would like to take this opportunity to express my personal gratitude to all of the pages who have served in the House of Representatives so diligently last year.

These dedicated and hard-working young people will soon be leaving to complete their high school education. They are: Eric Adler, Eryn E. Ament, Lin Ang, Emily B. Barey, Kristen Baty, Noah Bierman, Amanda Blandford, Emiy Buchholz, Timothy Burns, Christian T. Cannon, Lisa DeGolier, Daniel Denning, Jacquelyn Dinusson, Alberto Flores, Rebecca Freeman, Joshua Fuller, Joel L. Gilbert, Kimberly Gooley, Genevieve Haines, Christopher Hayes, Sabrina Hinojosa, Catherine M. Houston, Shannon Johnson, Kevin Keenan, Ian Kruger, Matthew Lee, Randolph Lisle, Leslie Lowry, Diane Magen, Geoffrey McGuire, Maureen McNally, Matthew McNinch, Alexandra Meir, Rajesh Menon, Kathleen Metinko, Carrie Miller, Brian Moneke, Markita Montgomery, Phil Navallo, Robert E. Parker III, Geoffrey Patnoe, Eliezer Perez, Nathaniel Potter, Marsey Retsema, Adam Rieger, Dawn Elizabeth Rigby, Victoria R. Robinson, Michelle Rodgers, Laura Rothkopf, Heather Rubinstein, Elizabeth Russell, Margaret Anne Sallah, Laurie Schmitz, Kelly Scott, Lori Shemka, Michael Shepard, Nonkululeko Singer, Anthony L. Smith, Sarah Speakman, Marcus Spells, Shelley Stinnett, Michael W. Sweeney, Elizabeth Weinstein and Jennifer J. Wharton.

We all recognize the importance that congressional pages play in helping the House of Representatives operate. This group of young people, who come from all across our Nation, represent what is good about our country. To become a page these people have proven themselves to be academically qualified. They have ventured away from the security of their home and families to spend time in an unfamiliar city. Through this experience they have witnessed a new culture, made new friends, and learned the details of how our Government operates.

As we all know, the job of a congressional page is not an easy time. Along with being away from home, the pages must possess the maturity to balance competing demands for their time and energy. In addition, they must have the dedication to work long hours and the ability to interact with people at a personal level. I am sure they will consider this to be one of the most valuable and exciting experiences of their lives, and that with this experience they will all move ahead to lead successful and productive lives.

Mr. Speaker, as chairman of the Page Board, I ask my colleagues to join me in honoring this group of distinguished young Americans. They certainly will be missed.

CIVIL JUSTICE REFORM ACT OF 1990

HON. JACK BROOKS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. BROOKS. Mr. Speaker, today I am introducing the Civil Justice Reform Act of 1990. The purpose of this proposal is to implement procedural changes in order to minimize the excessive costs and delay associated with litigating civil cases in the Federal court system. Joining me in sponsoring this bill are Congressman BOB KASTENMEIER, chairman of the Judiciary Subcommittee on Courts, Intellectual Property, and the Administration of Justice; and Congressmen HAMILTON FISH and CARLOS MOORHEAD, the ranking minority members of the full committee and courts subcommittee, respectively.

Last year, at the suggestion of Senator JOSEPH BIDEN, chairman of the Judiciary Committee in the other body, a task force was convened to consider the problems of cost and delay in civil litigation. This task force, which was organized by the Brookings Institution and the Foundation for Change, drew together individuals with a wide range of perspectives on the problem: Representatives of the plaintiffs' and defense bar, public interest and corporate attorneys, former judges and law professors, and other authorities on the administration of justice in Federal civil proceedings.

This group came forward with a series of recommendations for procedural reform, for expanding judicial administrative resources, and for encouraging attorneys and clients to respond to those changes. The proposal that we are introducing today as the Civil Justice Reform Act of 1990 embodies the task force's procedural recommendations. It would provide for each Federal district court to develop a civil justice expense and delay reduction plan. This plan would allow for the scheduling and management of cases on a track system, differentiated on the basis of the complexity, and

amount of time needed to handle the individual case. The adoption of these plans is intended to allow more careful monitoring of the progress of cases and the application of adequate resources to see those cases through to resolution in an efficient manner. The bill also calls for development of a model expense and delay reduction plan by the Judicial Conference of the United States, as well as evaluation of the district courts' plans by the Federal Judicial Center.

Mr. Speaker, the Civil Justice Reform Act of 1990 is a thoughtful and comprehensive proposal to deal with the Federal courts' increasingly crowded civil dockets. I am introducing it today because I believe that it merits fuller examination, evaluation, and discussion as we look at ways the Federal Government can use its judicial resources as efficiently as possible.

FOUR TIMES A CHARM

HON. JOEL HEFLEY

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. HEFLEY. Mr. Speaker, I rise today to pay homage to the Denver Bronco football team as they prepare to play in the Super Bowl for the third time in 4 years. Out of 28 teams in the National Football League, the field has been narrowed down to 2. The men in orange have once again demonstrated their desire to be the best.

Residing in my home State of Colorado, lifted by the support of the multitude there, the Broncos hold a record of 11 and 5 in addition to two playoff victories. As the team leaves Denver, a perch that is a mile high, and prepares to meet their formidable opponents, the team from the San Francisco Bay, they travel to New Orleans with the support of Coloradans everywhere.

There are no accolades strong enough for the leadership provided by owner Pat Bowlen and head coach Dan Reeves. After the frustrating 8 and 8 record the previous year, the wisdom of these two men has shown through. I commend them for their ability to build success out of disappointment.

There are many Bronco fans here in this distinguished body and across the Nation. As a representative of beautiful Colorado, I urge all of them to join me in cheering for the Broncos this coming Sunday as they attempt to become the No. 1 professional football team in the Nation.

In closing, I would like the players and coaches to know that win or lose, we are proud of the team for being one of the two best teams in professional football. Their athletic abilities have brought great enjoyment into all of our lives, and for that we are eternally grateful.

TRIBUTE TO FLOYD TURLEY

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. HUBBARD. Mr. Speaker, I appreciate this privilege of paying tribute to a friend whom I have appreciated and admired for many years.

Floyd Turley, 61, of Route 1, Marion, KY, died January 1 at Welborn Baptist Hospital in Evansville, IN.

Mr. Turley worked for Henderson-Union Rural Electric Cooperative Corp. for 37 years before retiring. He also was active in farming for 37 years in Crittenden County, KY.

A wonderful man, highly respected by those who knew him, Floyd Turley was also a dedicated Christian, active at General Baptist Church in Marion.

He is survived by his lovely wife, Frances Turley; five sons—Curtis Turley, head basketball coach at Henderson County High School, the largest public school in Kentucky west of Louisville; Randall Turley, David Turley, Billy Turley, and Todd Turley, all of Marion; a brother, James Arvil Turley of Paducah; five sisters—Elizabeth Travis, Hazel Owen, Jo Binkley, and Shirley Minner, all of Marion, and Mildred Walter of Cassopolis, MI, and 10 grandchildren.

My wife Carol and I extend to the family of Floyd Turley our sympathy.

ROBERT T. McINTYRE, VICE PRESIDENT OF PENNSYLVANIA AFL-CIO HONORED

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. KANJORSKI. Mr. Speaker, I rise today to pay tribute to Mr. Robert T. McIntyre, vice president of the Pennsylvania State AFL-CIO and president of Local 81, International Brotherhood of Electrical Workers in Scranton, PA.

Mr. McIntyre is a graduate of Scranton Central High School and is a Navy veteran of the Korean Conflict. He joined the IBEW in 1955 and worked as AFL-CIO community services director for Lackawanna County in 1963 and became a field representative for the national AFL-CIO in 1964.

He has been appointed by Governor Casey to the Pennsylvania Economic Development Partnership Board, the Governor's Education/Job Training Task Force, the State Unemployment Advisoy Council, the Governor's Energy and Power task force, and the Governor's Infrastructure task force.

In addition, Mr. McIntyre has been named to the Pennsylvania MILRITE Council, the Governor's Committee on Employment of the Handicapped and the Consumer's Advisory Council to the Insurance Department. Endorsed by the Pennsylvania Building and Construction Trades Council, Mr. McIntyre is hoping to become State AFL-CIO president when the labor organization convenes in Pittsburgh in May.

An advocate for workers rights, Mr. McIntyre has devoted his life to the working men and women of this Nation. With the help of tenacious labor union leaders like Mr. McIntyre, employees are ensured that their rights are represented, of fair treatment, and of adequate and safer working conditions.

Mr. McIntyre will be honored at a celebration, a "Community Salute to Bob McIntyre," to be held on Friday, January 26, 1990. I would like to take this opportunity to salute Mr. Robert McIntyre for his tremendous dedication in representing the workers of Pennsylvania, particularly those of the greater Wilkes-Barre/Scranton area.

IN RECOGNITION OF CAPTAIN JOHN E. KANE, U.S. NAVY

HON. WILLIAM H. GRAY III

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. GRAY. Mr. Speaker, I would like to take this opportunity to recognize and honor Capt. John E. Kane, U.S. Navy. On February 1, 1990, Captain Kane will retire from active duty after 21 years of outstanding service to the Navy and the Nation.

Hailing from Philadelphia, PA, Captain Kane graduated from the U.S. Naval Academy at Annapolis, MD, in 1968 and was designated a naval aviator the following year. While on active duty, he has served honorably and with distinction in four patrol aviation squadrons accumulating and embarked in six Pacific fleet aircraft carriers. As commanding officer of Patrol Squadron Ten, this unit was awarded the prestigious Isbell Trophy as the fleet's top operational squadron for an unprecedented 2 consecutive years. Ashore, Captain Kane's exemplary service included attendance at the Naval War College, Newport, RI, service as an analyst in manpower and total force requirements at the Navy Manpower and Material Analysis Center, and on the immediate staff of the Secretary of the Navy in the Office of Program Appraisal.

Since November 1987, Captain Kane has served as the director for Navy liaison, U.S. House of Representatives. It is in this capacity that I and many other Members of this body have come to respect and rely on his commanding knowledge of vital Navy issues and programs. Moreover, his assistance in promoting effective communications and harmonious working relationships between the Navy and the House of Representatives is recognized and appreciated by all who have been privileged to know him.

A man of Captain Kane's talent and integrity is rare indeed and while his honorable service will be genuinely missed, it gives me great pleasure today to recognize him before my colleagues and to wish him and his family every success as he brings to a close a long and distinguished career in the U.S. naval service.

NATIONAL CRIME VICTIMS' RIGHTS WEEK

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. GEKAS. Mr. Speaker, 35 million individuals in the United States are victimized each year by crime, with 6 million falling prey to violence. This means that 5 out of 6 individuals will be the victim or intended victim of crime during their lifetime, according to estimates by the U.S. Department of Justice.

All of us, regardless of our party affiliation, are concerned and startled by these grim statistics. Many victims of crime suffer severe psychological, physical, and emotional hardships. America must commit itself to improving the criminal justice and social services that respond to crime victims.

Mr. Speaker, that is why I am pleased to rise today to introduce, along with 78 of my colleagues, legislation designating April 22 through April 28 as "National Crime Victims' Rights Week." For the last 9 years 1 week in April has been designated to remember and support victims of crime, to acknowledge the advocates who serve them, and to support the rights of victims to participate in the criminal justice system.

Our Nation is committed to justice and liberty for all. This commitment must be extended to the victims of crime. Efforts must be continued to remove the inequities victims face and to protect and restore individuals rights. One way to redress the injustice to crime victims is to implement the recommendation proposed by the President's Task Force on Victims of Crime.

"National Crime Victims' Rights Week" is supported by the U.S. Department of Justice, National Victim Center, MADD [Mothers Against Drunk Drivers], NOVA [National Organization for Victim Assistance], Parents of Murdered Children, National Sheriffs Association and many other criminal justice and victims groups committed to the rights of crime victims. Today, I call upon all of my colleagues to support this very worthwhile resolution.

DR. FRANK E. YOUNG APPOINTED TO NEW POSITION

HON. MICHAEL BILIRAKIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. BILIRAKIS. Mr. Speaker, I would like to take a moment today to reflect upon the many achievements of Dr. Frank E. Young during his tenure as Commissioner of the Food and Drug Administration. After 5 years as Commissioner of the FDA, Dr. Young has been appointed to the new position of Health and Human Services Deputy Assistant Secretary for Health, Science and the Environment.

During his years as Commissioner, Dr. Young made the expeditious development and availability of drugs for those who are desperately ill his top priority. In 1988, he implemented the "Bush" Initiative to reduce the time required for human testing of drugs for life-threatening and severely debilitating diseases. Overall, the Agency reduced approval time for new top-priority drugs from 7.5 years to 4.2 years, which is one of the fastest rates in the world.

Frank Young also established a special classification for absolute top priority for all AIDS drugs. New treatments for those with life-threatening conditions and no alternative therapy were sometimes approved for investigational new drug regulations within 5 days. In addition, he provided a vigilant inspection program of the Nation's blood banks to ensure the safety of the blood supply.

The FDA, during Commissioner Young's tenure, approved more than a dozen therapeutics and vaccines in less than half the usual processing time. The FDA approved more than 350 products of biotechnology and an additional 650 products were authorized for clinical trials.

We, as a nation, are indebted to the services and dedication of Dr. Frank Young. The toils of a man like this should not go unnoticed. I wish him great luck, which I know he will not need, as he proceeds to this new challenge.

INTRODUCTION OF LEGISLATION TO PROVIDE FOR THE EXTENSION OF MFN STATUS TO ROMANIA, CZECHOSLOVAKIA, BULGARIA, AND EAST GERMANY

HON. BARBARA B. KENNELLY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mrs. KENNELLY. Mr. Speaker, I rise today to introduce legislation that would provide for the extension of most-favored-nation status to Romania, Bulgaria, East Germany, and Czechoslovakia.

Over the past few months we have witnessed unprecedented change in these Eastern European nations as a virtual tidal wave of reform and democratization swept nation after nation. As the tide begins to recede in Eastern Europe each of these reinvigorated nations begins the long process of sorting through the debris, the challenges, and the possibilities.

One shining remnant of the tidal wave in Eastern Europe is that each of these nations has opened its borders and is allowing free emigration.

I think we all are in agreement that the United States ought to do everything possible to encourage continued free emigration, the growth of democracy, and help the economies of these nations recover and adopt more market-like orientations.

Affording these nations MFN status will assist them in their efforts to rebuild their economies and will create new opportunities for American business. The new Government of Romania, for instance, recently denounced former dictator Nicolae Ceausescu's renunciation of MFN status.

I hope the introduction of this bill will sharpen the focus of Congress and the administration on these issues, especially in light of upcoming hearings in the Ways and Means Committee on Trade, the Soviet Union, and Eastern Europe.

POTENTIAL CLOSING OF THE LONG BEACH NAVAL SHIPYARD

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. ANDERSON. Mr. Speaker, I would like to express my great dismay over reports that the Long Beach Naval Shipyard has been included on a list of possible base closings. Though I cannot confirm this unsubstantiated rumor, I think that a move of this sort represents a serious mistake. No one should need to be told of the efficiency, productivity, and overall excellence of the Long Beach Naval Shipyard. It is to me the finest naval shipyard in the country, staffed with the finest workers in their field. Base closures are indeed a potential in the face of possible defense cutbacks, but not for a facility that is operating at peak performance. I am amazed that the most economically viable naval shipyard, and just look at the Long Beach Naval Shipyard's balance sheet for proof of that, would even be considered. I will insist that this rumored action not be carried through.

We simply cannot afford to lose the expertise and skilled labor that the Long Beach Naval Shipyard represents. It is a shipyard that is extremely important to this country, both in peacetime and wartime. And while the likelihood of conflict seems to be receding, we must remember that the United States is first and foremost a maritime power. We shouldn't take any steps to diminish our capabilities in that respect. The Long Beach Naval Shipyard represents a vital asset in our naval strength. And if needed, the shipyard will be a key factor in our ability to mobilize. But if we close down the base, the equipment, the location, the skilled manpower, the jobs, the capability are all gone forever. We need to keep open the Long Beach Naval Shipyard at a core level of work so we don't lose this asset of national importance. Let us not make a mistake and shut down the Long Beach Naval Shipyard.

I assure you, Mr. Speaker, that I will work diligently to keep this strategic shipyard open and viable.

RESPONSIBLE CITIZENSHIP

HON. PETER HOAGLAND

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. HOAGLAND. Mr. Speaker, we have just witnessed the closing of a decade in which millions of people who had long suffered from repressive regimes have toppled those regimes in their quest for freedom and democracy. We, who have benefited from the longest lasting constitutional democracy in history, should rejoice in the overthrow of those tyran-

nical governments and in the recognition by their citizens of the importance of the principles and values of free government we have cherished for so long.

We must wish the people of these nations well in the difficult tasks that lie ahead. And, we must do everything we can to ensure the success of their endeavors to establish governments based upon the principles of constitutional democracy.

At the same time, we must not neglect to pass on to our own youth an understanding of the fundamental principles and values of our democratic institutions. Such an understanding leads to a reasoned commitment to the preservation and improvement of these principles and values. In this regard, I am most pleased to commend the effort of Rich Brown, of Omaha, NE, whose dedication to the improvement of the civic education of our students is exemplary.

Through the dedicated and voluntary efforts of Rich Brown, thousands of upper elementary, middle, and high school students have studied the curriculum of the National Bicentennial Competition; its noncompetitive companion program, Congress and the Constitution; and the National Historical Pictorial Map Contest in Nebraska's Second Congressional District. This curriculum introduced students to the philosophical ideas of our Nation's founders, the historical background of the Philadelphia Convention, and the issues and debates that shaped the writing of our Constitution. Students learn how our Government is organized and how it protects the rights and liberties of all citizens. Finally, and most important, students learn of the responsibilities which accompany the rights of citizenship in a democracy.

It is ironic that while those who have experienced repressive regimes throughout the world are clamoring for the right to vote in free elections, in the United States, only one out of five eligible voters under the age of 30 takes advantage of that very right. With so few young people understanding the purpose and importance of our Constitution, it is clear that we must do all we can to turn the tide of political apathy into a wave of active and informed participation. I am pleased to express my admiration and appreciation of Richard Brown for his impressive contributions to the development of competent and responsible citzenship.

TRIBUTE TO PAUL "PETE" PAGE, A MISSOURI STATE REPRESENTATIVE

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 25, 1990

Mr. SKELTON. Mr. Speaker, I would like to rise today to say a special word in tribute to the late Paul "Pete" Page, a Missouri State representative.

Rep. Paul "Pete" Page, a Republican member of the Missouri House since 1976, died in his sleep last November. He was 71.

A native of Springfield, MO, Page graduated from Lebanon High School. He served in the U.S. Army Coast Artillery in 1942 and later entered the U.S. Army Air Force. Page was an active community leader in Lebanon. Activities ranged from president of the area chamber of commerce to the vice president of the Jaycees.

While in the Missouri House, Page served on the Federal-State relations committee; mines and mining committee; State parks, recreation and natural resources committee; and tourism, recreational and cultural affairs committee.

Rep. Pages' closeness within the community at home and at the State Capital will make him greatly missed. Missouri lawmakers describe Page as a friendly and popular member of the legislature with many friends and acquaintances.

Page is survived by his wife Edna; two sons, Paul Page III and Edward Page; and three grandchildren.

Mr. Speaker, Rep. Paul Page has served the people of his district with pride and honesty. His contribution to the State of Missouri and its people will long be remembered.

HOUSE OF REPRESENTATIVES—*Monday, January 29, 1990*

The House met at 12 noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

You have promised, O gracious God, that Your words are new every morning and Your presence is with us all the day through. We humbly pray that You increase in us the gift of hope that any dark cloud of illness or pain will be eased by the power of Your good spirit. Teach us, O God, never to lose that gift of hope so that our lives will not be governed by despair, but will be nurtured and brightened by Your work in our hearts and souls. Bless us this day and every day. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceeding and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. The Chair will ask the gentleman from Arizona [Mr. KYL] if he would come forward and lead the membership in the Pledge of Allegiance.

Mr. KYL led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Kalbaugh, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate having proceeded to reconsider the bill (H.R. 2712) entitled "An act to facilitate the adjustment or change of status of Chinese nationals in the United States by waiving the 2-year foreign residence requirement for "J" nonimmigrants," returned by the President of the United States with his objections, to the House of Representatives, in which it originated, and passed by the House of Representatives on reconsideration of the same, it was resolved that the said bill do not pass, two-thirds of the Senators present not having voted in the affirmative.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 247. An act to amend the Energy Policy and Conservation Act to increase the efficiency and effectiveness of State energy conservation programs carried out pursuant to such act, and for other purposes;

S. 286. An act to establish the Petroglyph National Monument in the State of New Mexico, and for other purposes; and

S. 555. An act to establish in the Department of the Interior the De Soto Expedition Trail Commission, and for other purposes.

The message also announced that pursuant to Public Law 96-114, as amended by Public Laws 98-33, 99-161, and 100-674, the Republican leader appointed William Russell King, Virginia, and Michael L. Lunceford, Texas, as members of the Congressional Awards Board.

THE CROSS FLORIDA PARK TO SUCCEED THE CROSS FLORIDA BARGE CANAL

(Mr. BENNETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BENNETT. Mr. Speaker, in this world of change, nothing is so changeless as change itself. What was wise and doable yesterday may not be wise and doable today. There was nothing wrong with the concept of this canal, which was based on documented positive commercial and defense values. But today, since the government of Florida has changed its mind about this project, the project now lacks the required non-Federal sponsorship. Even the local chambers of commerce and the Pentagon have abandoned their support. The most acceptable solution is to create a State park or State conservation area, and that is what my legislation will accomplish.

The State park or State conservation area would be like a phoenix bird arising from the ashes of yesterday's idea.

In 1986 Congress passed a law that deauthorized the canal, but only on condition that the Federal Government would continue to protect its $73 million investment in the project, all made at the request of the State of Florida. The State contributed less than $10 million and counties along the route contributed $32 million.

The State in 1989 passed a memorial disagreeing with the 1986 Federal law and asking that the State be allowed to sell all the assets, reserving no equities for the Federal contributions. My proposal also would not protect the Federal investments—except for a reverter clause—would require the State to pay the counties at least the $32 million out of the sale of outparcels—noncontiguous parcels—and would provide for a reverter of the contiguous lands to the Federal Government if the State ever seeks to use the lands for other than ecological conservation purposes. This proposal requests the State to use the surplus funds from noncontiguous land sales to acquire additional lands needed in the land route from the St. Johns River in the Gulf of Mexico. The Federal Government would be freed from its responsibilities to maintain the lands and other assets, which now cost the Federal Government about $2 million each year.

Beginning in June 1989 I suggested to State officials a State park or State conservation use of these lands; and I believe the State now approves.

Now if the State legislature repeals its 1989 memorial and expresses agreement with this bill I have introduced, or some amendment of it, I believe this matter can be quickly resolved. With such official assurance from the State, I anticipate I can pass the law I have introduced, even though it represents a very generous attitude on the part of the Federal Government, losing, as it will, $73 million it invested at the request of the State.

Mr. Speaker, I am including in the RECORD a copy of the bill, as follows:

H.R. 3905

A bill to deauthorize the Cross Florida Barge Canal and to assist the State of Florida in establishing a Cross Florida State Park or conservation area, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

Section 1114 of the Water Resources Development Act of 1986 is amended to read as follows:

"SEC. 1114. CROSS FLORIDA BARGE CANAL.

"(a) The Cross Florida Barge Canal is deauthorized immediately upon the transfer, by quitclaim or otherwise, to the United States of all lands and interests therein held by the State of Florida and its Canal Authority for the Cross Florida Barge Canal project, except for parcels of land that are not contiguous, adjoining or otherwise physically connected to the canal corridor (hereinafter referred to as 'noncontiguous parcels').

"(b) The State of Florida shall reimburse the counties of Duval, Clay, Putnam, Marion, Levy, and Citrus at least $32,000,000, in the aggregate, for their investment in the canal project. The State of Florida may use proceeds from any sale of the noncontiguous parcels referred to in subsection (a) as a source of funding for this reimbursement.

"(c) If the State of Florida requests the return of the lands transferred to the United States as prescribed in subsection (a) for the purpose of establishing a State park or State conservation area, the United States shall immediately transfer to the State of Florida said lands, along with any other lands, including physical structures, held by the United States for the canal project: *Provided, however,* That if the State of Florida ever attempts to sell any of such lands or any interest therein, or to use any parcel or portion of such lands for other than park or conservation purposes, the title to all the lands transferred under this subsection to the State of Florida, shall revert to the United States.

"(d) Congress urges the State of Florida to use any surplus funds derived from the sale of noncontiguous parcels referred to in subsection (a) to fund the acquisition of ecologically important lands to improve the integrity of the park or conservation area referred to in subsection (c).".

LET US APPLAUD PRESIDENT'S DECISION TO SEND TROOPS TO PANAMA

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAGOMARSINO. Mr. Speaker, President Bush's decision to send American combat troops to Panama has been applauded by a majority of both Panamanians and Americans.

I am appalled that the House Democratic leadership is unwilling to let this body applaud the President. A watered-down resolution on Panama was pulled last week when the leadership apparently realized it could not get away with simply commending the performance of American troops in Panama.

President Bush acted boldly and decisively to protect American lives in Panama, to protect our interests in the canal treaties, to restore democracy to Panama and to gain custody of Manuel Noriega to bring him to trial for drug trafficking.

All of those objectives were accomplished by the President's choice of action after he had exhausted all other diplomatic, economic, and political alternatives.

And to think, the leadership of this body is unwilling to give credit for protecting American national security interests.

DEFENSE BUDGET NOT FAIR

(Mr. MAZZOLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAZZOLI. Mr. Speaker, the President and his budget chief say the defense cuts announced today and affecting places like Naval Ordnance on Southside Drive in Louisville are fair. I say they are not fair.

What is fair about spending defense dollars for star wars, a system defending against missiles which are even today being dismantled by both the superpowers, while cutting the flesh, muscle, and bone of America's conventional defense capability? What is fair, Mr. Speaker, about adding defense dollars for the Stealth bomber, which can hardly fly, much less fly stealthily, while cutting the maintenance, repair, and modernization of conventional weapons which is being done at Naval Ordnance? Simply stated, there is nothing fair about it.

The same can be said about spending defense dollars for both the Midgetman and the MX.

In short, Mr. Speaker, the defense budget is not fair to facilities such as Naval Ordnance, to the 2,400 men and women who work there, nor to localities such as Louisville and Jefferson County.

I intend to point out this unfairness in the weeks ahead and work to correct it.

PRESIDENT'S BUDGET DESERVES OUR FULL SUPPORT

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, the President's budget deserves thoughtful consideration. While we may differ with the President in some details about that budget, the fact is it sets the right kind of priorities. It moves us away from the welfare-state kind of philosophy toward more growth and opportunity.

Let me give the Members just a couple of examples: In the area of our Space Program, the President proposes that we do more and go further. Back last July when the President said that this Nation should commit itself to going back to the Moon on a permanent basis and then on to Mars, many of his critics here in the Congress said: "No way; the President is not really serious about this because he did not put any dollars behind it." The President rightfully responded that he was in the middle of budget negotiations and did not want to change the budget at that point.

The President has now come forward with a budget to do the kinds of things that he said he was going to do, a 24-percent increase in the space budget. That is probably not quite enough to do the job, but it sets us in the right direction and is a major increase and ought to be supported in the Congress.

In the science budget, the President moves ahead in the areas of research and development, making certain that we continue to double the moneys for the National Science Foundation or move toward doubling those funds. That is exactly the right direction.

Even in defense, where he is cutting the budget overall, he has maintained the research and development budget and, in fact, has increased it. That makes certain that in the future we will have the technological base in this country for defending the Nation.

Those are the right kinds of priorities, and the President's budget in those categories deserves our full support.

VOTE ON CHINA WAS ABOUT WHO WE ARE

(Mr. DORGAN of North Dakota asked and was given permission to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, I wanted to observe after the vote last week on China that some of the reaction from the White House and the supporters of the President's policy just do not get it. They still do not get it.

The vote was just not about students, Chinese students, and their visas. The vote was a larger expression, it seems to me, particularly here in the House of Representatives, about who we are and what we stand for.

It was unforgivable, in my judgment, for the President to send Messrs. Scowcroft and Eagleburger to go to Beijing and lift a glass and toast the Chinese leaders. These are folks who butchered the students, butchered the young folks in Tiananmen Square, who erected out of papier-mache a statue of liberty demonstrating for freedom, risking their lives for a simple idea that free men and women want to govern themselves.

If we in America do not stand for that, what on Earth do we stand for? Why are our goals in China so modest? Why do we talk about freedom in Eastern Europe but when we talk about China the President talks about reform? Why so modest, Mr. President?

I am not suggesting sending troops to China, but I am saying we should not be drinking cocktails toasting the Chinese leaders when they have butchered those young folks in Tiananmen Square demonstrating for freedom.

That is what that vote was about. The vote was about who we are and what we stand for. Why on Earth would this country not, without a second thought, say, "Mark us down on the side of those folks who are risking their lives for freedom in China," not, "Mark us down to raise a glass to toast the Chinese leaders in Beijing?"

That was unforgivable, in my judgment.

COMMEND THE PRESIDENT FOR HIS TOUGH DECISIONS

(Mr. KYL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KYL. Mr. Speaker, I joined colleagues on the other side of the aisle to vote to override the President's veto on the China policy for many of the reasons that were just expressed by the previous speaker.

I would also urge my colleagues, when it is time to praise the President, that we be willing to do that as well. Our colleague from California urged that with respect to the President's action in Panama, as Commander-in-Chief, he deserves credit and should be praised for that. I urge my colleagues to join us in a resolution which would do precisely that.

By that same token, I join my colleague from Pennsylvania in asking that people on both sides of the aisle respect the President for the tough decisions that he had to make in sending his budget to us and commend him for what I believe is a job well done and specifically the work in the area of defense.

If we look at the defense budget this year as a jobs bill, we are looking at it all wrong. We have to be very careful how we continue to constrict our defense budget, which has now been cut for the last 5 years in a row.

□ 1210

It has not even kept pace with inflation. That means we have got to be very careful how we cut it back.

As the gentleman from Pennsylvania [Mr. WALKER] noted, we cannot afford to cut back on those leading technologies, the R&D kind of things, including the strategic defense initiative, which are going to be so important to our future. So as we begin to debate this budget, particularly the defense budget, let us not look at it in terms of what is fair. That is not important. This is not a job bill. What is important is the security of the United States of America. That should be our only criteria in evaluating the defense budget.

INAUGURATION OF HONDURAN PRESIDENT

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONTGOMERY. Mr. Speaker, I had the privilege this last weekend of going with Vice President DAN QUAYLE to Honduras and then to Panama. The purpose of that trip was the inauguration of a new President in Honduras who had been educated in the United States and attended the same university I did in Mississippi. I was very impressed with the new President of Honduras.

While in that country we met with four different Presidents of Central American and South American countries. I thought the Vice President of the United States handled himself very well in dealing with these Presidents.

We then went over to Panama and met with the new leadership there. I am impressed with the new leadership that was duly elected in Panama to lead that country.

Mr. Speaker, what is rather interesting is that in the last 30 days I have been to Panama two times before this last trip, and the Panamanian people now want the American military forces to stay there. The people say they have no army, they have no police force and they need some type of protection.

I believe President Bush, within the next couple of weeks, will withdraw all those troops that were in Operation Just Cause. I think what we could do to help the Panamanians, Mr. Speaker, is replace active duty forces from America with National Guardsmen and Reserves.

Our reserve components could include military police battalions and engineer battalions. It would be excellent training for them. They could do the job. We would then not have active duty regular troops from the military down in Panama. It makes a lot of sense to use National Guardsmen and Reservists to help get Panama back on its feet again.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore (Mr. VISCLOSKY) laid before the House the following communication from the Clerk of the House of Representatives:

Washington, DC, January 25, 1990.

Hon. THOMAS S. FOLEY,
The Speaker, House of Representatives, Washington, DC

DEAR MR. SPEAKER: Pursuant to the permission granted in Clause 5 of Rule III of the Rules of the U.S. House of Representatives, I have the honor to transmit two sealed envelopes received from the White House at 1:30 p.m. on Thursday, January 25, 1990 and said to contain a message from the President wherein he transmits a 6-month period report regarding the national emergency with Libya and said to contain a message from the President whereby he transmits his second National Drug Control Strategy.

With great respect, I am,
Sincerely yours,
DONNALD K. ANDERSON,
Clerk, House of Representatives.

NATIONAL EMERGENCY WITH RESPECT TO LIBYA—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 101-140)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, without objection, referred to the Committee on Foreign Affairs and ordered to be printed:

To the Congress of the United States:

1. I hereby report to the Congress on developments since my last report of July 19, 1989, concerning the national emergency with respect to Libya that was declared in Executive Order No. 12543 of January 7, 1986. This report is submitted pursuant to section 401(c) of the National Emergencies Act, 50 U.S.C. 1641(c); section 204(c) of the International Emergency Economic Powers Act, 50 U.S.C. 1703(c) ("IEEPA"); and section 505(c) of the International Security and Development Cooperation Act of 1985, 22 U.S.C. 2349aa-9(c).

2. Since my last report on July 19, 1989, there have been no amendments to the Libyan Sanctions Regulations, 31 C.F.R. Part 550 (the "Regulations"), administered by the Office of Foreign Assets Control ("FAC") of the Department of the Treasury. Additionally, since July 19, 1989, there have been no amendments or changes to orders of the Department of Commerce or the Department of Transportation implementing aspects of Executive Order No. 12543 relating to exports from the United States and air transportation, respectively.

3. During the current 6-month period, FAC has issued a limited number of specific licenses to individuals and corporations to permit them to engage in activities that would otherwise be prohibited by the Regulations. Under FAC licensing procedures, 23 individuals registered to travel to or remain in Libya with Libyan immediate family members. Fewer than 15 licensing actions were taken with respect to Libya.

4. Various enforcement actions mentioned in prior reports continue to be pursued. As reported previously, seven former officers of a Libyan student group operating under FAC license were convicted in November 1988 for the unauthorized use of student funds in violation of the Regulations. In May 1989, in the U.S. District Court for the Eastern District of Virginia, seven individuals associated with the student group were convicted of related charges of conspiracy, wire fraud, aiding and abetting, and credit card fraud. Their sentences ranged from 60 days' to 7 years' imprisonment with fines of up to $8,000.

In July 1989 the U.S. Customs Service seized a shipment of U.S.-origin electrical distribution and control equipment in Buffalo, New York, valued at $7,679 for an attempted illegal transshipment from Canada to Libya through the United States. In October 1989 the U.S. Customs Service seized a shipment of computer equipment valued at $7,500 for an attempted illegal transshipment to Libya through the Netherlands. Redelivery of the goods from the Netherlands to New York was effected prior to the seizure of the goods in New York.

In August 1989, in the U.S. District Court for the District of Minnesota, a Federal grand jury returned a four-count criminal indictment charging a U.S. firm and two of its corporate officers with unlicensed shipment of 43,400 pounds of chemicals to Libya in April 1986. Guilty pleas were entered by two corporate officers and on behalf of the corporation at a December 4, 1989, hearing. Sentencing is expected in January 1990.

During the current reporting period, FAC determined that the Government of Libya had illegally transferred certain of its physical assets in the United States to a Libyan student organization at the time the sanctions were imposed. In October 1989 FAC ordered the assets sold at auction with the proceeds deposited into a blocked account in the name of the Government of Libya.

5. The expenses incurred by the Federal Government in the 6-month period from July 19, 1989, through the present time that are directly attributable to the exercise of powers and authorities conferred by the declaration of the Libyan national emergency are estimated at $425,776. Personnel costs were largely centered in the Department of the Treasury (particularly in the Office of Foreign Assets Control, the Customs Service, the Office of the Assistant Secretary for Enforcement, the Office of the Assistant Secretary for International Affairs, and the Office of the General Counsel), the Department of State, the Department of Commerce, the Department of Justice, the Federal Reserve Board, and the National Security Council.

6. The policies and actions of the Government of Libya continue to pose an unusual and extraordinary threat to the national security and foreign policy of the United States. I shall continue to exercise the powers at my disposal to apply economic sanctions against Libya as long as these measures are appropriate, and will continue to report periodically to the Congress on significant developments as required by law.

GEORGE BUSH.

THE WHITE HOUSE, *January 25, 1990.*

THE 1990 NATIONAL DRUG CONTROL STRATEGY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Armed Services; the Committee on Banking, Finance and Urban Affairs; the Committee on Education and Labor; the Committee on Foreign Affairs; the Committee on Government Operations; the Committee on Energy and Commerce; the Permanent Select Committee on Intelligence; the Committee on the Judiciary; the Committee on Merchant Marine and Fisheries; the Committee on Public Works and Transportation; the Committee on Science, Space, and Technology; and the Committee on Ways and Means:

To the Congress of the United States:

Consistent with section 1005 of the Anti-Drug Abuse Act of 1988 (Public Law 100-690), I am today pleased to transmit my administration's 1990 National Drug Control Strategy for congressional consideration and action.

This report should be viewed as a companion volume to the National Drug Control Strategy that I sent to the Congress last September. In it you will find a comprehensive blueprint for Federal drug control activities for the next fiscal year. The principal goal of our strategy, however, remains the same: to reduce the level of illegal drug use in America. To help determine the most effective means of pursuing that objective, my administration has once again been aided by broad consultation with Members of Congress, Federal, State, and local officials, experts in the fields of drug prevention, treatment, and enforcement, and hundreds of interested and public-spirited citizens. The result, I believe, is a truly national plan to combat the illegal use of drugs, one that will bring us success in this new decade.

I am grateful for the enthusiastic and bipartisan support that the Congress gave to the National Drug Control Strategy last year, and I turn to you for that support again. I know that every Member of Congress shares my desire to overcome the terrible scourge of drugs. And so I ask you to join me in moving quickly to fund and implement the proposals and initiatives contained in this report. Full congressional support of this national strategy is essential if we are to give Americans the thorough and effective drug control policy they expect and deserve.

GEORGE BUSH.

THE WHITE HOUSE, *January 25, 1990.*

BUDGET OF THE U.S. GOVERNMENT FOR FISCAL YEAR 1991—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 101-122)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

I have the honor to present the *Budget of the United States Government for Fiscal Year 1991.*

The American economy is now in its eighth consecutive year of expansion and growth. It is essential that the growth of the economy continue and increase in the future. The budget is designed to achieve that goal.

The budget has five broad themes:

—*Investing in Our Future*—With an eye toward future growth, and expansion of the human frontier, the budget's chief emphasis is on investment in the future. It proposes: a capital gains incentive for long-term private investment and new incentives for family savings; record-high amounts for research and development, space, education, and Head Start; a major investment in civil aviation; and a large increase in spending to attack the scourge of drugs. At the same time, the budget maintains a strong national defense while reflecting the dramatic changes in the world political situation that are taking place; and it fulfills responsibilities to protect the environment, and preserve America's cultural heritage.

—*Advancing States as Laboratories*—The budget recognizes the emergence of new ideas and initiatives originating at the State and local level. The Federal Government will foster such innovation and experimentation in numerous fields, from transportation to health, through waivers of certain rules and regulations, and through demonstration grants.

—*Reforming Mandatory Programs*—Entitlement and other mandatory spending now constitutes nearly half the budget, not counting an additional 14 percent for interest. The budget provides for full payment of social security benefits and funds growth in health, low income and other mandatory programs. However, it proposes reforms where warranted to slow the growth in some of these programs and thus leave more room in the budget for priority initiatives.

—*Acknowledging Inherited Claims*—The budget faces up to such inher-

ited claims as the cleanup of decades old environmental damage at nuclear weapons facilities. It analyzes potential claims from unfunded annuities and Federal insurance programs. It assesses the growing volume of defaults in Federal credit programs and proposes essential credit reforms.

—*Managing for Integrity and Efficiency*—The budget contains suggestions for reforms in the way Congress deals with the budget. It provides more resources and suggests improved methods for managing the vast Federal enterprise better. It identifies low-return domestic discretionary programs where a smaller investment of budgetary resources is warranted.

The budget meets the deficit target of $64 billion for 1991 established by the Gramm-Rudman-Hollings law, without raising taxes. It would balance the budget by 1993 as required by that law, begin reducing debt, and protect the integrity of Social Security.

Each of the themes outlined above is discussed in more detail in Section One of the budget, the Overview. The customary tabular and appendix material is contained in Section Two.

I look forward to working with the Congress in the weeks and months ahead to produce a budget that meets the Gramm-Rudman-Hollings target, advances the Nation's essential interests, and keeps the economy on the path of continued growth.

GEORGE BUSH.

THE WHITE HOUSE, *January* 29, 1990.

VOTER REGISTRATION LEGISLATION

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, the schedule calls for us to take up the so-called motor-voter registration bill this week. I hope you will consider delaying action on this legislation.

I have a number of reservations concerning consideration of this bill.

First, this legislation will have a tremendous impact on all 50 States and will fundamentally alter the role of Federal Government in mandating procedures. It should have more hearings. It has been rewritten and redrafted since it was reported from committee and will require some procedural sleight of hand to get the rewrite to the floor. It is wrong.

Second, this legislation should be considered within the context of campaign reform. It was produced outside the framework of the bipartisan campaign reform task force. While it may have Democrat and Republican cosponsorship, I do not see it as bipartisan especially within this context. Its consideration separate from the work of that task force may do great damage to that process.

Third, this legislation has some critical flaws, Mr. Speaker, and they deserve a little more attention than they have been given.

Finally, hasty consideration may set up another early confrontation with the President. Some may have this kind of strategy in mind for this session, particularly if we are forced to take up Eastern Air Lines legislation next week. However, I do not believe that is your strategy, Mr. Speaker.

As you know, Mr. Speaker, I believe that comprehensive, bipartisan campaign reform is possible this year, but it will take extraordinary commitment and effort. This is not the right way to begin. I suggest we take a couple of steps back and start again.

□ 1220

PRESIDENTIAL BUDGET PRIORITIES

The SPEAKER pro tempore (Mr. VISCLOSKY). Under a previous order of the House, the gentleman from Pennsylvania [Mr. WALKER] is recognized for 5 minutes.

Mr. WALKER. Mr. Speaker, when budgets are presented to the Congress or drafted in the Congress, they are documents that have to be taken seriously. They should be taken seriously because they do outline the priorities that we as a country will be facing as we implement the details of those budgets.

That is the reason why the budget that was sent to Capitol Hill today by the President is an extremely important document and one which we need to focus on rather than simply stand on the side and criticize. We need to look at some of the directions that the President sought to take us in and compare those with the directions in which we have been heading.

As we draft these budgets, we choose one of two directions to go: You can either see the budget as something which causes you to invest in the future and thereby assure growth and opportunity for the country out in the future; or you can see the budget as simply building on what we have done before and basically choose to do everything the same way we have been doing it before.

The problem is that if we as a Nation choose that direction at the present time, we will choose a direction that has been taking us steadily down the road toward bankruptcy. What we need to have is a reform agenda. We need to look at the future differently than we have looked at the past. The world is changing.

The economies of the world are changing. The economy of this country relative to the world is changing. We need to begin to focus on some of those things here in the Congress and begin to budget in ways that reflect realities rather than the way we simply wish things could be.

I have been interested, as the President's budget has been discussed initially over the weekend, to hear a number of Members of Congress at least say publicly or say in press presentations that they think that this budget is a terrible document and it is going to have to be thrown out almost immediately on Capitol Hill.

I think that would be a tragic mistake if that is the direction that Congress goes.

Some of the criticism I have heard centers around the fact that the President did not take enough out of the defense budget, that we are arriving at a day when we can begin to spend away the peace dividend.

First of all, I think it may be a little too soon to make a calculation as to whether or not there is going to be a peace dividend or at least the extent to which that peace dividend is going to be available. But what is interesting is that some of those same people also seem to criticize the cuts that the President did make in defense. As an example, one of the things that the President did as he cutback the defense budget relative to inflation was he decided we are going to have to have some base closures. Already, people in the Congress who have screamed the loudest for defense cuts are also screaming the loudest about the fact that that entails some closure of bases.

How to do you get there from here if we are not willing to at least look and say there are some things that the Defense Department has been doing that it ought not be doing anymore?

For example, I am told we still have some forts up in Michigan that were put in there as Indian-fighting forts. Maybe there has been an Indian attack up there in recent months, but it certainly has not received the press attention if it was. Maybe those kinds of things could be looked at.

We ought not, though, be doing things that take away from our ability to build a technological base for this country, because even if there is a need to redefine the budget in terms of a peace dividend, we have to maintain our technological edge. That has always been what we as a Nation have as our ace in the hole, that our technology was always better than the other guy's technology. So while we could put together men and materials very quickly, we cannot do the 7- and 10-year developments of the new technology that allow us to stay competitive.

We also look at some of the other things that are in the President's budget and also focus on those technological issues and the world economy.

I yield to the gentleman from Kentucky briefly.

Mr. MAZZOLI. If my friend will yield briefly.

Mr. WALKER. Yes, I only have a limited amount of time.

Mr. MAZZOLI. I want to tell my friend how much I appreciate his discussion of this issue. He obviously is opening up the debate which will go on for weeks on the Hill.

As a Member in whose district one of these bases which is at least going to be studied for closure, I represent that district, it is important to me to look at this defense budget not just on the total numbers, the total dollars, but also on whether or not we are moving away from conventional defense into this area of high tech and space-age work, which I think could be at least a little bit dangerous because a lot of times this material does not work as it is designed.

Mr. WALKER. I understand the gentleman's point. I would say to the gentleman the fact is we do have to have long amounts of lead time for technological developments. And if in fact what you do is cut away from your ability to do the high-tech kinds of things, you never regain that. The point is you can always do something that puts together your conventional forces; but it is very difficult to put together the technological base.

That is what we have been doing as a Congress, I say to the gentleman, and that is exactly what my plea would be, to move away from.

We always seem to focus on those things that are in place and try to hold on to them as a Congress.

As we hold on to a lot of those things, what we do is take away from our ability to invest in the future. The President's budget is aimed at some investment. There is a space investment in here.

Mr. MAZZOLI. Would not my friend——

Mr. WALKER. I assume we are going to hear some people talk about the fact in the next few weeks, about the fact that we ought to take away from the space budget in order to do housing budgets or some other kinds of things.

I would suggest that a technological investment in the future is exactly the right course of action to take and that the President, in moving us in that direction in the budget, makes a great deal of sense and that ought to be our focus. In general, we always ought to be looking out toward the future.

TRIBUTE TO FIRE CHIEF M.H. (JIM) ESTEPP

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland [Mr. HOYER] is recognized for 5 minutes.

Mr. HOYER. Mr. Speaker, I rise today to honor the career of one of Prince Georges County's favorite sons, Chief M.H. [Jim] Estepp. Since 1962, Jim Estepp has served with the Prince Georges County government, including the past 12 years as chief of the county's fire department.

As chief, Jim oversaw an annual budget of nearly $50 million and a staff of over 800 people and an additional 800 volunteers. These people and funds operate 47 fire stations in our county and 13 major bureaus, including criminal arson and bomb investigations and responsibility.

Mr. Speaker, anything I say here today understates the career and accomplishments of this great public servant. Twelve years ago, Chief Estepp shouldered the responsibility at a time when fire service in the county was in turmoil. Almost singlehandedly, Chief Estepp molded the department into a model of efficiency for the entire government, and as awards prove, for the country as well. In fact, the county fire department has consistently been rated as the country's best run agency by citizen polls during Chief Estepp's tenure.

Organizing, managing, motivating are three verbs that come to mind when one thinks of Jim's career. And his actions translated into a very favorable fire insurance rating for the county, with a fire loss rate well below the national and regional averages for fire losses. County residents know that this means money in their pockets through lower insurance rates, and so more than their pride is reflected in the heartfelt gratitude with which they join me today in extending to Chief Estepp.

I would be remiss, Mr. Speaker, not to mention the many leadership awards that Chief Estepp has received during his tenure. In 1986, the American Society for Public Administration awarded the top management award given in Maryland to a local government official, the Janet L. Hoffman Award for Public Service. Since 1978, the fire department has received over 50 National Association of Counties awards for program excellence. Many in this Chamber know of Chief Estepp as the elected president of the International Association of Fire Chiefs, after serving terms as first and second vice president. This position is a reflection of the high esteem in which Jim's colleagues hold his capabilities and career. Finally, the County Executive, recognizing Jim's talent for administration, has appointed him the new director of public safety. In this role, Jim will oversee both police and fire departments in the county.

Mr. Speaker, I know that you and my colleagues join with me in commending Chief M.H. [Jim] Estepp on a job well done and wishing him continued success in his new position as Director of Public Safety for Prince Georges County.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia [Mr. GINGRICH] is recognized for 60 minutes.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Member (at the request of Mr. WALKER) to revise and extend their remarks and include extraneous material:)

Mr. WALKER, for 5 minutes, today.

(The following Members (at the request of Mr. MAZZOLI) to revise and extend their remarks and include extraneous matter:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. POSHARD, for 5 minutes, each day on January 30, February 6, February 20, and February 27.

Mr. GLICKMAN, for 60 minutes, on January 30.

Mrs. BOGGS, for 60 minutes, on January 31.

Mr. SKELTON, for 30 minutes, on January 31.

Mr. HOYER, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. WALKER) and to include extraneous matter:)

Mr. GINGRICH.

Mr. GEKAS.

(The following Members (at the request of Mr. MAZZOLI) and to include extraneous matter:)

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. TORRICELLI.

Mr. FRANK.

Mr. BORSKI.

Mr. MAZZOLI.

Mr. EDWARDS of California.

Mrs. KENNELLY.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 247. An act to amend the Energy Policy and Conservation Act to increase the efficiency and effectiveness of State energy conservation programs carried out pursuant to such Act, and for other purposes; to the Committee on Energy and Commerce.

S. 286. An act to establish the Petroglyph National Monument in the State of New Mexico, and for other purposes; to the Committee on Interior and Insular Affairs.

S. 555. An act to establish in the Department of the Interior the De Soto Expedition Trail Commission, and for other purposes; to the Committee on Interior and Insular Affairs.

ADJOURNMENT

Mr. MAZZOLI. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 29 minutes

p.m.), the House adjourned until tomorrow, Tuesday, January 30, 1990, at 12 noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2362. A letter from the Secretary of Health and Human Services, transmitting a report on prevention activities by the Alcohol, Drug Abuse, and Mental Health Administration for fiscal years 1987 and 1988, pursuant to 42 U.S.C. 290aa(e)(2); to the Committee on Energy and Commerce.

2363. A letter from the Administrator, Energy Information Administration, transmitting a copy of the Energy Information Administration's annual energy outlook for 1990, pursuant to 15 U.S.C. 790d(a); to the Committee on Energy and Commerce.

2364. A letter from the Deputy Director, Defense Security Assistance Agency, transmitting a report of those foreign military sales customers with approved cash-flow financing in excess of $100 million as of October 1, 1989, pursuant to 22 U.S.C. 2765; to the Committee on Foreign Affairs.

2365. A letter from the Assistant Secretary of State for Legislative Affairs, transmitting copies of the original report of political contributions of Nelson C. Ledsky, of Maryland, for the rank of Ambassador during his tenure of service as Special Cyprus Coordinator, pursuant to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

2366. A letter from the Assistant Secretary of State for Legislative Affairs, transmitting copies of the original reports of political contributions by Paul C. Lambert, Ambassador Extraordinary and Plenipotentiary-designate to the Republic of Ecuador; by Everett Ellis Briggs, Ambassador Extraordinary and Plenipotentiary-designate to the Republic of Portugal; and by Edward Morgan Rowell, Ambassador Extraordinary and Plenipotentiary-designate to Luxembourg, and members of their families, pursuant to 22 U.S.C 3944(b)(2); to the Committee on Foreign Affairs.

2367. A letter from the Archivist of the United States, transmitting a report of actions taken to increase competition for cotracts during fiscal year 1989, pursuant to 41 U.S.C. 419; to the Committee on Government Operations.

2368. A letter from the Assistant Secretary of State for Legislative Affairs, transmitting the annual report on the Foreign Service retirement and disability system for fiscal year 1987, pursuant to 31 U.S.C. 9503(a)(1)(B); to the Committee on Government Operations.

2369. A letter from the Chairman, U.S. International Trade Commission, transmitting a report of actions taken to increase competition for contracts during fiscal year 1989, pursuant to 41 U.S.C. 419; to the Committee on Government Operations.

2370. A letter from the Chief Justice of the United States, transmitting an amendment to the Federal Rules of Evidence as adopted by the Court, pursuant to Public Law 100-702, section 401(a) (102 Stat. 4649) (H. Doc. No. 101-142); to the Committee on the Judiciary and ordered to be printed.

2371. A letter from the Chairman, Panama Canal Commission, transmitting the Commission's report, including unaudited financial statements, covering the operations of the Panama Canal during fiscal year 1989, pursuant to 22 U.S.C. 3722; to the Committee on Merchant Marine and Fisheries.

2372. A letter from the Chairman, the Panama Canal Commission, transmitting a copy of the 10-year report of the Panama Canal Commission during the decade since October 1, 1979; to the Committee on Merchant Marine and Fisheries.

2373. A communication from the President of the United States, transmitting Presidential Certification No. 90-9, his certification that Panama is fully cooperating with the United States on the war on drugs, pursuant to 22 U.S.C. 2991(h)(3) (H. Doc. No. 101-1:41); jointly, to the Committees on Foreign Affairs; Banking, Finance and Urban Affairs; and Ways and Means and ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BENNETT:

H.R. 3905. A bill to deauthorize the Cross Florida Barge Canal and to assist the State of Florida in establishing a Cross Florida State Park or conservation area, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. DURBIN (for himself, Mr. MADIGAN, Mr. DORGAN of North Dakota, Mr. LEACH of Iowa, Mr. SKELTON, Mr. MICHEL, Mr. NAGLE, Mr. JONTZ, Mr. GRANDY, Mr. JOHNSON of South Dakota, Mr. PENNY, Mrs. SMITH of Nebraska, Mr. EVANS, Mr. BRUCE, Mr. JONES of North Carolina, and Mr. LIGHTFOOT):

H.R. 3906. A bill to extend and modify tax incentives for ethanol, to establish minimum oxygen content of motor fuels in carbon monoxide nonattainment areas, to require a study of the environmental impacts of aromatic compounds in gasoline and the benefits of using ethanol in motor fuels, and for other purposes; jointly, to the Committee on Ways and Means and Energy and Commerce.

MEMORIALS

Under clause 4 of rule XXII,

310. The SPEAKER presented a memorial of the Senate of the State of Washington, relative to the application for federal assistance for storm damaged counties in the State of Washington; to the Committee on Public Works and Transportation.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 6: Mr. GRANT and Mr. GLICKMAN.

H.R. 586: Mr. GOODLING, Mr. MILLER of California, Mr. PEASE, Mr. FLAKE, Mr. NOWAK, and Mr. SIKORSKI.

H.R. 1505: Mr. DE LUGO, Mr. ROE, Mr. TOWNS, and Mr. DEFAZIO.

H.R. 1684: Mr. CRAIG.

H.R. 1725: Mr. MCNULTY.

H.R. 1733: Mr. PAYNE of New Jersey and Mr. SIKORSKI.

H.R. 1767: Mr. SAWYER.

H.R. 1845: Mr. SCHEUER.

H.R. 2096: Mr. POSHARD.

H.R. 2098: Mr. FISH and Mr. BILIRAKIS.

H.R. 2319: Mrs. LOWEY of New York and Mrs. VUCANOVICH.

H.R. 2323: Mr. KANJORSKI and Mr. MCNULTY.

H.R. 2345: Mr. DWYER of New Jersey.

H.R. 2460: Mr. GILMAN, Ms. SCHNEIDER, Mr. GRANT, Mr. ROWLAND of Connecticut, Mr. JAMES, Mr. ROTH, Mr. MCDADE, Mr. MILLER of Ohio, and Mrs. SMITH of Nebraska.

H.R. 3223: Mr. THOMAS A. LUKEN.

H.R. 3321: Ms. KAPTUR, Mr. ENGLISH, Mr. PETRI, and Mr. QUILLEN.

H.R. 3349: Mr. SHAYS.

H.R. 3386: Mr. SMITH of Vermont and Mr. GILLMOR.

H.R. 3432: Mr. WEISS.

H.R. 3512: Mr. SMITH of Florida, Mr. ATKINS, and Mr. FASCELL.

H.R. 3552: Mr. MOODY.

H.R. 3562: Mrs. UNSOELD and Mr. GEJDENSON.

H.R. 3603: Mr. MORRISON of Washington, Mr. ROBERT F. SMITH, Mr. PRICE, Mr. CHAPMAN, Ms. SCHNEIDER, Mr. WEBER, Mr. BATES, Mr. DE LUGO, Mr. ERDREICH, Mr. WYDEN, Mr. DUNCAN, Mr. MCMILLEN of Maryland, Mr. WILSON, Mr. INHOFE, Mr. GALLEGLY, Mr. STENHOLM, Mrs. LOWEY of New York, Mr. BENNETT, Mr. BILIRAKIS, Mr. THOMAS of Wyoming, Mr. DANNEMEYER, Mr. NEAL of North Carolina, and Mr. SCHAEFER.

H.R. 3643: Mr. BALLENGER, Mr. MILLER of Washington, and Mr. BROOMFIELD.

H.R. 3857: Mr. MOODY, Mr. BROWN of Colorado, and Mr. WILLIAMS.

H.R. 3859: Mr. HOYER, Mr. COURTER, Mr. HUGHES, Mrs. ROUKEMA, Mr. TORRICELLI, Mr. BRUCE, and Mr. BOEHLERT.

H.R. 3869: Mr. DANNEMEYER, Mr. KYL, Mr. CHAPMAN, and Mr. SABO.

H.J. Res. 431: Mr. PORTER, Mr. MACHTLEY, Mr. WALSH, Mr. BOEHLERT, Mr. WOLPE, Mr. THOMAS of Georgia, Mr. HUGHES, Mr. DORNAN of California, Mr. HORTON, Mr. LAGOMARSINO, Mr. CHANDLER, Mr. KOLBE, Mr. HILER, Mr. DONALD E. LUKENS, Mrs. MARTIN of Illinois, Mr. SMITH of New Hampshire, Mr. FAUNTROY, Mr. LIPINSKI, Mr. BROWN of California, Mrs. COLLINS, Mr. NIELSON of Utah, Mr. FUSTER, Mr. GLICKMAN, Mr. OWENS of Utah, Mr. KANJORSKI, Mr. ECKART, and Mr. SANGMEISTER.

H.J. Res. 439: Mr. LEVIN of Michigan, Mr. BROWN of California, Mr. HUGHES, Mr. MCDADE, Mr. KASICH, Mr. JONTZ, Mr. LANCASTER, and Mr. TOWNS.

H.J. Res. 464: Mr. CONYERS, Mr. CROCKETT, Mr. DOUGLAS, Mr. GILMAN, Mr. HOCHBRUECKNER, Mr. JONTZ, Mr. MCDERMOTT, Mr. PARKER, Mr. PICKETT, Ms. SLAUGHTER of New York, and Mr. SMITH of Florida.

H. Con. Res. 66: Mr. TRAFICANT.

PETITIONS, ETC.

Under clause 1 of rule XXII,

137. The SPEAKER presented a petition of American Friends Service Committee, Cambridge, MA, relative to political freedom and human rights in Haiti; which was referred to the Committee on Foreign Affairs.

SENATE—*Monday, January 29, 1990*

(Legislative day of Tuesday, January 23, 1990)

The Senate met at 2 p.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

For my people have committed two evils; they have forsaken me the fountain of living waters, and hewed them out cisterns, broken cisterns, that can hold no water.—Jeremiah 2:13.

Creator God, "from whom, through whom, to whom are all things," the Prophet Jeremiah reminds us of the human propensity to reject God and seek substitutes. In the words of St. Augustine, "Thou hast made us for Thyself, O Lord, and restless are our hearts until they repose in Thee." The great scientist, Pascal, reminds us, "There is a God-shaped vacuum in every heart."

Forsaking Thee, Lord, we find emptiness which nothing but God can fill. As nature abhors a vacuum, human nature seeking false gods ends up with only hollow souls. In the business of life, God of grace and mercy, help us to seek Thee, knowing we shall surely find Thee and be consummately satisfied.

In Jesus' name whose gift to us is forgiveness, cleansing, and renewal. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE

Mr. MITCHELL. Mr. President following the time of the two leaders today there will be a period for morning business until 2:30 p.m., with Senators permitted to speak therein for up to 5 minutes each. At 2:30 the Senate will resume consideration of S. 1630 the clean air bill. There will be no rollcall votes today relative to the clean air bill nor the State Department authorization.

Last Thursday a unanimous-consent agreement was entered into which provides that today there will be 1 hour of debate on H.R. 3792, the State Department authorization bill, with the time equally divided and controlled between Senators PELL and HELMS, or their designees.

The agreement further provides that vote on final passage of H.R. 3782 will occur at 5 p.m. tomorrow, Tuesday, January 30.

Again, Mr. President, I encourage Senators who wish to speak on the clean air bill to do so today. Senators who have amendments to the bill should be prepared to proceed with respect to those amendments beginning today. I expect, Mr. President, there is going to be substantial debate with many votes soon on the clean air bill this week.

RESERVATION OF LEADER TIME

Mr. MITCHELL. Mr. President, I reserve the remainder of my leader time, and I reserve all of the leader time of the distinguished Republican leader.

The PRESIDENT pro tempore. Without objection, the time of the two leaders that is unused will be reserved.

MORNING BUSINESS

The PRESIDENT pro tempore. The Senate will now proceed to the consideration of morning business. Senators are permitted to speak for not to exceed 5 minutes each, and the time for morning business will extend until the hour of 2:30 p.m. today.

The Senator from Utah [Mr. HATCH] is recognized.

CIVIL RIGHTS LEGISLATION

Mr. HATCH. Mr. President, we have been told to expect within the next few days new omnibus civil rights legislation, designed to overturn several recent Supreme Court decisions. I described these decisions in some detail last year and have grown concerned that during the upcoming congressional debate passion may again overwhelm accuracy.

After listening to a few of the pronouncements made by the proponents of the impending legislation, I am concerned that we may realize Justice White's fear that racial quotas may be the only way to comply with a new simple, statistical standard of discrimination under title VII. *Wards Cove Packing Co.* v. *Atonio*, 109 Sup. Ct. Rpt. 2122. Similar fears were raised by Justice O'Connor: "If quotas and preferential treatment become the only cost-effective means of avoiding expensive litigation and potentially catastrophic liability, such measures will be widely adopted. The prudent employer will be careful to ensure that its programs are discussed in euphemistic terms, but will be equally careful to ensure that the quotas are met." *Watson* v. *Ft. Worth Bank & Trust*, 108 S. Ct. 2777, 2788 (1988) (opinion of O'Connor, J.) That is the very real possibility presented by the impending legislation.

I am also concerned that this new legislation may unintentionally eliminate what heretofore has been a core right of every American—black, Hispanic, Asian, Indian, or white, male or female—the constitutional, due process right to a day in court. Specifically, Americans will lose the right to be protected from a decision which adversely affects their personal interests in an employment discrimination case in which they were neither a party nor represented.

Mr. President, the Supreme Court's decision in Wards Cove Packing Co. versus Atonio, simply reaffirms the principle that title VII of the 1964 Civil Rights Act protects the rights of individuals, not group rights. As Justice William Brennan had earlier written, "The principal focus of title VII itself is the protection of the individual employee, rather than the protection of the minority group as a whole. Indeed the entire statute and its legislative history are replete with references to protection for the individual employee." *Connecticut* v. *Teal*, 457 U.S. 440, 454 (1982).

But this new legislation, in seeking to overturn Atonio, will trade-in the principle of equality of opportunity, which we all support, for the discredited principle of equality of result. It will be based on the presumption that a free people will gravitate to specific jobs at every place of employment in strict proportion to their numbers in the available work force. If an employer's jobs are not filled in a racial, ethnic, and gender proportion, the employer will be automatically guilty of discrimination and a title VII violation unless that employer can prove his or her innocence under a virtually impossible standard of proof.

The Wards Cove decision was written not by a Reagan appointee but by

a Kennedy appointee, Justice Byron White. It reflects earlier Supreme Court and several lower court decisions interpreting the disparate impact standard. Indeed, this decision makes clear that a disparate impact case is to be proven along the same procedural lines as a disparate treatment case—a methodology established by the Court years ago. *Texas Department of Community Affairs* v. *Burdine,* 450 U.S. 248 (1981). it makes sure title VII is not used as an engine of reverse discrimination.

I will only mention one other decision the impending bill will seek to overturn, Martin versus Wilks. This case stands for the proposition that every American is entitled to his or her day in court. There, minority plaintiffs and city and county defendants entered into a consent decree. When employment decisions pursuant to the consent decrees were undertaken, several innocent white firefighters, who were not parties to the original case, brought a lawsuit challenging those actions. These firefighters claimed that less-qualified minorities were promoted ahead of them. The defendants admitted that, yes, the decisions were race conscious, but that they were required by the consent decree, and therefore, not subject to challenge in a new lawsuit. This is the position preferred by many of those who have called for new legislation.

The Supreme Court held that the lawsuit of these white firefighters could go forward; that the consent decree could be challenged according to applicable legal and constitutional standards. If valid under these standards, it would be upheld; if it impermissibly trammels the rights of innocent third parties, it would fall, and properly so.

As the Supreme Court stated, a holding which precludes these plaintiffs from challenging employment decisions based on consent decrees agreed to in a case to which they had not been parties "contravenes the general rule that a person cannot be deprived of his legal rights in a proceeding to which he is not a party." Slip op. at 1, 2.

The Court went on to note: "All agree that '[i]t is a principle of general application in Anglo-American jurisprudence that one is not bound by a judgment * * * in a litigation in which he is not designated as a party or to which he has not been made a party by service of process.' " Slip op. at 4, 5. The Court noted that: "This rule is part of our 'deep-rooted historic tradition that everyone should have his own day in court.' " Slip op. at 5. That is a very strong affirmation of elementary civil rights.

This is a matter of constitutional due process, not merely a matter of statute or changing the rules of civil procedure. The Court said so 50 years ago, in an opinion by Justice Stone, joined by Justices Black, Frankfurter, Douglas, and Chief Justice Hughes. *Hansberry* v. *Lee,* 311 U.S. 32, 40 (1940). In 1979, the Court said again, in an opinion joined by, among others, Justices Bennan, Marshall, Blackmun, Powell, and Stevens: "It is a violation of due process for a judgment to be binding on a litigant who was not a party or a privy and therefore has never had an opportunity to be heard." *Parklane Hosiery Co.* v. *Shore,* 439 U.S. 322, 327 n.7 (1979).

If a party wants to bind others who are affected by consent decree in a case, then that party must seek to join in the lawsuit those others whose rights are at stake. Otherwise, persons not a party to a case are entitled to their day in court.

But what if the facts of the Martin case were reversed? What if the white firefighters had been the first to the courthouse and had obtained a consent decree? Would any of us support a rule of law that would prohibit aggrieved minority plaintiffs from having their day in court simply because others had previously filed a suit to which they were not made a party? I would hope not, but that's the result you will obtain if you overrule Martin versus Wilks. It stands for equal justice: It does not matter who gets to the courthouse first; everyone is entitled to their day in court.

Mr. President, I urge my colleagues to read these decisions. I further urge my colleagues to look carefully beyond the labels in considering this impending effort to overhaul dramatically the principles of equal opportunity and due process.

Mr. RIEGLE. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. REID. Mr. President, I ask unanimous consent that I be allowed to proceed as if in morning business, which I understand is about to expire, for 3 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

FEDERAL ELECTION COMMISSION

Mr. REID. Mr. President, I feel compelled to make a statement regarding a Federal case that was decided Friday by Judge Gesell in which he indicated that the Federal Election Commission had an obligation to act. But how could they have? Congress set up the Federal Election Commission so that there are three Democrats and three Republicans which, in effect, has made them powerless to do anything that is controversial.

One of the things that Judge Gesell said was that it was important that the FEC understand that they have to initiate policy. He indicated that one of the illegal activities that has taken place in Federal elections, Senate elections, over the last many years is bundling; that is, money is solicited for one apparent reason, but it is used for another. In other words, money is gathered by a political committee in the committee's name then funneled to individual Senate candidates.

When I was elected to the Senate in 1986, this was done on several occasions on behalf of my opponent. I filed complaints with the Federal Election Commission. It is interesting to note that in some 4 years, the Federal Election Commission has not responded. They have not responded, as Judge Gesell indicated, because of the 3-3 makeup in the Commission. He has told them that it is mandatory that they do something.

So, Mr. President, after these many years, finally, it would appear that what went on in Nevada and other States will be remedied, and made good. I think that is important.

I congratulate and applaud U.S. district Judge Gerhard A. Gesell for his ruling and ask that the Federal Election Commission now be given the authority that Congress did not give them.

The PRESIDENT pro tempore. Does the Senator yield the floor?

Mr. REID. I do, Mr. President.

IN HONOR OF DR. EDWARD J. BLOUSTEIN

Mr. LAUTENBERG. Mr. President, on Saturday, December 9, 1989, New Jersey and the Nation lost a distinguished leader in the field of higher education. Dr. Edward J. Bloustein, who became president of Rutgers University in 1971, guided it until his death last month. He was the 17th president of the university and was one of the longest serving heads of an American public college or university.

Ed Bloustein, who was committed to excellence in education and dedicated to the cause of academic freedom, helped make Rutgers one of the Nation's top level public universities. His vision and extraordinary dedication won Rutgers national recognition as a member of the Association of American Universities, an elite organization of the Nation's top 54 research universities.

In the last decade, Rutgers has added several high technology research centers with advanced work in fiber optics, plant biology, and ceramic engineering. These facilities have at-

tracted the Nation's top researchers and students. Their work will lay a foundation for future growth of New Jersey's economy.

Not only did he make giant strides academically but he took an enthusiastic interest in developing nationally recognized athletic teams. They brought a new sense of pride to the university and to the State.

Bloustein's 18 year tenure was also punctuated by some difficult times. During the 1970's, the university was a focus for protests against the war in Vietnam. More recently, he faced protests over tuition increases. But his loyalty and commitment to Rutgers guided the university toward its ultimate goal—excellence in research and education.

Ed Bloustein met the needs and challenges of our State university with determination and in a manner of which we are all be proud.

Admired and loved by family, friends, and colleagues, Dr. Edward Bloustein leaves a strong record of accomplishments and contributions to the State of New Jersey.

I extend my deepest sympathies to his children, Elise and Lori, his sisters, Rachel, Gertrude, and Sally, and his brother, Oscar. All of us will miss him.

LEO AND MILDRED ROBINSON CELEBRATE 60TH ANNIVERSARY

Mr. DOLE. Mr. President, I only recently became aware that two outstanding Kansans—Leo and Mildred Robinson, of Hill City, KS—this year celebrated a milestone occasion; their 60th wedding anniversary.

I have known Leo and Mildred for many years. They are an extraordinary couple, whose years of partnership and devotion are a model for us all.

My colleague, Senator KASSEBAUM, has earlier offered them congratulations. I am glad to join her, and all the people of Hill City and Kansas, in extending our best wishes.

TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,780th day that Terry Anderson has been held in captivity in Beirut.

BRONKO NAGURSKI

Mr. BURDICK. Mr. President, the Nation today is talking about San Francisco's big win in the Super Bowl. I played with a super player in my day—Bronko Nagurski. He was not only a strong and able player on the football field, he was a great person off the field. I was saddened to learn he passed away earlier this month in International Falls, MN.

I first met Bronko when we were both matriculating at the University of Minnesota in 1926. This big guy standing ahead of me in line spoke in a soft voice that wasn't consistent with his strong physical shape and rough appearance. We started talking and discovered we both planned to play football. We both made the team and under Dr. Clarence Spears' coaching, the University of Minnesota football squad was darn good in 1927 and 1928.

While at Minnesota, Bronko was honored to be named an all-American as both a tackle and a fullback. He went on to be an all-pro player with the Chicago Bears, again alternating as fullback and tackle, often in the same game.

Bronislaw Nagurski was born in Canada, but moved to Minnesota where a teacher gave him his nickname at an early age. Bronko was a gentle, soft-spoken giant who could charge through any line and run like the wind.

There are many stories about Bronko. As the Washington Post said in his obituary, Mr. Nagurski once scored against the Redskins on a play that began when he charged over the center. He then sent a pair of linebackers flying, ran through a safety and stopped only when he smashed into a brick wall. He was quoted as saying, "That last guy hit me awfully hard."

While Joe Montana is amply rewarded for his skills, players back in the early days didn't earn much playing football. Bronko became a professional wrestler, and later farmed, ran a service station, coached, fished, and hunted. I regret that I didn't have the opportunity to see him in recent years. We missed each other several years ago when he stopped by my Washington office, but didn't want to interrupt my schedule.

I am proud to have had the privilege to play football with Bronko Nagurski. I know he will be remembered as one of the best players in the game's history. As Shirley Povich said in a January 10 column in the Washington Post, "Probably no football player ever commanded so many superlatives."

I ask unanimous consent that a column on Bronko by Patrick Reusse from the Minneapolis Star-Tribune be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Minnesota Star Tribune, Jan. 9, 1990]

BRONKO'S LEGACY—UNASSUMING NAGURSKI LEAVES HIS MARK

(By Patrick Reusse)

Ron Nagurski was on the phone from the family homestead on Rainy Lake. "I'm looking around the house," Ron said. "There are a few pictures, a few interesting things, but it isn't a monument to Dad or anything like that. The house never had a trophy room. I think Dad knew his place in history, but it didn't seem to matter that much to him."

You can't find a loftier place in the history of American sports than was occupied by Ron Nagurski's father.

Baseball. Babe Ruth.

Football. Bronko Nagurski.

There you have it: The two great American sports, and the two names that have been attached to them for the ages. Babe and Bronko.

Nagurski suffered with arthritis for more than 20 years. Respiratory problems followed, and then his heart went bad. Late Sunday night, at 81, Bronko died at Falls Memorial Hospital.

Monday, four of the Nagurskis' six children—Jane, Eugenia, Kevin and Ron—were gathered at the lake home where they were reared. Two other brothers, Bronko Jr. and Tony, will arrive Wednesday.

"That's why we put the funeral back to Saturday," Ron said. "We wanted everyone to have a chance to get here. There are so many grandchildren . . . it would take one of my sisters to figure out the number."

It takes some time to get to International Falls. You don't just walk to the counter at the airport in Mobile, Ala., where Bronko Jr. lives these days, and say, "Put me on the next non-stop to the Falls."

A few years back, the president of the Chamber of Commerce in International Falls said: "Wherever I travel, people ask me two things—is it really that cold, and does Bronko still live there?"

The answers to both questions were always yes. A dry climate might have reduced the pain in his arthritic joints, but Bronko wasn't willing to leave the north country.

"It would've been awfully tough to get Dad out of here," Ron said. "He loved the Falls, living on the lake, the fishing and the hunting. He taught all of us to fish. He loved it."

The Nagurskis could walk down to the dock in the front of the house and, odds were, they could reel in a Rainy Lake walleye.

"The house is three or four miles from town," Ron said. "It was a lake cottage that originally belonged to one of my grandmothers. Mom and Dad moved into the cottage, and then they kept adding on rooms as the kids came along. We were all raised here on the lake."

Ellen Nagurski was six years younger than her husband and, according to Ron, she was in charge on the home front. "Mom was outgoing . . . she was more active in the church and the community, and she ran the show around the house," Ron said. "That's the way Dad like it. When Mom died in 1987, it seemed to me that his health started to deteriorate more rapidly."

For years, newspaper and magazine writers made pilgrimages to International Falls, seeking interviews with Bronko. The Babe died in 1948, but this legend was still pumping gas at the Pure Oil station he owned, or making the morning trip to town, to drop off Ellen at work and make a stop at the post office.

Mostly, Bronko would turn down the interviews. His legs were swollen from the poor ciruculation. The glasses he wore were as thick as the cliched Coke bottles. Nagurski once explained his reluctance to grant the interviews: "I wanted people to remember me as I was, not as I am."

The disappointed reporters often returned from the Falls to report that Nagurski had become a recluse, but Bronko was never to sports what J.D. Salinger is to literature. Bronko wasn't in hiding. He was quiet.

Reporters weren't the only ones who had a tough time getting Nagurski to talk about his football prowess. It wasn't often that he told stories about George Halas or Red Grange or Doc Spears, even when he was sitting in the fishing boat with one of his sons or around the dinner table with his family.

"I remember one time he got rolling on the stories: It was at my sister's wedding and one of his old football-playing buddies was there," Ron said. "They were talking about the old days, and it was a lot of fun. Then, Dad noticed the audience he had attracted, and that was the end of that."

In 1984, Bronko surprised most everyone—including his family—by accepting the NFL's invitation to be the honorary coin tosser at the Super Bowl. The game was played in Tampa, Fla. Bronko sat through a lengthy interview session a couple of days before the game.

"One reason he went was that the whole family had a chance to go along." Ron said, "We all had a great time. It was tough for Dad to get around, but he enjoyed himself."

That day, Bronko told the reporters: "I have so much arthritis that, as soon as I move, my joints start barking."

In 1979, the Gophers retired Nagurski's number—the famed 72. He played for Minnesota from 1927 through 1929. As a senior, he was named to the 11-man All-America team as both fullback and tackle, the only player ever to hold that distinction.

Bronko then played eight years for the Chicago Bears, gaining his most fame as the unstoppable fullback, until Halas wouldn't give him the $6,000 he wanted to play the 1938 season. Bronko went back to International Falls and started a career as a good guy on the professional wrestling tour.

"Some of the matches were fixed, some weren't," Bronko once said.

Nagurski wrestled until 1953, returning to play for the Bears one time—1943—when they were short of players because of the war. In the late '50s, Bronko bought the Pure Oil station on the corner of Third Av. and Third St. and pumped gas there for about 10 years.

"I worked there with him for most of those years." Ron said. "In the summer, people from out-of-town would make sure to stop at the station for a couple of bucks worth a gas and they would get an autograph, too. Every day, the mail would have letters from people who wanted Dad to send them autographs. He had stenograph pads made up, with one of the pictures of him as a football player stenciled on it. He would write back on that paper. The people liked that."

Nagurski was charter member of the Pro Football Hall of Fame in Canton, Ohio. They placed Bronko's bust in the Hall of Fame, and they gave him a duplicate to take home to the Falls.

"The high school wanted the bust to be put on display there, so Dad let them have it." Ron said. "As far as I know, it's still up there. It's not here at the house."

The cottage on Rainy Lake was never a museum to the legend of Bronko Nagurski. It was a home, Yesterday, a reporter called Kevin Nagurski's residence in the Falls. He was told Kevin was not there.

"Kevin is at the lake with his brothers and sisters," the lady said. "Bronk's place."

CONCLUSION OF MORNING BUSINESS

The PRESIDENT pro tempore. Is there further morning business? If, not, morning business is closed.

CLEAN AIR ACT AMENDMENTS OF 1989

The PRESIDENT pro tempore. Under the order, the Senate will proceed with the consideration of the pending business S. 1630 which the clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 1630) to amend the Clean Air Act to provide for attainment and maintenance of health protective national ambient air quality standards, and for other purposes.

The Senate resumed consideration of the bill.

Mr. BAUCUS. Mr. President, we are now back on the major business which will transpire this week and probably into the second week. Members last week had an opportunity to present their views on the Clean Air Act. I suspect more Senators will present their views this week and the following week as well.

I am not going to make a lengthy statement at this point except to say that this will be the week where we will have votes and we will make substantial progress on the bill. I urge Senators to come to the Senator from Montana and the Senator from Rhode Island with any perspective amendments or any ideas they might have so that we can work those out if we can in advance of any prolonged or protracted debate.

The Senator from Nevada [Mr. REID] is now on the floor. He has been a very able member of our committee and has made many contributions to this bill before us.

At this time I yield the floor because I believe the Senator from Nevada would like to make a statement on the bill. I look forward to working with the Senator from Nevada not only on this bill but on other legislation yet to come. He is a very, very good member of the committee. The people of Nevada should be very, very proud of him.

Mr. REID. Mr. President, I ask unanimous consent that Barry Zalcman be entitled to privileges of the floor during my statement.

The PRESIDENT pro tempore. Is there objection?

The Chair hears no objection. The Senator's request is granted.

Mr. REID. Mr. President, it is with pride that I make a statement regarding the clean air bill which we, in the Environment and Public Works Committee, have spent many, many hours preparing so that it would be at this point in the legislative agenda.

I would like to take this opportunity to express my public appreciation to Senator BAUCUS of Montana for the long, hard work that he has put into this piece of legislation. Those of us on the committee had the ability to come and go as witnesses testified when the press of other matters came up. We had the ability to participate heavily in those hearings that we felt were important to our State. Senator BAUCUS, though, did not have that luxury. It was necessary for him to be there every minute the testimony was taken regarding that legislation. All of us on the committee admire and respect the time that he spent on that bill to craft a piece of legislation that we believe has the ability to pass.

There is no question that clean air is an important part of the progress of this country. I think it goes without saying that we need a strong bill. I think it goes without saying that we need, after these many years, a new clean air bill. I think it is also important to note that there has been, over the years, a change in attitude regarding what the American public would do and be willing to accept regarding clean air.

In 1981, people were asked whether they would be willing to pay for clean air. At that time, they indicated that they would, but they were not a large majority. In fact, Mr. President, in January 1981, the question was asked, Do you agree or disagree with the following statement: "Protecting the environment is so important that requirements and standards cannot be too high, and continuing environmental improvements must be made regardless of cost"? In January 1981, 45 percent of the people polled said they agreed with that, 42 percent disagreed, and 13 percent had no opinion.

In April 1989, that figure had changed dramatically. This poll conducted by the New York Times and CBS indicates that 74 percent of the people responded in April 1989 saying they would be willing to pay to have clean air. Only 18 percent disagreed. In January 1981, some 42 percent of the people disagreed. Now only 18 percent disagreed, and only 8 percent had no opinion.

So it is quite clear that the American public wants clean air. The question, of course, is, How are we going to get clean air?

Most of those that look at this legislation acknowledge that this bill is imperfect. Those of us on the committee acknowledge that it is an imperfect piece of legislation. As much time as those of us on the committee have spent on this legislation, we recognize that there are elements that are not in the best interest for our respective States.

In Nevada, the environmental quality is not as it used to be. The cities of

Las Vegas and Reno, the two largest cities in Nevada, are among the top 10 most polluted cities in the United States with carbon monoxide and it is obvious that something has to be done to change that. Nevada is known for its prestine environment and we want to make sure that we are able to maintain that.

One of the things that I am concerned about in this legislation that I have spoken to Senator BAUCUS about. There needs to be something in this legislation, not only to maintain the air quality standards that we talk about with clearn air, but to address the visibility issue.

I ask unanimous consent that these photographs, together with the résumé of what the descriptions of these photographs are, be made a part of the RECORD.

The PRESIDENT pro tempore. Does the Senator ask that the photographs be made a part of the RECORD?

Mr. REID. I do.

The PRESIDENT pro tempore. The Chair would have to impose an objection at this point.

Mr. REID. These photographs can copy under regular procedure. They will not have to be reproduced as photographs.

The PRESIDENT pro tempore. Will the Senator withhold his request?

Mr. REID. I am happy to. I leave that subject to the review of the Chair to make that determination.

In introducing these photocopies, I have four pictures that show the Grand Canyon. They are very, very descriptive.

The first represents relatively clear conditions observed only about 10 percent of the time. The second photograph represents the median visibility observed during the summer in Grand Canyon; half the days are more polluted than the scene, half are cleaner. The third picture that we have depicts a severely polluted condition that is observed about 10 percent of the time. About 9 days each summer the air is more polluted than this. And the fourth picture is the worst case scenario, Mr. President. This complete whiteout of the canyon is caused by pollution.

These pictures, again, go from the best time in the Grand Canyon to the very worst. And the sad part about it, in the worst case we cannot see Grand Canyon. We might just as well be in a high smog alert time in the middle of Los Angeles or New York.

It would seem to me that we need to protect the vistas in our national parks. I had the opportunity of preparing an article for a national magazine that dealt with this visibility problem. This is something the Clean Air Act must also address.

As I have indicated, Mr. President, I have spoken with Senator BAUCUS and he is also aware of the problem. I think we can work something out in this legislation so that visibility is one of those things we are concerned about with clean air legislation.

There are other problems that I have with this legislation which I discussed in the committee and discussed with the chairman and Senator BAUCUS. One is, in the Western part of the United States we have done a good job of cleaning up our coal-fired generating facilities. Under this legislation there is about $20 billion of marketable value in allowances; that is credits. But only about $1 billion of the $20 billion would be available to the Western United States; this seems to us in the West to be unfair because we have already paid once. Therefore why should we pay again so we can address some of our growth problems? This is something that will come up and we will have to discuss on the floor in the future. Another important problem with the legislation is the 14 traffic control measures in the bill. There is some question, in the legislation now, as to whether each of the 14 measures are mandatory or whether the legislation leaves the State some discretion in crafting an effective implementation plan. The chairman, Senator BAUCUS, feels there is discretion allowed. At the very least, I think what we need to do, as we proceed with this legislation, is, through a colloquy or some other action on the floor, give the States some leeway so the States do not feel it mandatory that each one of these 14 has to be addressed, especially if it may not be in the best interests of the respective States or communities.

I think another thing that this clean air bill addresses, and I think rightfully so, is transportation in general.

We hear a lot about coal-fired electrical generating facilities and we know what a concern that is to States that are high volume producers of coal. But I hope this legislation will send a message that the main polluter we have in the country today is the automobile. Until we recognize that fact, we are not going to be able to satisfy clean air problems effectively. Transportation is the area we must look to.

In Nevada, especially the southern part of the State, we did not have traffic problems. That is one of the reasons we have had the quality of life that is causing thousands of people to move to Clark County each month. Estimates are that from 5,000 to 6,500 new residents are moving into that county each month. The attraction is the quality of life. But we are beginning to see traffic problems.

As a result of this, on the 15th of February, we are going to have a transportation summit in southern Nevada. This summit will provide the forum to talk about some of the traffic problems we have in the area.

We have to look at all areas that deal with traffic. We know our airports are becoming increasingly congested. There is not much capacity left in our airports around this country.

We also recognize the more traditional method of long distance travel, on trains, is not working well. Amtrak is doing the best it can, but it is also limited in capacity. And, of course, as I have already indicated, our highways are jam-packed.

During the hearing we had in the Environment and Public Works Committee, it was estimated that, if Florida continues its present rate of growth, by the year 2000, 22 lanes of freeway-type highways will be needed from the top to the bottom of that State. We simply cannot continue to build and maintain super highways; we must look at new solutions.

I think Congress should address itself to the fact we do need new solutions. One of the areas we need to look at, and this bill should remind us, is other ways to transport people.

It used to be, Mr. President, that Congress was involved in research and development. If there was a program that looked favorable, looked promising, Congress would appropriate money for research and development in an effort to stimulate the private sector to investigate the new program from a technological and feasibility standpoints. Then, if it was practical, the private sector would take over.

There are numerous such examples in the history of this country. My favorite occurred in 1844. In 1844 a man suggested to Congress there was an invention that, if it would work, would revolutionize the communications industry. So, Congress in 1844 appropriated $40,000 to build a telegraph line from Washington, DC, to Baltimore. That money was appropriated, and in fact the man was right, it did revolutionize the communication industry, not only in the United States but throughout the world. After that small investment, the private sector took over. We have to do the same type of thing in this country regarding transportation.

Mr. President, in the early 1960's two scientists were stuck in traffic in Manhattan, repeatedly. They looked at one another and said, "We should do something about this. We should not be stuck in traffic. What can we do about it?" These two men went back to their laboratories at MIT and invented magnetic levitation.

In 1971 Congress decided they would no longer fund research and development on that program. As a result of that action, the research and development for this very promising program was curtailed in the United States.

The magnetic levitation transportation system is now something that is not controlled by the United States; it

has been developed in Japan and Germany.

There are areas in the United States, Mr. President, where magnetic levitation has tremendous potential for the future. It will happen, and we, in Congress, could speed this up. There is a program being considered in Florida. The States of California and Nevada have entered into a bi-State contract, the two legislatures have approved moneys, and are now in their third year of working out a program to carry people from southern California to southern Nevada and back. Remember, this magnetic levitation is the wave of the future.

These transportation systems can travel over 300 miles an hour, carrying thousands and thousands of people, with no attendant air pollution or sound pollution in the immediate vicinity. It is something that we as a Congress should be reminded about when we talk about clean air.

Until we do something about the automobile, that is try to move people more rapidly, we are going to continue to have problems. That is why some of the things that have been done in the Environment and Public Works Committee, led by Senator MOYNIHAN, on magnetic levitation, are things the whole Congress should be interested in.

We have money that has been appropriated but not authorized to have the Corps of Engineers begin a thorough review and study of magnetic levitation. That is something that we need to do. There is legislation that has been introduced to allow up to $10 billion to be borrowed from public pension and profit-sharing programs for the purposes of research and development into magnetic levitation. These moneys could be borrowed, and they would be guaranteed by the Federal Government.

It is important that we do this. We cannot cede yet another industry that we have invented to either Germany or Japan to develop. We should develop this ourselves. There will be magnetic levitation transportation systems in this country. Why should we not be the ones who do the research, the development and the manufacture of these systems?

As we look at the clean air bill, and a great deal of work has gone into this bill, it is important that we be careful and understand that legislation is only "the art of the possible." We have to come up with legislation that can pass this body and pass the other body. It is important we get the job done.

I look forward, as the bill works its way through the Senate, in assisting the able work of the Senator from Montana. I certainly recognize that many people have problems with the legislation, but we also have to recognize how the American people feel, as indicated from this poll that I talked about earlier. Do you agree or disagree with the following statement:

Protecting the environment is so important that requirements and standards cannot be too high and continuing environmental improvements must be made regardless of cost.

Seventy-four percent of the American public said "yes." It is important that we do our job as legislators, set proper public policy and meet what the American public wants; that is, clean air.

The PRESIDENT pro tempore. The request that was earlier made by the distinguished Senator from Nevada [Mr. REID], in which he asked that certain photographs appear in the RECORD, the Chair respectfully calls to the attention of the Senator title 44, section 904, CONGRESSIONAL RECORD, Code of Laws of the United States.

Maps, diagrams, or illustrations may not be inserted in the RECORD without the approval of the Joint Committee on Printing.

Did the Senator have another part of his request that dealt with printed matter? If so, perhaps he would like to renew that request.

Mr. REID. Yes, Mr. President, I appreciate that, and recognizing the Presiding Officer's knowledge of the laws and the rules of this body, I amend my request and ask that there be allowed to accompany my statement a summary of the pictures as I have outlined them in my statement.

The PRESIDENT pro tempore. A summary explanation of the pictures.

Mr. REID. That is right.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

NATIONAL PARK SERVICE VISIBILITY PHOTOGRAPHS DEMONSTRATE VISIBILITY DETERIORATION IN THE WEST FOR CURRENT AND FUTURE POLLUTION LEVELS

Four photos taken of the Grand Canyon by the National Park Service as part of the visibility monitoring program, were presented. Since 1979, the NPS has been monitoring visibility in national parks throughout the country as part of the visibility protection program required by the 1977 Amendments to the Clean Air Act.

All four photos are taken at 3:00 PM during the summer on days when clouds were not present and when man-made pollution accounted for most of the visibility impairment observable in the photos. The pollution conditions depicted in the four scenes reflect the distribution of summertime visibility observed in the Grand Canyon since this monitoring program was commenced.

Photo #1. The first photo represents the relatively clear conditions observed about 10% of the time. Approximately nine days out of the summer, the air is this clean or cleaner.

Photo #2. The second scene represents the median visibility day observed during the summer in the Grand Canyon. Half of the days are more polluted than this scene, and half cleaner.

Photo #3. The third scene depicts the severely polluted conditions that are observed 10% of the time. About nine days each summer the air is more polluted than this.

Photo #4. A worst-case day. This complete "white-out" of the Canyon is caused by pollution.

Half of the visibility impairment on the median day (photo #2) is caused by sulfate ($-SO_4$), which is formed in the atmosphere from the chemical conversion of sulfur dioxide (SO_2). In the West, most SO_2 is emitted by coal-fired power plants and copper smelters. When the clean day (photo #1) is compared with the high pollution day (photo #3), most (about 70%) of the difference in visibility between the two days is caused by sulfate. Sulfur dioxide is the major culprit in the obliteration of the West's scenic beauty.

IMPACT OF EMISSION GROWTH ON VISIBILITY

The NPS has analyzed EPA's projected increases for SO_2 in the West. If SO_2 emissions double by 2010 as EPA expects, then the impact on visibility throughout the West will be largely predictable. An analysis was prepared to assess the deterioration of visibility in seven western parks. The pollution will not be limited only to the national parks. It will include all the West.

According to the NPS analysis, the increased pollution will affect all parks. Averaged regionwide, the clean days will nearly disappear (decrease to about 5 per summer), the visibility degradation seen on the median day will occur 65% to 70% of the days instead of only half of the days, and the high pollution days will increase from 9 per summer to 27-36 each summer. By 2010, it will be six times more likely that a visitor to a national park in the West will experience a high pollution day than a clean day.

The PRESIDENT pro tempore. The Senator from Montana [Mr. BAUCUS] is recognized.

Mr. BAUCUS. I thank the Chair.

Mr. PRESIDENT, the Senator from Nevada has made a very valuable contribution to the bill. He mentioned two or three areas where he has some concerns. We have spoken, the Senator and I, about each of them.

The latter concern, the one considering transportation control measures particularly, is one we discussed very briefly about half an hour ago. I would like to point out to the Senator page 219 and page 220 of the bill and page 44 of the committee report language of the bill, plus language of the report that is intended to show that transportation control measures need not be enacted by they are not necessary.

I do not wish to engage in debate with the Senator from Nevada, but I point out those provisions now to the Senator so he can look at them and determine whether or not in his judgment those provisions meet his concerns. If they do, fine. If they do not, well, we have to then find some accommodation if we possibly can.

I would like now to point that out to the Senator so in due course we can work out any potential problem that may or may not occur. I think it is basically worked out with the language of the bill that I referred to with the accompanying language of the committee report, which I also referred to.

Mr. REID. If the Senator will yield, I appreciate very much the statement he just made. As the Senator knows, there is a lot of misinformation floating around about this legislation.

The information that I received from the State of Nevada regarding concerns that we have along the Las Vegas strip is that some of these measures simply would not work.

It appeared clear to my staff that the information in the bill and the report is as indicated by the Senator from Montana. Certainly this colloquy he and I entered on this floor substantiates that.

I thank the Senator.

The PRESIDENT pro tempore. The Senator from Rhode Island [Mr. CHAFEE] is recognized.

Mr. CHAFEE. I want to thank the Chair. First I want to commend the Senator from Nevada for his statement. He, as has been mentioned, is a valuable member of the Environment Committee and has given a good deal of thought to the matter that is currently before us.

I would also like to say to the Senator from Nevada, in view of the rules regarding the printing of pictures in the RECORD, if he should have copies of those pictures showing the air pollution in his particular area—I think he is referring to the Grand Canyon—I, for one, would be glad to seek to either receive copies or take a look at the copies he may have, if that would be helpful. It would be helpful to me.

Mr. REID. Again, if the Senator will yield, I will take the Senator up on his offer. I will show these to the Senator from Rhode Island at his earliest convenience, because even though I am going to do the best I can to summarize what these pictures show, the human eye could not be more in tune with what really is happening in the Grand Canyon. It simply goes from being able to see for much more than 100 miles to being unable to see beyond the nearest rim in front of you as a result of air pollution.

AMENDMENT NO. 1219

(Purpose: To amend title VII to control methyl chloroform pollution)

Mr. CHAFEE. Mr. President, I send an amendment to the desk on behalf of myself, Mr. BAUCUS, Mr. MITCHELL, Mr. DURENBERGER, Mr. JEFFORDS, Mr. LIEBERMAN, and Mr. WARNER, and ask for its immediate consideration.

The PRESIDENT pro tempore. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Rhode Island [Mr. CHAFEE], for himself, Mr. BAUCUS, Mr. MITCHELL, Mr. DURENBERGER, Mr. JEFFORDS, Mr. LIEBERMAN, and Mr. WARNER, proposes an amendment numbered 1219.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

Amend S. 1630 by striking line 4 on page 557 and inserting in lieu thereof the following:

"'SEC. 508. (a) NATIONAL POLICY.—The Congress hereby declares it to be the policy of the United States that the production and use of ozone depleting substances listed under subsection (b) of section 504 are to be monitored closely and controlled in such a manner as to assure that the production and use of such substances will not—

"'(1) increase the peak chlorine loading that is projected to occur with interim chlorofluorocarbin emission controls followed by a year 2000 global phase-out of all halocarbon emissions (the base case);

"'(2) reduce significantly the rate at which the atmospheric abundance of chlorine is projected to decrease under the base case; or

"'(3) delay the date by which the average atmospheric concentration of chlorine is projected under the base case to return to a level of 2 parts per billion, the highest concentration at which repair of the Antarctic ozone hole may be possible.

"'(b) MONITORING GROWTH IN PRODUCTION AND USE.—The Administrator shall monitor and not less often than every three years following enactment of this title submit a report to Congress o the production and use of substances listed under subsection (b) of section 504. Such report shall include data on domestic production compiled under section 505 and an estimate of worldwide production and use of such substances.

"'(c) MONITORING ATMOSPHERIC CONCENTRATIONS OF CHLORINE.—The Administrators of the National Aeronautics and Space Administration and the National Oceanic and Atmospheric Administration shall monitor and not less often than every 3 years following enactment of this title submit a report to Congress on the current average tropospheric concentration of chlorine. Such reports shall include, under the base case as well as on the basis of current international and domestic controls on substances covered by this title, updated projections of—

"'(1) peak chlorine loading;

"'(2) the rate at which the atmospheric abundance of chlorine is projected to decrease after the year 2000; and

"'(3) the date by which the atmospheric abundance of chlorine is projected to return to a level of 2 parts per billion.

"'(d)(d) PHRASE-OUT SCHEDULE FOR METHYL CHLOROFORM.—In the absence of regulations promulgated in accordance with subsection (b) of section 506 establishing earlier dates—

"'(A) effective on the date of enactment of this title, it shall be unlawful for any person to produce methyl chloroform in annual quantities greater than that produced by such person during calendar year 1989;

"'(B) effective January 1, 1996, it shall be unlawful for any person to produce methyl chloroform in annual quantities greater than 50 per centum of that produced by such person during calendar year 1989; and

"'(C) effective January 1, 2000, it shall be unlawful for any person to produce any quantity of methyl chloroform.'".

Mr. CHAFEE. Mr. President, the amendment I have submitted on behalf of myself and the Senators I just listed is to phaseout the production of a chemical that is destroying more of the fragile ozone shield than most of the chlorofluorocarbons, the CFC's, we hear so much about.

The chemical that we are talking about in this amendment is methyl chloroform, which is a solvent used for cleaning or degreasing metals. It is also used as a component of certain adhesives or coatings, such as paints. I briefly will give a summary of the amendment.

As I discussed in my opening statement last week in connection with the entire clean air bill, title VII of that bill, which is S. 1630, adds a new title V to the Clean Air Act, and the purpose of this new title V is to control CFC's and other chemicals that are destroying the Earth's ozone shield.

This amendment adds the first part of section 508 to create a control program for methyl chloroform. The bill already includes a control program for CFC's, halons, and carbon tetrachloride.

Another amendment adding a control program for all other substances covered by this new title, section V, primarily is a class of hydrochlorofluorocarbons, in other words, HCFC's. That will be offered later. That has nothing to do with the amendment that is before us now. This amendment is solely concerned with methyl chloroform. It has nothing to do with HCFC's.

The amendment we are offering today provides that effective upon the date of enactment of the amendment, the production of methyl chloroform will be frozen at 1989 levels. Allowable production will then be reduced. First we have the freeze based on the 1989 levels. Then the next step is that production will be reduced by 50 percent from that base by the year 1995, and production will be completely eliminated by the year 2000, 10 years from now.

What are the primary uses of methyl chloroform? That is a great big title. What does it mean, and what are these used for?

The largest single use of methyl chloroform—about 60 percent—is for vapor degreasing and cold cleaning in the metal cleaning industry. It is a solvent used to remove organic compounds such as grease and oil. That is 60 percent.

About 12 percent is used in aerosols as either an active ingredient or as a solvent of other active ingredients.

OK. So we start with 60 percent for the degreasing. Twelve percent is used in these aerosols. Adhesives make up around 9 percent of the methyl chloroform market.

The electronics industry uses about 6 percent, primarily to remove solder flux from printed circuit assemblies.

Around 3 percent is used by manufacturers, printers, and users of decorative coatings and inks.

So that is what methyl chloroform is used for.

The next logical questions is: As a result of a piece of legislation that has a 50-percent phaseout by the year 1995 and a 100-percent phaseout by the year 2000, are there substitutes available? The answer is yes.

Last June, a report of the Montreal Protocol's technical review panel—which is an international panel of experts, not just Americans but an international group—concluded that "substances currently exist for 90 to 95 percent of the methyl chloroform uses." A draft report by EPA agrees with that conclusion and says that for all end-users of methyl chloroform, technically feasible technologies are already available to reduce the use of methyl chloroform more than 50 percent by the year 1991 and to eliminate its use completely by the year 2000.

What are these substitutes that EPA and the international panel have identified?

They include water-based cleaning systems; alcohol-based solvents; water-based systems for aerosols, adhesives, and coatings; nonchlorinated solvents such as petroleum distillates; and other technologies such as powder coatings and hot melt adhesives.

Data prepared for an industry-sponsored study in November 1989 showed that for all uses of methyl chloroform, alternative substances or processes are available and are being employed by significant portions of the market.

For example, metal cleaning in this country uses almost 500,000 metric tons of solvent every year—500,000 tons a year—but only 31 percent of that is methyl chloroform. That means that nearly 70 percent of the market is already using substitutes that are currently available.

This pattern is repeated in every use category.

It is important, Mr. President, to understand the approach being offered by this amendment. The limitations and ultimate prohibition on production do not prohibit recycling or production for use as feedstocks. The amendment does not place limits on the allowable uses of methyl chloroform. It only looks at production. In other words, it is not saying you cannot use it. It says you cannot produce it. But you can recapture that that has been used and use it over again. So recycled and existing stocks could continue to be used after the year 2000 when production is prohibited.

What is the rationale for this amendment? In August of last year an international science assessment panel, established under the Montreal protocols issued a United Nations Environment Programme, also known as UNEP, report and presented several scenarios highlighting the need to control the growth and use of all ozone-depleting substances, including methyl chloroform.

The panel established the following points: First, the current atmospheric concentration of chlorine is approximately three parts per billion, which is a record high level.

Two, peak chlorine loading is increasing and will continue to increase for several years.

Three, increases in chlorine loading will increase the risk of significant ozone depletion over the Northern Hemisphere, similar to that that we have seen and heard so much about over Antarctica and the Southern Hemisphere.

Four, an atmospheric chlorine concentration of 2 parts per billion is the maximum allowable level if the Antarctic ozone hole is to be repaired.

Five, the production and use of methyl chloroform and other ozone-depleting substances may affect peak loadings of chloroform; will affect the rate at which the atmospheric abundance of chlorine is projected to decrease, in other words, to bring it down; and, finally, may affect the date by which the average concentration of atmospheric chlorine is expected to return to 2 parts per billion.

The conclusion suggested by the recent UNEP presentation is that in addition to eliminating the CFC's currently regulated under the Montreal protocol as rapidly as possible, additional controls on methyl chloroform are necessary. The Montreal protocol dealt with the CFC's but it also said we should get on with controlling methyl chloroform.

Because of its high production volume of approximately 1.5 billion pounds worldwide in 1988 and more than 700 million pounds of that in the United States—nearly half of all the methyl chloroform is produced in the United States—methyl chloroform currently represents a significant source of chlorine in the stratosphere. Methyl chloroform has contributed more to current ozone depletion than have six of the eight CFC's that we are worried about—more than six of the eight plus halons currently regulated by EPA. Only CFC's 11 and 12 have contributed more than methyl chloroform to the destruction of the ozone layer. Methyl chloroform is posing more of a threat to the ozone layer than CFC's 113, 114, and 115, the halons, and HCFC 22.

Methyl chloroform is responsible for 13 percent of the chlorine in the atmosphere, which is approximately four times more than the contributions from CFC 113 or HCFC 22.

Now, the good news, Mr. President, is that methyl chloroform has a relatively short atmospheric lifetime, around 7 years, as compared to CFC 12, which has a lifetime of more than 100 years. So the good news out of all of this, Mr. President, is that it is possible to reduce methyl chloroform's contribution to the stratospheric chlorine concentrations, we are able to reduce those far faster than the contributions from the other CFC's because, as I say, methyl chloroform has a short lifespan.

Recent analyses by EPA suggest that the year 2000 phaseout of methyl chloroform would be the single most important source for near-term reductions in stratospheric chlorine levels. If we want to do something about reducing the chlorine levels and we want to do them fast, the route to pursue is to have these limitations on the production of methyl chloroform.

Chlorine from methyl chloroform is almost entirely cleansed from the atmosphere in approximately 20 years, whereas significant quantities of chlorine from the CFC's remain, as I said earlier, for 100 years. Thus, controls on methyl chloroform emissions will reduce stratospheric chlorine levels more rapidly than controls on any of the CFC's. That is the positive thing, if we ban the production, as we do in this amendment, by the year 2000.

However, allowing methyl chloroform to remain unregulated would lead to higher concentrations of chlorine and would increase the risk of ozone loss over heavily populated areas in the Northern Hemisphere.

This chemical can and must be eliminated by the year 2000.

Now, we have all dealt with this a good deal, Mr. President, but I just want to briefly touch on the point of why worry about all of this.

What do CFC's have to do with us? Many may know it, but it bears repeating. CFC's, methyl chloroform, the halons and some HCFC's destroy the ozone layer which is 20 to 35 miles up above the globe. So what? What do we care about the ozone layer? The ozone layer is that filter which takes out the ultraviolet rays from the sun and prevents those ultraviolet rays from descending not only on the human population of our globe, but on the plant life of this world which we are all riding upon.

Clearly, permitting the continued destruction of the ozone layer permits these increased number of ultraviolet rays and the intensity of them to come down upon our earth, increases skin cancers dramatically, increases the incidence of cataracts, destroys the immune system of human beings, and radically affects plant life in our world.

Unless something can be done about this destruction of the ozone layer, which we are doing pursuant to this legislation, our world is going to be in very, very difficult straits. Incidentally, the CFC's also contribute to between 15 and 20 percent of the global warming which we are also concerned about. The two great international

global concerns are the destruction of the ozone layer, and the warming of our globe.

No reputable scientist now questions the fact that the chlorine loadings in the stratosphere are destroying the ozone layer. That has been debated, and now there is no doubt left.

So by controlling these CFC's and the methyl chloroform and the halons we are getting a tooth in them. We are preventing the destruction of the ozone layer, and we are preventing or reducing the warming of the globe.

So this is a good amendment, Mr. President. I urge our colleagues to support it.

The PRESIDING OFFICER (Mr. BREAUX). Is there further debate?

Mr. BAUCUS addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I support this amendment offered by the Senator from Rhode Island.

This amendment freezes and phases out the production of methyl chloroform which along with CFC's and halons is responsible for the destruction of the protective ozone layer.

This amendment freezes production of methyl chloroform at 1989 levels upon enactment of the bill.

And it phases out production first by 50 percent by 1996 and then completely by 2000.

It is modeled after a proposal that the United States has made to other nations. A proposal to strengthen the Montreal protocol—to reduce the threat of damage to the protective ozone layer as quickly as possible.

The ozone layer, Mr. President, is needed to block harmful ultraviolet ray which cause skin cancer, cataracts, and even death. We have learned that this protective layer now has a hole 10 million square miles large, and about 70,000 feet above us. We have also learned that CFC's, halons and other ozone depleting substances are responsible for the depletion of the stratospheric ozone layer.

As a consequence, many countries of the world signed what is known as the Montreal protocol. The protocol calls for a 50-percent phaseout of CFC's by the year 2000. Many countries are now beginning to implement the protocol.

By every account, the Montreal protocol was a bold and ground-breaking step. For the first time, nations of the world agreed to a coordinated assault on a global environmental threat—CFC's and the destruction of the straospheric ozone.

But we now know that the Montreal protocol did not go far enough. We now know that unless we reduce and eventually eliminate all ozone depleting substances—CFC's, halons, carbon tetrachloride, methyl chloroform, and others—we will not be able to save the stratospheric ozone from destruction.

Mr. President, in August of last year, the United Nations Environment Programme [UNEP] issued a report that confirmed our worst fears. The report strongly stated the need to control growth and use of all ozone depleting substances—including methyl chloroform—if we are to save our protective ozone layer.

The report made several noteworthy conclusions that are relevant to this debate.

First, chlorine loading in the atmosphere will increase the risk of significant ozone depletion over the northern hemisphere, similar to that occurring over Antarctica and the southern hemisphere.

Second, chlorine loading is at a record high—3 parts per billion. This may not seem like much, but 2 parts per billion is the maximum level we can allow if we are to repair the Antarctic ozone hole. And getting to this level requires that we control additional substances like methyl chlorine.

Finally, chlorine loading is increasing and will continue to increase for several years. Even if we phase out methyl chloroform by the year 2000, as this amendment does, chlorine levels will increase to 3.5 parts per billion. If we wait until 2030, chlorine levels will increase to 3.9 parts per billion—a 45-percent increase in risks from today's levels.

Mr. President, the use and production of methyl chloroform is significantly increasing chlorine levels in the atmosphere. And by doing so it is destroying the stratospheric ozone.

This is occurring for several reasons.

Methyl chloroform which is used in solvents, degreasers, aerosals, electronics and other products is currently produced and used in large volumes. Worldwide, over 1½ billion pounds was produced in 1988. The United States produced about half of this amount.

To put this in perspective, this is roughly equivalent to the total production of all CFC's combined.

Moreover, methyl chloroform—which has three chlorine atoms—is extremely destructive to the ozone layer because of its chlorine. Methyl chloroform contributes 13 percent of the chlorine content in the atmosphere. Four times more than CFC-113 or HCFC-22.

However, unlike CFC's, methyl chloroform has a short atmospheric life. The lifetime of methyl chloroform is only 6 to 7 years compared to CFC's which stay around for 60 to 120 years.

The short atmospheric lifetime of methyl chloroform provides us with a golden opportunity.

It allows us to reduce the amount of chlorine in the atmosphere significantly faster than from any of the CFC's.

And it provides us with an opportunity to reduce—more quickly—the amount of stratospheric ozone loss.

In fact, EPA has concluded that:

A phaseout of methyl chloroform would be the single most important source for near-term reductions in stratospheric chlorine levels.

EPA went so far as to say that a phaseout of methyl choloride is:

The most effective means of limiting increases in peak chlorine concentrations and in achieving significant near-term reductions in stratospheric chlorine concentrations.

In addition to these near-term benefits, there are some significant long-term health benefits from reducing and eliminating methyl chloroform.

By reducing chlorine levels and restoring the stratospheric protective ozone, some 3.6 million cases of nonmelanoma skin cancer in the United States will be avoided from now through the year 2075.

Again, 3.6 million cases of skin cancer—this is the nonmelanoma skin cancer—in the United States alone will be avoided from now until the year 2075.

Sixty-five thousand cancer deaths will be avoided, and more than 300,000 cases of cataracts will be avoided from now through the year 2075.

According to EPA, the benefits of phasing out methyl chloroform range from $89 to $348 billion, to the year 2075. These benefits far exceed the costs of phasing it out, estimated by EPA range from $42 to $58 billion for that same period of years.

Finally, this amendment is not asking us to do the impossible. Both EPA and the experts on the Montreal protocol's technical review panel believe that reducing or eliminating methyl chloroform is technically feasible. According to the experts, low ozone depleting alternatives are available for all end-users of methyl chloroform.

Adding methyl chloroform to the list of ozone depleting substances to be phased out by the year 2000 therefore makes good sense. Eliminating methol chloroform reduces chlorine levels in the atmosphere more quickly, as I said, than any other substance.

I strongly support the amendment and urge my colleagues to accept it.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is noted. The clerk will please call the roll.

The legislative clerk proceeded to call the roll.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURENBERGER. Mr. President, I support this amendment. Removing methyl chloroform as a contributing factor to chlorine levels in

the atmosphere is a necesary step, if we are to prevent further destruction of the ozone shield which protects Earth from ultraviolet radiation. It is a step that can be taken within the timeframe required by this amendment.

The amount of methyl chloroform used in the United States is 700 million pounds per year. That exceeds the use of all of the chlorofluorocarbons which are clearly linked to ozone depletion.

Methyl chloroform has a shorter atmospheric life than the CFC's. Molecule-for-molecule, methyl chloroform is, therefore, less of a threat than the CFR's. Nevertheless, 13 percent of the chlorine in the atmosphere is contributed by methyl chloroform emissions at current levels.

If we do not take action to control methyl chloroform, production and emissions may increase substantially. This chemical is a substitute for the CFC's in some uses. It is also a substitute for some of the organic solvents which are likely to be regulated as hazardous air pollutants under title III of this legislation. A dramatic increase in emissions of methyl chloroform may occur, as emissions of these other substances are controlled.

Mr. President, it is clear that the world will need to take steps beyond the Montreal protocol, if the thin layer of ozone which protects the Earth from ultraviolet radiation is to be preserved.

As we all now understand, various long-lived, manmade compounds containing chlorine and bromine atoms are rising high into the stratosphere where they are broken down by the Sun's radiation. The chlorine and bromine atoms are released and begin a chemical reaction which results in the destruction of ozone molecules.

The principal culprits in this threat to our atmosphere are the chlofluorocarbons and the halons, but other chemicals inlcuding carbon tetrachloride and methyl chloroform also play a role. CFC's include freon used in air conditioning and refrigeration. CFC's are also used to clean computer chips and as foam blowing agents in everything from home insulation to the packages which keep fast food hot. The halons are used principally in fire extinguishers. Methyl chloroform is a solvent used in a variety of commercial and industrial uses, primarily to clean metals in manufacturing.

The ozone in the stratosphere is critical to life on Earth. It reduces ultraviolet-B radiation which would otherwise reach the Earth's surface. This radiation causes human skin cancer and cataracts. It will also damage crops and may destroy the minute life forms at the surface of the ocean which are the foundation for the marine food chain.

There is some chlorine in the atmosphere from natural sources. It is estimated that background chlorine levels are about 0.6 parts per billion. By the 1970's, man's activities had increased that concentration to 2.0 parts per billion. It was early in the 1970's that scientists first determined that the CFC's could do significant damage to the ozone shield. Acting on this scientific concern, the United States banned CFC's as a propellant in aerosol cans. But emissions from other sources continued to grow and quickly eroded the progress that had been made.

The most dramatic evidence of the impact of these chemicals on the stratospheric ozone shield was discovered in the mid-1980's as a hole in the ozone layer over the Antarctic during the winter and spring months in that region. The hole is measured as a 50-percent reduction in the total amount of ozone between the Earth's surface and the edge of the atmosphere over a 10 million square mile area. Ozone depletion of 95 percent occurs in the upper reaches of the stratosphere in these annual episodes.

By the time the ozone hole was recognized by scientists as a serious phenomenon began to form when chlorine levels had reached about 2.7 parts per billion in the atmosphere. As chlorine levels have increased over the past decade, the hole has generally become more severe.

Discovery of the ozone hole spurred action on the Montreal Protocol to Protect the Ozone Layer. The protocol freezes worldwide production of the CFC's at 1986 levels. It reduces production by 50 percent by 1998. The protocol also freezes production of the halons which are made in smaller quantities, but which contain bromine and are generally thought to be even more threatening to the ozone shield; 50 nations have signed the protocol and it went into force on January 1, 1989.

The protocol was a significiant accomplishment for the governments of this fragile planet. But it will not be enough. Depletion in the ozone shield over midlatitudes including depletion over the Northern Hemisphere has been discovered since the protocol was signed. And chlorine levels continue to increase.

The ozone hole was discovered when chlorine levels reached approximately 2.7 parts per billion. We are now approaching 3 parts per billion. If no further steps beyond the protocol are taken, chlorine levels will continue to increase dramatically reaching more than 12 parts per billion by the end of the next century.

Mr. President, it will be along time before this problem is corrected, no matter what we do. The CFC's have atmospheric lifetimes of 60 to 120 years. CFC's which we have already released will remain in the atmosphere for that period of time.

The best atmospheric scientists from around the globe have developed a model which projects the atmospheric chlorine levels that will result from various strategies. As I said a moment ago, if we do no more than the Montreal protocol, chlorine levels will continue to increase through the next century rising to levels in excess of 12 parts per billion.

It appears however, that we can keep the peak chlorine loadings under 4 parts per billion and return to levels near 2 parts per billion—levels which existed before the ozone hole was discovered—by the year 2075, if we phase out the use of the most serious ozone depleting chemicals over the next decade.

The chemicals which must be eliminated from commerce by the end of the next decade are the chlorofluorocarbons, the halons, carbon tetrachloride and methyl chloroform. In addition, the so-called HCFC's, which may serve as substitutes for the CFC's in a transitional period, must be eliminated by the year 2030.

Again, if we take these steps, we can limit the peak chlorine loading to just 3.6 parts per billion and we can, by the year 2075, return to chlorine levels which existed before the ozone hole was discovered; that is, 2 parts per billion. Taking methyl chloroform out of the picture by the end of the 1990's is most important in keeping the peak loadings down. If we simply freeze methyl chloroform production levels, the peak loading will climb to 3.9 parts per billion. And if we do nothing at all, it is likely to climb much higher.

Mr. President, I have a table showing the impact of the various elements of this strategy which I ask unanimous consent be printed in the RECORD.

There being no objection, the table was orderd to be printed in the RECORD, as follows:

Strategies to control atmospheric chlorine levels (cholorine in parts per billion in 2075)

Montreal protocol reductions in CFC's (50 percent by 1998)	10.95
Year 2000 phaseout of CFC's and halons	8.30
Year 2000 phaseout of carbon tetrachloride	5.38
Year 2000 phaseout of methyl chloroform	3.02
Year 2030 phasehout of HCFC's	2.29

Mr. DURENBERGER. The phaseout required by this amendment can be achieved. Methyl chloroform has a variety of uses, but in no case is it the dominant chemical in the market for any particular use. There are substitutes. A study published last summer indicated that a 90- to 95-percent phaseout over the next decade is a realistic goal.

We may hear during the debate on this amendment about the plight of

the many businesses which depend on methyl chloroform in the formulation of specific products or in manufacturing applications. I am more than sympathetic with the concerns that will be expressed. I have met with constituents from my own State on this subject and have learned that methyl chloroform is an essential element of some products manufactured by Minnesota-based companies.

I do have the jobs which depend on those products in mind as we debate the Clean Air Act here on the floor of the Senate. Nevertheless, I believe that substitutes for all the uses of this chemical can be developed and that the pressure of a definite phaseout date will speed the research on these substitutes.

We have been too often surprised by the impact of these chemicals on the ozone shield and on the Earth's climate system. The ozone hole was not expected. The ozone depletion over the midlatitudes came sooner and is deeper than was predicted. We must not be slow to respond to this threat.

Ultraviolet radiation has several effects at the surface of the Earth. It causes skin cancer and cataracts in humans. It may also suppress the human immune system. It damages crops: cotton, peas, beans, melons, cabbage, and loblolly pines, and may interfere with the production of micro-organisms at the surface of the ocean which are the beginning of the food chain.

Each 1-percent decrease in the ozone leads to a 3- to 6-percent increase in skin cancer. Ozone reductions in latitudes above North America have already been measured in the 3- to 6-percent range.

If we do nothing beyond the protocol, between now and the year 2075, increased ultraviolet radiation will cause an additional 5.1 million nonmelanoma skin cancers—causing 81,000 deaths—46,000 melanoma skin cancers—causing 11,000 deaths—and 876,000 additional cataract cases in the U.S. population alone. And the impacts are global.

Mr. President, I commend the Senator from Rhode Island and the Senator from Montana for offering this most important amendment. I urge the Senate to adopt this measure and the limitation on the production of HCFC's which is to be offered later in this debate as necessary steps to complete our ozone protection policy.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Massachusetts is recognized.

(The remarks of Mr. KENNEDY pertaining to the introduction of S. 2031 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. KENNEDY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF STATE AUTHORIZATION FOR FISCAL YEARS 1990-91

Mr. PELL. Mr. President, at the request of the majority leader and with the concurrence of the Republican leader, I ask the Chair to lay before the Senate H.R. 3792, the State Department authorization bill.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 3792) to authorize appropriations for fiscal years 1990 and 1991 for the Department of State and for other purposes.

The PRESIDING OFFICER. Under the previous order, the Senate will proceed to the consideration of H.R. 3792.

The PRESIDING OFFICER. The Chair will observe that under the previous order, the debate on this bill is limited to 1 hour with the time being controlled by the Senator from North Carolina [Mr. HELMS] and the chairman of the committee, the Senator from Rhode Island [Mr. PELL].

Mr. PELL. Mr. President, I am pleased that the Senate stands ready to approve the fiscal year 1990-91 Foreign Relations authorization bill. This bill contains necessary authorization of activities of the State Department, USIA, and the Board for International Broadcasting. This bill also contains sanctions against the People's Republic of China.

As my colleagues know, getting to this point has been a rather labored process. In view of the somewhat arduous path that leads to this moment, I thought that some brief background would be appropriate.

The bill currently before the Senate is not the House-Senate conference report, House Report 101-343, that the Senate approved on November 16, 1989. That conference report was vetoed by the President because he objected to the Moynihan provision, which prohibited the diversion of funds for purposes for which U.S. assistance is prohibited. I deeply regret this veto of a provision which simply would require the executive branch to obey the law. I sincerely hope that the President's veto does not constitute his approval of Iran-contra type activities or an intention to undertake such activities.

Recognizing that the votes were not there to override the veto, the House introduced, following the veto, a new bill, H.R. 3792, which did not contain the Moynihan provision. The President pinpointed this provision as the sole reason he felt compelled to veto the conference report. The bill currently before the Senate, H.R. 3792 does not contain the Moynihan provision. Otherwise, it is identical to the conference report approved by both Houses of the Congress last November.

Insofar as this bill is identical to the H.R. 1487, except for the Moynihan provision, the conference report language for H.R. 1487, along with the statement of managers and the legislative history of that bill shall constitute the legislative history of this bill. In implementing this legislation I expect the administration to be governed by the legislative history of H.R. 1487, as if that bill had been enacted. In this connection, I call particular attention to the conference report language on Prime Minister Bhutto's Association of Democratic Nations and the call of the report for support for the related work of the Committee for a Community of Democracies-USA [CCD-USA]. Indeed, recent developments in Eastern Europe make this proposal ever more timely.

As I pointed out earlier, this bill contains sanctions against the People's Republic of China—a long overdue response to the brutal repression of the prodemocracy movement. The President assured the conferees last year that he would accept the language in this bill.

These sanctions make it clear that the United States will not resume relations at the level that existed before the June crackdown, much less develop ties further, unless there is a significant improvement in the political and human rights situation in China and Tibet.

The President's need to retain flexibility in the conduct of foreign policy is acknowledged in this bill. It provides two separate conditions under which the President may terminate one or more of the suspensions: First, that he report to the Congress that the PRC Government has made progress on a program of political reform; or, second, that he deems that it is in the national interest to take such action.

However, I would like to make clear my own views that the Chinese have not responded positively to the administration's efforts to improve relations. The Chinese continue to arrest and detain thousands of democracy pro-

testers. They continue to impose martial law in Tibet. They continue to place constraints on Hong Kong's political system as the territory moves toward reversion to China. And they continue to arm the Khmer Rouge in Cambodia. The President has held out his hand to China's leaders and they have slapped it down.

In passing this bill today we send a strong message of Congress' and the American public's continuing concern about events in China. It may not be the last message that Congress has to send.

Finally, I would note that the East European revolutions of the fall of 1989 may make some provisions of this legislation obsolete and will require us to address other State Department issues in an expedited manner. For example, our new relationship with the Soviet Union requires a significant expansion of office space for our Embassy in Moscow and the opening of new consulates in the Soviet Union. Most of this new activity is of an unclassified nature, that is visa and economic work, and could be done in our unfinished new chancery. Therefore, I question the wisdom of spending over $500 million to tear down the existing building and starting over. It would be far cheaper to build a new, smaller, classified facility and to use the existing building for our burgeoning unclassified work.

The PRESIDING OFFICER. Who yields time? The Senator from North Carolina.

Mr. HELMS. I thank the Chair. I yield such time as I may require.

Mr. President, it is always a pleasure to join with the distinguished chairman of the Foreign Relations Committee in any matter, and I am pleased to join him today in presenting for the Senate's consideration H.R. 3792, which is, as has been said, the Foreign Relations Authorization Act for Fiscal Years 1990 and 1991.

As Senator PELL has indicated, this legislation is identical to the conference report on H.R. 1487 with one important exception. Senators may recall that the conference report accompanying H.R. 1487 was passed by the Senate on November 16 of last year. That legislation was vetoed by the President and this is one of those occasions when Senator PELL and I must agree to disagree agreeably.

The President was right in vetoing it because of the so-called Moynihan amendment, which in effect would make it a crime for executive branch officials to carry out certain foreign policies. It was, in my judgment, an intrusion upon the constitutional prerogatives of the President of the United States.

Shortly after the President issued that veto, a bill identical to the conference report excluding the controversial Moynihan provision was introduced and passed by the House, and that is the bill, H.R. 3792, that is before us now.

Senators will recall that the Senate version of the authorization bill, Senate bill 1160, was originally passed by the Senate last July 21. We considered that bill for 5 or 6 days, as I recall. It was sort of like a root canal, working through all the amendments offered by Senators. But after 5 or 6 days of consideration by the Senate and substitution of the Senate-passed bill for the House-passed version, H.R. 1487, it went back to the House.

Now, I regret the fact that the legislation before us is not as good as the State authorization bill passed by the Senate last July. That was a good piece of legislation. Many excellent provisions of the Senate-passed bill were dropped in conference without so much as even one word of discussion, which was a unique experience for me in terms of dealing with conferences between the House and Senate.

My colleagues on the Foreign Relations Committee know well that the House of Representatives refused to even go to conference until October 5. House Democratic Members apparently delayed action hoping to pressure the Senate into dropping a number of provisions that they had asserted were nongermane under the House rules.

Of course, the Senate does not operate under the rules of the House of Representatives, and I am thankful for that. The purpose of a conference always is to harmonize House and Senate versions of legislation, not to arbitrarily eliminate the Senate. But that is exactly what happened.

I, like every member of the House Foreign Affairs Committee, but I am bound to observe that they were arbitrary and I think the record will show that they were.

In any case, we finally did get to a conference in October, and the conferees on the House side took the interesting position that they would not even consider more than 50 provisions of the Senate-passed bill. They said, "No way; we are not even going to consider them."

Some of these sections fell within the jurisdiction of committees other than the House Foreign Affairs Committee, but approximately 30 of them were solely within the purview and jurisdiction of the Foreign Affairs Committee.

The Republican Senate conferees took the position that all Senate provisions should be conferenced, but we were forced to submit to the wishes of the majority. And our Senate Democratic colleagues decided that the best strategy was to yield on all of these 50 items. I regret that they came to that conclusion, but I can understand it.

I was sorry to see this massive retreat and I hope all Senators will understand that some of us tried to preserve the Senate provisions.

All that aside, H.R. 3792, which is at the desk now pending, does represent fulfillment by the Senate Foreign Relations Committee of its responsibility to authorize State Department operations for the current year and the next fiscal year. Even more important, it includes many excellent substantative provisions addressing foreign policy as well as State Department management issues.

SANCTIONS AGAINST COMMUNIST CHINA

The bill before us today includes wide-ranging sanctions against the Communist Chinese regime responsible for slaughtering thousands of its own citizens last June for the simple crime of advocating and pleading for freedom. That is all they did. And many, many, many young people were slaughtered.

These sanctions are among the most important, if they are not the most important, provisions of this bill. They are found under title 9 which provides for a suspension of United States programs for the People's Republic of China, which means Red China, Communist China, brutal China, as we all recall that week last June in Tiananmen Square.

Americans watched in horror last June as so many young people and other citizens were massacred by the Communist regime just because they were pleading for freedom. I think the American people will long remember that one Chinese young man standing down an entire column of tanks dispatched to massacre those demonstrating for freedom. Certainly it is indelible in my memory, and I think it is with countless millions of other Americans.

Unfortunately, since the massive crackdown in Communist China last June, the situation there, as Senator PELL has eloquently said, has continued to deteriorate. The Chinese Government, after having killed thousands of pro-democracy demonstrators, has engaged in a systematic campaign to imprison and intimidate thousands of others. In response to the massacre in Tiananmen Square, President Bush did mandate some initial sanctions, but the subsequent actions of the Communist Chinese regime requires that these initial actions be reinforced with congressionally endorsed sanctions against the Government of the People's Republic of China.

The Senate passed such sanctions during consideration of the State Department authorization bill last July as a part of the Mitchell-Dole amendment.

This amendment provided for wide-ranging and comprehensive sanctions aimed at limiting U.S. support for the Communist Chinese regime, and title 9 of the legislation before us today, I

emphasize, closely follows the wording and the intent of that amendment.

THE MOYNIHAN PROVISION

Perhaps the most controversial item of the State Department authorization bill considered last year was the so-called Moynihan provision. I was pleased that the President vetoed the authorization bill last year over that provision and I was doubly pleased to see the House of Representatives drop that provision from the legislation before us today.

The Moynihan provision represents just another attempt in many to bash President Reagan and Ollie North for the so-called Iran-Contra affair. But the effect of the provision would be beyond mere politics—it would severely hamper the ability of the President to conduct foreign policy by effectively making it a crime for any executive branch official to lend assistance in any fashion to promote foreign policy goals for which U.S. funding is prohibited.

Great effort was undertaken during the course of consideration of the State authorization bill last year to produce some kind of compromise on this provision. Numerous discussions were held between the very able Senator from New York and representatives of the administration. Unfortunately, these talks proved unable to produce a compromise which would address the concerns of the Senator from New York without infringing upon the President's constitutional authority.

PLO TERRORISM

Mr. President, the Palestine Liberation Organization, and its offshoot terrorist groups, for whose actions the PLO is directly responsible, has victimized American citizens. It has given the nod of its head for the kidnaping, injuring, and hijacking of our constituents—of innocent Americans.

Despite the grisly, anti-American record of the PLO, the State Department is now conducting face to face negotiations with these terrorists. I said at the time these negotiations started, and I say again—it is a mistake to negotiate with terrorists.

Terrorism is nurtured on the belief that violence against innocent men and women and children can, over time, produce tangible political results. By initiating negotiations with the PLO, the State Department gave this terrorist organization such a tangible political result.

Unfortunately, I fear that over the long run, terrorism will be encouraged by the State Department's recognition of the PLO, and acceptance of this terrorist group as a legitimate player in the Middle East.

The PLO claims it is "the sole legitimate representative of the Palestinian people." It has conducted a campaign for decades now to force acceptance of this claim, using the barrel of a gun, the complicity of the United Nations and now, the words of the U.S. Department of State.

But in fact, Arafat and his band of terrorists represent no one but themselves. He and his cronies have not lived in Israel or Israel's administered territories since 1948. Their initial goal is to supplant the traditional Arab social, economic and political structure in Israel's territories, and then, destroy Israel itself.

It has been reported that during the uprising in Israel's territories, more Arabs have been killed by fellow Arabs than Jews have been killed by Arabs. That is because the PLO can only compel adherence to its dictates through force and intimidation. If the events in the territories are any guide, legitimization and the accession to power of the PLO will only snuff out and not enhance Palestinian economic, political, and social rights.

This legislation includes three provisions which address the PLO campaign to legitimize itself through the U.S. State Department and the United Nations.

As my colleagues recall, State Department negotiations with the PLO commenced on the basis of a commitment made by Yasser Arafat in December 1988, that the PLO renounces terrorism, recognizes Israel, and accepts United Nations Resolutions 242 and 338.

Of course, the PLO has not abided by Arafat's commitments. PLO terrorism continues under the guise of PLO member groups for which the State Department has decided not to hold Arafat responsible.

Title VIII of this legislation will measure PLO compliance with Arafat's commitment. It combines two pieces of legislation introduced in the Senate early last year.

One is Senate Resolution 97, which I introduced with 25 cosponsors. As part of this title, it requires the State Department to inquire in its talks with the PLO about 14 specific reported PLO terrorist activities conducted after the Arafat's commitment to renounce terrorism. It also requires the State Department to report back to Congress on any response given by the PLO in regards to these terrorist activities.

The other bill folded into title VIII is S. 473, which was introduced by Senators MACK and LIEBERMAN. I am proud to be 1 of 30 cosponsors of this legislation. As included in the legislation, it provides a framework for monitoring PLO compliance with Arafat's commitment, and a mechanism for making public the PLO record in regard to Arafat's commitment.

If the State Department erred in recognizing the PLO, the way it has conducted its negotiations with this terrorist organization indicates a callous disregard for past terrorism against Americans. Last spring, all for the purpose of sustaining the diplomatic process in the Middle East, the State Department commenced negotiations with Salah Khalaf—otherwise known as Abu Iyad.

I was shocked when I found out that we were treating this man as a legitimate diplomat, when in fact he is widely believed to have personally ordered the brutal killing of two U.S. diplomats, Ambassador Cleo Noel and George Moore in Khartoum, Sudan, on March 2, 1973.

When the Senate considered the State Department authorization bill on July 14, I offered an amendment which would have cut off funds for negotiations with any representative of the PLO "unless and until the President certifies to Congress that he has determined that the representative did not directly participate in, or conspire in, or was an accessory to the planning or execution of a terrorist activity which resulted in the death, injury or kidnapping of an American citizen."

After days of heavy lobbying by high-level administration officials, this amendment was rejected by the Senate. In its place, the Senate approved an amendment which is now section 108 of H.R. 3792. This amendment would cut off funds for "the conduct of the current dialog on the Middle East peace process with any representative of the PLO if the President knows of and advises the Congress that that representative directly participated in" a terrorist activity against an American.

I voted against this amendment because it does not require the President ever to report what he knows to Congress. Indeed, I doubt any President would ever unilaterally and voluntarily choose to cut off his own funds by reporting to Congress.

I hope that President Bush will report to the Senate on what the Government knows about the role of Abu Iyad and other PLO terrorists in attacks on Americans. But in light of the extraordinary enthusiasm of the State Department bureaucracy for the diplomatic process in the Middle East, I am not optimistic.

Section 414 addresses efforts by the PLO to legitimize itself using the United Nations. Last spring, the PLO, claiming to represent a "State of Palestine" undertook an effort to gain admittance to the World Health Organization as a member state. Last November, the PLO undertook an effort in the United Nations to change its designation from an "observer organization" to that of an "observer state."

Under the leadership of our Assistant Secretary of State for International Organizations, John Bolton, the United States successfully prevented the PLO from gaining membership as a state in the World Health Organiza-

tion and from having its designation in the United Nations changed.

To support Secretary Bolton's efforts and to assure that the United States is not put in the position of lending financial support to any move by the United Nations or any affiliated agencies to accord the PLO state status, section 414 prohibits future U.S. funding of the United Nations or any specialized agency thereof which accords the Palestine Liberation Organization the same standing as member states.

Mr. President, one more observation concerning the PLO. Today, the PLO is trying to convince America that it is the sole representative of the Palestinian Arab people at the same time it is forcing itself upon the Arab residents of Israel's administered territories.

It has killed Palestinian Arabs who have dared to opt for peace rather than the radical, ultimately destructive agenda of the PLO. The PLO insists over and over again that peace between all people in Israel is impossible until Israel hands to the PLO all of its demands.

The PLO hopes that by holding out the promise of peace, people will ignore the true nature of the PLO, its crimes and its goals, and rather accept its rationalizations.

For the sake of keeping the process of diplomacy moving along, the State Department has decided to forgive the PLO for its past crimes against Americans and ignore its continuing transgressions. The major media has done its best to spread and promote PLO rationalizations for these crimes and transgressions.

Unfortunately, history has shown that this is the path to disaster. The cause of peace in the Middle East can only be served by recognizing the PLO for what it is—a terrorist organization bent on the ultimate elimination of Israel and destruction of United States influence in the Middle East.

To the extent the facts regarding the true nature of the PLO and its activities continue to be ignored by our policymakers, hope for long-term peace and stability in the Middle East is diminished, not enhanced.

TV MARTI AND OTHER USIA AND VOA PROVISIONS

Mr. President, titles II and III of this legislation contain authorizations for the U.S. Information Agency [USIA], the Bureau of Educational and Cultural Affairs, Voice of America [VOA], Television Broadcasting to Cuba [TV Marti], and the Board for International Broadcasting [BIB].

Perhaps the most important of the provisions of these titles are found under part D of title II—providing the authority for USIA television broadcasting to Cuba.

Many Senators are aware of the success which has met Radio Marti in its efforts to provide the enslaved people of Cuba with an alternate source of information from the propaganda shoveled out by Fidel Castro. Television programming or TV Marti is a logical extention of the highly successful Radio Marti.

Although TV Marti enjoys broad support in Congress, there were significant differences between the House and Senate versions of this provision. The conferees agreed upon a compromise provision that enjoys the support of the administration and provides the USIA with the authority necessary to move forward with this important initiative.

The conferees likewise agreed upon an authorization of $16 million for both fiscal years 1990 and 1991 in order to get this program underway. The provisions provided for in the conference report are also found in the legislation before us this afternoon.

All told, title II of this legislation authorizes $960 million for USIA for fiscal year 1990. Of the $960 million, $69 million is authorized for an important VOA radio construction program. Our current VOA facilities are rapidly becoming obsolete, as a number of our transmitters are decades old. This authorization will permit VOA to move forward with the construction of important transmitter sites in Thailand and Morocco.

These sites will permit VOA to extend the quantity and quality of broadcasts throughout the world. They will also enhance our capacity to overcome the effects of jamming. In view of budgetary constraints, this legislation retains a provision offered by Senator PRESSLER that provides VOA with the authority to enter into contracts for radio construction over a period of 5 years. This authority will permit VOA to move forward with this program immediately, and will avoid costly delays in the awarding of contracts.

In recognition of the broad bipartisan concern for the people of the Tibet, who live under occupation by the brutal Communist Chinese regime, the conference report requires VOA to establish a Tibetan language service that provides daily broadcasts into Tibet. The provision requires that VOA establish a Tibetan service within 90 days of the enactment of this act, and that they provide a full report to Congress by the end of 1990. I understand that VOA has already begun to lay the groundwork for the Tibetan language service.

Mr. President, this report also lifts a number of the restrictions on USIA's Television and Film Services. Senators may recall that there was broad concern in the Senate with USIA's previous claims about the effectiveness of the Film and Television Service. I shared a number of those concerns.

This legislation provides the necessary authorities to the Director of USIA to acquire, produce, and broadcast television programs. However, the agreement also specifies the types of programs that may be broadcast over the service.

Overall, the legislation authorizes $31 million for USIA's Film and Television Service. Out of the $31 million authorization, the legislation includes a House provision placing a $12 million cap on those programs formerly comprising the WorldNet daily service. Let me emphasize that the cap applies solely to the daily service as described in section 207 of the House Foreign Affairs Committee Report 101-17.

Mr. President, this title contains a number of line-item authorizations for the Bureau of Educational and Cultural Affairs. In my view, a number of these line-item authorizations are unnecessary. The report additionally renames the Office of Private Sector Programs as the Office of Citizens Exchanges. The Office of Citizens Exchanges will appropriately be located within the Bureau of Educational and Cultural Affairs and will receive its funding for program activities from the salaries and expenses account of that Bureau.

Title III of this bill provides authorization for activities of the Board of International Broadcasting. Perhaps the most important provision of this title is included in section 301, where authorization for the construction of a radio transmitter site in Israel is provided for. This transmitter will facilitate broadcasting into the Central Asian republics of the Soviet Union—the fastest growing part of the Soviet Union in terms of population.

In its original legislation, the House provided full authorization for the transmitter. However, the draft bill provided to the Senate Committee on Foreign Relations by the distinguished chairman did not provide 1 cent for this important public diplomacy effort.

During markup in the Foreign Relations Committee, I offered a committee amendment to restore the full $194 million request for the BIB transmitter. That amendment was approved overwhelmingly by the committee.

Since both the House and the Senate bills authorized $194 million for the BIB transmitter, I expected this would not be an issue for discussion in the conference. All the documents that I received prior to the day of the conference indicated that this was not an issue of contention.

Yet on the last day of the conference, a funding table was circulated that reduced the authorization level for fiscal year 1990 to $183.5 million. Despite the fact that this authorization level is outside the scope of the conference, it remained in the conference report, and is included in this legislation.

This was not the only surprise with regard to funding levels. Although both the House and Senate approved $16,932,000 for the Asia Foundation in fiscal year 1990, the chairman of the conference proposed $25 million for fiscal year 1991. Mr. President, this massive increase in funding was never discussed with me or any of my staff prior to the day of the conference. In my opinion, it was beyond the scope of the conference. It is totally unjustified and in my view irresponsible.

The authorization for the migration and refugee assistance account was likewise beyond the scope of the conference. The authorization approved by the conference was more than $11 million higher than the level approved by either the House or the Senate. Again, the figure before the conferees seemed to appear out of nowhere on the day of the conference with no prior consulations.

Mr. President, another important issue addressed in this bill concerns the U.S. Advisory Commission on Public Diplomacy. Despite efforts to alter the status of this Commission, the Senate Foreign Relations Committee during markup on this bill adopted an amendment to restore the bipartisan nature of the Commission. Unfortunately, the report language accompanying the Senate bill did not accurately reflect the committee's action on restoring the Commission.

The legislative history on this matter should be made clear. The conference report restores the U.S. Advisory Commission on Public Diplomacy and ensures that those currently serving on the Commission may remain to serve out the full remainder of the terms to which they were originally appointed. The legislative language in this bill is clear on that point.

STATE DEPARTMENT PERSONNEL ISSUES

As a general rule, Mr. President, I am deeply concerned that U.S. foreign policy, particularly at the senior levels, is conducted for the most part by males who attended Ivy League institutions. This is certainly the case in the Foreign Service.

It is essential that the Foreign Service be opened so as to reflect better the diversity of the American citizenry, and I applaud new efforts in this regard in the conference report.

At the same time, Mr. President, Foreign Service elitism has a second, but highly significant, impact on employes of foreign affairs agencies who are GS employees. Denied the chance to compete and win the highest jobs, GS employees at the State Department are most definitely treated as second class. After resisting the law, the State Department has, at last, appointed an ombudsman for GS employees. Congress expects this to be an influential position, and encourages the State Department to staff that office fully.

Some employees are even less than second class. They lack the career rights that GS and Foreign Service officers have. One such group is classified GG and works at the U.S. Mission to the United Nations in New York City. I have come to believe that these people should immediately be given the opportunity to become GS employees. This seems only fair, and would assist in remedying the hiring difficulties chronically facing the U.S. Mission. I urge the State Department to study this option thoroughly and soon.

Mr. President, among the many provisions of this bill regarding personnel issues, section 142 is a reform essential to America's national security. It prevents agents of foreign countries from serving as so-called public members of Foreign Service Selection Boards. After offering this suggestion in the Foreign Relations Committee, I am delighted to report that the prohibition has survived the torturous conference process and is in the legislation before us this afternoon.

Section 144, I believe, could be subject to abuse. It provides for a new program of visiting scholars at the Foreign Service Institute. Abuse, to this Senator, would be the consistent selection of participants representing either the U.S. foreign policy establishment or scholars and experts associated solely with one political philosophy. If this program is in fact needed, the best people ought to be selected from throughout the country. Until the Foreign Service becomes more representative, it is absolutely essential that they have an opportunity to hear from a wide range of people.

In an amendment to section 1202 of the Foreign Service Act of 1980, paragraph (c)(1), provided for in section 149 of this bill, it is the clear intent of Congress that this provision not be considered to have exclusive applicability. The language, more properly, would have read:

> Students enrolled full-time in institutions of higher education, including those from groups which are underrepresented * * * shall be eligible to be interns in programs under this chapter.

Later in the same paragraph, the legislation states that the first and second internships can be with the U.S. Congress. I have mixed feelings on this, Mr. President. I believe it is almost always useful for State Department employees to learn about Congress firsthand, and I suspect the reverse is also the case.

However, since the purpose of a Foreign Service internship is to lead to greater familiarity with career service in international affairs, I would hope that such congressional details be used sparingly.

Section 153 of the legislation is long overdue and it gives me a real sense of satisfaction that it has survived. It is intended to increase the regional, educational, and ethnic diversity of the Foreign Service and the Department of State.

For the first time, Congress and the American people will be able to see a comprehensive data base on the makeup of the Foreign Service. This Senator hopes that the State Department, armed with the figures, will finally commit itself to better reflecting the diversity of our Nation. As an insurance policy, Mr. President, the existence of such statistics will guarantee that Congress can act if the State Department and other foreign affairs agencies do not.

In compiling the report and using its results, I hope the State Department will keep this Senator and the minority staff of the Foreign Relations Committee fully apprised of progress and results.

One provision of section 153 was forced on conferees by a House committee which asserted its jurisdiction. The result was the insertion of the term "handicapping conditions" in section 153(c) of the legislation. As the statement of managers to the conference report of H.R. 1487 makes abundantly clear, it is not the intent of the committee of conference to impose definitions in the Rehabilitation Act upon the State Department. For ideological reasons, alcoholism and drug abuse or additional odd uses of terminology are considered handicapping conditions in the current version of that law. Regulations to be promulgated by the Secretary of State should be as broadly drawn as reasonable, but it is clearly unreasonable to expect an application which is as broad as in the Rehabilitation Act.

Further, although it was clearly a technical and conforming provision, it was not possible to change section 153(g)(1) from "sexual" to "gender." The intent of the conferees was that men and women not be treated differently in the employment context because of their gender.

Section 153(h) takes the unwise step of setting up a new program called Foreign Service Fellowships. This is of questionable value for precisely the same reasons as the Visiting Fellows Program at the Foreign Service Institute. I will not repeat the discussion of this matter, except to say that the intent of Congress is clearly that participation in this program not be festooned with former Foreign Service Officers and figures of the foreign policy establishment of this or other countries.

Section 153(h) also contains the same technical problem which was uncorrected elsewhere. Ideally, the language should read:

> Such program shall give priority to the extent practicable in the award of fellowships.

In other words, conferees clearly intend that fellowships be awarded in accordance with the constitutional rights of all Americans.

Mr. President, the Senator from North Carolina plans to continue to monitor personnel issues at the State Department. The State Department has light years to travel before favoritism and elitism are overcome. This Senator intends to assist affected employees and organizations representing them to end the blight of a good old boy's private club of Ivy League educated elites, especially in the areas of promotion and positive selection.

INTERNATIONAL ORGANZIATIONS

In spite of intensive lobbying on its behalf, the United Nations Educational, Scientific, and Cultural Organization [Unesco] is still hopelessly lost in an ideological forest, and continues to have serious management problems.

An outstanding editorial, "No Tears for Unesco," appeared in the Wall Street Journal of November 1, 1989. The substantive complaints which led to United States and British withdrawal from Unesco remain. Fortunately, the United States has an outstanding Assistant Secretary for International Organization Affairs, Mr. John Bolton, whose competence and outstanding acuity have served us well on Unesco and other issues regarding international organizations.

According to a report printed in the Foreign Broadcast Information Service [FBIS] of October 27, 1989, Unesco continues to rush toward thought control on a global scale. At a meeting in Harare, Zimbabwe, that country's Information Minister opened a conference of media specialists on the new world information order by stating:

The establishment of the new international information and communications order should witness the birth of a new and vigorous people-oriented media, highlighting their real concerns as opposed to vulgar distortions of reality which are mistakenly regarded as free flow of information.

He continued:

But this will not come on a silver platter. Third country journalists will have to struggle for the new order along with their progressive counterparts in other parts of the world.

This, he said, means that—

Freedom of the press (is) only within the framework of the struggle and not as an abstract concept unrelated to the day-to-day lives of our people.

Unesco still moves along the path of thought control and other programs. The United States should be in no hurry to rejoin. The Moynihan-Helms language embodied in section 408 makes this very clear. In addition, Mr. President, let me especially compliment Mr. Terry Miller, a public servant who keeps an eye on Unesco activities in Paris for the U.S. Government. Unfortunately, Mr. Miller's tour of duty ends in 1990. I hope that his successor shares President Bush's view on Unesco, and is familiar with its programs.

Mr. President, it is the intent of Congress that no funds authorized by this legislation be utilized to reclassify employees at the U.S. Mission to the United Nations, or to change the status of their employment, or to increase any member of that staff's salary without specific legislative authorization by the Foreign Relations and Foreign Affairs Committee.

Section 411 is a limited endorsement by conferees for a careful assessment of the International Court of Justice. The addition of the phrase "where appropriate" in paragraph 10(b) represents the significant recognition of the fact that this body has, in recent years, not merited our trust in the settlement of international disputes.

Section 417 places in permanent law provisions of the DeConcini-Helms amendment to the Dire Emergency Supplemental Appropriations Act. It requires the President to certify that certain conditions have been fulfilled prior to releasing United States contributions to United Nations peacekeeping forces in southern Africa.

The United States must take an active, public role to promote peace, national reconciliation and free, fair elections between the warring parties: UNITA and the MPLA.

Without consultation with Congress, such certifications have been produced and signed by the President under provisions of the earlier appropriations act. In addition to plowing familiar ground, conferees intend that minority and majority sides of the relevant authorizing committees be consulted and be informed of developments so that a fair assessment can be made of conditions necessary to release these funds.

SECTION 15

Mr. President, part of the controversy complicating passage of the State authorization bill concerned a continuing attempt by some of our colleagues to repeal section 15 of the State Department Basic Authorities Act.

Section 15 requires the enactment of an authorization bill before funds can be expended for the State Department. Its repeal would eliminate the serious responsibility of the Foreign Relations Committee to submit an authorization bill for the State Department and also diminish the ability of Congress to influence operations of the Department of State.

The Senator from Rhode Island and I have given high priority to the State Department authorization bill. We spent a week deliberating the bill on the floor before its passage in July, and staff level conference meetings began soon after that.

Despite this fact, shortly after the Senate appointed conferees for the State authorization bill, we learned that the Commerce, Justice, State, and Judiciary appropriations conference had inserted in their conference report a waiver of the section 15 requirement that an authorization bill be passed before funds can be expended for the State Department.

I know my distinguished colleagues on the Appropriations Committee had good intentions when they inserted this waiver, but the truth is that the Foreign Relations Committee must be allowed to fulfill its responsibility of authorizing funds for the State Department before they are expended by another committee.

Mr. President, I want to emphasize that this issue is extremely important—important not only to the Foreign Relations Committee, but to every Senator, to each authorizing committee.

In fact, the Senate spoke out on this matter just 2 months ago. On October 31, by a vote of 53 to 45, the Senate supported an amendment offered by the distinguished chairman of this committee and this Senator and supported by all members of the committee to strike the waiver of the authorizing requirement. Obviously, my distinguished colleagues recognized the dangerous precedent that could be set if one committee succeeded in usurping the jurisdictional responsibilities of another.

Mr. President, some of my colleagues have implied that section 15 is a unique restriction, an unnecessary nuisance that inhibits the appropriations process. However, I have found that the State Department is not the only department with some kind of authorizing restriction.

According to the Library of Congress, certain agencies of the Department of Energy, Department of Commerce, U.S. Information Agency, and U.S. Customs Service have similar restrictions which require an authorization before funds can be expended.

Mr. President, I hope passage of this legislation ends debate over this question of section 15. The requirements of section 15 assure that the Foreign Relations Committee fulfills its legislative responsibilities with regard to the operation of the State Department, and provides Congress with greater opportunity to affect foreign policy.

Several Senators addressed the Chair.

Mr. PELL. Mr. President, I yield such time to the Senator from South Carolina as he may need.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, I thank our distinguished chairman of our Foreign Relations Committee. And I have had the pleasure of working with him for 24 years.

The reason this is being enacted, Mr. President, right at the point, at this

moment rather than in the closing moments of the last session was that we on our Appropriations Committee thought we had done a credible job working on top of the table with the Foreign Relations Committee.

The fact of the matter is we waited until the very, very end. This was the last one. There was some feeling amongst the members of our subcommittee of State, Justice, Commerce, that the State Department authorization was being held up as a tool to try to force-feed the foreign ops bill on the U.S. Senate. In fact, the distinguished ranking member of the Committee on Foreign Relations stated exactly that on the floor.

We in our duties had passed an appropriations bill with the clause to the effect that it would be in conformance with the 1990 authorization bill if and when enacted. However, our colleagues on Foreign Relations took exception to that, and they insisted that it be knocked out. They brought in all their members, in almost like an ambush, like we were trying to pass this authorization on our appropriations. We were just trying to give them the time and we knew in the closing days there ought to be an authorization bill for 1990, and that we would like to conform to it our particular bill.

They prevailed, and sure enough then it was used as pressure, and we are used to that in this game. So we just stood our ground and said if they would conform this authorization bill and their committee practices to the committee practices of all committees in the U.S. Senate we would be glad to lift our objections.

We also wanted to give notice to our Department of State which were telling us they were for us for what we were doing. When the showdown came they were opposing us. So I think we have gotten their attention now.

I know Senator PELL and I have both the same interests in trying to provide in an orderly fashion the needs of the Department of State. Right to the point, this is not going to take care of the needs. In the budget the President transmitted this morning, the Department of State is asking for some additional $800 million for fiscal 1991 over the amounts authorized in this bill. We might have to pass a second authorization bill.

We also need an additional amendment now to repeal section 614 of the Commerce-Justice-State Appropriations Act for fiscal 1990 to conform it to this particular authorization. I will have a bill in to do that or we can tack it on to an emergency measure for Panama, as we are being told that it will be coming up momentarily. One way or the other, we need to facilitate that because the State and USIA functions have been held to the 1989 levels. They have real problems without having problems with us here in the Congress, and the political maneuvers to pass foreign ops.

I oppose sections 15 and 701 of the State and USIA basic laws. Senator PELL understands that. In fact, they added a similar section 302 in this bill on the Board for International Broadcasting, saying they could not have an enacted appropriation until the authorization bill is passed. I have not pressed for deletion of section 304 due to the time requirement, but it will be deleted for the Board of International Broadcasting. We have agreed that he will go along with that. I will probably include a provision again in our appropriations bill because, as they say, a man convinced against his will is of the same opinion still.

I like my appropriations. The last time I counted I had 128 different appropriations in the State, Justice, Commerce bill. We have the Arms Control and Disarmament Agency, the DEA, the border patrol and the Immigration Service, the Federal Trade, the Federal Communications, and the Federal Maritime Commissions—I go right on down the line. We do not have any difficulty. All committees operate on the same plane save this one.

I think if we can have better trust amongst the colleagues—and better understanding is a better word—a better understanding amongst the colleagues, because certainly I have absolute trust and admiration for our colleague from Rhode Island who is serving in the distinguished fashion as the chairman of our committee. But a better understanding so we will not get into these misunderstandings. We on the subcommittee hate to be chastised when we do the job. We actually change some things beyond authorization at the request of Foreign Relations Committee. They come up and say here it is in conformance with 1989 under the law but if and when you pass the 1990 authorization it will be in conformance with whatever. You pass it in the 1990 authorization.

If that is not open trust of a chairman and a committee, I do not know how best to word it. That is what we had worded but they came up and opposed it, and said, oh, it was political shenanigans. We were trying to pass both at the same time. What we were doing was forestalling the maneuvers on foreign ops, not on the authorization for the Department of State.

Having said that, I am glad to join in on the unanimous consent or any other request to facilitate this so the State Department can get about its business. I want to thank Senator PELL for his understanding and cooperation, and Senator HELMS also, our ranking Member and the members of the committee.

I yield the floor.

Mr. RUDMAN. Mr. President, the Foreign Relations Authorization Act, fiscal year 1990 and 1991, is virtually identical to legislation vetoed by the President late last year with several important changes. It does not include the so-called Moynihan amendment dealing with the third party solicitation of foreign aid for purposes not in accord with law. However, it does include a provision offered by Senator BYRD to the conference report on the Defense Appropriations Act removing spending floors and earmarks which impinge on the jurisdiction of the Appropriations Committee.

When the conference report on the fiscal year 1990 Commerce-Justice-State Appropriations Act first came to the floor of the Senate last October, it included a section which provided continuing appropriations rates for the State Department and USIA until an authorization was enacted or November 30, 1989, whichever was earlier. We took this action in order to provide the authorizing committees the time to complete action on their conference. However, we were also determined the normal operations of government should continue, and that if the authorizing committees could not complete their work the appropriations process should move forward.

To my astonishment, the Foreign Relations Committee objected to this provision—even though they had only met once in conference with their colleagues from the House side. As a consequence the provision was deleted and we find ourselves in the current situation. Ironically, had the original provision been retained in the appropriations act, the authorization would probably have been enacted on the last day of the session and the State Department and USIA would be operating at 1990 appropriated levels.

Mr. President, I am willing to support enactment of the authorization legislation before us because I firmly believe we have a responsibility to complete our work—even if it is not completed in a timely fashion. However, I do so with the understanding that the chairman of the Foreign Relations Committee and the ranking minority member intend to repeal the provision requiring an authorization for the Board for International Broadcasting before the obligation of appropriated funds. I am told they will seek to do so at the earliest possible date.

I believe that section 15 of the State Department Basic Authorities Act and section 701 of the Educational and Cultural Exchange Act should also be repealed. These provisions impose similar requirements on appropriations for the State Department and the U.S. Information Agency and have been used for purposes other than those for which they were originally enacted. Should the Foreign Relations Committee fail to enact an authorization on a timely basis for fiscal years

1992 and beyond, it is my expectation that the Appropriations Committee will have the right to seek to repeal or waive these provisions.

Finally, I would like to discuss the role of the State Department in this matter. In 1987 the Department threatened to veto the continuing resolution for fiscal year 1988 if the Congress did not waive section 15 of the State Department Basic Authorities Act. Again we had a situation where the end of the session was approaching and the authorization bill had not been enacted into law. Indeed, there was a veto threat over the authorization and the authorizing committees were using section 15 as leverage in an attempt to force acceptance of their bill. After negotiations with the Department, we agreed to waive certain portions of the authorization bill on the continuing resolution in order to resolve the problem. Once again, we were being used by the authorizing committees to complete work they could not do on their own.

When the current situation developed last fall, I assumed the Department would seek to ensure that its 1990 budget was approved prior to the adjournment of Congress. I was wrong; no assistance was offered by the State Department or any of its officials to resolve this situation. Indeed, they did not even take a position on the issues involved in the dispute. This inexplicable stance was even more puzzling given the veto threat when we did not waive section 15 in 1987.

I do not understand the reluctance of the Department to fight for its budget. However, they seem to be sending a clear signal to the Appropriations Committee that we should not take their budget request seriously. I am afraid this attitude may have unintended consequences in the coming year, especially since several requests they will be making exceed the authorization levels in this bill. I can only assume they do not want us to appropriate those funds until and unless an authorization is enacted into law.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. PELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Mr. President, I thank the Senator from South Carolina for his thoughts and willingness to work out a compromise. And I am glad that this bill can proceed in an orderly way.

I yield the floor.

The PRESIDING OFFICER. If no one yields time, time will be deducted equally.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. A quorum having been suggested, the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, I would like to engage in a colloquy with the ranking Republican member of the Foreign Relations Committee, Senator HELMS, concerning section 128 of H.R. 3792, the State Department authorization bill. It is my understanding that subsection (b) of section 128 repeals the sunset provision on section 901 of the Foreign Relations Authorization Act, fiscal years 1988 and 1989. That section prohibits the denial of temporary entry to an alien because of any past, present, or anticipated statements, associations or beliefs. Is that the understanding of the Senator from North Carolina?

Mr. HELMS. Yes. That is my understanding.

Mr. SIMPSON. The text of the provision requires the executive branch to grant entry to an alien in such cases unless there is a reason other than those described in the section to deny entry. For that reason, the executive branch has not treated section 901 as repealing the exclusion of Communists, but rather as requiring that waivers be granted to permit their temporary entry unless a legitimate reason existed for denying entry. It is my understanding that the removal of the sunset provision required by section 128(b) would have no effect on the substance of the provision nor on the way in which the executive branch has applied it up to now. Is that a correct understanding?

Mr. HELMS. Yes. That is a correct interpretation.

Mr. President, I thank the Chair. I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum having been suggested, the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I ask unanimous consent that it be in order for me to request the yeas and nays.

The PRESIDING OFFICER. Unanimous consent is not required at this point to request the yeas and nays.

Mr. HELMS. There is a time agreement. I ask for the yeas and nays.

The PRESIDING OFFICER. There is a time agreement in effect of the time remaining on both sides of the aisle. This would be a time under which the rules would allow for the request of the yeas and nays.

Mr. HELMS. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second. The yeas and nays are ordered.

The yeas and nays were ordered.

Mr. HELMS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, one of the provisions of the pending legislation of immediate concern to me and many Senators is that which addresses the question of sanctions against the Government of the People's Republic of China. Senator DOLE and I originally offered the amendment which included these sanctions. The amendment was adopted by a vote of 81 to 10.

Title 9 of the bill expresses the sense of the Congress that the President should urge the Export-Import Bank to continue to postpone approval of any application for financing United States exports to China, and that the directors of the appropriate international financial insitutions should continue to oppose the extension of loans or any other finanical assistance to China. If systematic repression in China deepens, the President would review United States most-favored-nation trade treatment to Chinese products and other bilateral trade agreements between the United States and China, including those concerning satellite launches and nuclear energy. In addition, he would consult with the members of Cocom and GATT to review the treatment of China in those organizations.

The bill also suspends the following programs or activities between the United States and People's Republic of China: Overseas Private Investment Corporation finanical support, the Trade and Development Program, the issuance of licenses for the export of defense articles on the U.S. munitions list, the issuance of licenses for the export of any crime control or detection equipment, the export of any United States made satellites intended for launch by China, nuclear cooperation activities, and multilateral liberalization of export controls. The President may at his discretion terminate one or more of the suspensions if he submits a report either that the Chinese Government has made progress on a program of policital reform, or that it is in the national interest to do so.

These sanctions set down guidelines and restraints designed to cause the

Government of China to give serious consideration to the desire of the Chinese people for modest reforms and an opening toward a more democratic society.

In the days immediately after the massacre in Tiananmen Square the President restricted the export sale of military weapons, equipment, and training for the Chinese Armed Forces. Now, however, those restrictions have for the most part been removed and Chinese military officers are again receiving training on U.S. military equipment. On June 5, 1989, the President suspended licensing of satellite exports to China. On December 12, however, the suspension was lifted. Also, on June 5, 1989, the President suspended the export of Boeing 757 jetliners to China because their navigational systems were considered to have technology which could have military uses.

In August, however, the administration permitted the export of the jetliners, even though the guidance systems remained on the restricted munitions list. Additionally, the President announced in June 1989 that he was instructing the United States directors in international lending institutions to oppose loans to China. Yet this past Saturday the American-appointed World Bank President recommended resuming loans to China.

Last week the President promised the Senate that he would not send any of the resident Chinese students back to China unless he was certain that the human rights situation in that country would not cause them to be in danger. It is very important that no student be thus placed in danger.

Tomorrow the Senate will again vote on the State Department authorization bill containing modest sanctions designed to encourage the Chinese leaders to end their represession of the students and workers whose only offense is their desire for an open democratic society. The Senate will again have an opportunity to express to the Chinese Government the concern which the American people feel about the continued persecution of the prodemocracy movement and our dedication to historic democratic principles of justice, human rights, and self-determination.

I hope my colleagues will stand up for these principles and vote for passage of this bill.

Mr. President, I understand that there are no further Senators who wish to speak on the pending legislation and, therefore, I am authorized in behalf of both managers to yield back the remainder of the time.

MESSAGES FROM THE PRESIDENT RECEIVED DURING RECESS

Under the authority of the order of the Senate of January 3, 1989, the Secretary of the Senate, on January 25, 1990, during the recess of the Senate, received a message from the President of the United States transmitting a nomination and the withdrawal of a nomination; which were referred to the appropriate committee.

(The nomination and the withdrawal received on January 25, 1990, are printed in today's RECORD at the end of the Senate proceedings.)

MESSAGES FROM THE PRESIDENT

A message from the President of the United States was communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGE REFERRED

As in executive session the Presiding Officer laid before the Senate a message from the President of the United States submitting a nomination which was referred to the Committee on the Judiciary.

(The nominations received today are printed at the end of the Senate proceedings.)

DEFERRAL OF CERTAIN BUDGET AUTHORITY—MESSAGE FROM THE PRESIDENT—PM 79

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which; pursuant to the order of January 30, 1975, as modified by the order of April 11, 1986, was referred jointly to the Committee on Appropriations, the Committee on the Budget, the Committee on Agriculture, Nutrition, and Forestry, the Committee on Foreign Relations, and the Committee on Commerce, Science, and Transportation:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report two new deferrals and four revised deferrals of budget authority now totalling $8,251,604,695.

The deferrals affect International Security Assistance programs, as well as programs of the Departments of Agriculture, State, and Transportation.

The details of these deferrals are contained in the attached report.

GEORGE BUSH.

THE WHITE HOUSE, *January 29, 1990.*

BUDGET OF THE U.S. GOVERNMENT—MESSAGE FROM THE PRESIDENT—PM 80

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which, pursuant to the order of January 30, 1975, as modified on April 11, 1986, was referred jointly to the Committee on Appropriations and the Committee on the Budget:

To the Congress of the United States:

I have the honor to present the *Budget of the United States Government for Fiscal Year 1991.*

The American economy is now in its eighth consecutive year of expansion and growth. It is essential that the growth of the economy continue and increase in the future. The budget is designed to achieve that goal.

The budget has five broad themes:

—*Investing in Our Future.*—With an eye toward future growth, and expansion of the human frontier, the budget's chief emphasis is on investment in the future. It proposes: a capital gains incentive for long-term private investment and new incentives for family savings; record-high amounts for research and development, space, education, and Head Start; a major investment in civil aviation; and a large increase in spending to attack the scourge of drugs. At the same time, the budget maintains a strong national defense while reflecting the dramatic changes in the world political situation that are taking place; and it fulfills responsibilities to protect the environment, and preserve America's cultural heritage.

—*Advancing States as Laboratories.*—The budget recognizes the emergence of new ideas and initiatives originating at the State and local level. The Federal Government will foster such innovation and experimentation in numerous fields, from transportation to health, through waivers of certain rules and regulations, and through demonstration grants.

—*Reforming Mandatory Programs.*—Entitlement and other mandatory spending now constitutes nearly half the budget, not counting an additional 14 percent for interest. The budget provides for full payment of social security benefits and funds growth in health, low income and other mandatory programs. However, it proposes reforms where warranted to slow the growth in some of these programs and thus leave more room in the budget for priority initiatives.

—*Acknowledging Inherited Claims.*—The budget faces up to such inherited claims as the cleanup of dec-

ades old environmental damage at nuclear weapons facilities. It analyzes potential claims from unfunded annuities and Federal insurance programs. It assesses the growing volume of defaults in Federal credit programs and proposes essential credit reforms.

—*Managing for Integrity and Efficiency.*—The budget contains suggestions for reforms in the way Congress deals with the budget. It provides more resources and suggests improved methods for managing the vast Federal enterprise better. It identifies low-return domestic discretionary programs where a smaller investment of budgetary resources is warranted.

The budget meets the deficit target of $64 billion for 1991 established by the Gramm-Rudman-Hollings law, without raising taxes. It would balance the budget by 1993 as required by the law, begin reducing debt, and protect the integrity of Social Security.

Each of the themes outlined above is discussed in more detail in Section One of the budget, the Overview. The customary tabular and appendix material is contained in Section Two.

I look forward to working with the Congress in the weeks and months ahead to produce a budget that meets the Gramm-Rudman-Hollings target, advances the Nation's essential interests, and keeps the economy on the path of continued growth.

GEORGE BUSH.

THE WHITE HOUSE, *January 29, 1990.*

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate together with accompanying papers, reports, and documents, which were referred as indicated:

EC-2210. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to give the Secretary of Agriculture authority, independently or in cooperation with the Government of any country of the world or any international organization or association, to produce and sell sterile screwworms to the Government of any country of the world or to any international organization or association; to the Committee on Agriculture, Nutrition, and Forestry.

EC-2211. A communication from the director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Navy's proposed letter of offer to Egypt for defense articles estimated to cost in excess of $50 million; to the Committee on Armed Services.

EC-2212. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-114 adopted by the Council on November 7, 1989; to the Committee on Governmental Affairs.

EC-2213. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-119 adopted by the Council on November 21, 1989; to the Committee on Governmental Affairs.

EC-2214. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-120 adopted by the Council on November 21, 1989; to the Committee on Governmental Affairs.

EC-2215. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-121 adopted by the Council on November 11, 1989; to the Committee on Governmental Affairs.

EC-2216. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-122 adopted by the Council on November 21, 1989; to the Committee on Governmental Affairs.

EC-2217. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-123 adopted by the Council on November 11, 1989; to the Committee on Governmental Affairs.

EC-2218. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-124 adopted by the Council on November 21, 1989; to the Committee on Governmental Affairs.

EC-2219. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-128 adopted by the Council on December 19, 1989; to the Committee on Governmental Affairs.

EC-2220. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-132 adopted by the Council on December 5, 1989; to the Committee on Governmental Affairs.

EC-2221. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-129 adopted by the Council on December 19, 1989; to the Committee on Governmental Affairs.

EC-2222. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-130 adopted by the Council on December 5, 1989; to the Committee on Governmental Affairs.

EC-2223. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-131 adopted by the Council on December 5, 1989; to the Committee on Governmental Affairs.

EC-2224. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-133 adopted by the Council on December 5, 1989; to the Committee on Governmental Affairs.

EC-2225. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-134 adopted by the Council on December 5, 1989; to the Committee on Governmental Affairs.

EC-2226. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-135 adopted by the Council on December 5, 1989; to the Committee on Governmental Affairs.

EC-2227. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-136 adopted by the Council on December 5, 1989; to the Committee on Governmental Affairs.

EC-2228. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-137 adopted by the Council on December 5, 1989; to the Committee on Governmental Affairs.

EC-2229. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-139 adopted by the Council on December 5, 1989; to the Committee on Governmental Affairs.

EC-2230. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-140 adopted by the Council on December 19, 1989; to the Committee on Governmental Affairs.

EC-2231. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-141 adopted by the Council on January 20, 1990; to the Committee on Governmental Affairs.

EC-2232. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-142 adopted by the Council on January 2, 1990; to the Committee on Governmental Affairs.

EC-2233. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-143 adopted by the Council on January 2, 1990; to the Committee on Governmental Affairs.

EC-2234. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-144 adopted by the Council on December 19, 1989; to the Committee on Governmental Affairs.

EC-2235. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-145 adopted by the Council on December 19, 1989; to the Committee on Governmental Affairs.

EC-2236. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-146 adopted by the Council on December 19, 1989; to the Committee on Governmental Affairs.

EC-2237. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-148 adopted by the Council on December 19, 1989; to the Committee on Governmental Affairs.

EC-2238. A communication from the Executive Director of the Committee For Purchase From The Blind and Other Severely Handicapped, transmitting, pursuant to law, the annual report of the Committee under the Freedom of Information Act for calendar year 1989; to the Committee on the Judiciary.

EC-2239. A communication from the Clerk of the United States Claims Court, transmitting, pursuant to law, the annual report on judgements of the United States Claims Court for fiscal year 1989; to the Committee on the Judiciary.

EC-2240. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the Seventh Special Report on Alcohol and Health; to the Committee on Labor and Human Resources.

EC-2241. A communication from the Secretary of Health and Human Services, trans-

mitting, pursuant to law, a report on the prevention activities of the Alcohol, Drug Abuse, and Mental Health Administration for fiscal years 1987 and 1988; to the Committee on Labor and Human Resources.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-395. A resolution adopted by the National Order of Women Legislators relative to protection of the environment and energy production waste; to the Committee on Energy and Natural Resources.

POM-396. A resolution adopted by the Senate of the State of Michigan; to the Committee on the Judiciary:

"SENATE RESOLUTION No. 233

"Whereas Mr. George Mantello, personally credited with saving the lives of 30,000 Jews during the Holocaust, is one of the most outstanding individuals responsible for helping mobilize the world against the atrocities of Nazi Germany and its death camps. His deeds and valor, performed in a totally humanitarian manner, played a vital role in altering the course of World War II for the lives of countless people. He is a gentleman highly worthy of praise and recognition; and

"Whereas a Romanian Jew, serving as El Salvador's Secretary General in Switzerland from 1942 to 1945, George Mantello utilized his position to place more than 30,000 Jews under El Salvador's protection. Mr. Mantello performed his extraordinary feats of rescue primarily by two means. While the Nazis and their Hungarian collaborators were deporting up to 10,000 Jews a day to Auschwitz, George Mantello, almost singlehandedly, initiated a press campaign in Switzerland that alerted the western world to the horrors of the Nazi concentration camps. Describing the ongoing atrocities of the concentration camps, through an official Auschwitz document, and based on the testimony of two young escapees from Auschwitz, Joseph Lanik and Rudolph Vrba, was Mantello's main thrust for exposing this horror to the world. The document was reported in over 400 articles, published in 120 Swiss newspapers, condemning the mass murders at Auschwitz. This report evoked an international outcry from such leaders as President Roosevelt, the Pope, Britain's Anthony Eden, the King of Sweden, the International Red Cross, and the Swiss government. Acting upon this information, these exemplary world leaders demanded that Admiral Horthy, the Regent of Hungary, put an end to the deportation of the remaining Jews in Budapest. Nearly 200,000 Jews still living in Budapest were saved from the gas chambers through this effort; and

"Whereas Mr. George Mantello's second rescue coup was responsible for saving another impressive number of people during the war. He produced and distributed 15,000 Salvadoran citizenship papers to Jews and non-Jews throughout Nazi-occupied Europe. Ninety-five percent of these families survived the Holocaust through these protective papers. Mr. Mantello provided these papers for free, rather than through the selling of passports, a practice prevalent in those dark days. Undoubtedly, Mr. George Mantello deserves the utmost praise and commendation for his brave and humanitarian endeavors during World War II: Now, therefore, be it

"*Resolved by the Senate*, That we hereby memorialize the United States Congress to award Mr. George Mantello the Congressional Medal of Freedom; and be it further

"*Resolved*, That a copy of this resolution be transmitted to the President of the United States Senate, the Speaker of the United States House of Representatives, and the members of the Michigan Congressional delegation."

POM-397. A resolution adopted by the National Order of Women Legislators favoring the adoption of comprehensive child care legislation; to the Committee on Labor and Human Resources.

POM-398. A resolution adopted by the National Order of Women Legislators favoring programs of education and treatment for the children of substance abuse; to the Committee on Labor and Human Resources.

REPORTS OF COMMITTEE

The following reports of committees were submitted:

By Mr. BOREN, from the Select Committee on Intelligence:

Special Report entitled "Report of the Select Committee on Intelligence, United States Senate, January 1, 1985 to December 31, 1986" (Rept. No. 101-236).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. RIEGLE (for himself, Mr. GARN, Mr. DIXON, Mr. SHELBY, Mr. GRAHAM, Mr. KERRY, Mr. BRYAN, Mr. HEINZ, Mr. D'AMATO, Mr. PRESSLER, and Mr. WIRTH):

S. 2028. A bill to amend the International Banking Act of 1978 and the Securities Exchange Act of 1934 to provide for fair trade in financial services; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. GRAMM (for himself and Mr. DOLE) (by request):

S. 2029. A bill to amend the Higher Education Act of 1965, to reduce student loan defaults, to achieve greater accountability in Federal student assistance programs to minimize the potential for waste, fraud, and abuse, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. KOHL:

S. 2030. A bill to protect the privacy of telephone users by amending title 18, United States Code; to the Committee on the Judiciary.

By Mr. KENNEDY:

S. 2031. A bill to further the foreign policy of the United States by establishing a Partnership for Democracy to assist the peoples of foreign countries in developing democratic forms of government and free market economies; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. RIEGLE (for himself, Mr. GARN, Mr. DIXON, Mr. SHELBY, Mr. GRAHAM, Mr. KERRY, Mr. BRYAN, Mr. HEINZ, Mr. D'AMATO, Mr. PRESSLER, and Mr. WIRTH):

S. 2028. A bill to amend the International Banking Act of 1978 and the Securities Exchange Act of 1934 to provide for fair trade in financial services; to the Committee on Banking, Housing, and Urban Affairs:

FAIR TRADE IN FINANCIAL SERVICES ACT

Mr. RIEGLE. Mr. President, together with my distinguished colleague Senator GARN, the ranking minority member of the Banking Committee, and along with Senators DIXON, SHELBY, GRAHAM, KERRY, BRYAN, HEINZ, D'AMATO, PRESSLER, and WIRTH, all members of the Banking Committee, I am today introducing the Fair Trade in Financial Services Act of 1990.

The bill we are introducing is designed to give Treasury negotiators new leverage in their negotiations to obtain competitive access to foreign banking and securities markets such as those in Japan. Section 3602 of the Omnibus Trade and Competitiveness Act of 1988 already requires the Treasury to identify and report to Congress every 4 years on countries that do not grant full national treatment to U.S. banking and securities firms. The first report under that provision is due on December 1, 1990. The Fair Trade in Financial Services Act amends section 3602 to specify that national treatment includes "effective market access." This is designed to address situations where U.S. firms abroad may receive de jure national treatment—equality according to the letter of the law—but not de facto national treatment—equality of opportunity to compete in actual practice. If foreign countries do not provide such national treatment, the bill asks the Treasury Department to negotiate to obtain it. To strengthen Treasury's hand in any negotiations, the bill permits our banking and securities regulators to deny applications for regulatory approval filed by banking and securities firms from countries that discriminate against U.S. firms. Any denials would not force foreign financial firms to shrink their existing operations, but it would limit their opportunities for future expansion. Before regulators could exercise their authority, however, the Secretary of the Treasury would have to publish in the Federal Register a determination that discrimination against U.S. financial institutions is taking place in a given foreign country. Let me stress that no action is mandated by this legislation. The Treasury Secretary has discretion under it whether to use the grant of authority being given to him.

No issue is more important to this Senator than the competitiveness of all sectors of our economy in today's global environment. We Americans must pay much greater attention to this issue in the context of the type of domestic policies we adopt and the

impact they have on the competitive ability of our industries. We must, however, also ensure that our firms get the same fair treatment—and I stress fair treatment—abroad that we grant foreign firms here. These matters are not just economic or trade issues. They are of the utmost importance to the long-run national security of our country. Let me explain why.

Our country emerged from World War II as the world's preeminent economic power. America's economic strength provided the foundation for building for building the military and political power needed to stem the tide of totalitarianism that then threatened to engulf Western Europe and Asia. Recent and continuously developing events in the Soviet Union and Eastern Europe, along with the growing economic strength of free nations, suggest that America's containment policy worked, and both America and its European and Asian allies can be pleased with that achievement. On the whole Americans are proud of our country's role over the last 45 years. For the most part we have used our economic, political, and military strength to promote a freer and more prosperous global community of nations.

It seems clear, however, that the postwar era is over and a new age is dawning in which the world's economy is becoming integrated at an ever accelerating pace. Despite the optimistic rhetoric of recent Presidential administrations, there are growing concerns among many Americans about our country's readiness to be an effective competitor in this increasingly global market place. Americans are fast beginning to understand that if we can not compete effectively in this new global marketplace, our relative economic strength will decline and so will our capacity for world leadership.

One area in which the United States is experiencing a competitive slide is in international banking and finance. During the 1950's and 1960's, U.S. banks dominated the global banking scene as they helped American companies finance their expanding export markets and funded the growth of overseas subsidiaries. In the 1970's, as the economies of Europe and Japan fully recovered from the war, many foreign banks also began to do business in this country as companies from their countries expanded their export markets here. This was a direct result of the efforts our country made in the 1950's and 1960's to encourage the economic growth of Europe and Japan. America, however, had no national policy dealing with the regulation of foreign banks in this country. As a result American banks rightfully began complaining that foreign banks actually enjoyed competitive advantages in their operations here. For example, foreign banks could branch and take deposits nationwide while the McFadden Act generally prohibited their American competitors from doing likewise.

The Congress responded by passing the International Banking Act of 1978, which established the rules under which foreign banks operate in America. That law was designed to establish a level playing field between American and foreign banks in this country. It did not discriminate against foreign banks and even grandfathered some of the competitive advantages they enjoyed. The Senate Banking Committee's 1978 report on that statute stated:

> Foreign chartered banks are accorded operating privileges in the United States which enable them to compete in the United States on terms which equal or exceed the domestic operating privileges of our own domestically chartered banks.

The report went on to state that with enactment of the International Banking Act of 1978:

> The United States has more than abided by the principle of national treatment for foreign banks operating here . . . In contrast our domestic banks operating abroad have not always received equal treatment in foreign countries with their host country competitors.

The report noted that treatment of American banks abroad varied from country to country. It noted:

> European Common Market countries have been most receptive to the benefits of competition brought by American banks to their economies. Japan is a contrast. By the restrictive practices of its officials, American banks are competitively disadvantaged in Japanese banking markets. Not only are American banks limited in their branching abilities, but they are also deterred from soliciting local deposits.

While Congress was concerned in 1978 about the inconsistency between our national treatment policy and the differing policies of some of our competitors, it hoped these matters could be resolved by U.S. negotiators without further congressional action. It did require the Treasury Department to report to Congress by 1980 on the extent to which American banks were denied national treatment in their banking operations abroad.

In 1978, when the International Banking Act was passed, American banks were still among the largest in the world and controlled the largest share of the international banking market. Two of the three largest banks in the world were American and U.S. banks made over 30 percent of all international loans. America's macroeconomic policies in recent years have contributed to massive deficits in America's current account balances. This in turn has fueled the growth of foreign banks in this country and has contributed to the new problems U.S. banks now face in international competition. For example, in 1983 United States banks did 27 percent of cross-border lending compared to 20.5 percent for Japan and 31 percent for European banks. In 1988, United States banks did only 14.7 percent of cross-border lending compared to 38.2 percent for Japan and 30.6 percent for Europe. Now the largest U.S. bank ranks only 24th in the world in size.

Foreign banking institutions currently control over 25 percent of all banking assets booked in the United States. Japanese banks alone have 14 percent of all such assets. In some markets, such as California, Japanese banks have 25 percent of total assets. Furthermore, foreign bank loans in the United States are growing three times as fast as domestic bank loans. In contrast the share of banking assets held by American and all other foreign banks in Japan, while never large, has continued to decline. In recent years the United States share of the Japanese market has declined from 3 to 1 percent. Foreign banks on the whole have less than a 3-percent share of the Japanese market and that too is in decline. The continued erosion of our banks' position in international markets has important implications for our export industries. We have been told that non-U.S. banks are apt to favor exporters from their own countries because of proximity, long-standing relationships, closer legal access, common customs and language, and perhaps social or political pressures. Robert Heller, a former Federal Reserve Governor stated in May 1988:

> If American banks disengage from the international arena, American businessmen will have to conquer new export markets without an important ally in the form of their own banks. The loss of that extra competitive edge may be costly in terms of foreign sales.

These considerations make it more urgent than ever that we address economic weakness such as our lack of savings, our trade and budget deficits, and the short-term planning horizons of our corporations. But they also make it very important for us to be concerned with whether our banks are getting a fair chance to compete in foreign markets.

It seems clear that the Japanese have organized themselves to be able to compete effectively in world markets both in manufacturng and finance. Mr. R. Taggart Murphy, in an article entitled "Power Without Purpose: The Crisis of Japan's Global Finance Dominance" which appeared in the March-April 1989 edition of the Harvard Business Review, states the following:

> Japanese financial institutions are much like their industrial counterparts: regulations exist for the benefit of the institutions not for the domestic consumers. The institutions enjoy high earnings in a domestic market that is effectively protected not only from foreigners but from "excessive" competition. Japanese banks compete bitterly

with each other for retail deposits, for example, with small gifts to individual depositors and repeated visits to their homes, but there is no difference in the interest rates banks pay those individuals or the fees they charge them. Japanese commercial and investment banks have succeeded overseas partly because of their diligence and attention to detail, but also because they can offer lower spreads and lower fees to borrowers, thanks to the profits they enjoy from a cartel-like, protected market at home. Such a market is inconsistent with global financial leadership.

The Department of the Treasury in 1986 did its second update on the original national treatment study required by the International Banking Act of 1978. In that report the Treasury stated that: "Japan has continued to provide national treatment for foreign banks," but then went on to state that:

Despite major changes taking place in Japanese financial markets, foreign commercial banks continue to find Japanese markets difficult to penetrate and offering few competitive opportunities . . . the long standing problems foreign banks have had in funding themselves in domestic yen remain. The resulting funding and pricing practices make Japan a relatively uncongenial lending market for foreign banks. Foreign banks' small share of the loan market has declined modestly in the last three years.

In other words, the Treasury Report suggests that while Japan gives foreign banks de jure national treatment, it does not give them a real opportunity to compete in the Japanese market and thus does not provide de facto national treatment.

The European Community, in seeking to perfect its internal market by removing nontariff trade barriers, has wrestled with the difference between de jure and de facto national treatment and how to deal with it. Early in 1988 the Commission published its proposed second banking directive under which a banking institution licensed by any member state would be free to conduct the full range of banking services throughout the Community. This so-called passport to bank throughout the Community would also be available to foreign institutions established in any member state of the Community. The directive, however, proposed that the passport should not be granted to financial institutions owned or controlled by countries which failed to grant reciprocity to the financial institutions of all EC member states.

American banking institutions voiced concern to us about whether the Community had in mind "mirror-image reciprocity" or "reciprocal national treatment." In the former case our banks worried whether our geographic and Glass-Steagall restrictions would be used to justify denying them access to the new banking passport in the EC. Such mirror-image reciprocity could have led to difficulties for EC member banks operating in this country. Fortunately, I understand, most concerns have now been alleviated by the action of the EC Ministers in clarifying that the directive intended not mirror-image reciprocity, but rather reciprocal national treatment. The final form of article 9(4) of the Directive adopted on December 15 authorizes the EC to respond if "its credit institutions do not receive national treatment offering the same competitive opportunities as are available to domestic credit institutions and the conditions of effective market access are not fulfilled." An EC press release states that the new article intends that the current internationally accepted standard of national treatment should really work in practice ensuring effective market access in a third country. American officials have been told that the directive means the EC wants de facto not just de jure national treatment. That is exactly what they receive in the United States.

Thus concerns earlier expressed about the EC banking directive have been calmed. The Community is stating that it will adhere to the national treatment standard favored by the United States, but it wants that standard to mean national treatment in fact as well as in law. The Community has made clear that it will periodically review whether banks from EC member nations are receiving fair opportunities to compete abroad and, if they are not, will restrict the operations within the Community of banks from the offending country. That sort of provision makes sense to me. Competition in financial services cannot be fair if one major competitor gives its banks a protected home market in which they can make exorbitant profits that are then used to fund their operations abroad. Furthermore, as I noted earlier, a protected home financial market harms Americans trying to export into that market. The EC has made clear in its second banking directive that it will not accept such treatment.

In 1987, even prior to the example set by the European Community in its second banking directive, the Senate passed a bill adopting a reciprocal national treatment policy. Title XV of the Senate bill S. 1409, entitled "National Treatment of Financial Institutions," contained a section adding the following new provision to the International Banking Act of 1978:

Notwithstanding any other provision of law, a Federal banking agency may . . . deny any application by a foreign bank or foreign bank holding company . . . if the country in which the foreign bank is incorporated or has its principal place of business does not accord United States banks . . . the same competitive opportunities as it accords to domestic banks * * *.

The bill also amended section 15(b) of the Securities Exchange Act of 1934 to permit the SEC the authority to deny applications for broker-dealer registration by nationals of countries that did not provide equal competitive opportunities to American firms in their foreign operations.

These provisions were designed to strengthen the hand of the United States in negotiations to end discrimination against U.S. banking and securities firms abroad. Although the U.S. House of Representatives did not accept the provisions in the trade bill conference, the Senate passed them both again in 1988 as sections 909 and 910 of the Proxmire Financial Modernization Act. That bill did not become law.

The Senate has thus twice adopted a reciprocal national treatment policy for banks and securities firms, but the House failed to concur. However, the situation in the House may now be changing. On October 13, 1989, Chairman GONZALEZ of the House Banking Committee expressed his own strong concern that while the United States gives foreign banks national treatment, U.S. financial institutions "have not been in practice accorded equality of competitive opportunity abroad."

Under Secretary of the Treasury David Mulford related his frustration in attempting to persuade the Japanese to truly open their financial markets in 6 years of talks between the United States Treasury and the Japanese Ministry of Finance in a November 29, 1989 article in the Financial Times. In that article he stated:

It is particularly disheartening to see foreign banks and securities firms blocked from offering internationally proven services and products in Japan. . . . Formal legal frameworks apart, foreign firms are also frustrated by opaque informal practices.

Mr. Mulford noted:

* * * statutory restrictions and regulatory practices continue to be a firm barrier to full access by foreign firms to the Japanese financial services industry. The situation invites Congressional action and risks exhausting the U.S. Treasury's patience with the slow evolution of the past six years.

Specific practices that have been cited as some of the means by which the Japanese deny foreign financial institutions a fair opportunity to compete are:

First, regulation of deposit interest rates.—Although in the last 6 years Japan has increased the percentage of deregulated deposits from 15 to 50 percent, they still regulate half of all bank deposits. Mr. Mulford of the Treasury has stated:

Remaining interest rate restrictions should be removed. This would greatly reduce the cost-of-capital advantage Japanese banks enjoy over foreign financial institutions.

Second, impediments to developing money market instruments deny foreign banks an opportunity to fund themselves in domestic yen.

Third, laws, regulations and practices which prohibit Japanese investors from gaining access to foreign markets and impede the entry of innovative foreign products to the Japanese market.

Fourth, laws, regulations, and practices which limit the opportunities of foreign firms to manage pension funds and mutual funds.

Fifth, lack of transparency—Foreign firms are not given fair opportunities to engage in the process through which official policies, regulations and administrative guidance are developed by the Ministry of Finance. Some claim that is hard for them to even obtain clear written statements of the rules or policies once they are decided. Furthermore, the bureaucracy is empowered to interpret the law as it deems fit creating fears of arbitrary treatment in foreign firms if they question authoritative interpretations by Government officials.

This list of practices is only meant to be illustrative and is certainly not an exhaustive description of the Japanese practices that need to be remedied.

As I noted earlier the bill that we are introducing today is designed to give Treasury negotiators new leverage in their ongoing negotiations to obtain competitive access to foreign banking and securities markets such as those in Japan. It is designed to be a market opening mechanism.

We are clearly at a new moment in history for our country. The post World War II order in which America sometimes ignored its own economic interests in favor of achieving military and political objectives is at an end. The American people are beginning to appreciate how critical it is for our country to get ready to compete in the increasingly integrated world economy. The mood is not to retreat from tough economic challenges from our foreign competitors. But the American people and the Congress also understand that we can not afford and will no longer be willing to overlook a lack of fair treatment in trade and financial matters. Our present competitive problems can be overcome and they will be once the American people understand their full significance. It will require the Congress and the President to work closely to ensure that our domestic economic policies are crafted with a full appreciation of their impact on the competitive positions of our industries and financial firms. It will also require that we demand fair treatment for our firms abroad.

I agree with Deputy Secretary of State Lawrence Eagleburger who stated in a recent speech:

We as a government and as a society are going to have to acknowledge that our ability to trade competitively in the world market may be the single most important component of our national security as we move into the next century.

The Fair Treatment in Financial Services Act is designed to give our negotiators new tools to help our financial institutions have the opportunity to trade competitively. This is important, as I noted earlier, not only for our financial institutions but for U.S. industry generally. The Banking Committee knew this in 1978 and stated in its report on the International Banking Act of 1978:

American banks abroad can and should play a significant role in supporting American exports. The Committee is concerned with the uneven treatment accorded to American banks abroad, particularly in contrast with the open reception foreign banks have been given in our domestic market and its consequent effect on our balance of trade.

My only regret is that the Congress and executive branch did not focus more quickly on the need to give our negotiators the tools needed to ensure U.S. firms received fair treatment in international financial services. The Fair Trade in Financial Services Act of 1990 provides such tools and is an important piece of legislation which we will attempt to move expeditiously through the Banking Committee and through the Senate.

I ask unanimous consent that a section-by-section analysis of the bill I am introducing and a copy of the bill itself be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2028

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Fair Trade in Financial Services Act of 1990".

SEC. 2. EFFECTUATING THE PRINCIPLE OF NATIONAL TREATMENT FOR BANKS.

The International Banking Act of 1978 (12 U.S.C. 3101 et seq.) is amended by adding at the end the following:

"NATIONAL TREATMENT

"SEC. 15. (a) GENERAL RULE.—A Federal banking agency may deny any application, or disapprove any notice, filed by a person of a foreign country if the Secretary of the Treasury has published in the Federal Register (and has not revoked) a written determination that the foreign country does not offer United States banks and bank holding companies the same competitive opportunities (including effective market access) as are available to its domestic banks and bank holding companies.

"(b) PERSON OF A FOREIGN COUNTRY DEFINED.—A person of a foreign country is a person that—

"(1) is organized under the laws of that country;

"(2) has its principal place of business in that country;

"(3) in the case of an individual—

"(A) is a citizen of that country, or

"(B) is domiciled in that country; or

"(4) is directly or indirectly controlled by a person described in paragraph (1), (2), or (3).

"(c) NEGOTIATIONS REQUIRED.—

"(1) The Secretary of the Treasury shall initiate negotiations with any foreign country described in subparagraphs (A) and (B) of subsection (d)(1) to ensure that that country offers United States banks and bank holding companies the same competitive opportunities (including effective market access) as are available to its domestic banks and bank holding companies.

"(2) Paragraph (1) does not require the Secretary of the Treasury to initiate negotiations with a foreign country if the Secretary—

"(A) determines that such negotiations would be fruitless or would impair national economic interests; and

"(B) gives written notice of that determination to the chairman and ranking minority member of the Committee on Banking, Housing, and Urban Affairs of the Senate and of the Committee on Banking, Finance and Urban Affairs of the House of Representatives.

"(d) ANNUAL REPORTS REQUIRED.—For each calendar year beginning on or after January 1, 1991, the Secretary of the Treasury shall, not later than May 1 of the following calendar year, submit to the Congress a report—

"(1) identifying each foreign country—

"(A) that, according to the most recent report submitted under section 3602 of the Omnibus Trade and Competitiveness Act of 1988, does not offer United States banks and bank holding companies the same competitive opportunities (including effective market access) as are available to its domestic banks and bank holding companies; and

"(B) with respect to which no written determination under subsection (a) is in effect;

"(2) explaining why the Secretary has not made, or has revoked, such a determination with respect to that country; and

"(3) describing the results of negotiations conducted pursuant to subsection (c)(1).".

SEC. 3. EFFECTUATING THE PRINCIPLE OF NATIONAL TREATMENT FOR SECURITIES BROKERS AND DEALERS.

Section 15(b) of the Securities Exchange Act of 1934 (15 U.S.C. 78o(b)) is amended by adding at the end the following new paragraph:

"(11)(A) This paragraph shall apply with respect to a foreign country if the Secretary of the Treasury has published in the Federal Register (and has not revoked) a written determination that the foreign country does not offer United States brokers and dealers the same competitive opportunities (including effective market access) as are available to its domestic brokers and dealers.

"(B)(i) The Commission may—

"(I) deny any application for registration under this subsection filed by a person of a foreign country to which this paragraph applies; and

"(II) prohibit any person of that foreign country from acquiring control of a registered broker or dealer, irrespective of when the acquisition was initiated.

"(ii) No person of that foreign country, acting directly or indirectly, shall acquire control of any registered broker or dealer unless—

"(I) the Commission has been given notice 45 days in advance of the acquistion, in such form as the Commission shall prescribe by rule; and

"(II) the Commission has not prohibited the acquisition.

"(iii) The Commission may, by order, extend the notice period with respect to any

particular acquisition for not more than 60 days.

"(C) A person of a foreign country is a person that—

"(i) is organized under the laws of that country;

"(ii) has its principal place of business in that country;

'(iii) in the case of an individual—

"(I) is a citizen of that country, or

"(II) is domiciled in that country; or

"(iv) is directly or indirectly controlled by a person described in clause (i), (ii), or (iii).

"(D)(i) The Secretary of the Treasury shall initiate negotiations with any foreign country described in subclauses (I) and (II) of subparagraph (E)(i) to ensure that that country offers United States brokers and dealers the same competitive opportunities (including effective market access) as are available to its domestic brokers and dealers.

"(ii) Clause (i) does not require the Secretary of the Treasury to initiate negotiations with a foreign country if the Secretary—

"(I) determines that such negotiations would be fruitless or would impair national economic interests; and

"(II) gives written notice of that determination to the chairman and ranking minority member of the Committee on Banking, Housing, and Urban Affairs of the Senate and of the Committee on Energy and Commerce of the House of Representatives.

"(E) For each calendar year beginning on or after January 1, 1991, the Secretary of the Treasury shall, not later than May 1 of the following calendar year, submit to the Congress a report—

"(i) identifying each foreign country—

"(I) that, according to the most recent report submitted under section 3602 of the Omnibus Trade and Competitiveness Act of 1988, does not offer United States brokers and dealers the same competitive opportunities (including effective market access) as are available to its domestic brokers and dealers; and

"(II) with respect to which no written determination under subparagraph (A) is in effect;

"(ii) explaining why the Secretary has not made, or has revoked, such a determination with respect to that country; and

"(iii) describing the results of negotiations conducted pursuant to subparagraph (D)(i)."

SEC. 4. CONFORMING AMENDMENTS SPECIFYING THAT NATIONAL TREATMENT INCLUDES EFFECTIVE MARKET ACCESS.

(a) QUADRENNIAL REPORTS ON FOREIGN TREATMENT OF UNITED STATES FINANCIAL INSTITUTIONS.—Section 3602 of the Omnibus Trade and Competitiveness Act of 1988 (22 U.S.C. 5352) is amended by adding at the end the following: "For purposes of this section, a foreign country denies national treatment to United States entities if it does not offer them the same competitive opportunities (including effective market access) as are available to its domestic entities.".

(b) NEGOTIATIONS TO PROMOTE FAIR TRADE IN FINANCIAL SERVICES.—Section 3603(a)(1) of the Omnibus Trade and Competitiveness Act of 1988 (22 U.S.C. 5353(a)(1) is amended by inserting "effective" after "banking organizations and securities companies have".

(c) PRIMARY DEALERS IN GOVERNMENT DEBT INSTRUMENTS.—Section 3502(b)(1) of the Omnibus Trade and Competitiveness Act of 1988 (22 U.S.C. 5342) is amended—

(1) by striking "does not accord to" and inserting "does not offer";

(2) by inserting "(including effective market access)" after "the same competitive opportunities in the underwriting and distribution of government debt instruments issued by such country"; and

(3) by striking "as such country accords to" and inserting "as are available to".

THE FAIR TRADE IN FINANCIAL SERVICES ACT OF 1990—SECTION-BY-SECTION ANALYSIS

SECTION 1: SHORT TITLE

This section designates this Act as the "Fair Trade in Financial Services Act of 1990."

SECTION 2: EFFECTUATING THE PRINCIPLE OF NATIONAL TREATMENT FOR BANKS AND BANK HOLDING COMPANIES

This section adds a new section 15 to the International Banking Act of 1978, establishing a framework of negotiations, reports, and discretionary sanctions designed to help end discrimination against U.S. banks and bank holding companies that operate or seek to operate abroad.

A. Discretionary Sanctions

1. Procedure

Subsection (a) of new section 15 authorizes certain sanctions against persons from countries that discriminate against U.S. banks and bank holding companies. The Secretary of the Treasury may open the way for such sanctions by publishing in the Federal Register a determination that a foreign country does not offer U.S. banks and bank holding companies the same competitive opportunities (including effective market access) as are available in that country to its domestic banks and bank holding companies. The Federal banking agencies may then deny applications and disapprove notices filed by persons of that country.

Subsection (a) applies to any application requiring the approval of a Federal banking agency, including an application to acquire shares of a bank or bank holding company; to effect a bank merger; to establish a branch, agency, or commercial lending company; to engage in a nonbanking activity; to establish an Edge Act or Agreement corporation; or to obtain Federal deposit insurance. Subsection (a) likewise applies to any notice that is subject to disapproval by a Federal banking agency, such as a notice under the Change in Bank Control Act.

2. National Treatment

The operative standard of subsection (a)—i.e., whether a foreign country "offers[s] United States banks and bank holding companies the same competitive opportunities (including effective market access) as are available to its domestic banks and bank holding companies"—is largely drawn from section 3502(b)(1) of the Omnibus Trade and Competitiveness Act of 1988 (22 U.S.C. § 5342(b)(1)), as well as section 601 of S. 1409 (reported by the Senate Banking Committee on June 23, 1987), sections 1501 and 1503 of the Senate amendment to H.R. 3 (adopted on July 21, 1987), and sections 909 and 910 of S. 1886 (passed by the Senate on March 30, 1988), all of the 100th Congress. The European Community's Second Banking Directive (adopted December 15, 1988) incorporated strikingly similar language. This section, in turn, draws on the Second Banking Directive for two improvements in phrasing: "accords to" in section 3502(b)(1) becomes "offers" in this section; and "as such country accords" becomes "as are available."

The reference to "effective market access" is intended to emphasize that national treatment must be de facto as well as de jure; mere equality in the letter of the law will not suffice. That is what section 3502(b) and the Senate antecedents cited above meant by "the same competitive opportunities."

The Senate Banking Committee originated that phrase to encapsulate the guiding principle of the International Banking Act of 1978: national treatment to ensure equality of competitive opportunity. The Committee used "national treatment" to encompass that concept, in keeping with the opening paragraph of the Treasury Department's original national treatment study, which stated that the International Banking Act's guiding principle was "to provide 'national treatment' for foreign banks, i.e., to accord foreign banks equality of competitive opportunity with their domestic counterparts in the U.S." Report to Congress on Foreign Government Treatment of U.S. Commercial Banking Organizations vii (1979). Indeed, "the same competitive opportunities" is itself a paraphrase of "equality of competitive opportunity." Thus the Committee, quoting from the Treasury's original study, described "national treatment" as follows:

"[N]ational treatment 'afford(s) foreign banks equality of competitive opportunity vis-a-vis domestic institutions in similar circumstances.' It 'entails a pragmatic impact- or effects-oriented test for assessing the overall legal and regulatory climate affecting foreign banks in a given country. The test is met if foreign banks are allowed to compete on essentially equal terms with domestic institutions in the host country, even if some specific regulations or requirements applied to foreign banks differ from those affecting domestic banks.' "

S. Rep. No. 85, 100th Cong., 1st Sess. 42 (1987).

The conference committee on the Omnibus Trade and Competitiveness Act of 1988 took the same approach in discussing section 3502(b): "In the Conferees' view, a country accords national treatment to U.S. companies only if it accords them the same competitive opportunities as it accords to its domestic companies. National treatment requires a pragmatic, effect-oriented test for assuring that the same competitive opportunities exist." H. Rep. No. 576, 100th Cong., 2d Sess. 855 (1988).

B. Person of a Foreign Country Defined

Subsection (b) broadly defines a person of a foreign country as any person that (1) is organized under the laws of that country; (2) has its principal place of business in that country; (3) if an individual, is a citizen of or is domiciled in that country; or (4) is directly or indirectly controlled by any of the foregoing.

C. Negotiations Required

Subsection (c) generally requires the Secretary of the Treasury to initiate negotiations with any foreign country if: (1) according to the Treasury Department's most recent national treatment study, that country does not offer U.S. banks and bank holding companies the same competitive opportunities (including effective market access) as are available to that country's domestic banks and bank holding companies; and (2) the Secretary has not made a determination under subsection (a) with respect to that country. The objective of the negotiations is to ensure that the foreign country offers such opportunities to U.S. banks and bank holding companies. However, the Secretary need not initiate such negotiations if he determines that they would be fruitless or would impair national economic interests,

and gives written notice of that determination to the chairman and ranking minority member of the Senate and House Banking Committees.

D. Annual Reports Required

Subsection (d) requires the Secretary of the Treasury to report to Congress each year (1) identifying each foreign country that, according to the most recent national treatment study, does not offer U.S. banks and bank holding companies the same competitive opportunities (including effective market access) as are available to that country's domestic banks and bank holding companies, and yet with respect to which no determination under subsection (a) is in effect; (2) explaining why the Secretary has not made (or has revoked) such a determination; and (3) describing the results of any negotiations conducted pursuant to subsection (c). Such a report is due by the May 1 following the year with which the report deals.

SECTION 3: EFFECTUATING THE PRINCIPLE OF NATIONAL TREATMENT FOR SECURITIES BROKERS AND DEALERS

This section adds a new paragraph (11) to section 15(b) of the Securities Exchange Act of 1934, creating a framework for securities brokers and dealers parallel to that for banks and bank holding companies under section 2. The objective is to help end discrimination against U.S. brokers and dealers that operate or seek to operate abroad.

A. Discretionary Sanctions

Under subparagraph (A) of new paragraph (11), the Secretary of the Treasury may open the way for sanctions against persons from such a country by publishing in the Federal Register a determination that that country does not offer U.S. brokers and dealers the same competitive opportunities (including effective market access) as are available in that country to its domestic brokers and dealers. (This standard—"the same competitive opportunities (including effective market access)"—is discussed above in connection with section 2.) The Securities and Exchange Commission may then deny applications for registration as a broker or dealer filed by a person of that country, and to prohibit any person of that country from acquiring control of a registered broker or dealer.

If the Secretary has published a determination under subparagraph (A) with respect to a given country, no person of that country may acquire control of any registered broker or dealer without giving the SEC at least 45 days notice of the proposed acquisition.

B. Person of a Foreign Country Defined

Subparagraph (B) broadly defines a person of a foreign country as any person that (1) is organized under the laws of that country; (2) has its principal place of business in that country; (3) if any individual, is domiciled in or a citizen of that country; or (4) is directly or indirectly controlled by any of the foregoing.

C. Negotiations Required

Subparagraph (C) generally requires the Secretary of the Treasury to initiate negotiations with any foreign country if: (1) according to the Treasury Department's most recent national treatment study, that country does not offer U.S. brokers and dealers the same competitive opportunities (including effective market access) as are available to that country's domestic brokers and dealers; and (2) the Secretary has not made a determination under subparagraph (A) with respect to that country. The objective of the negotiations is to ensure that the foreign country offers such opportunities to U.S. brokers and dealers. However, the Secretary need not initiate such negotiations if he determines that they would be fruitless or would impair national economic interests, and gives written notice of that determination to the chairman and ranking minority member of the Senate Banking Committee and the House Energy and Commerce Committee.

D. Annual Reports Required

Subparagraph (D) requires the Secretary of the Treasury to report to Congress each year (1) identifying each foreign country that, according to the most recent national treatment study, does not offer U.S. brokers and dealers the same competitive opportunities (including effective market access) as are available to that country's domestic brokers and dealers, and yet with respect to which no determination under subparagraph (A) is in effect; (2) explaining why the Secretary has not made (or has revoked) such a determination; and (3) describing the results of any negotiations conducted pursuant to subparagraph (C). Such a report is due by the May 1 following the year with which the report deals.

SECTION 4: CONFORMING AMENDMENTS SPECIFYING THAT NATIONAL TREATMENT INCLUDES EFFECTIVE MARKET ACCESS

This section makes conforming amendments to three sections of current law.

A. Quadrennial Reports on Foreign Treatment of United States Financial Institutions

Section 3602 of the Omnibus Trade and Competitiveness Act of 1988 requires the Secretary of the Treasury to report at least every four years on, *inter alia*, the extent to which foreign countries deny national treatment to U.S. banking and securities organizations. 22 U.S.C. § 5352. Subsection (a) adds a definition of national treatment consistent with that adopted in sections 2 and 3 of the bill: "a foreign country denies national treatment to United States entities if it does not offer them the same competitive opportunities (including effective market access) as are available to its domestic entities."

B. Negotiations to Provide Fair Trade in Financial Services

Section 3603(a)(1) of the Omnibus Trade and Competitiveness Act of 1988 directs the President or his designee to conduct discussions with foreign governments aimed at "ensuring that United States banking organizations and securities companies have access to foreign markets and receive national treatment in those markets." Id. § 5353(a)(1). For consistency with sections 2 and 3 of the bill, subsection (b) specifies that access must be "effective."

C. Primary Dealers in Government Debt Instruments

Section 3502(b)(1) of the Omnibus Trade and Competitiveness Act of 1988 generally prohibits the Federal Reserve System from designating as a primary dealer in U.S. Government securities (or continuing any existing designation of) any person of a foreign country that "does not accord to United States companies the same competitive opportunities in the underwriting and distribution of government debt securities issued by such country as such country accords to domestic companies of such country." *Id.* § 5342(b)(1). For consistency with sections 2 and 3 of the bill, subsection (c) specifies that "the same competitive opportunities" include "effective market access." As noted above in connection with section 2, this makes explicit in legislative language the original intent of section 3502(b)(1).

In addition, subsection (c) makes two improvements in phrasing drawn from the European Community's Second Banking Directive: "accords to" becomes "offers"; and "as such country accords" becomes "as are available."

Subsection (c) affects only the definition of national treatment; it does not alter existing law—including the exemptions from and exceptions to section 3502(b)(1)—in any other respect.

Mr. GARN. Mr. President, today I join Senator RIEGLE in introducing the Fair Trade in Financial Services Act. This legislation is intended to give the Treasury negotiating leverage to open up markets for U.S. financial services companies where they are now being denied national treatment, or equal market access.

Beginning with my participation in passage of the International Banking Act of 1978, I have been a strong proponent of the national treatment standard both as U.S. financial policy and as the international standard to be pursued in negotiations for foreign market access. This notion of equal treatment under domestic law promises fair treatment for all sides, without challenging the right of governments to establish the regulatory framework they judge appropriate within their own borders. It is also important to note that national treatment is not only a U.S. standard but is an internationally recognized standard for cross-border transactions in the GATT. Moreover, it is adopted in the Second Banking Directive of the European Community.

While national treatment is a widely recognized standard, this bill provides a useful elaboration of its meaning by including within its definition "effective market access." This addition emphasizes that equal treatment must occur in practice as well as in statute. There are many examples in the world today of foreign governments that impose no legal bar to market access but still limit foreign participation in their markets by less formal means.

I believe this is a vitally important issue for U.S. competitiveness in world markets. As I indicated when the Banking Committee considered national treatment legislation during the trade bill debate in 1987, financial services is an area in which the United States has competitive institutions and the best products. There is no reason that we cannot compete successfully in foreign markets unless limited by unfair restrictions.

I have delivered this message repeatedly to governments around the world—to the Japanese, the Taiwanese, the South Koreans, and others—with little to show for it. I have warned time and again that unless markets are liberalized, Congress will

pass tougher legislation to deal with market access. I believe the time has come to take action.

We are not closing our markets with this bill. But we are putting others on notice that we will not wait forever to receive fair play.

Mr. D'AMATO. Mr. President, I am pleased to be an original cosponsor of legislation introduced today by our distinguished chairman of the Banking Committee, Senator RIEGLE and the distinguished ranking Republican on the committee, Senator GARN. The Fair Trade in Financial Services Act of 1990 strikes a responsive chord with this Senator because it concerns two areas with which I have long been concerned: Free and fair trade and the competitiveness of America's financial services industry.

Free trade is a time-honored tradition in America and a cornerstone of the free enterprise, capitalist economic system. For the past 6 years the Bush administration and the Reagan administration have negotiated myriad difficult issues with our trading partners, the Japanese, over the simple concept of free trade. United States markets are open to Japanese competition and for many years we have sought to make open market access a reality in Japan. Mr. President, we remain far from that reality.

I support this legislation and commend my colleagues for introducing this bill. Its necessity is clear based on the situation described by Treasury Under Secretary Mulford. He describes a familiar situation in trade talks with Japan. As in other areas of trade in both goods and services, Secretary Mulford has found that Japanese barriers to free trade in financial services consist of not just laws and regulations, but also traditional practices and opaque informal barriers to full access. Mr. President, I ask unanimous consent to include the full text of Mr. Mulford's article in the Financial Times at the conclusion of my remarks.

This legislation will not, by itself, solve any of the knotty and seemingly intractable problems of structural and cultural impediments that plague United States efforts to penetrate Japanese markets; but it is a step in the right direction. And it is aimed at facilitating free competition for United States firms in an industry which is crucial to the economic success of both the United States and Japan: financial services.

It requires no prescience to know that Japanese firms have penetrated American markets in financial services products. Names like Nomoura, Fuji, and Daiwa are familiar to any student of our domestic financial services industry. By their large and growing presence in key financial centers like New York, Los Angeles, and Chicago these foreign giants are clear proof of the globalization of financial markets. By their entry into this market, Japanese institutions have heightened the competition and lowered the profit margins of the banking and securities industries.

To this I say: more power to them; for more competition means better service at lower prices to the American consumer. That is why we encourage free access to American markets from foreign competitions. Financial services is a major industry in my State of New York. Firms in that industry and the American consumers, not to mention the American economy, thrive on the basis of strong and fair competition.

The Japanese consumer deserves the same benefit. American firms seeking entry into Japanese markets deserve the same opportunity to compete for Japanese business whether they seek to make deposits, make loans, or underwrite securities offerings. America seeks only a free-flowing two-way street.

This legislation gives the administration additional and needed leverage to help the Japanese Ministry of Finance see the full benefits of real competition. It recognizes the practical difficulties which foreigners seeking to do business in Japan face in every industry. It grants additional authority to Treasury and to banking regulators to condition continued access to American financial services markets upon the actual, tangible realization of full access to Japanese markets for United States firms. It will help us to realize the elusive goal of free trade and the consumer benefit that inevitably results from hard fair competition. With this legislation, we offer further encouragement to the Treasury Department to continue its difficult and frustrating task of bringing about real globalization of the financial services industry and competitive consumer benefit to the people of Japan.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NEEDED: BOLDER STEPS TOWARD FREER ACCESS

(By David Mulford)

Six years of yen-dollar talks between the US Treasury and the Japanese Ministry of Finance have produced a long and impressive record of accomplishments. Nonetheless, a realistic assessment after the latest round of talks must conclude that the fundamental problems of over-regulation in Japan and access to the Japanese market by foreign financial institutions are a long way from resolution.

The two sides originally aimed to internationalise the yen and to open up and "democratise" Japan's financial markets. It was believed that this would contribute to a stronger international financial system. With the focus now on correcting current account imbalances, these objectives have become even more important.

When negotiations began, the Japanese capital markets were heavily regulated. Interest rates were largely fixed; short-term money markets were in their infancy; there was little access for foreigners to the domestic government bond market. Nor were there any foreign members of the Tokyo stock exchange or foreign trust banks. The Euroyen market was embryonic.

Today, about half of all bank deposits have been deregulated and largely reflect market interest rates. The Bank of Japan has taken an important step toward liberalising the money market. New short-term money market instruments have been introduced. A partial auction system in the government bond market has reduced the role of the traditional Japanese syndicate. Foreign firms have been admitted to the Tokyo stock exchange and entered the trust banking business. In the Euro-markets, the volume of yen offerings has grown 17-fold.

The Ministry of Finance is to be commended on this progress, but Japanese officials who suggest that the financial liberalisation process in Japan is largely complete are wrong. The standard of judgment must be not the relative one of how many changes have been made in the old system, but the absolute one of how close Japan is to a truly market-based financial system—one that operates on the same principles of efficiency, transparency, objectivity and competition which distinguish other great financial centres.

The reforms so far are a start, but they have not changed substantially the way financial market business is conducted in Japan. Basic deregulation, sweeping change, or bold challenges to the way the existing system benefits traditional Japanese financial institutions are hard to find.

The reforms adopted in Japan can be viewed more clearly when seen against the pace of liberalisation in the rest of the world. New York and London have become increasingly efficient and sophisticated financial markets. Japan lags behind.

Full deregulation is what is needed. For example, the remaining interest rate restrictions should be removed. This would greatly reduce the cost-of-capital advantage Japanese banks enjoy over foreign financial institutions. Moreover, competitive rates would add about 1 per cent of Japanese GNP to the personal income of depositors, thereby increasing consumption and imports.

Slow progress in the Japanese money markets has also been disappointing. Reforms have not produced a full range of short-term money market instruments unencumbered by artificial barriers, nuisance taxes and other regulatory intervention. Furthermore, the absence of an efficient, liquid money market in Japan has discouraged greater use of the yen internationally. Despite the progress made in the Euroyen bond market, the yen still commands little interest as an international currency. Ninety per cent of Japan's imports and 65 per cent of its exports are still denominated in non-yen currencies.

The chief brakes on further progress are the laws, regulations, and practices which prohibit Japanese investors from gaining access to foreign markets and impede the entry of innovative foreign products, and services to the Japanese market. This is regrettable, because it is innovation that makes capital markets dynamic and efficient. For example, the Chicago Mercantile Exchange has been delayed in obtaining Japanese approval for its Globex electronic trading system.

It is particularly disheartening to see foreign banks and securities firms blocked

from offering internationally proven services and products in Japan. In the growing market for pension funds and mutual fund management, foreign firms are severely limited in their ability to provide services in which they have established and respected positions.

Formal legal frameworks apart, foreign firms are also frustrated by opaque informal practices. It is to the benefit of all Japanese financial market players that decisions be made in a transparent way.

Taken together, these statutory restrictions and regulatory practices continue to be a firm barrier to full access for foreign firms to the Japanese financial services industry. The situation invites Congressional action and risks exhausting the US Treasury's patience with the slow evolution of the past six years.

Open and efficient financial markets are central to an effective international monetary system, to world economic growth and to the adjustment of the world's large external imbalances. The failure by Japan to provide full access to its markets is particularly serious given Japan's current financial and economic position in the world. The US calls on its Japanese friends to accelerate their deregulation efforts in 1990 and to resolve the remaining issues fundamental to real reform.

By Mr. GRAMM (by request for himself and Mr. DOLE):

S. 2029. A bill to amend the Higher Education Act of 1965, to reduce student loan defaults, to achieve greater accountability in Federal student assistance programs, to minimize the potential for waste, fraud, and abuse, and for other purposes; to the Committee on Labor and Human Resources.

STUDENT LOAN DEFAULT REDUCTION AMENDMENTS OF 1990

Mr. GRAMM. Mr. President, today I am introducing the Student Loan Default Reduction Amendments of 1990. The legislation has been developed with Secretary of Education Lauro Cavazos and seeks to curb the rising defaults on Government-insured student loans. The high and increasing costs of student loan defaults is a major problem facing higher education today.

Default costs under the Guaranteed Student Loan [GSL] program are at an all-time high. They increased almost eight-fold since fiscal year 1981 from $235 million to $1.84 billion in fiscal year 1989. These costs constitute 37 percent of the program obligations, and rank fourth in the expenditures of the Department of Education for fiscal year 1989.

Although the Department of Education has increased collections on defaulted loans from $65 million fiscal year 1981 to $630 million in fiscal year 1989, we currently have $6.37 billion of defaulted loans outstanding. Clearly, the failure of past students to repay their loans is straining our ability to make loans to current and future students.

Enactment of the proposals contained in this legislation would be a major step toward ensuring the integrity of the student loan program. It is my intent to ensure that all eligible students receive the help they need to gain a high quality education and that they fulfill the financial obligations they incurred to pay for that education so that help also will be available to the next generation of students when they, too, need it most.

I encourage my colleagues to review this proposal and work to ensure its swift enactment. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2029

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Student Loan Default Reduction Amendments of 1990".

SEC. 2. GRADUATED REPAYMENT.

(a) TERMS OF FEDERALLY INSURED STUDENT LOANS.—Section 427(a)(2) of the Higher Education Act 1965 (hereinafter referred to as "the Act") is amended—

(1) in subparagraph (G), by striking out the "and" at the end thereof;

(2) by redesignating subparagraph (H) as subparagraph (I); and

(3) by inserting immediately following subparagraph (G) the following new subparagraph:

"(H) provides that, not more than 6 months prior to the date on which the student borrower's first payment on a loan is due, the lender shall offer the student borrower the option of repaying the loan in accordance with a graduated repayment schedule, provided that such schedule does not result in negative amortization of the loan, provides for the repayment of only accrued interest during the first 12 months of repayment, and that, after the fourth year of repayment, requires the borrower to resume repayment on an equal installment basis in an amount sufficient to satisfy the requirements of subparagraph (B); and".

(b) REQUIREMENTS OF INSURANCE PROGRAM.—Section 428(b)(1)(E) of the Act is amended to read as follows:

"(E) subject to subparagraphs (D) and (L), and except as provided by subparagraph (M), provides that—

"(i) not more than 6 months prior to the date on which the student borrower's first payment on a loan is due, the lender shall offer the student borrower of a loan made, insured, or guaranteed under this section or section 428A the option of repaying the loan in accordance with a graduated repayment schedule, provided that such schedule does not result in negative amortization of the loan, provides for the repayment of only accrued interest during the first 12 months of repayment, and that, after the fourth year repayment, requires the borrower to resume repayment on an equal installment basis in an amount sufficient to satisfy the requirements of clause (ii), and

"(ii) repayment of loans shall in installments over a period of not less than 5 years (unless the student, during the 6 months immediately preceding the start of the repayment period, specifically requests that repayment be made over a shorter period) nor more than 10 years, beginning 6 months after the month in which the student ceases to carry at least one-half the normal full-time academic workload as determined by the institution;".

SEC. 3. RESTRICTIONS ON INSTITUTIONAL PROMOTIONAL ACTIVITIES.

Section 487(a) of the Act is amended by adding at the end thereof the following new paragraph:

"(11) The institution does not—

"(A) use any contractor or any person, other than a salaried employee of the institution or a volunteer, to conduct any student recruiting or admission activities or to make decisions regarding the award of student financial assistance; or

"(B) pay any commission, bonus, or other incentive payment based directly or indirectly on success in securing enrollments to any persons engaged in any such activity.".

SEC. 4. WAGE GARNISHMENT.

(a) Section 428E of the Act is amended to read as follows:

"WAGE GARNISHMENT REQUIREMENTS

"SEC. 428E. (a) GARNISHMENT REQUIREMENTS.—Notwithstanding any provision of State law, a guaranty agency may garnish the disposable pay of an individual to collect the amount owed by the individual, if he or she is not currently making required repayments under a repayment agreement with the guaranty agency, on a loan made, insured or guaranteed under this part on which the agency received reimbursement from the Secretary under section 428(c), provided that—

"(1) the amount deducted for any pay period may not exceed 10 percent of disposable pay, except that a greater percentage may be deducted upon the written consent of the individual involved;

"(2) the individual shall receive a minimum of 30 days written notice from the agency, informing such individual of the nature and amount of the loan obligation to be collected, the intention of the agency to initiate proceedings to collect the debt through deductions from pay, and an explanation of the rights of the individual under this section;

"(3) the individual shall be provided an opportunity to inspect and copy records relating to the debt;

"(4) the individual shall be provided an opportunity to enter into a written agreement with the agency, under terms agreeable to the head of the agency or his designee, to establish a schedule for the repayment of the debt;

"(5) the individual shall be provided an opportunity for a hearing in accordance with subsection (b) on the determination of the agency concerning the existence or the amount of the debt, and in the case of an individual whose repayment schedule is established other than by a written agreement pursuant to paragraph (4), concerning the terms of the repayment schedule;

"(6) the employer shall be liable for, and the agency may sue the employer in a State or Federal court of competent jurisdiction to recover, any amount which such employer fails to withhold from wages due an employee following receipt by such employer of notice of the withholding order, plus attorneys' fees, costs and, in the court's discretion, punitive damages, but such employer shall not be required to vary the normal pay and disbursement cycles in order to comply with this paragraph; and

"(7) an employer may not discharge from employment, refuse to employ, or take disciplinary action against an individual subject

to wage withholding in accordance with this section by reason of the fact that the individual's wages have been subject to garnishment under this section, and such individual may sue in a State or Federal court of competent jurisdiction any employer who takes such action. The court shall award attorneys' fees to the employee and, in its discretion, may order reinstatement of the individual, award punitive damages and back pay to the employee, or order such other remedy as may be reasonably necessary.

"(b) HEARING REQUIREMENTS.—A hearing described in subsection (a)(5) shall be provided prior to issuance of a garnishment order if the individual, on or before the 15th day following receipt of the notice described in subsection (a)(2), and in accordance with such procedures as the head of the agency may prescribe, files a petition requesting such a hearing. If the individual does not file a petition requesting a hearing prior to such date, the agency shall provide the individual a hearing under subsection (a)(5), but such hearing need not be provided prior to issuance of a garnishment order. A hearing under subsection (a)(5) may not be conducted by an individual under the supervision or control of the head of the agency, except that nothing in this sentence shall be construed to prohibit the appointment of an administrative law judge. The hearing official shall issue a final decision at the earliest practicable date, but not later than 60 days after the filing of the petition requesting the hearing.

"(c) NOTICE REQUIREMENTS.—The notice to the employer of the withholding order shall contain only such information as may be necessary for the employer to comply with the withholding order.

"(d) DEFINITION.—For the purpose of this section, the term 'disposable pay' means that part of pay of any individual remaining after the deduction of any amounts required by law to be withheld.".

(b) SECRETARY'S EQUITABLE SHARE.—Section 428(c)(6) of the Act is amended—

(1) in subparagraph (A)(ii), by striking out "(subject to subparagraph (D) of this paragraph)"; and

(2) by striking out subparagraph (D).

SEC. 5. EMERGENCY ACTIONS.

(a) LEGAL POWERS AND RESPONSIBILITIES.—Section 432 of the Act is amended—

(1) by redesignating subsection (i) as subsection (j); and

(2) by inserting immediately following subsection (h) the following new subsection:

"(i) AUTHORITY OF THE SECRETARY TO TAKE EMERGENCY ACTIONS AGAINST LENDERS.—(1) If the Secretary—

"(A) receives information, determined by the Secretary to be reliable, that the lender is violating any provision of this title, any regulation prescribed under this title, or any applicable special arrangement, agreement, or limitation;

"(B) determines that immediate action is necessary to prevent misuse of Federal funds; and

"(C) determines that the likelihood of loss outweighs the importance of following the limitation, suspension, or termination procedures authorized in subsection (h),

the Secretary shall, effective on the date on which notice of the action is mailed to the lender, take emergency action to stop the issuance of guarantee commitments and the payment of interest benefits and special allowance to a lender.

"(2) An emergency action under this subsection may not exceed 30 days unless a limitation, suspension, or termination proceeding is begun against the lender under subsection (h) before the expiration of that period.

"(3) The Secretary shall provide the lender, if such lender so requests, an opportunity to show cause that the emergency action is unwarranted.".

(b) PROGRAM PARTICIPATION AGREEMENTS.—Section 487(c)(1) of the Act is amended—

(1) in subparagraph (C), by striking out "and" at the end thereof;

(2) in subparagraph (D), by striking out the period at the end thereof and inserting in lieu thereof a semicolon and "and"; and

(3) by adding at the end thereof the following new subparagraph:

"(E) an emergency action against an institution, under which the Secretary shall, effective on the date on which notice of the action is mailed to the institution, withhold funds from the institution or its students and withdraw the institution's authority to obligate funds under any program under this title, if the Secretary—

"(i) receives information, determined by the Secretary to be reliable, that the institution is violating any provision of this title, any regulation prescribed under this title, or any applicable special arrangement, agreement, or limitation,

"(ii) determines that immediate action is necessary to prevent misuse of Federal funds, and

"(iii) determines that the likelihood of loss outweighs the importance of the procedures prescribed under subparagraph (D) for limitation, suspension, or termination, except that an emergency action shall not exceed 30 days unless limitation, suspension, or termination proceedings are initiated by the Secretary against the institution within that period of time, and except that the Secretary shall provide the institution an opportunity to show cause, if such institution so requests, that the emergency action is unwarranted.".

SEC. 6. ABILITY TO BENEFIT.

(a) IN GENERAL.—Section 484(d) of the Act is amended to read as follows:

"(d) ABILITY TO BENEFIT.—(1) In order for a student who is admitted on the basis of the ability to benefit from the education or training offered to be eligible for any grant, loan, or work assistance under this title, the student shall, prior to enrollment, pass a test developed, administered, and graded by one or more independent organizations in accordance with paragraph (3).

"(2) For purposes of paragraph (1), independent organizations may include, but are not limited to, State agencies and private national or regional organizations, except that an organization that includes one or more institutions of higher education or vocational schools, or their officers or owners, as members shall not be eligible. An organization is eligible to develop, administer, and grade tests for purposes of this section only upon a determination by the Secretary that the organization is independent of the institutions that would be using such tests to determine the ability of their prospective students to benefit from the education or training offered by the institution.

"(3)(A) Any test developed for purposes of this subsection shall measure the student's ability to complete successfully the course of study for which the student has applied for admission. More than one test may be developed for purposes of this subsection in order to measure appropriately a student's ability to complete a particular type of educational program.

"(B)(i) The appropriate accrediting agency shall establish the passing score on any test developed in accordance with subparagraph (A) for any educational program for which the test is used.

"(ii) Notwithstanding clause (i), if the Secretary determines that students who achieved passing scores on any test developed for purposes of this subsection are not achieving substantially the same graduation, job placement, or State licensing examination pass rates as students attending the same institutions who received their high school diplomas (or its recognized equivalent) prior to admission to such institutions, the Secretary is authorized to—

"(I) establish a different passing score, or require a different accrediting agency to establish the passing score on such tests;

"(II) consider this information in reevaluating the recognition by the Secretary of the agency that established the passing score as reliable authority as to the quality of training offered by the institutions it accredits; and

"(III) require that a different test, developed by another independent organization, be administered to students seeking admission at that institution.

"(4) Notwithstanding paragraph (1), a student who is enrolled in an elementary or a secondary school shall not be eligible for assistance under this title.".

(b) DEFINITION.—Section 481(b) of the Act is amended in the fourth sentence by striking out "shall not promulgate regulations defining the admissions procedures or remediation programs that must be used by an institution in admitting students on the basis of their ability to benefit from the training offered and".

(c) PROGRAM PARTICIPATION AGREEMENTS.—Section 487(a) of the Act (as amended by section 3) is further amended by adding at the end thereof the following new paragraph:

"(12) In the case of an institution that admits students on the basis of ability to benefit from the training offered, the institution shall provide the Secretary with the information necessary for the Secretary to make the determination described in section 484(d)(3)(B)(ii).".

SEC. 7. EFFECT OF LOSS OF ACCREDITATION.

(a) DEFINITIONS FOR STUDENT LOAN INSURANCE PROGRAM.—Section 435 of the Act is amended—

(1) in subsection (a)(1), by striking out "The term" and inserting in lieu thereof "Subject to subsection (m), the term"; and

(2) by adding at the end thereof the following new subsection:

"(m) IMPACT OF LOSS OF ACCREDITATION.—(1) Except as provided in paragraph (2), an institution shall not be considered to be an eligible institution under subsection (a) if such institution has—

"(A) had its accreditation withdrawn, revoked, or otherwise terminated for cause during the preceding 24 months by a nationally recognized accrediting agency listed by the Secretary in accordance with section 1201(a); or

"(B) withdrawn from accreditation voluntarily under a show cause or suspension order during the preceding 24 months.

"(2) Paragraph (1) shall not apply to an institution if its accreditation has been restored by the same accrediting agency that had accredited it prior to the withdrawal, renovation or termination.".

(b) GENERAL DEFINITIONS.—Section 481 of the Act is further amended—

(1) in subsection (a)(1), by striking "For the purpose" and inserting in lieu thereof "Subject to subsection (e), for the purpose"; and

(2) by adding at the end thereof the following new subsection:

"(e) IMPACT OF LOSS OF ACCREDITATION.—(1) Except as provided in paragraph (2), an institution shall not be considered to be an eligible institution under subsection (a) if such institution has—

"(A) had its accreditation withdrawn, revoked, or otherwise terminated for cause during the preceding 24 months by a nationally recognized accrediting agency listed by the Secretary in accordance with section 1201(a); or

"(B) withdrawn from accreditation voluntarily under a show cause or suspension order during the preceding 24 months.

"(2) Paragraph (1) shall not apply to an institution if its accreditation has been restored by the same accrediting agency that had accredited the institution prior to the withdrawal, revocation or termination.".

SEC. 8. TUITION REFUNDS.

(a) PROGRAM PARTICIPATION AGREEMENTS.—Section 487(a) of the Act (as amended by section 6) is further amended by adding at the end thereof the following new paragraph:

"(13)(A)(i) The institution will have a fair and equitable refund policy under which the institution will make a refund of unearned tuition, fees, room and board and other charges to a student who received a grant, a loan, or work assistance under this title, or whose parent received a loan made under section 428B on behalf of the student, if the student—

"(I) does not register for the period of attendance for which the assistance was intended; or

"(II) withdraws or otherwise fails to complete the period of enrollment for which the assistance was provided.

"(ii) The institution will provide a written statement containing its refund policy, together with examples of the application of this policy, to a prospective student prior to the student's enrollment, and will make its refund policy known to currently enrolled students. The institution will include in its statement the procedures that a student must follow to obtain a refund, but the institution will, in accordance with regulations, pay to the lender the portion of a refund allocable to the student's loans made, insured, or guaranteed under section 427, 428, 428A, or 428B, and return the portion of refund allocable to another program under title IV of the Act to that program, whether or not the student follows those procedures. If the institution changes its refund policy, it will ensure that all students are made aware of the new policy.

"(B) The institution's refund policy will be considered to be fair and equitable for purposes of this paragraph if—

"(i) that policy provides for a refund in an amount of at least the larger of the amount provided under—

"(I) the requirements of applicable State law;

"(II) the specific refund standards established by the institution's nationally recognized accrediting agency and approved by the Secretary; or

"(III) if no such standards exist, the specific refund policy standards established by the Secretary in regulations, or the refund policy standards set by another association of institutions of postsecondary education and approved by the Secretary; and

"(ii) within 60 days after the institution's receipt of notice from the Secretary that its fiscal year default rate, as defined by the Secretary in regulations, exceeded 30 percent for any fiscal year after 1986, and continuing until the Secretary notifies the institution that its rate was equal to or less than 30 percent for a subsequent fiscal year, the institution's policy conforms with the pro rata refund calculation described in subparagraph (C), or the requirements of subparagraph (B)(i), whichever results in the larger refund amount, except that this clause will not apply to the institution's refund policy for any student whose withdrawal date is after the earlier of—

"(I) the halfway point (in time) for the student's program of study.

"(II) six months after commencement of the student's program of study.

"(C)(i) As used in this paragraph, the term 'pro rata refund' means a refund by the institution of not less than that portion of the tuition, fees, room and board, and other charges assessed the student by the institution equal to the portion of the period of enrollment for which the student has been charged that remains on the last recorded day of attendance by the student, rounded downward to the nearest 10 percent of that period, less any unpaid charges owed by the student for the period of enrollment for which the student has been charged, plus—

"(I) a reasonable administrative fee not to exceed the lesser of 5 percent of the tuition, fees, room and board, and other charges assessed the student, or $100; and

"(II) charges authorized by clause (iii).

"(ii) For purposes of clause (i), 'the portion of the period of enrollment for which the student has been charged that remains, is determined—

"(I) in the case of a program that is measured in credit hours, by dividing the total number of weeks comprising the period of enrollment for which the student has been charged into the number of weeks remaining in that period as of the last recorded day of attendance by the student;

"(II) in the case of a program that is measured in clock hours, by dividing the total clock hours comprising the period of enrollment for which the student has been charged into the number of clock hours remaining to be completed by the student in that period as of the last recorded day of attendance by the student; and

"(III) in the case of a correspondence program, by dividing the total number of lessons comprising the period of enrollment for which the student has been charged into the total number of such lessons not submitted by the student.

"(iii) An institution may require that the equipment issued to the student by the institution that the institution would reissue to another student be returned by a student once the institution determines that the borrower has withdrawn, if the institution makes a written request for that return that is received by the student within 10 days of that determination. If the institution notified the student in writing prior to enrollment that return of the specific equipment involved would be required if the student withdrew, the institution may deduct from the refund owed under this paragraph the documented cost to the institution of that equipment if the student fails to return it within 10 days of the date of the student's receipt of the request from the institution. However, the institution may not delay its payment, in accordance with regulations, of a refund to a lender by reason of this process.".

(b) INFORMATION DISSEMINATION ACTIVITIES.—Section 485(a)(1)(F) of the Act is amended by inserting a comma and "in accordance with section 487(a)(13)," immediately following "institution".

SEC. 9. EFFECTIVE DATES.

(a) IN GENERAL.—The amendments made by section 2 shall be effective for a loan made, insured, or guaranteed under part B of title IV of the Act, whenever made, for which the student borrower's first payment on such loan is due on or after six months after the date of enactment of this Act.

(b) SECTIONS 3 AND 8.—The amendments made by sections 3 and 8 shall be effective 90 days after the date of enactment of this Act.

(c) SECTIONS 4, 5, AND 7.—The amendments made by sections 4, 5, and 7 shall be effective upon enactment of this Act.

(d) SECTION 6.—The amendments made by section 6 shall be effective for grant, loan, or work assistance awarded for periods of enrollment beginning on or after July 1, 1990.

Mr. DOLE. Mr. President, I am pleased to join in introducing the administration's student loan default reduction initiative. This measure builds on the strong antidefault provisions included in last year's budget reconciliation bill and on the effective, responsible default regulations issued by the Department of Education last summer.

The by-now familiar statistics on student loan defaults still shock. In recent years, student loan default costs borne by the Department of Education have amounted to well over $1 billion annually, making repayment of these defaulted loans in effect the third largest program within the Department. Default costs in fiscal year 1989 alone approached $2 billion.

The alarming cost of student loan defaults threatens to undermine public support for our vital student loan programs. We owe it to the taxpayers to restore the fiscal integrity of Federal student loan programs, and we owe it to all the deserving students who depend on these programs to help meet the high cost of postsecondary education.

The bill proposed by the administration attacks the default problem by authorizing guarantee agencies to garnish defaulters' wages, prohibiting schools from employing commissioned sales representatives for recruiting and admitting activities, and requiring lenders to provide graduated repayment options to student borrowers. In addition, the measure requires schools with default rates over 30 percent to issue pro rata tuition refunds to Federal student aid recipients who drop out early and requires students admitted under the "ability-to-benefit" criterion to pass a test, prior to enrollment, designed and administered by an independent organization.

In closing, Mr. President, I want to commend the Department of Educa-

tion for developing this legislation and my colleague from Texas for introducing it. I hope other Members will lend their support to this measure and work for its passage.

By Mr. KOHL:

S. 2030. A bill to protect the privacy of telephone users by amending title 18, United States Code; to the Committee on the Judiciary.

TELEPHONE PRIVACY ACT

● Mr. KOHL. Mr. President, a new technology is sweeping the country and changing the way we use the telephone. It is known as Caller ID, and it lets a person see the number of who's calling before picking up the receiver. Caller ID is already in place in New Jersey and parts of Florida, Vermont, Ohio, New York, Virginia, and Maryland. In these areas, customers can buy the service by purchasing a $50 device and paying their phone company about $7 a month. The device records the numbers of callers and displays any incoming number while the phone is ringing.

Caller ID is a welcome development. By supplementing the answering machine, this innovation will help us screen our calls and enhance our privacy. Indeed, when Caller ID arrives in my cities—Milwaukee and Washington—I am going to be one of the first to sign up. It will be great to know who's calling, or at least to know that the caller might be someone I do not know.

But I am afraid there is a downside to Caller ID. While it will increase our privacy as call recipients, it will diminish our privacy as callers. The Caller ID device displays listed and unlisted numbers alike. This means that people with unlisted phones are forced to divulge their numbers every time they contact someone who has Caller ID. Furthermore, a person with Caller ID can take the caller's phone number and find out where the caller lives by using a name and number service or reverse telephone directory.

Is this so terrible? At first blush, Caller ID does not appear to invade privacy because it is the caller, after all, who decides to place the call in the first place. If we look a little closer, however, we can see that a privacy balance must be struck.

THE PROBLEM: FORCED DISCLOSURE

There are a variety of situations where callers need and deserve to keep their phone numbers to themselves. Put another way, there are instances in which unrestricted Caller ID can end up being a nuisance and perhaps even a danger. Let me suggest a few examples:

A consumer calls a business establishment to inquire about a product. Although the consumer does not volunteer his name, the business uses Caller ID to find out his identity. The enterprise then makes unsolicited sales pitches to that consumer.

A woman in a battered women's shelter calls home to check on her family. With Caller ID, the abusing husband learns the phone number and address of the shelter, jeopardizing the safety of the woman and her counselors.

A teacher calls an unruly student's parents at night. The student acquires the teacher's home phone number and retaliates with harassing calls.

A professional, such as a physician or lawyer, calls a patient or client from an unlisted home phone. Using Caller ID, the patient or client obtains this home number, whether or not the professional wished to disclose it.

Fearing that her identity will be revealed by the Caller ID mechanism, a tipster decides not to call the authorities, and a crime is not reported.

A troubled person avoids calling a crisis hotline because he thinks he will lose his anonymity.

An undercover narcotics officer phones a drug dealer from the precinct station to arrange a buy. The target recognizes where the call came from. As a result, the drug dealer scuttles the sale—or, worse, kills the undercover agent.

These examples show that callers sometimes have an important privacy interest. At bottom, we are talking about choice. Who decides whether the caller will reveal his or her number? I think the decision must rest with the caller.

For this reason, I am today introducing the Telephone Privacy Act of 1990. My bill would require phone companies that sell Caller ID to give callers the option of blocking the display of their phone numbers. Emergency calls to 911 would not be blocked, so police could continue to pinpoint the location of those in need. The measure balances the privacy interests of callers and call recipients.

THE SOLUTION: VOLUNTARY BLOCKING

Blocking allows a caller to prevent the recipient from seeing the originating number. Technologically, blocking can be made available on a per-call basis—in which the caller dials two or three digits before placing the call—or on a subscription basis—in which all calls from a particular phone are blocked for a certain period of time. If a caller decides to block, the recipient sees "Private" flash on the Caller ID device. When that happens, the recipient can ignore the call, screen it with an answering machine, or pick up the phone knowing that the caller—for whatever reason—wished to withhold her number.

The blocking option gives the caller more privacy, but the recipient nevertheless obtains more information than is available at present. And the recipient always retains the right not to answer. By way of analogy, a homeowner can refuse to open the front door when a visitor covers the peephole with a finger.

Because blocking protects personal privacy, it has won the endorsement of law enforcement groups, civil liberties organizations, consumer advocates, and counseling associations. In addition, some of the leading phone companies back blocking. The Pacific Telesis Group, for example, long ago recognized the privacy concern and decided that it would offer blocking when Caller ID comes to California in 1991. The California Legislature has also required blocking by law. Similarly, Dr. Bonnie Guiton, President Bush's Special Adviser for Consumer Affairs, has endorsed the idea of blocking. In a statement released just today, she stated,

> If residential consumers can be offered a blocking mechanism in conjunction with Caller ID, they will be able to take back some of the privacy they have already lost.

Blocking will not undermine Caller ID. Callers will not block calls to their friends and colleagues. They will permit their numbers to be displayed as a way of saying, "It's me, so pick up the phone." Only when they desire privacy will callers exercise their right to block.

But will blocking allow individuals to place obscene phone calls? No. First, even with Caller ID, a person can make a harassing phone call anonymously from a pay phone. Second, and more importantly, the phone companies are offering Caller ID along with three other services that just as effectively combat harassment—and provide protection even though the recipient does not see the caller's number. Call trace permits the phone company to trace a harassing call automatically; call block lets the customer prevent any future calls from a harasser; and return call enables the customer to confront a harassing individual who just called.

THE TELEPHONE PRIVACY ACT

The Telephone Privacy Act of 1990 would amend the Electronic Communications Privacy Act [ECPA] to clarify the legal status of Caller ID and to require blocking of phone companies that offer Caller ID.

Caller ID may be illegal under present law. Technically, it is a trap and trace device, and ECPA prohibits the use of such devices without a warrant. While ECPA does allow phone companies to install trap and trace devices where the consent of the user has been obtained, the statute does not specify whether the user is the caller or the call recipient. My bill would end this ambiguity and permit phone companies to install Caller ID when blocking is offered. The measure would not affect internal PBX or Centrex phone systems that show who's calling.

I want to stress that my bill is meant to be a starting point for debate. Choice is the ultimate goal, but a number of subsidiary issues will have to be hammered out in hearings. Among the questions that need to be addressed are these: Should blocking be made available on a per-call basis, subscription basis, or both? Shoud blocking be free? The bill does not say, though I believe that everyone must have access to blocking. Should consumers be able to block calls to 800 numbers? Will unscrupulous individuals use Caller ID to discriminate by refusing calls from particular exchanges—a form of telephone redlining? Is it fair to ask phone companies that do not offer Caller ID to protect the privacy of their customers who call into areas where the service is already available?

Mr. President, I look forward to resolving these issues with the assistance of my colleague PATRICK LEAHY, chairman of the Judiciary Committee's Subcommittee on Technology and the Law. I am also pleased that my colleague and friend from Wisconsin, Representative ROBERT KASTENMEIER, has indicated that he will explore this subject in the House. I believe that Congress can encourage this new technology and simultaneously protect personal privacy.

Thank you. I ask unanimous consent that the text of the Telephone Privacy Act of 1990 by printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2030

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Telephone Privacy Act of 1990".

SEC. 2. PURPOSE.

To protect their right to privacy, telephone users must be able to limit the dissemination of their telephone numbers to persons of their choosing.

SEC. 3. TITLE 18 AMENDMENTS.

(a) Section 3121 of title 18, United States Code, is amended by striking subsection (b)(3) and adding immediately after paragraph (2) the following:

"(3) where a non-governmental recipient of wire or electronic communication consents and its provider enables any originator to block receipt of the originating number; except that the provider is not required to enable an originator to block receipt of the originating number on the emergency assistance telephone line of a State or municipal police or fire department, or on a 911 emergency line; or

"(4) on the emergency assistance telephone line of a State or municipal police or fire department, or on a 911 emergency line.".

(b) Section 3121 of title 18, United States Code, is further amended by redesignating subsection (c) as subsection (d) and by inserting immediately after subsection (b) the following new subsection:

"(c) CIVIL ACTION.—Any user of wire or electronic communication service aggrieved by a provider's failure to enable an originator to block receipt of the originating number under subsection (b)(3) may recover from the provider in accordance with section 2707 of this title.".●

By Mr. KENNEDY:

S. 2031. A bill to further the foreign policy of the United States by establishing a partnership for democracy to assist the peoples of foreign countries in developing democratic forms of government and free market economies; to the Committee on Foreign Relations.

PARTNERSHIP FOR DEMOCRACY ACT

Mr. KENNEDY. Mr. President, I rise to introduce the Partnership for Democracy Act of 1990 to encourage Americans to join in the process of rebuilding Eastern Europe.

The year 1989 may well be remembered as the year of democracy.

Rarely has there been such a dramatic series of events as the transformations that have swept through the nations of Eastern Europe.

An old order has ended and a new order is being born. The challenge we face now is clear—how can the United States best respond to the end of the cold war.

Since World War II, we have devoted massive resources to the defense of Europe. Our tanks and missiles contained the spread of communism. But it was our ideals that finally toppled the oppressive regimes in country after country, from Poland and Hungary, to East Germany and Czechoslovakia, to Romania and Bulgaria.

Under the Marshall plan, we provided the equivalent of $13 billion in current sums to rebuild Western Europe after the devastation of World War II.

Through NATO, we spent $140 billion last year to defend our allies from the Soviet and Warsaw Pact threat.

The NATO countries devoted another $160 billion for their own defense.

These costs are large, but they have been a bargain. They have kept the peace in Europe for the past four decades, and brought us to this threshold of a new era.

Now, we must decide what levels of aid to provide to Eastern Europe, what types of investment credits and guarantees, what kinds of trade assistance and food assistance, and how best to coordinate our efforts with those of other nations.

All of these issues must be addressed in this Congress and in the context of our overall budget debate.

We do not yet know the size of the peace dividend that will be available for such assistance.

We will need to balance our response to Eastern Europe with our own pressing needs at home and with other important obligations in Latin America, Africa, Asia, and the Middle East.

But we do not need to wait for all of these decisions to be made in order to begin.

One way to help Eastern Europe quickly, efficiently, and inexpensively is to create a Partnership for Democracy for Eastern Europe.

The budget deficit may limit our financial aid, but we have an abundance of skills to make available to the new democracies—

Business executives, entrepreneurs, labor representatives, economists, engineers, consultants, accountants, managers, election experts, journalists, and professionals in countless other areas with a wide range of skills to assist nations struggling to rebuild their societies and economies.

The people of Eastern Europe have won their revolution. Now is the time to lend our expertise to help them consolidate that victory. A Partnership for Democracy is an excellent way to provide one of America's most valued commodities—our know-how and ingenuity.

In a sense, a Partnership for Democracy to help these nations in the 1990's would be analogous to the Peace Corps created in the 1960's to encourage young Americans to use their talents to serve in other lands.

In the years since then, the Peace Corps has sent over 120,000 Americans of all ages to every continent and 99 countries. The Peace Corps has stood for what is strongest in our values. America's best tradition has already been its generosity—its response to human needs everywhere.

Now, the Peace Corps is reaching out to Eastern Europe. Hungary will soon become the Peace Corp's 100th recipient and Poland may be the 101st.

The Partnership for Democracy would be devised to address the needs of those nations as well.

It would be a U.S. Government-sponsored, nonprofit organization that would match experts in a variety of fields with the specific requirements of those nations. Individuals from all walks of life—young or old, midcareer or retired, would be eligible to participate.

Eventually, if the program is successful, it could be expanded to other areas of the world. Certainly, the Soviet Union would benefit from such a program as the Government continues to implement its new policy of economic reform.

The benefits would be significant for Eastern Europe, but it would not be a one-way street. The people-to-people contacts that take place will enhance the understanding between our two societies divided by the Iron Curtain for so long. And private entrepreneurs in this country will be able to explore new business and investment opportunities in the East.

All types of public and private enterprises, in these nations—government agencies, businesses, financial institutions, universities, media, political organizations, environmental projects, and many others—would be eligible to apply for assistance under the program.

Projects would need to meet certain threshold requirements relating to economic viabilty, contributing to the development of democratic institutions and free enterprise operations, or meeting important social needs. But in general, the Partnership for Democracy would have wide flexibility to match European needs with American expertise.

The Partnership for Democracy would be run by a 12-member board of directors selected by the administration and Congress.

The board would be charged with overseeing the projects, setting general policy and reporting annually to Congress. Its operations would be funded by a Federal appropriation of $150 million a year for the next 5 years.

U.S. businesses and labor organizations would be encouraged to participate in the program by contributing their skilled employees and other resources. Experts could be assigned to countries on a project by project basis, or for specific periods of time.

I would hope, for example, that larger firms would permit their most skilled managers to spend a sabbatical year in Eastern Europe facilitating the shift of a state-run enterprise to private activity, or that senior executives and small business entrepreneurs would postpone their retirement in this country, in order to offer their skills to assist in the development of these new democracies.

In some cases, the partnership would be authorized to pay reasonable compensation and other expenses for those who participate in the program, and matching grants could be used to encourage U.S. firms to share the cost for executives willing to serve overseas.

On an ad hoc basis, nations of Eastern Europe are already drawing on the skills of Americans. U.S. corporations are exploring opportunities for investment. Media and campaign consultants are advising political parties. Experts on constitutional law are helping to draft new constitutions. The National Democratic Institute has been to Czechoslovakia and Hungary to help plan the upcoming elections. The American Federation of Teachers is sending teachers and scholars to promote ways to teach and practice democracy. But the need for help and skills is overwhelming, and a more coordinated form of assistance should be available.

As the President of Czechoslovakia, Vaclav Havel, recently stated:

We need advice, here, now, immediately. Not from governments, but from professionals.

The United States should lose no time in offering the assistance of our talented men and women to these nations. They have done their part in opening their societies to freedom. Now we must do our part to help them keep it.

One way to start is the immediate formation of the Partnership for Democracy. I hope my colleagues will join me in supporting this unique assistance to the struggling democracies of Eastern Europe.

Mr. President, I ask unanimous consent that the text of the bill may be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2031

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Partnership for Democracy Act of 1990".

SEC. 2. STATEMENT OF FINDINGS.

The Congress finds that—

(1) the United States has a proud and successful tradition of providing support to democratic nations;

(2) under the Marshall Plan, the United States spent $13 billion in current sums to rebuild Western Europe after the devastation of World War II;

(3) through NATO, the United States spends $140 billion a year to defend our democratic allies in Western Europe;

(4) in 1989, Poland, Hungary, Czechoslovakia, East Gemany, Romania, and Bulgaria each took dramatic steps to shed forty years of communist rule, and to initiate sweeping political, economic, and democratic reforms;

(5) it is in the national interest and the national security interest of the United States that the countries of Eastern Europe and elsewhere should succeed in their efforts to carry out such reforms;

(6) after four decades of repressive regimes, corrupt leadership and state-run, inefficient economies, the nations of Eastern Europe deserve assistance in developing free market economies and democratic forms of government;

(7) the United States has an abundance of talented men and women whose skills are urgently needed by the nations of Eastern Europe, such as business executives, engineers, consultants, accountants, teachers, lawyers, physicians, financiers, managers, small businessmen and women, journalists, farmers, and election experts; and

(8) the availability of these skills to the nations of Eastern Europe will advance their transition to democracy and a free market economy.

SEC. 3. DECLARATION OF POLICY.

The Congress declares that it is the policy of the United States to promote democracy and free market economics through the Partnership for Democracy, a federally chartered and sponsored corporation, operated by individuals drawn primarily from the private sector, which shall make available to interested countries and areas men and women qualified for service abroad and willing to serve, advise, and assist the people of such countries and areas in developing the technical skills essential to developing democratic systems of government and market economies. The Partnership for Democracy shall also promote a better understanding of the American people abroad and a better understanding of other peoples within the United States.

SEC. 4. CONSULTATION.

The President shall carry out this Act in consultation with Congress.

SEC. 5. ESTABLISHMENT OF THE CORPORATION.

(a) ESTABLISHMENT.—There is established the Partnership for Democracy Corporation (hereafter in this Act referred to as the "Corporation").

(b) BOARD OF DIRECTORS.—(1) The Corporation shall have a Board of Directors. All powers of the Corporation shall vest in and be exercised by or under the authority of the Board of Directors.

(2) The Board of Directors shall elect, by majority vote, a president of the Corporation.

(c) APPOINTMENT OF DIRECTORS.—(1) The Board of Directors shall consist of 12 directors, appointed by the President, by and with the advice and consent of the Senate, from among individuals having business experience in a free market economy. No individual appointed to the Board of Directors may hold other office under the United States.

(2) Seven members of the Board of Directors shall constitute a quorum for the transaction of business.

(d) TERMS OF SERVICE.—Each Member of the Board shall be appointed for a term of no more than three years. The terms of no more than three Members of the Board shall expire in any one year. Members of the Board shall serve until their successors are appointed. Members of the Board may be reappointed.

(e) COMPENSATION.—The President shall fix the annual compensation for the president of the Corporation at $100,000. Members of the Board shall receive no annual compensation but shall be reimbursed for all reasonable travel and living expenses necessary to carry out their functions under this Act.

(f) DUTIES.—The Board of Directors shall meet quarterly to review and approve proposed and ongoing projects. The Board of Directors may promulgate such rules and regulations as it may deem necessary or appropriate to carry out the purposes of this Act.

(g) INTERPRETATION.—Nothing in this Act may be construed to infringe upon the powers or functions of the Secretary of State.

SEC. 6. PURPOSES OF THE CORPORATION.

(a) IN GENERAL.—The purpose of the Corporation is—

(1) to contribute to the development of democratic institutions and political pluralism characterized by—

(A) the establishment of fully democratic and representative political systems based on free and fair elections,

(B) effective recognition of fundamental liberties and individual freedoms, including freedom of speech, religion, and association,

(C) termination of all laws and regulations which impede the operation of a free press and the formation of political parties,

(D) creation of an independent judiciary, and

(E) establishment of non-partisan military, security, and police forces; and

(2) to promote, through the provision of technical skills in such areas as health care,

business, education, the media, financial services, and other business services such as accounting and marketing, the development of a free market economic system characterized by—

(A) privatization of economic entities,

(B) establishment of full rights to acquire and hold private property, including land and the benefits of contractual relations,

(C) simplification of regulatory controls regarding the establishment and operation of businesses,

(D) dismantlement of all wage and price controls,

(E) removal of trade restrictions, including on both imports and exports,

(F) liberalization of investment and capital, including the repatriation of profits by foreign investors,

(G) tax policies which provide incentives for economic activity and investment,

(H) establishment of rights to own and operate private banks and other financial service firms, as well as unrestricted access to private sources of credit, and

(I) access to a market for stocks, bonds, and other instruments through which individuals may invest in the private sector.

(b) PROHIBITION.—The Board of Directors shall not approve any project which does not further a purpose described in subsection (a).

SEC. 7. AUTHORITY.

The President is authorized to enter into bilateral agreements with the governments of eligible foreign countries whereby the Corporation would be authorized to provide volunteer assistance, in accordance with the purposes of this Act, to such governments, the local governments of such countries, or trade unions, election and campaign organizations, other political organizations, cooperatives, educational institutions, farm organizations, environmental organizations, religious groups, or other public or private businesses or voluntary agencies, entities, or organizations.

SEC. 8. VOLUNTEER PROGRAMS.

(a) SELECTION OF PROJECTS.—The Board of Directors shall authorize the implementation of specific projects requiring volunteer assistance in accordance with the bilateral agreements described in section 7.

(b) AUTHORITY TO DETAIL OR ASSIGN VOLUNTEERS.—The Board of Directors shall authorize the detail or assignment of volunteers to foreign or international public or private entities in accordance with the bilateral agreements described in section 7.

(c) USE OF VOLUNTEER PERSONNEL.—The Corporation shall enroll in service abroad qualified men and women to serve, advise, and assist in carrying out the projects authorized under subsection (a).

(d) TERMS AND CONDITIONS.—The terms and conditions of the enrollment, training, compensation, hours of work, benefits, leave, termination, and all other terms and conditions of the service of volunteers shall be exclusively those set forth in this Act.

(e) STATUS OF VOLUNTEERS.—Except as provided in this Act, volunteers shall not be considered to be officers or employees of, or otherwise in the service or employment of, or holding office under, the United States for any purpose.

(f) NONPOLITICAL AND NONDISCRIMINATORY.—(1) In applying terms and conditions to the enrollment and assignment of volunteers under this Act, no political test shall be required or taken into consideration.

(2) In carrying out this Act, there shall be no discrimination against any person on account of race, creed, color, or national citizenship.

SEC. 9. TERMS AND CONDITIONS FOR VOLUNTEERS.

(a) ALLOWANCES AND OTHER SUPPORT.—Volunteers shall be provided with such living, travel, and leave allowances, and such housing, transportation, supplies, equipment, and subsistence as the Corporation may determine to be necessary for their maintenance and to insure their health and their capacity to serve effectively. Transportation and travel allowances may also be provided, in such circumstances as the President may determine, for applicants for enrollment to or from places of training and places of enrollment, and for former volunteers from places of termination, to their homes in the United States.

(b) COMPENSATION.—Volunteers shall be entitled to compensation from the Corporation at a rate set by the Board of Directors or their designee, but not to exceed the maximum salary offered within the Senior Executive Service per annum.

(c) OATH.—Each volunteer shall sign an oath stating that while serving as a volunteer he will not seek to recruit employees, develop business, or take any other actions to directly or indirectly benefit any company, corporation, or other profitmaking institution or organization with which the volunteer has been associated.

(d) TERMINATION.—A volunteer or project may be terminated at any time at the discretion of the Board of Directors.

(e) HEALTH CARE.—Volunteers shall receive such health care during their service, and such health examinations and immunization preparatory to their service, as the Corporation determines to be necessary or appropriate. Subject to such conditions as the Corporation may prescribe, such health care, examinations, and immunization, may be provided for volunteers in any facility of any agency of the United States Government, and in such cases the appropriation for maintaining and operating such facility shall be reimbursed from appropriations available under this Act.

(f) ALLOWANCES AND SUPPORT OF FAMILY MEMBERS.—(1) Spouses and minor children of volunteers may receive such living, travel, and leave allowances, and such housing, transportation, subsistence, and essential special items of clothing, as the Corporation may determine, but the authority contained in this paragraph shall be exercised only under exceptional circumstances.

(2) Spouses and minor children of volunteer leaders accompanying them may receive such health care as the Corporation may determine and upon such terms as he may determine, including health care in any facility referred to in subsection (e) of this Act, subject to reimbursement of appropriations as provided in subsection (e).

(3) Spouses and minor children of volunteer leaders accompanying them may receive such orientation as necessary to accomplish the purposes of this Act as the Corporation may determine.

(g) DURATION OF EMPLOYMENT.—The duration of a volunteer's employment in the Corporation shall be tied to the time period required for completion of that project or the completion of that detail to which that volunteer is assigned. Most projects shall be designed to be completed between six months and two years.

SEC. 10. PARTNERSHIP FOR DEMOCRACY EMPLOYEES.

(a) AUTHORITY.—The Corporation may employ such persons (other than volunteers) as the Board of Directors determines to be necessary to carry out the provisions and purposes of this Act. Except as otherwise provided in this Act, such persons (hereafter in this Act referred to as "employees") shall be employed in accordance with and shall be subject to the laws applicable to personnel employed by the United States Government.

(b) STANDARDS.—The Board of Directors shall set standards or other criteria for maintaining adequate performance levels for employees and may, notwithstanding any other law, separate persons who fail to meet such standards or other criteria, and also may grant such persons severance benefits of one month's salary for each year of service, but not to exceed one year's salary at the then current salary rate of such persons.

(c) ADMINISTRATION OF OVERSEAS ACTIVITIES.—In each country or area in which volunteers serve abroad, the Corporation may set up a corporate headquarters and appoint an employee or a volunteer as a Partnership for Democracy representative to direct other employees and volunteers of the Corporation abroad and to oversee the activities carried on under this Act in such country or area.

SEC. 11. VOLUNTEER ORIENTATION.

(a) IN GENERAL.—The Corporation shall make provision for such orientation as the Corporation deems appropriate for each applicant for enrollment as a volunteer and each enrolled volunteer. Such orientation may be provided for volunteers in any facility of any agency of the United States Government and, in such cases, the appropriation for maintaining and operating such facility shall be reimbursed from appropriations made available under this Act. All of the provisions of this Act applicable respectively to volunteers shall be applicable to applicants for enrollment as such during any period of orientation occurring before enrollment, and the term "volunteers" shall include such applicants during any such period of orientation.

(b) OTHER VOLUNTEER PROGRAMS.—The Corporation may also make provision, on the basis of advances of funds or reimbursement to the United States, for the orientation of persons other than those referred to in subsection (a), who have been selected for service abroad in programs not carried out under authority of this Act which are similar to those authorized by this Act.

SEC. 12. PARTICIPATION OF FOREIGN NATIONALS.

In order to provide for assistance by foreign nationals (other than volunteers who are foreign nationals) in the orientation of volunteers, and to permit effective implementation of Partnership for Democracy projects with due regard to the desirability of cost-sharing arrangements, where appropriate, the Corporation may make provision for transportation, housing, subsistence, or per diem in lieu thereof, and health care or health and accident insurance for foreign nationals engaged in activities authorized by this Act while they are away from their homes, without regard to the provisions of any other law.

SEC. 13. GENERAL POWERS AND AUTHORITIES.

In furtherance of the purposes of this Act, the Corporation may—

(1) raise private funds for the Corporation's activities;

(2) enter into, perform, and modify contracts and agreements (to the extent and in the amounts provided in an appropriation Act) and otherwise cooperate with any agency of the United States Government or

of any State or any subdivision thereof, other governments and departments and agencies thereof, election and campaign organizations, educational institutions, religious groups, voluntary agencies, farm organizations, labor unions, environmental organizations, and other organizations, individuals, firms, and public and private companies and corporations;

(3) advertise for and accept in the name of the Corporation and employ in furtherance of the purposes of this Act (A) voluntary services from individuals and through private or public entities and (B) any money or property (real, personal or mixed, tangible or intangible) received by gift, devise, bequest, or otherwise;

(4) contract with individuals for personal services abroad, and with aliens (abroad or within the United States) for personal services with the United States;

(5) discuss with prospective and current recipients of assistance from the Corporation their needs and projects; and

(6) recommend and administer alternative ways to finance the travel, living, and orientation expenses associated with volunteers.

SEC. 14. REPORTS.

Not later than November 1 of each year in which the Corporation has carried out activities during the preceding fiscal year, the Board of Directors shall prepare and transmit to the Congress a report describing such activities.

SEC. 15. DETAIL OF PERSONNEL TO FOREIGN GOVERNMENTS AND INTERNATIONAL ORGANIZATIONS.

(a) IN GENERAL.—In furtherance of the purposes of this Act, the Corporation is authorized to detail, assign, or otherwise make available any volunteer—

(1) to serve with, or as a member of, the international staff of any international organization, with or without compensation from that organization, or

(2) to any office or position with any foreign government or agency thereof, with or without compensation from that foreign government.

(b) REGARDING REIMBURSEMENT.—Details or assignments may be made under this section—

(1) without reimbursement to the Corporation by the international organization or foreign government;

(2) upon agreement by the international organization or foreign government to reimburse the Corporation for compensation, travel expenses, and allowances, or any part thereof, payable to such officer or employee during the period of assignment or detail; and such reimbursement shall be credited to the appropriation, fund, or account utilized for paying such compensation, travel expenses, or allowances, or to the appropriation, fund, or account available for such purpose; or

(3) upon an advance of funds, property, or services to the Corporation accepted with the approval of the Board of Directors for specified uses in furtherance of the purposes of this Act; and funds so advanced may be established as a separate fund in the Treasury of the United States, to be available for the appropriations or direct expenditure, subject to the provisions of this Act.

SEC. 16. UTILIZATION OF FUNDS.

(a) WAIVER OF LAWS.—Funds made available for the purposes of this Act may be used for compensation, allowances, and travel of volunteers and Corporation personnel, for printing and binding without regard to the provisions of any other law, and for expenditures outside the United States for the procurement of supplies and services and for other administrative and operating purposes (other than compensation of employees) without regard to such laws and regulations governing the obligation and expenditure of Government funds as may be necessary to accomplish the purposes of this Act.

(b) TRAVEL OR TRANSPORTATION EXPENSES.—Funds made available for the purposes of this Act may be used to pay expenses in connection with travel abroad of volunteers and corporate personnel, including travel expenses of dependents (including expenses during necessary stopovers while engaged in such travel), and transportation of personnel effects, household goods, and automobiles when any part of such travel or transportation begins in one fiscal year pursuant to travel orders issued in that fiscal year, notwithstanding the fact that such travel or transportation may not be completed during the same fiscal year, and cost of transporting to and from a place of storage, and the cost of storing automobiles of employees when it is in the public interest or more economical to authorize storage.

(c) ORIENTATION AND TRAINING.—Funds available under this Act may be used to pay costs of orienting volunteers and training employees. Any payments or contributions in connection therewith may, as deemed appropriate by the head of the agency authorizing such orientation or training, be made by private or public sources and be accepted by any volunteer or may be accepted by and credited to the current applicable appropriation of such agency, except that any such payments to a volunteer in the nature of compensation shall be in lieu, or in reduction, of compensation received from the United States Government.

(d) ADDITIONAL EXPENSES.—Funds available for the purposes of this Act shall be available for—

(1) rent of buildings and space in buildings in the United States, and for repair, alteration, and improvement of such leased properties;

(2) expenses of attendance at meetings concerned with the purposes of this Act;

(3) rental and hire of aircraft;

(4) entertainment (not to exceed $10,000 in any fiscal year except as may otherwise be provided in an appropriation or other Act);

(5) exchange of funds, without regard to the provisions of any other law, and loss by exchange;

(6) expenditures (not to exceed $20,000 in any fiscal year except as may be otherwise provided in an appropriation or other Act) not otherwise authorized by law to meet unforeseen emergencies or contingencies arising in the Partnership for Democracy, except that a certificate of the amount only of each such expenditure and that such expenditure was necessary to meet an unforeseen emergency or contingency, made by the Board of Directors, shall be deemed a sufficient voucher for the amount therein specified;

(7) insurance of official motor vehicles acquired for use abroad;

(8) rent or lease abroad for not to exceed five years of offices, health facilities, buildings, grounds, and living quarters, and payments therefor in advance; maintenance, furnishings, necessary repairs, improvements, and alterations to properties owned or rented by the United States Government or made available for its use abroad; and costs of fuel, water, and utilities for such properties; and

(9) expenses of preparing and transporting to their former homes, or, with respect to foreign participants engaged in activities under this Act, to their former homes or places of burial, and of care and disposition of, the remains of persons or members of the families of persons who may die while such persons are away from their homes participating in activities under this Act.

SEC. 17. USE OF FOREIGN CURRENCIES.

Whenever practicable, expenditures incurred in carrying out functions under this Act shall be paid for in such currency of the country or area where the expense is incurred as may be available to the United States.

SEC. 18. AUTHORIZATION OF APPROPRIATIONS.

(a) AUTHORIZATION.—There are authorized to be appropriated to the Corporation $150,000,000 for each of the fiscal years 1990 through 1995 to carry out the provisions of this Act.

(b) AVAILABILITY OF FUNDS.—Funds appropriated pursuant to subsection (a) are authorized to remain available until expended.

SEC. 19. DEFINITIONS.

(a) DEFINITIONS.—For purposes of this Act—

(1) the term "United States" means the several States and territories and the District of Columbia;

(2) the term "health care" includes all appropriate examinations, preventive, curative and restorative health and medicare care, and supplementary services when necessary;

(3) the term "United States Government agency" includes any department, board, wholly or partly owned corporation, or instrumentality, commission, or establishment of the United States Government; and

(4) the term "transportation" in sections 9(a) and 9(f) includes transportation of not to exceed 300 pounds per person of unaccompanied necessary personal and household effects.

(b) CALCULATION OF SERVICE.—For purposes of this or any other Act, the period of any individual's service as a volunteer under this Act shall include—

(1) any period of orientation prior to enrollment as a volunteer under this Act; and

(2) the period between enrollment as a volunteer and the termination of service as such volunteer by the Corporation or by death or resignation.

ADDITIONAL COSPONSORS

S. 260

At the request of Mr. MOYNIHAN, the name of the Senator from Delaware [Mr. BIDEN] was added as a cosponsor of S. 260, a bill to amend the Internal Revenue Code of 1986 to make the exclusion from gross income of amounts paid for employee educational assistance programs.

S. 306

At the request of Mr. BENTSEN, the name of the Senator from Washington [Mr. ADAMS] was added as a cosponsor of S. 306, a bill to amend the Social Security Act to make certain modifications in the Medicare Program with respect to payments made under such program to hospitals located in rural areas to improve the delivery of health services to individuals residing in such areas, and for other purposes.

S. 561

At the request of Mr. HOLLINGS, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of S. 561, a bill to provide for testing for the use, without lawful authorization, of alcohol or controlled substances by the operators of aircraft, railroads, and commercial motor vehicles, and for other purposes.

S. 1384

At the request of Mr. DASCHLE, the name of the Senator from Vermont [Mr. JEFFORDS] was added as a cosponsor of S. 1384, a bill to amend title XVIII of the Social Security Act to provide direct reimbursement under part B of Medicare for nurse practitioner or clinical nurse specialist services that are provided in rural areas.

S. 1430

At the request of Mr. KENNEDY, the name of the Senator from South Dakota [Mr. DASCHLE] was added as a cosponsor of S. 1430, a bill to enhance national and community service, and for other purposes.

S. 1578

At the request of Mr. FOWLER, the name of the Senator from South Dakota [Mr. DASCHLE] was added as a cosponsor of S. 1578, a bill to provide for the creation of an independent Historic Preservation Agency and a National Center for Preservation Technology, and for other purposes.

S. 1579

At the request of Mr. FOWLER, the name of the Senator from South Dakota [Mr. DASCHLE] was added as a cosponsor of S. 1579, a bill to amend the National Historic Preservation Act, the Historic Sites Act, the Archaeological Resources Protection Act, and the Abandoned Shipwreck Act and certain related acts to strengthen the preservation of our historic heritage and resources, and for other purposes.

S. 1622

At the request of Mr. HEINZ, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of S. 1622, a bill to promote environmental sector lending by the World Bank.

S. 1630

At the request of Mr. BAUCUS, the names of the Senator from Washington [Mr. ADAMS] and the Senator from Massachusetts [Mr. KENNEDY] were added as cosponsors of S. 1630, a bill to amend the Clean Air Act to provide for attainment and maintenance of health protective national ambient air quality standards, and for other purposes.

S. 1646

At the request of Mr. LEVIN, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of S. 1646, a bill to implement key provisions of the Great Lakes Water Quality Agreement to protect and restore the Great Lakes.

S. 1664

At the request of Mr. HEINZ, the names of the Senator from Alaska [Mr. STEVENS], the Senator from Alabama [Mr. SHELBY], the Senator from New Jersey [Mr. BRADLEY], the Senator from Hawaii [Mr. INOUYE], the Senator from Utah [Mr. GARN], the Senator from Iowa [Mr. GRASSLEY], and the Senator from Louisiana [Mr. JOHNSTON] were added as cosponsors of S. 1664, a bill to establish a congressional commemorative medal for members of the Armed Forces who were present during the attack on Pearl Harbor on December 7, 1941.

S. 1779

At the request of Mr. BENTSEN, the names of the Senator from Georgia [Mr. NUNN], the Senator from Tennessee [Mr. GORE], the Senator from North Carolina [Mr. HELMS], and the Senator from Michigan [Mr. LEVIN] were added as cosponsors of S. 1779, a bill to change the tariff treatment of certain brooms wholly or in part of broom corn.

S. 1835

At the request of Mr. WILSON, the name of the Senator from New Mexico [Mr. BINGAMAN] was added as a cosponsor of S. 1835, a bill to amend the Drug-Free Schools and Communities Act of 1986 to provide for the awarding of grants for drug abuse resistance education instruction for students, and for other purposes.

S. 2006

At the request of Mr. GLENN, the names of the Senator from Maryland [Mr. SARBANES], the Senator from California [Mr. WILSON], the Senator from Vermont [Mr. LEAHY], and the Senator from Georgia [Mr. NUNN] were added as cosponsors of S. 2006, a bill to establish the Department of the Environment, provide for a global environmental policy of the United States, and for other purposes.

SENATE JOINT RESOLUTION 224

At the request of Mr. BYRD, the names of the Senator from Rhode Island [Mr. PELL] and the Senator from Minnesota [Mr. DURENBERGER] were added as cosponsors of Senate Joint Resolution 224, a joint resolution to designate the month of May 1990 as "National Trauma Awareness Month."

SENATE JOINT RESOLUTION 227

At the request of Mr. KASTEN, the names of the Senator from California [Mr. WILSON], the Senator from Idaho [Mr. SYMMS], the Senator from Indiana [Mr. LUGAR], and the Senator from Illinois [Mr. DIXON] were added as cosponsors of Senate Joint Resolution 227, a joint resolution to designate March 11 through March 17, 1990, as "Deaf Awareness Week."

SENATE JOINT RESOLUTION 236

At the request of Mr. WILSON, the names of the Senator from Nevada [Mr. REID], the Senator from Virginia [Mr. WARNER], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Washington [Mr. GORTON], the Senator from Vermont [Mr. JEFFORDS], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Montana [Mr. BURNS], the Senator from Indiana [Mr. LUGAR], the Senator from Kentucky [Mr. FORD], the Senator from Georgia [Mr. NUNN], the Senator from Illinois [Mr. DIXON], the Senator from Hawaii [Mr. INOUYE], the Senator from California [Mr. CRANSTON], the Senator from Wyoming [Mr. WALLOP], the Senator from Florida [Mr. GRAHAM], the Senator from Florida [Mr. MACK], and the Senator from Louisiana [Mr. JOHNSTON] were added as cosponsors of Senate Joint Resolution 236, a joint resolution designating May 6 through 12, 1990, as "Be Kind to Animals and National Pet Week."

AMENDMENTS SUBMITTED

CLEAN AIR ACT AMENDMENTS

CHAFEE (AND OTHERS) AMENDMENT NO. 1219

Mr. CHAFEE (for himself, Mr. BAUCUS, Mr. MITCHELL, Mr. DURENBERGER, Mr. JEFFORDS, Mr. LIEBERMAN, Mr. WARNER, and Mr. GORE) proposed an amendment to the bill (S. 1630) to amend the Clean Air Act to provide for attainment and maintenance of health protective national ambient air quality standards, and for other purposes, as follows:

Amend S. 1630 by striking line 4 on page 557 and inserting in lieu thereof the following:

"'SEC. 508. (a) NATIONAL POLICY.—The Congress hereby declares it to be the policy of the United States that the production and use of ozone depleting substances listed under subsection (b) of section 504 are to be monitored closely and controlled in such a manner as to assure that the production and use of such substances will not—

"'(1) increase the peak chlorine loading that is projected to occur with interim chlorofluorocarbon emission controls followed by a year 2000 global phase-out of all halocarbon emissions (the base case);

"'(2) reduce significantly the rate at which the atmospheric abundance of chlorine is projected to decrease under the base case; or

"'(3) delay the date by which the average atmospheric concentration of chlorine is projected under the base case to return to a level of 2 parts per billion, the highest concentration at which repair of the Antarctic ozone hole may be possible.

"'(b) MONITORING GROWTH IN PRODUCTION AND USE.—The Administrator shall monitor and not less often than every three years following enactment of this title submit a report to Congress on the production and use of substances listed under subsection (b)

of section 504. Such report shall include data on domestic production compiled under section 505 and an estimate of worldwide production and use of such substances.

"'(c) MONITORING ATMOSPHERIC CONCENTRATIONS OF CHLORINE.—The Administrators of the National Aeronautics and Space Administration and the National Oceanic and Atmospheric Administration shall monitor and not less often than every 3 years following enactment of this title submit a report to Congress on the current average tropospheric concentration of chlorine. Such reports shall include, under the base case as well as on the basis of current international and domestic controls on substances covered by this title, updated projections of—

"'(1) peak chlorine loading;

"'(2) the rate at which the atmospheric abundance of chlorine is projected to decrease after the year 2000; and

"'(3) the date by which the atmospheric abundance of chlorine is projected to return to a level of 2 parts per billion.

"'(d)(1) PHASE-OUT SCHEDULE FOR METHYL CHLOROFORM.—In the absence of regulations promulgated in accordance with subsection (b) of section 506 establishing earlier dates—

"'(A) effective on the date of enactment of this title, it shall be unlawful for any person to produce methyl chloroform in annual quantities greater than that produced by such person during calendar year 1989;

"'(B) effective January 1, 1996, it shall be unlawful for any person to produce methyl chloroform in annual quantities greater than 50 per centum of that produced by such person during calendar year 1989; and

"'(C) effective January 1, 2000, it shall be unlawful for any person to produce any quantity of methyl chloroform.' ".

NOTICES OF HEARINGS

SUBCOMMITTEE ON ENERGY RESEARCH AND DEVELOPMENT

Mr. FORD. Mr. President, I would like to announce for the Senate and the public that a hearing has been scheduled before the Subcommittee on Energy Research and Development.

The purpose of the hearing is to receive testimony on Senate bill S. 1976, the Department of Energy High-Performance Computing Act of 1989.

The hearing will take place on Tuesday, March 6, 1990, at 2 p.m., in room SD-366 of the Senate Dirksen Office Building in Washington, DC.

Those wishing to provide written testimony for the printed hearing record should send it to the Subcommittee on Energy Research and Development, U.S. Senate, Washington, DC, 20510, attention: Paul Barnett.

For further information, please contact Paul Barnett at (202) 224-7569.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. JOHNSTON. Mr. President, I would like to announce for the public that a nomination hearing has been scheduled before the Full Committee on Energy and Natural Resources.

The hearing will take place Monday, February 5, 1990, at 10 a.m., in room SD-366 of the Senate Dirksen Office Building in Washington, DC.

The purpose of the hearing is to consider the nominations of John W. Bartlett to be Director of the Office of Civilian Radioactive Waste Management, Department of Energy, and Robert H. Gentile to be Assistant Secretary of Energy (Fossil Energy), Department of Energy.

For further information, please contact Rebecca Murphy at (202) 224-7562.

ADDITIONAL STATEMENTS

TRIBUTE TO THOMAS J. STANTON, JR.
